The customs collections for October at the custom house in Montreal, though large, are not as large as those of October a year ago. The figures for both months are as under: October, 1904, $972,851.10; October, 1903, $1,068,792.11, showing a decrease for last month of $95,341.

A news item from Schenectady, N.Y., dated October 28th, stated that over a hundred office employees of the American Locomotive Company have been notified that their services are no longer required. With this cut-down, only about two hundred men of the five thousand in the local plant of the concern four months ago, remain at work. It is said that the reduction of the force is temporary.

Mercantile Summary

The extension of the Minneapolis, St. Paul and Sault Ste. Marie Railway to St. Vincent, on the Manitoba border, so as to connect with the Canadian Pacific, has been accomplished, and according to the American view of the matter, will result in a very great growth of business to the Soo line, seeing that it will largely tap the business of Winnipeg, the most rapidly growing city at the present time on the continent.

A. L. Kemp, general dealer, of Silver Water, Algoma District, is reported embarrassed financially, and his lawyer writes his Montreal creditors asking them to grant him an extension of three, six and nine months, on liabilities of $7,250, claiming assets of $11,500. He began storekeeping in the spring of 1901, and previously had been contracting for the getting out of pulpwood, and furthermore sold musical instruments. This was more because he had a busy mind than that he was especially fond of variety in occupation.

A general dealer, named D. Bellehumeur, at St. Guillaume d'Upton, Que., has become insolvent. He has been in business since 1901, and was previously for ten years a policeman in Montreal, not, perhaps, very apt training for merchandising.——U. Matte, of St. Raymond, Que., lately reported as having assigned, is stated to have compromised liabilities of $5,460 at 30 cents, half cash, and the balance on time.——Theo. Bouchard, who has long done a small store business at Sayabec, Que., and who has always been found slow in settlements, has finally made an assignment of his estate.

Victor Archambault, of Sherbrooke, Que., doing business in his wife's name, as a grocer, has assigned to J. R. Royer, of that town. He first began business in books and stationery in 1899, but failed in April, 1900. He was out of business for a time, but bought out a boot and shoe and grocery stock in June, 1903, eventually continuing in groceries only.——The failure is noted of H. E. Martinette & Co., general storekeepers at St. George de la Beauce, who only took up this line of business in the spring of 1903. Mr. Martinette, who is revenue inspector for the district, has had to make use of his wife's name, owing to some old troubles, through the loaning of his own name some years ago to his father, a local tinsmith, who was unsuccessful.——J. A. Otis, a young blacksmith of St. Felicite, Que., who took up storekeeping a few years ago, in addition to sledge and bellows, is reported insolvent.——An assignment has been made on demand by A. Nadeau, formerly engaged in a sawmilling business, at Bolduc, Que.——Joseph Bolduc, of St. Evariste, Que., took up the store business of his father, an old general merchant, in the fall of 1902, in conjunction with a brother, under the style of Bolduc Freres. They, however, separated shortly after, he continuing alone, but he has been unable to manage successfully, and has been asked to assign.

R. G. DUN & CO.
Toronto, Montreal, Hamilton, London and Cities in Dominion, U.S. and Europe.

Mercantile Summary.

—The Portland Cement Company, Limited, of Manitoba, capital stock, $1,000,000, has been incorporated. Head offices will be in Winnipeg and operations carried on at Springfield. D. A. Keizer, C.E., Winnipeg, is among the members of the company.

Armstrong, Morrison & Co. are erecting a plant on False Creek, near Vancouver, for the manufacturing of cement blocks.

A report from Petrolia of two or three days ago said that a very large oil gusher had been struck in Moore Township, about six miles away, the oil issuing to a height of 40 feet.

The Western Securities Company, Winnipeg, has been incorporated under the Manitoba Joint Stock Companies Act. It is authorized to advance loans on the security of real or personal estate or on the stock of agreements of the Imperial Co-operative Investment Company, Limited, or other similar company. The capital stock is $100,000.

The season for the receipt of coal at Toronto harbor has now practically closed. During last month 15,276 tons were brought in, as against 13,126 for October, 1903, a gain for the month of 2,150 tons. However, for the whole season, a falling off is to be noted, the figures being 163,961 tons for 1903, compared with 154,298 tons for the present year.

The Toronto and Scarboro Railway Company have succeeded in obtaining from the Scarboro township council a perpetual and exclusive franchise for the extension of the line to Highland Creek. Work on the extension is to be completed by Dec. 1st. The company undertakes to run a freight car each way daily as soon as freight cars may be run over the city lines.

The Scottish Pig Iron Trade Association has agreed to the formation of a new form of "warrant," to represent Standard Foundry pig-iron as apart from Scotch G. M. B. Cleveland, ordinary, and Cumberland hematite. This step is believed by some to have been due to the recent creation of an Iron Warrant Exchange in New York, and will at any rate serve to facilitate the importation of American and other foreign iron into Britain.

According to calculations made by Bradstreet's, the production of coal in Canada has maintained a steady increase of tonnage for the past ten years, during which time the output of the mines has increased from 3,783,499 tons to 7,996,634 tons. For about fifty years Nova Scotia has been a producer of coal, but it is only lately that there has been any marked expansion in the production. There are now about twenty shipping companies in that province, and all of them report greatly increasing production, and it is stated on good authority that the exporting of coal to England will, before long, be a great factor in the trade. In the Far West there are ten coal-producing companies with a capacity of 2,500,000 tons for this year, and at least five other companies are developing.

Mercantile Summary.

Mann's planing mills, at Peterborough, Ont., were on Monday last destroyed by fire, at a loss of $6,000; insurance, $4,500.

The North American Saw Company, of Philadelphia, has purchased a site in Toronto, upon which it intends to erect a branch factory.

The Government ice-breaking steamer "Champlain" has arrived in Quebec. She will run during the winter between Murray Bay and Ouelle River.

The Lake Superior Corporation's charcoal plant, at Sault Ste. Marie, is now in operation, and the by-products have, it is said, all been contracted for in Europe.

The returns for duties at the custom house in Toronto for last month amounted to $806,012, compared with $586,424 in that month last year, or an increase of 37 per cent. The receipts have nearly doubled since October, 1899.

Many people will be interested to know that the Japs have shown of late a decided preference for Canadian whiskey, though out of the total importation last year into Japan of $62,830 worth of whiskey, less than $1,000 worth was sent from this country.

The Kingston Locomotive Works have been awarded by the Grand Trunk Railway Company a contract for the reconstruction of twenty-five Richmond compound mogul freight locomotives. There is said to have been considerable competition from United States companies, who submitted lower figures. The price will be in the neighborhood of $400,000. They will be built within the next year and a half.

>The shareholders of the Consumers' Gas Company, Toronto, held their annual meeting a day or two ago, and elected the following board of directors: A. W. Austin, J. L. Blaikie, Henry Cawthra, George R. R. Cockburn, M.A.; George Gooderham, Dr. F. Le M. Grasett, Jas. Henderson, M.A., D.C.L.; Thomas Long, E. B. Osler, Andrew Smith, F.R.C.V.S.; L. W. Smith, K.C., D.C.L; Thomas R. Wood. At a subsequent meeting of directors, Dr. Larratt W. Smith was re-elected president, and Mr. George R. R. Cockburn, vice-president. Dr. Grasett is a new director, replacing Mr. A. J. Somerville.

We learn with interest that the Taylor-Forbes Company, of Guelph, well known as manufacturers of hardware and machinery, have arranged to go into the manufacture of radiators, hot water and steam heating boilers, and cast iron fittings. It is their intention also to handle a complete line of steamfitters' supplies, such as steam pipe and valves. For all this product ample additional premises will be required. The plant is being constructed, and is well under way. It will be a steel construction, built by the Hamilton Bridge Company. The company are also preparing machines and patterns, and these, we are told, are well advanced. This department will be under the personal supervision of John M. Taylor, who has had experience in these lines, and associated in the mechanical department is Mr. J. P. Hockin, formerly superintendent of the Dominion Radiator Company, who is described as among the best designers of special tools for such work in America. The Taylor-Forbes Co. believes that, growing as Canada is doing, there is sufficient trade for them without in any way interfering with any of the firms already established in these lines. With their experience in the business, and knowledge of the requirements of the trade, with ability to design new features in radiation, the venture is expected to meet with the approval of the heating trade.

Burmese Linen Ledger

Wears Forever.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly letter dated New York, October 29th, say:

Pronounced reactionary symptoms developed in Wall Street this week. Business improvement was being discounted altogether too rapidly, and the temptation to take profits became irresistible. The market leaders were also disposed to check the advance and prevent speculation from becoming too indiscriminate and rampant. As usual, some important event was required to cause a general turn in the market, and in this instance it was unexpectedly furnished by panic-stricken Russian sailors bent on destroying a few harmless fishermen. Another shock to the market was the rather unexpected export of $3,250,000 gold to the Continent. Some of the big European banks show a depletion of their gold reserves that requires replenishment, and it is but natural that they should draw upon the handsome surplus of the United States. Fortunately, we can easily spare a few millions without injury. At the moment the market is in a feverish and excited condition. Not a few stocks are selling above their intrinsic value, rises of 30 to 40 points being out of all proportion to improved conditions, either present or prospective. There are no indications of the present movement having exhausted itself. Good buying develops on all sharp declines, and stocks have not yet passed entirely from strong into weak hands. The public have been buying much more freely, it is true; but no small part of the recent activity has been artificial, and the big interests still retain large holdings which

ELECTRIC PROCESS FOR PRODUCING IRON AND STEEL.

Dr. Haanel, Dominion Superintendent of Mines; F. W. Harbord, an English metallurgist, and other experts, have been making an extended enquiry as to whether iron and steel can be produced profitably in Canada by the electric process. The enquiry is an important one:

Mr. Harbord's conclusions are, in brief: that steel equal in all respects to the best Sheffield crucible steel can be produced either by the Kjellin, Heroult or Keller processes, at a cost considerably less than the cost of producing a high-class crucible steel. That at present structural steel cannot be produced to compete with Bessemer or Siemens steel. That pig-iron can be produced on a considerable scale to compete with the blast furnace only when the electric energy is very cheap, and the fuel very dear; on the basis of $10 per horse-power year, and coke at $7 per ton, the cost of production is about the same as the cost of producing pig-iron in a modern blast furnace. To sum up under ordinary conditions, where blast furnaces are an established industry, electric smelting cannot compete; but in special cases where ample water power is available and blast furnace coke is not readily obtainable, electric smelting may be commercially successful. Dr. Haanel, however, gives a more hopeful view, and says that where, as at Chat's Falls, near Ottawa, as he is told, electric power can be produced at $4 per horse-power per year, and peat coke or briquetted charcoal made from mill refuse, at a cost of not more than $4 per ton, is used, the cost of two of the heaviest items entering into the production of pig-iron is reduced by one-half. And he concludes: "When it is considered that the electric process is applicable also to the smelting of ores, such as copper, etc., and that the furnaces are of simple construction, the temperature available, 1,000° C. above that of the blast furnace, and the regulation of the heat supply under perfect control, it is reasonable to expect that the near future will witness great strides in the application of electric energy to the extraction of metal from its ores, and that familiarity with handling large currents and experience gained in electric smelting will result in solving the difficulties encountered in the smelting of ores which up to the present time have proven refractory to all commercial processes known."

* * *

—When William Rockefeller had appendicitis, Dr. McBirney was called in to perform the necessary operation. After his recovery, Mr. Rockefeller received the doctor's bill in due course, and drawing a cheque went to pay the account in person. In the conversation which followed, appendicitis was naturally their main theme. "You told me," said Mr. Rockefeller, "while I was sick, doctor, that everybody in the world had a vermiform appendix." "With a few exceptions, I believe that to be the case," answered the doctor. "And that, sooner or later," pursued the oil magnate, "every one would have to be operated on, either to cure or prevent the disease." "That is the generally recognized opinion among the medical fraternity," was the answer. "Well," said Mr. Rockefeller, rising, "if you will pardon my saying so, it seems to me that you have a better thing in this than the Standard Oil Company."—Boston Traveller.

* * *

TORONTO MARKETS.

Toronto, November 3rd, 1904.

Chemicals, Drugs, etc.—The feature of the week in drug circles was a rise in price of iodine and iodine salts. iodide of potash has gone up 50c. Quinine is moving freely, though so far the bulk of the shipments are on a basis of the price before the recent advance. Not much need be said of opium, which continues dull. Carbolic acid, menthol, refined camphor and Norwegian cod liver oil are all quite firm. The usual winter movement in the heavier bulk chemicals is fairly brisk. Prices are well maintained. In New York business is about average, while British dealers in chemicals complain of rather slow sales.

Dry Goods.—Signs of the coming Christmas season have already made their appearance, and novelties have already begun to be asked for in abundance. Prices for woolens are becoming even firmer than they have been during the past month, due to the constantly increasing strength of raw material and to its scarcity. British foreign dress goods are very firm, and some advances have been registered. Linens and jute are in the same position. Trade in wholesale quarters cannot be described as over-brisk just now, but the feeling is that it will improve any time. Payments have been good except from the West, but this feature also is likely to improve as soon as the farmers complete their fall operations.

Flour and Grain.—While the demand for flour is good so far as it goes, and prices keep steady, there is no great

amount of actual business passing. Ninety per cent. patents are quoted at $4.35 to $4.45. Hungarian patents are quoted at $5.70. There is a quiet market for rolled oats. In grains the only change is in rye, which has gone up 5c. Receipts of wheat and other grains are small, farmers taking advantage of the open fall weather to finish plowing, etc.

Hides, Skins and Leather.—Supply and demand in the hide market are about equal. Prices are steady. Lambskins are plentiful, but still realize 80c. to which they were advanced a week or two ago. Calfskins are quiet. No change in tallow. Leather is rather quiet for the moment, but prospects are bright.

Groceries.—Seldom has there been so much interest displayed in sugar as during the last few days. The market both in Canada and New York may be described as excited, and no less than three separate advances have been made in prices since a week ago. The cause would appear to be the revised estimate of the German beet crop which places it at a much lower figure than was at first expected, the weather having been very unseasonable. An active trade is being carried on at the high figures prevailing. The position of canned vegetables is strong; tomatoes exceedingly so, for these the pack is evidently not sufficient to meet more than half the immediate requirements. The price now stands at $1.25, and if this goes higher still, importations are likely to begin coming in from the States. Teas are in ordinary good demand, without special feature. General trade is fairly brisk, and is likely to increase when the farmers cease their fall work.

Hardware.—There is very little to report as being of special interest under this heading. Seasonable lines are in good request, and orders are being rushed in so as to obtain deliveries before navigation closes. Prices of the heavy metals continue steady.

Provisions. — Common to medium grades of butter are in full supply, but choice is scarce and wanted at good values. The cheese market is firm and values are the same as quoted last week. Eggs are still firm, the usual quotation being 20c., though some sales have been made at a trifle less. Hops, Canadian crop, are still very firm; extra choice realizing 35c. Poultry is more plentiful, but prices keep steady. Stocks of hog products are still low, and the demand good. Live hogs are easy. According to last week's Cincinnati Price Current, the recent movement of hogs into market channels has not been fully maintained the past week. There is considerable increase in comparison with the corresponding week last year, but a shortage when compared with two years ago. Total Western packing, 370,000 hogs, compared with 395,000 the preceding week, and 385,000 two weeks ago. For corresponding time last year the number was 310,000, and two years ago 420,000. From March 1st, the total is 12,830,000, against 12,625,000 a year ago

SWEET CAPORAL
CIGARETTES
STANDARD OF THE WORLD
SOLD BY ALL LEADING WHOLESALE HOUSES.

—an increase of 205,000. The quality is without notable change in its variableness, with the larger proportion of the offerings designated as fair to good. Prices at the close for prominent markets average about $5.10 per 100 lbs., compared with $5.05 a week ago, $5.50 two weeks ago, $5.25 a year ago, $6.50 two years ago, $5.80 three years ago.

Wool.—Prices are very strong, and a scarcity of supplies is anticipated. Not much actual business, however, is being done. Our last week's quotations for fleece and pulled hold good.

⁂

MONTREAL MARKETS.

Montreal, 2nd November, 1904.

Ashes.—Under very limited supplies the market is strong at $5.90 to $6 for No. 1 pots; seconds, $5.40 to $5.50. There is an entire absence of business in pearls, none being apparently made.

Dairy Products.—Last week's exports of cheese were comparatively light, only 47,235 boxes, but they were some 5,000 boxes ahead of the same week a year ago. The total shipped to date is 1,838,671 boxes, being 336,163 boxes less than at this date in 1903. Shipments of butter for the week were 11,150 packages, and the total to date is 458,957 packages, a gain of 144,921 packages on last year's figures. English demand for cheese is still light, but reports of a comparatively small fall make seem to give a certain degree of steadiness to the market, and holders are apparently not inclined to much concession. Finest Ontarios are quoted at 9½ to 9⅝c.; Townships, 9¼ to 9⅜c.; Quebecs, about 9¼c. The enquiry for butter is also moderate. We quote finest creamery, 19¼ to 19½c.; dairy, 15 to 15½c.

Dry Goods.—While a moderate volume of spring orders is reported, sorting business still continues rather on the slow side, and the election excitement is probably accountable to some extent for a reported falling off in collections from country retail dealers. Buyers just returned home from visiting the European markets tell us that they have found much firmness in silks, linens and woolens, in the last-named line of textiles mohair goods being particularly strong. There is also some difficulty experienced in getting fine goods and novelties, as manufacturers seem to be adopting a very conservative policy in the production of these articles.

Furs.—Full cable reports of the fur sales in London last week show lower prices as compared with the sales last March in the following lines:—Cross-fox declined 20 per cent.; red fox, 15 per cent.; grey fox, 15 per cent.; lynx, 25 per cent.; wolf, 30 per cent.; wildcat, 20 per cent.; muskrat, 20 per cent. lower than last January. Otter, mink, beaver, bear and coon sold at about the same figures, and in marten only is an advance shown of 25 per cent. In Australian furs, wombat sold at 40 per cent. advance, and wallaby at 15 per cent. advance.

Groceries.—The probabilities of an advance in sugars, as noted by us last week, have taken very pronounced shape, and three advances have been established by local refiners, aggregating in all 20c. per cental. The factory price for standard granulated, announced this morning, is $4.75, with yellows ranging from $4.15 upwards. The advance has stimulated the demand from jobbers, which refiners now report as quite active. In Japan teas there is a rather improved demand, some very fair sales of medium grades at about 17c. being reported within the last few days, also several hundred packages of siftings at 7 to 7½c. The "Jacona," the second and last direct boat bringing supplies of currants, raisins, etc., is now in the Gulf, and is due here in a day or two. Canned vegetables continue very firm. It is reported that packers will not put up any gallon apples this season, owing to the low price of the green fruit. In other lines nothing new is reported.

Hides.—The usual monthly advance has taken effect in lambskins, which are now quoted at 90c. each, but apart from this there is nothing new in the hide market. Supplies of beef hides appear to be readily absorbed by tanners, and prices rule steady on the basis of 9c. per lb., dealers' price for No. 1, with the usual half cent advance to tanners.

Leather.—The past month is found to have been a particularly active one in sole leather export to Britain, one large firm alone having orders for 250,000 sides, it is said, with the result that local dealers have been short of stock. Prices are reported firm on the basis of 23½ to 24c. for mfrs.' No. 2. Black leathers are quiet, but steady at 20 to 21c. for Western splits; Quebec, ditto, 17c.; harness, 28 to 30c.; pebble and buff, 12c.; grain, 14c.

Metals and Hardware.—The election excitement, or something else seems to have affected the demand for heavy metals, the movement not being so good as a fortnight or so ago, and in general hardware the movement while fair is not specially active. No marked changes in values are reported. Lead shows some further advance, $3.40 now being asked in a jobbing way; ingot tin is firm at 31½ to 32c, and copper at 14c. Spelter is rather strong at $5.95; antimony, 7 to 7¼c. Pig-iron prices remain as last given, and $1.70 to $1.75 is quoted in an ordinary way for bars, though car lots can be done at $1.65; sleigh-shoe steel, $1.80 to $1.90. The plate market shows a little firmer feeling in England, but local prices are unchanged.

Oils, Paints and Glass.—The volume of trade is lighter. As regards prices, no change of any kind has been reported since last writing. Glass stocks are very low, some sizes being completely run out, and only a few moderate shipments are due before close of navigation.

Mercantile Summary.

The British Columbia Electric Railway Company held a meeting in London on the 28th ult., and declared a dividend of 6 per cent. for the year ending June 30th last.

It is said in Hamilton that the American Horse Shoe Company, of Easton, Pa., are about to establish a branch factory employing a hundred men at the start, in the former city.

The following patents have been granted during the past week in the United States to Canadian inventors:—772,916, nail-making machine, S. Beauregard et al.; 772,940, apparatus for shaping hollow metal ware, Jas. Humphrey; 772,946, supplementary truck frame for brake mechanism, Wm. G. MacLaughlin; 773,141, check-rein hook, Wm. H. Gonne; 773,152, hot water heater, Clarence C. Longard; 773,272, kettle-steamer, Adele M. Baldwin; 773,289, blank for forming pitchforks, Carl K. Jansen; 773,294, non-refillable bottle, Clarence Medley; 773,342, machine for shocking grain, Wm. Russell; 12,280, re-issue, box-plate and attachment therefor, Harry McCann.

The Peterborough Radiator and Boiler Company will establish a factory in Peterborough for the manufacture of the Sturgeon heater, invented by a local plumber.

Mr. Kenric B. Murray, Secretary of the Chamber of Commerce, London, Eng., gives notice that its official organ, the Chamber of Commerce Journal, in order to assist British inter-imperial trade, will publish gratuitously announcements bringing together buyers and sellers of all classes of goods, notices of public tender, etc. Enquiries should be sent in so as to reach the editor not later than the 20th of the month.

The New York World draws attention to the increased cost of living in the following striking manner: On July 1st, 1897, not quite four months after the Republican party began the lease of power it has held over since, the average cost of food, clothing, and other necessary articles of consumption was $72.45 per head of our population. On September 1st, 1904, after a little over seven years of the blessings of Republican rule, it was $97.84, an increase of $25.39 per head, or $126.95 per family of five. These are the official figures published by the Department of Commerce and Labor, lately under the control of Mr. Cortelyou. They show an increase in the necessary cost of living of over 35 per cent. That means that it takes $1.35 now to buy the things a dollar would have bought in 1897. It means that in order to be just even a man who was earning a dollar a day in 1897 ought to be getting $1.35 now, that one who was earning $2 ought now to be getting $2.70 and that one who was earning $3 ought to draw $4.05. The question is, is he?

Great regret is expressed at the somewhat sudden death of Mr. Cornelius Shields, not only at the Soo, with the development of which industrial centre he was so intimately connected, but throughout the whole country and in many parts of the United States, where he was known. The cause is attributed to heart failure. Mr. Shields was born in the State of New York. He was connected at various times with many important industrial enterprises, and had earned a reputation as being one of the most successful managers on the continent. His first business training was received with J. J. Hill, on the Northern Pacific Railway. He was with that institution for several years and afterwards became connected with the Canadian Pacific Railway in the capacity of divisional superintendent. After leaving the C.P.R. he went to Virginia and became receiver for the Virginia Coke Company. He was with that company for two years, and went from there to Sydney, C.B., to manage the plants of the Dominion Iron and Coal Company, which he gave up in April, 1903, to accept the management of the Consolidated Lake Superior Company which position he held at the time of his death.

BRITISH AND FOREIGN TEXTILE CENTRES.

A report from New York says that the comparatively slow demand from spinners has caused planters, who were holding back their cotton, to weaken sooner than was anticipated, and the resultant pressure of large receipts has forced quite a marked decline in both spots and futures. Extremely favorable weather throughout the South and the failure of dry goods markets to show substantial improvement were also strong bearish factors. Another depressive influence is the belief that the census report of cotton ginned to October 18th will aggregate at least 7,000,000 bales. The latter factor will be somewhat counterbalanced by the well-known fact that the season is some three weeks earlier than usual, and that the outlook for a large top crop is far from favorable. Conservative operators, however, are showing increased belief in a crop of about 11,250,000 bales and are, therefore, sellers whenever cotton rises above 10 cents for near months. The visible supply and stocks at ports and interior towns are the largest on record for this period at above 9 cents a pound. As compared with the amount of cotton that has come into sight the consuming demand is the smallest in ten years. This is taken to mean that cotton prices must decline materially or trade improve enormously if consumption is to equal the previous maximum of 10,995,000 bales in 1899-1900. The average price of cotton was then 7¾ cents.

The position in the Manchester cotton trade has somewhat improved, says the Drapers' Record, but complaints are made as to the condition of the home market, which does not give satisfaction to producers, although spring deliveries have been large. In view of the serious falling off in the volume of wages distributed in the great manufacturing districts for some time past, it was anticipated that there would be a considerable shrinkage in drapery purchases, and events have not belied these expectations. Fancy goods have suffered seriously, and mercerized cloths seem to have been rather overdone, the production having increased at a greater rate than the demand. Spinners of Egyptian yarns are not as a rule making money. China is sending forward a fair amount of enquiry for shirtings, more especially in the medium qualities, and the South American trade is also moderate. Japan continues to give out extensive orders for woolen clothing.

Advanced prices for raw silk at Canton and Yokohama, and the extreme firmness of Shanghai and European sellers had forced business almost to a standstill at the close of the week. The majority of manufacturers are either well supplied and indifferent, or show little faith in the maintenance of advances. On the other hand, there is a considerable number who are indifferently supplied with raw silk and cannot remain out of the market long. The demand from the latter is at least sufficient to prevent any marked reaction. American buyers have been very large purchasers in both Yokohama and Canton, and were responsible for the advances scored in both markets. The higher prices, however, have caused them to withdraw temporarily.—Dry Goods Economist.

The amount of actual business passing at Bradford, Yorks, in either colonial or home-grown wools is reported not large at the present time. Values are, however, well sustained in both merino and crossbred kinds, and there can be no doubt that the amount of available stocks of fine and coarse sorts is still very much below the normal point. We find, therefore, that the manufacturer of worsted goods in this district is in a very precarious position, insomuch that his raw material has risen to such an extent that the cost of production is greatly enhanced and yet there is only a slow demand for the manufactured goods on account of the want of purchasing power, which is so strikingly evident both in this and in the leading countries of the Continent. The present values of crossbreds have now been in existence for some time, and there are no indications of any decline in prices in the near future.

The linen market in Belfast shows little change, but business is still quietly improving, and values are fully maintained. Unions are moving off regularly, and the demand for dress goods is satisfactorily growing. Sales of damasks and housekeeping goods are still below par. The handkerchief trade is a shade better, and the making-up factories are a little busier. Orders from the home warehouses for bleached and finished goods are coming forward fairly well, and the volume of business, though nothing to boast of, reached a considerable amount. Export business is moderately good. Demand from the United States is slower than might be expected at this season. Canadian trade is expanding, Australasian is moderate, and Continental business shows little change. Prices all round are fully sustained.

CANADA'S SHIPPING.

The Canadian Department of Marine and Fisheries tells in plain terms of the decay of the wooden ship. The total number of ships registered in Canada on December 31st last was 7,020, measuring 683,147 tons. Estimating their value at $30 a ton, the total capital represented is $20,494,000. In the past three years both the tonnage and number of vessels registered in Canada has been increasing. Before 1900, however, there had been a steady decline for nearly twenty years. The loss has been 459 in the number of vessels since 1879, and 649,868 in the registered tonnage since 1878. The provinces chiefly affected by the decline are New Brunswick and Nova Scotia. In 1878 New Brunswick ports were credited with 1,142 vessels of 335,965 tons; last year they had but 929 vessels of 59,508 tons. In 1879 Nova Scotia had 2,975 ves-

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

sels of 552,159 tons; last year it had 2,069 vessels of only 216,053 tons. Port after port, which formerly figured largely in the register of new shipping, has ceased to build. Iron and steel have replaced wood for building large vessels, and places that had only wood to depend on have had to drop out of the business. It will only be when Canadians are able to use steel as effectively as they once used wood that the old state of affairs can be restored, though wood is and will continue to be a building material for the smaller class of ships, for coasting, fishing, etc. The use of steel is already bringing Ontario well forward among the ship-building provinces, its yards having turned out for the Great Lakes trade craft of over 3,000 tons' register. Last year the provinces were credited with new shipping as follows:

	Number.	Tonnage.
Nova Scotia	135	12,907
Ontario	71	10,719
New Brunswick.........	24	1,708
Quebec	31	1,076
British Columbia	56	3,494
Prince Edward Island..	6	171
Manitoba	5	248

At $45 a ton, the estimated value of new ships, this represented an addition of $1,364,000 to the value of the shipping of Canada, and, after allowing for the loss of old craft, represented an addition estimated at $916,000 to the capital invested in water transport.

Publishers, Winnipeg.

Eastern firms should subscribe for THE COMMERCIAL and keep posted on Western trade

BRITISH LABOR CONDITIONS.

A report made by the labor department of the Board of Trade for the United Kingdom stated that, generally speaking, employment in September was dull, and showed, on the whole, a slight decline as compared with August, especially in the shipbuilding trade. In the cotton trade employment showed an improvement, owing to the resumption of full time in mills using American cotton. As compared with a year ago, employment showed a decline, except in the cotton and tin-plate industries. In the 273 trade unions, with an aggregate membership of 575,575, making returns, 39,005, or 6.8 per cent., were reported as unemployed at the end of September, compared with 6.4 per cent. at the end of August, 1904, and 5.8 per cent. at the end of September, 1903. The changes in rates of wages reported during September affected over 21,000 workpeople, of whom over 1,500 received advances, while nearly 19,500 sustained decreases. The net effect of all the changes was a decrease of over £200 per week. The changes of the previous month affected nearly 356,600 workpeople, the net result being a decrease of over £17,600 per week. During September, 1903, the number affected was about 23,000 workpeople, and the net result a decrease of about £400 per week. The principal changes reported were decreases affecting 6,200 coal miners in Cumberland, 6,850 blast furnacemen in Cumberland and Cleveland, and 6,250 blast furnacemen and iron and steel workers in South Wales and Monmouthshire. Two changes, affecting over 6,200 workpeople, were arranged by conciliation boards; and five changes, affecting over 14,100 workpeople, took effect under sliding scales. The remaining changes, affecting nearly 700 workpeople, were arranged directly between employers and workpeople or their representatives, two of these changes, affecting 50 workpeople, being preceded by disputes causing stoppage of work. The total number of workpeople involved in disputes which began or were in progress during September, 1904, was 13,916, compared with 12,969 in August, and 11,577 in September, 1903. The aggregate duration of all the disputes of the month, new and old, amounted to 130,000 working-days.

⁂

SHIPS FOR THE GREAT LAKES.

It seems incredible, and yet figures prove it to be true, that the average cargo carried on the Great Lakes ten years ago was 2,500 tons and that the largest cargo carried on the lakes as late as 10 years ago was 3,355 tons. Now the situation has changed so suddenly, says the Marine Review, as to practically stagger one's understanding, and it must certainly be giving the owners of what were the largest carriers on the lakes ten years ago considerable concern. The thing almost seems to have occurred in a night. The average cargo of the vessels under construction to-day is 9,000 tons, and the Steel Corporation, the largest shipper and ship owner on the Great Lakes, has let contract for four vessels of 10,000 tons' capacity as the forerunners in the modernizing of its great fleet. It is going to dispose of its smaller vessels, probably to scrap them if it cannot sell them. It seems that the 10,000-ton ship, considered as too big for the lakes, even as late as a few months ago, has really come to stay, and is to be the carrier of the future. While actual figures are not as yet obtainable, the added cost of operating a 10,000-ton ship as against a 4,000-ton ship is slight, whereas the gross earning power at an equivalent rate of freight is more than double. There is, of course, to be considered the interest on capital and the delay at receiving ports, which cannot handle these monsters with quite the despatch that a smaller vessel is handled, but nevetheless the odds are with the big ship. The new era is full of problems, but it must be set down as part of the economic evolution of the times. It is quite clear that the ore trade belongs to the great carrier. It is not likely that any ships less than 500 ft. in length will be built for this trade in the future.

⁂

—Messrs. Osler & Hammond, brokers, etc., Toronto, have bought the block on the southeast corner of King and Jordan streets, opposite the Bank of Commerce building, the price, we understand, being $225,000. They will shortly remove their offices there.

Agencies in all principal Towns and Cities in Canada.

—According to the Bulletin de Statistique de Legislation Comparee, published in Paris, France, Russia has received large sums of French capital, namely, $1,175,370,000 in imperial loans, and $152,856,000 in industrial enterprises. Of these latter, Southern Russia obtained $58,479,000, Moscow and environs, $42,706,000; Russian Poland, $34,740,000: St. Petersburg, and vicinity, $4,825,000; other parts, $8,685,000. France has $9,457,000 in commercial undertakings, $3,474,000 in banks, and $3,281,000 in real estate transactions. Thus the total amount invested is $1,344,438,000. When it is remembered that a very large part of capital usually accredited to Belgium in the books of Russian and European writers belongs to France, it will be seen that the total investments of the republic in the empire exceed figures furnished in this estimate.

⁂

—The aggregate annual letter and newspaper mail of the world amounts to thirty-two billion, five hundred-million pieces, of which eight billion, five hundred million go through the United States mails. In that country there are seventy-five thousand post-offices, and five hundred thousand miles of postal routes, with a yearly travel over them amounting to five hundred million miles. The service costs over one hundred and fifty million dollars a year. The receipts now almost equal the expenditures, and have doubled in the last ten years. In 1860 the total receipts were eight million dollars, which was considered an extraordinary sum. But for twenty-two million dollars spent in establishing the rural free delivery which now serves one-seventh of the population of the United States, the post-office would be self-sustaining.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

THE METROPOLITAN LIFE INSURANCE CO.
(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

ILLUSTRATING CANADA

A suggestion has been made, arising out of an article of ours a week or two ago entitled "Canadian Commercial Agencies Abroad," which we give to our readers. It is this: The Canadian agent in Birmingham, Mr. Ball, and others of our agents abroad for aught we know, when lecturing on Canada uses a lantern into which he puts photographs or colored slides illustrating the greater features of our country—the wheat fields—the coal mines in the mountains—the forests of the West and East. But it is found that these do not afford quite the kind of object-lesson that is desirable to give in order to produce an effect upon the mind of those across the ocean as to the conditions of Canada. For example, if a hundred men came to hear a lecture, most of them workers in metals, they would be more attracted by photographs of the C.P.R. work-shops in Montreal, the Massey-Harris works in Toronto, the Goldie & McCulloch machine shop in Galt, than by the glories of the Rocky Mountains, or the abundance of the grain fields. For the workman is not imaginative; he does not always reason, when a picture of field or forest is shown him: "Well, where they have such fields or forests as that they must have workshops." But when pictures of an extensive series of workshops are shown him, he says, "Ah! that's something like. I shall be pretty sure of a job out there; I did not think they had such establishments in Canada."

Therefore we think the suggestion a good one that along with pictures showing the vastness of Canada, the variety of her products, her natural resources, about which our public men love to talk, there should be shown rather more of the industrial life of Canada, her shipyards, her fisheries, her lumber-mills, her machine shops—anything and everything that will convince the Englishman (the Scotchman does not need so much convincing), that this country is fit for a mechanic or a field-laborer to live in as well as a farmer. This is a point we would commend to the attention of the Canadian Manufacturers' Association, who if they establish agencies in the United Kingdom might provide their agents with illustrations of the industrial progress of the country. Then it may be well worth the while of Canadian town and village authorities to see that the Government agents abroad are supplied with views of their manufacturing establishments as well as of landscape views depicting the towns at large. There is room for thousands of desirable immigrants in our towns and villages as well as in our cities and upon our farms. And pictures of actual industrial scenes in Canada will prove more convincing to the average man than pages of type giving only facts and figures. The success of the later pamphlets issued by the Dominion Government for circulation abroad, full of pictures as they are, has shown this very clearly.

* * *

THE POSITION OF SUGAR.

Sugars have made another rise of 10c. per hundred-weight on top of the phenomenal advances, 20c. per cwt. all told, of last week. The position of the market is still strong, and some say further increases would not absolutely surprise them. Seldom indeed has so much excitement reigned in sugar circles as during the past ten days, and it will interest our readers no doubt to know why such conditions prevail, especially at this time of the year, after the heavy demand for preserving purposes has subsided, and when generally speaking an easy tone is to be discerned. It should be understood, of course, that the Canadian market in itself has very little to do with the present state of things which depends rather upon the statistical position of sugar in Europe and the United States. In the first place, at the beginning of the past month the European stocks of sugar did not much exceed 700,000 tons, as compared with 1,139,000 tons at the same time last year. In Cuba and the United States, the estimated aggregate stocks on hand were 167,000 tons, as against 323,000 tons on October 1st, last year. In addition to these conditions is the fact that the European beet sugar crop for this past season shows a very serious shortage, the crop in Germany being now estimated at 4,940,000 tons, which is smaller than for many years past, and the French and Austrian production being equally short.

Canadian buyers appear to have been among the first to recognize the bullish conditions prevailing, and soon saw that in the West Indies they would have to meet the competition not only of the American refiners, but much more largely than usual of those of the United Kingdom as well. These ideas were speedily brought to a head by happenings in New York. The sugar situation there had been in an unsettled state for some time past. Two important refineries had increased their prices rapidly about two weeks ago, but the Arbuckles refused for a while to follow suit. Finally, however, they joined in the upward movement, and raised the price of their product by 15 points at one sweep. Then the excitement broke forth without hindrance, and the trading at the high values grew very keen. In the meanwhile the advance, of European beet within one week, was no less than 1s. ¾d., a sharper rise in the period, we believe, than was ever before known. The experts say it is fully warranted, and point to the estimated total production of sugar for the year, 670,000 tons short of last year's, as their reason.

The upshot of the matter is that the basis of Canadian refined sugar at the present time is 75 cents per hundred higher than this time last year, and the end is—or may be—not yet. It is to be remarked that at the present high figures a fairly brisk trade is going on in the Dominion, both at the central points and throughout the country. Evidently the feeling is abroad that further advances may come any day. It is difficult to say whether such will prove the case, but the situation will evidently bear close watching.

* * *

THE POLICE SCANDAL IN MONTREAL.

A serious state of things has developed in police circles of Montreal, and the resignation of the Chief of Police, M. Legault, is probably only one of the prominent features of recent events. A member of the police committee of the council of that city, M. Marchand, was informed some months ago that the police practised blackmail upon improper houses, and divided up the proceeds among themselves. Detective Guerin was put upon the case, and in July he secured evidence that money was distributed among certain officers. The evidence was handed to Recorder Poirier, and one result of it was the resignation of Chief Legault. But the Chief had been suspended, pending investigation, and at Monday's meeting of the city council it was ordered that the resignation of that official be accepted and the city attorneys be consulted as to the best means to make an investigation into the accusations brought before the Recorder's Court against Chief Legault and other officers, or on anything else connected with the general administration of the department. The Mayor stated that several more improper houses were ready to supply evidence as to alleged black mail by the police, and investigation is to be continued at the Recorder's Court.

A trenchant article in last Tuesday's Gazette inveighs against the weakness of administration of criminal justice in Montreal and in Quebec Province generally. We quote portions of the article:—

> Time and again the city has been robbed by its employees. The facts have been notorious. In two cases only, one of them of recent occurrence, and that largely because there were private interests concerned, has effective prosecution followed. . . . There are Crown prosecutors, whose duty is is, or should be, to take cognizance of such cases. The duty, however, is neglected, not by the present occupants of the position, it is to be said, more than by their predecessors. The same conditions have existed for thirty years. Actually in some cases the thieves have not taken the trouble to go out of the city they robbed. The situation has become scandalous. . . .
>
> During the past week there has been told in the Recorder's Court a tale which, if true, means that in the Montreal city hall there has existed a species of the vilest graft. Nothing in New York's rotten record exceeds in criminality what is alleged to have occurred, what is alleged to have been a system here. The penitentiary is the proper place for those who profited by the abomination—or for those who have falsely declared the abomination to exist. The thing should not be allowed to rest where it is.

It is to the credit of the Montreal city council that with few exceptions they execrated the state of affairs laid bare by the investigation as far as it has gone. Recorder Poirier has elicited valuable information as to the methods of the police in dealing with improper houses, and the Mayor has declared that investigation shall be continued. One thing seems clear, that if policemen or other officials levy blackmail upon houses of ill-fame in consideration of allowing them to continue improper traffic, they are equally likely to condone other vices or crimes against the community. Hence the clear necessity of the fullest investigation. Mayor Laporte declares that in the past, when enquiry in similar directions was sought, injunctions were taken out to stop investigation by the Police Committee, and so far as the Superior Court was concerned, specific charges must be produced before anything could be done there. And Alderman Marchand has stated that "only the edge of the veil has been lifted," while Alderman Sadler declares that "perhaps a dismissal [of Chief Legault] is deserved, and I have no doubt that other heads will come off before the end is reached."

* * *

THE FIRE WASTE.

It is a grave state of things to find the fire waste of the United States and Canada increasing as it does. Last month's loss exceeded that of October, 1903, or October, 1902, just as September last witnessed more burning of property than the same month in either preceding year. And the prominent fact stands out that the fire losses of the whole ten months of this year exceed those of the same months of either year preceding, even if we deduct the $70,000,000 fire in Baltimore of February, or the $10,000,000 fire of April in Toronto. Here are the figures, compiled from the records of the New York Journal of Commerce, showing a total for October, of $12,866,200. The following table exhibits the entire years 1902 and 1903, and also the first ten months of 1904:—

	1902.	1903.	1904.
January	$15,032,800	$13,166,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,894,600	13,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
June	10,245,350	14,684,350	10,646,700
July	10,028,000	12,838,600	11,923,200
August	7,425,550	8,428,350	9,715,200
September	9,945,000	9,939,450	14,387,650
October	9,593,300	10,409,800	12,866,200
Total, 10 months	$124,097,700	$125,381,350	$221,426,700
November	10,546,650	13,589 550	....
December	14,616,500	17,224,700	....
Total for year	$149,260,850	$156,195,600	....

According to this compilation, the fires in Winnipeg during October exceeded $800,000 in destructiveness; Brooklyn, N.Y., and Camden, N.J., contributed $350,000 each to the fire waste; two Ohio places added $685,000 in all, and two Tennessee cities added $400,000 more. There were no fewer than 272 fires in October tabulated in these records, each costing more than $10,000. It will be a wonder if the continued publication of such disastrous blazes has no effect in arousing publicists to the serious drain, $12,000,000 to $15,000,000 per month, means to the common wealth. And it will be a pity if the people generally cannot be made to see, by disaster after disaster of this kind, that every man, woman, and child on this continent should be more careful of fire.

* * *

ELECTRICAL FIRES.

It has been often remarked, and with truth, that the workings of electricity are not yet generally understood, and that many fires occur which are clearly traceable to either this ignorance or (in the majority of cases) to careless work on the part of those who do the wiring of houses or shops for electric light or power. Yet it is no less just to say that fires are sometimes blamed upon electricity unjustly. In the last quarterly report of the electrical bureau of the National Board just issued, William H. Merrill, Jr., the electrician, states that twenty-eight fires, losses aggregating $619,000, reported as due to electricity, have upon further and more reliable investigation been found to have been due to other causes. Of these: A $100,000 fire originated in a boiler plant; a $25,000 loss was caused by a cigar stub; a $10,000 loss is attributed to spontaneous ignition; a $10,000 loss was due to hot cinders.

In his report of the causes of fires this official says that during the quarter ended with September last, reports of one hundred and twenty-three electrical fires, losses aggregating over $165,000 have been received. Seven were attributed to incandescent lamps nearby.

Thirteen occurred in electric cars, in six cases due to overheated resistances.

Three fires were caused by dynamos and motors.

Two fires were due to loose connections in electrical fittings.

Seventeen pole and tree fires are reported. There were twenty-two crosses of high and low potential circuits, and ten fires have been caused by short circuit of flexible cord.

Twenty-nine fires are reported due to the grounding of circuits, of which eleven were on gas pipes, the resulting arcs burning holes through the pipes and igniting the escaping gas. The same official reports twenty-four cases of damage by lightning as received.

The losses through fires started by matches are enormous, and they are increasing. Children are allowed access to matches too readily. It is said that in Germany especially, since 1890, fires in the country caused by children have increased 50 per cent.; in towns by 200 per cent. At the same time the fires in town caused by children are only one-third of the number of those which took place in the country. It is rather startling to find that last year there were 1,300 fires caused by children in town and country in Germany and Switzerland. The fire statistics of Chicago show 398 fires started from matches in eight months.

* * *

BOILER INSPECTION.

The business of boiler inspection has been carried on in Canada for the past thirty years, during the last twenty of which, at least, the largest manufacturers and steam users in the country have shown their appreciation of the benefits to be derived from it. And all classes of manufacturers and steam users are becoming more alive to the advantages to be gained from a proper inspection of their steam plant by competent and experienced men, as well as to the advisability of providing for indemnity against loss by explosion.

Although the inspection of boilers by competent and experienced men may tend to prevent accident where those in charge of steam plants co-operate with those making the inspections by bestowing ordinary care in the use of the boilers, and following such advice or instructions as may be given them by the inspectors, no inspection can prevent accidents caused by or due to gross carelessness or negligence. And with perhaps one or two exceptions the explosions which have occurred in Canada during the last eighteen months have been due to those causes. In such cases it is probable that some companies might seek, on the technical ground of culpable negligence, to avoid paying a loss and be within their legal rights in doing so. A manufacturer or steam user would naturally be careful in insuring his boilers to do so in a company which, besides being responsible, has earned a reputation not only for not taking advantage of mere legal technicalities but for prompt and liberal settlement of losses.

With regard to the inspection of boilers, such inspection is of little value unless made by a man of ability and experience. And the business is of so wide a scope that it is doubtful if even ten or more years spent as an engineer in charge of boiler plants would give a man sufficient experience and knowledge to make him an efficient inspector. To give him such efficiency as would make his services of value it would be necessary for him to have had the advantage of observation and experience gained in the employ of a company carrying on the business of boiler inspection. In such a position he would come in contact day by day with various kinds of boilers, and with different conditions in each, thus gaining a knowledge that could not possibly be acquired in any other way. The longer his employ in such a company the greater his experience and the more valuable his services. In short we question if by any other means a man can acquire the right to call himself an expert.

There are three companies doing boiler insurance in Canada at the present time, two Canadian and one American, and as many more have made attempts to carry on the business, but have apparently been unsuccessful in doing so. It may be of interest to our readers to know the names of these companies:—

Company.	Commenced Business.	Ceased to do Business.
The Boiler Inspection & Insurance Co. of Canada...	Oct. 9th, 1875.	....
London Mutual Boiler Ins. Co., Ltd., of London, England	May 2nd, 1877.	31st. Dec., 1879.
American Steam Boiler Ins. Co., of New York.	July 1st, 1889.	31st. Dec., 1891.
Steam Boiler & Plate Glass Ins. Co. of Canada..	July 27th, 1893.	31st. Dec., 1895.
Canadian Casualty & Boiler Ins. Company.	March 7th, 1903.	....
Maryland Casualty Co.	Jan. 1st, 1904.	....

With the exception of the Canadian Casualty & Boiler Insurance Company, which is incorporated under an Ontario charter, all these companies are and have been licensed to do business by the Dominion Government.

* * *

—"Commercial Intelligence," London, does not seem impressed with any great leaning on the part of the Dominion Government towards a lowering of the Canadian tariff against goods manufactured in the Mother Country. Our London contemporary is of opinion that it will be apparent to anyone who studies the new customs regulations that, either from design or not, they constitute a second line of protection of a formidable character. It does not refer so much to the "dumping" clause, which may be regarded as an honest attempt to deal with unfair competition, but to what it regards as the new restrictions on import trade generally. British goods shipped to order have now to be accompanied by a certificate of value, a certificate of origin, and a surtax certificate, while the invoice values must be set out in a particular order. It is quite certain, thinks the journal quoted, that it would not pay a shipper to master these various forms and regulations, and go to the expense of printing these certificates to execute a chance order from the Dominion. The cost of the additional printing and stationery, not to speak of the time occupied in preparing the documents, forms a substantial addition to the sum paid in import duties, and we calculate that through the new Canadian regulations British shippers have already been mulcted in some £5,000. Shippers of goods on consignment (i.e., not sold prior to shipment) are treated as a class apart, as probable "dumpers," and with their invoices must send a sworn declaration of value. In the above estimate are not reckoned the fees they may have to pay when attesting such documents, so that £5,000 is probably well within the mark.

CANADIAN BANKERS' ASSOCIATION.

On yesterday the annual meeting of the Canadian Bankers' Association was opened in the King Edward Hotel, Toronto. A very considerable representation was present, the president of the Association, Mr. E. S. Clouston, general manager of the Bank of Montreal, in the chair. Members present were: Thomas McDougall, general manager of the Quebec Bank; G. H. Balfour, general manager of the Union Bank; W. E. Stavert, St. John, general manager of the Bank of New Brunswick; E. L. Thorne, Halifax, general manager of the Union Bank of Halifax; D. R. Clarke, Halifax, general manager of the People's Bank of Nova Scotia; J. A. McKinnon, Sherbrooke, general manager of the Eastern Townships Bank; Tancrede Bienvenu, Montreal, general manager of the Provincial Bank; M. J. H. Prendergast, general manager of the Banque d' Hochelaga; D. M. Stewart, general manager of the Sovereign Bank; Edson L. Pease and J. Gillespie Muir, of the Royal Bank; Arthur F. Doble, secretary to the general manager of the Bank of Montreal; J. T. P. Knight, secretary and treasurer of the Association, and editor of the Canadian Bankers' Journal.

Among those represented by their local managers are the general managers of the Molsons Bank, the Bank of British North America, the Merchants Bank. Yesterday the visitors were the guests of the Canadian Bank of Commerce at luncheon. To-day there is to be a luncheon party given by the Toronto banks, and a dinner party in the evening, at which His Excellency the Governor-General will be the guest of honor. Next week we hope to give a resumé of the proceedings of the meeting.

* * *

LIABILITY INSURANCE.

The announcement of the probable dissolution of the liability insurance conference in the United States came, no doubt, with somewhat of a shock to the Canadian managers of the different companies which write that kind of business in the Dominion, in view of the fact that a similar tariff arrangement had just been entered into by them modelled largely after that just mentioned. While nothing has been definitely settled at the present writing, there seems every reason to believe, however, that a larger and stronger association will be formed at once in the United States, embracing in addition to the old board companies the principal companies heretofore not members of this conference. Under this new arrangement the liability conference will be in a position to improve on its excellent work done in the past in connection with proper and adequate liability ratings.

There is not the slightest occasion, therefore, so far as we can see, for the members of the Accident Underwriters' Association of Canada to become discouraged over what at first blush looks like failure in the United States of such a tariff arrangement. On the contrary, the fact that the leading non-board companies there are joining the new Tariff Association should make more certain, if possible, the belief of the liability companies doing business in Canada, that a mutually agreed-upon tariff arrangement is an absolute essential to the proper and profitable underwriting of liability risks in the Dominion.

* * *

THE HOME BANK OF CANADA.

The authorities of this new bank have chosen an attractive illustration for their prospectus—a low, flat-roofed log cottage, with an external stone chimney, having the sort of primitive look that the huts of the York Pioneers present to the spectator at the south-west corner of the Exposition grounds, the legend underneath being the "First Canadian Home." This bank has been incorporated to take over and continue as a bank the business of the Home Savings and Loan Company, Limited, which has existed for fifty years, and has at the present time over 8,000 depositors. Our readers are familiar with the preliminary steps taken towards the formation of this bank, the procuring of its charter of incorporation, and the conversion of the loan company's paid capital and reserve of $400,000 into shares of the Home Bank, namely, $300,000 of fully paid bank stock, besides $100,000 in the shape of a reserve fund. The stock of the bank is to be issued at a premium, namely, $133.33 for each $100 share, payable in ten monthly instalments. The list of provisional directors is a good one. Mr. O'Keefe, Mr. John Foy, Mr. Stock, Mr. Flynn and Mr. Mason have been for years directors of the Home Savings and Loan Company, while Mr. T. R. Wood and Mr. E. G. Gooderham are well-known and influential members of the commercial community of Toronto. The new bank will have, as available funds for the accommodation of its patrons when its stock is fully paid up, $1,000,000 capital, $333,333 reserve, and deposits of $3,000,000; in all, over four and a quarter millions of dollars. Mr. Mason has properly earned a reputation for care and skill as a loan company manager, and the directors who are associated with him are in the main the same as have supported him for years. There is room for the new bank, and its prospects are undeniably good. Considerable subscriptions of stock have already been promised, we are told, at the premium required.

* * *

HOW TO INVEST.

The statement that a far vaster sum of money is lost annually through unwise investment than through pure speculation will surprise most people; yet the fact that such an authority as Mr. John Moody, compiler of Moody's "Manual of Corporation Securities," makes the statement will suffice to draw to it more than passing interest. It is true that entire fortunes are oftentimes placed in jeopardy and dissipated through speculation in stocks, grain futures, and the like, but these losses in a measure are anticipated. Often they represent money easily gained through previous successful speculation. On the other hand, losses through unwise investing are generally unexpected and unprepared for, being the hard-earned savings of industrious people. They are, therefore, felt more deeply. We have received a booklet, entitled "The Art of Wise Investing.* It consists of a series of short articles on investment values, and points out the essential characteristics of safe securities. Referring to another book of the same sort, named "The Art of Investing," to which he has been indebted, the author leads us to suppose, by choosing for his title "The Art of *Wise* Investing," that there is a difference. As explained in the preface: "The art of wise investing involves two primary motives: to place one's principal where it will be absolutely secure; and secondly, to gain as large a percentage of return as possible without in the least disturbing that security." The moment the status of the principal is changed in order to enhance the rate of return pure investment ceases, and the transaction becomes more or less of a speculation. Probably it is due to an unconscious confusion in the investor's mind as to the true relation of these two motives that so much unwise placing of money results, and a large part of the book under review is devoted to pointing out the financial pitfalls which beset the path of the investor in choosing his securities. There are also some very interesting comments upon the various stock exchanges and the methods of their votaries.

* * *

OUR HALIFAX LETTER.

The Halifax Board of Trade is about to receive a large accession to its membership as a result of the decision of the Retail Merchants' Association to dissolve as an independent organization and form it into a section or committee of the Board of Trade on somewhat the same lines as the Mining Section of the Board. This is now being carried out, and will mean the addition of about one hundred members to the Board of Trade, as well as extending the scope of its operations.

The matter of establishing a steel shipbuilding plant at Halifax has been again brought to the front by the visit of Mr. Alexander Spence, a Glasgow shipbuilder. Mr. Spence was here last June, and interested himself in the shipbuilding proposition. He says now is the time to get the project under way, and expresses the opinion that if the Dominion Government can be induced to grant the proposed bonus of six dollars a ton the establishment of a large plant in Halifax would be quite feasible, and that English capitalists would invest readily in the enterprise. He thinks that there will soon be a boom in shipbuilding, and that, therefore, the present is an opportune time to start. When the Russo-Japanese war is ended there will be orders for many warships, which will tax the capacity of several of the existing yards, leaving the additions to the mercantile marine to others. There is a fair amount of Halifax capital ready to invest in the enterprise, and the chief obstacle now in the way seems to be the absence of the expected Government bonus. The scheme generally favored, and which it is understood the Government is willing to put through, provided an agreement of all interests can be attained, is a bonus of $6 a ton to the Nova Scotia plant, $4 a ton at Toronto and $2 a ton on Lake Superior. The argument for the higher bonus for Halifax is that, being at the side of the ocean, the plant here would be in direct competition with the old-established shipyards of Europe in much greater degree than the shipbuilders of Toronto, while on the upper lakes the competition of European yards is scarcely a factor at all. It is argued that, as the western sites are naturally protected, the bonus does not need to be as large as in the East. When the delegation last waited upon the Government, Toronto and Halifax agreed upon this scale, but the Collingwood people did not support it, and nothing was done. Probably the solid Liberal contingent the electors are now sending to the House of Commons may have some influence in getting the desired bonus, but to be of any service the action should be immediate.

Halifax had a great war scare last week. At the time of the strained relations between Great Britain and Russia over the North Sea incident there was much activity here in naval and military circles. The crews of the three warships of the North Atlantic squadron were detained aboard on Wednesday; those who had shore leave of absence were recalled, as it was considered possible that orders might come to proceed to sea at any moment. Many of the tars from the flagship were ashore, and parties were sent to hunt them up and bring them on board; and during the evening Jackies could be seen in all directions hustling back to their ships. Some person connected with the military started the rumor that war had been declared, and the report was given credence, not only by the citizens generally, but also at the barracks and the dockyard. The annual sale of unused naval stores took place on Tuesday at the dockyard. Buyers were present from a number of outside cities, and the goods, although well worn in many instances, brought more than the original cost. There were no bargains such as were often obtained at like sales of military and naval stores in former years.

The contract has been awarded for the building of seven miles of railway from River Hebert, on the Joggins Railway, to Minudie. The work is to be completed by the 15th of June next, and will provide the Minudie Coal Company, as well as the Strathcona, Victoria and other coal areas in that region, with a shipping point by deep water at Minudie. The directors and a number of United States shareholders recently visited the property. The Atlantic Grindstone Company is owned by the same parties, and the quarries, which date back to the eighteenth century, are still turning out large quantities of the stone, which have become famous all over the continent.

Apple shipments at the port so far this season amount to about 220,000 bbls. Only the winter apples are still to go forward, and these will bring the total for the season up to 400,000 barrels, or two-thirds of the quantity shipped last season. All the insurance on the apples lost in the

---

*"The Art of Wise Investing," published by the Moody Publishing Co., 35 Nassau Street, New York.

"Loyalist" has been paid. The court of investigation into the loss of the steamer censured the master, and suspended his certificate for three months. The rate for the insurance of apples en voyage is only ⅜ of one per cent. A new company has this season entered the field, which, for a slightly higher rate, not only assumes the ordinary risk, but insures this perishable fruit against loss by delay through the break down of engines or other like causes.

Halifax, 7th Nov., 1904.

* * *

LIFE INSURANCE NOTES.

"Suppose you could remember all you have forgotten, what a fine time you could have with yourself. I know of a man," says Amicus, "who made up his mind to insure his life—next year—and then forgot all about it. Strange to relate, he said it was five years before that thought came to him again. It came to him along with diabetes, but his chance for life insurance was gone. If this man had only put down in his book, 'Must insure next year,' he would have been all right. What is better, however, is to write down, 'Insure this year!' And having done so, all you have charged upon your memory is, not to forget to pay the premium."

It is odd that the cities of Canada, which are the worst provided for in the matter of water supply and fire protection, are those who think that they can do better for themselves than by relying on insurance companies. They forget that the conflagration hazard which has been so luridly illustrated at Baltimore, Ottawa and other places can only be provided against by practically a world-wide business. Again, as we have pointed out before, the laws, certainly of this country, will not permit the inhabitants of one city to be taxed in order to pay for the negligences of the inhabitants of any other city. Once let the idea get hold that watchfulness over individual and municipal fire protection is relaxed, then we can look out for fires, and the unfortunate citizens of the towns where conflagrations happen will find themselves penniless.—Review, London.

* * *

BANKING AND FINANCIAL.

The annual general meeting of shareholders in the Bank of Montreal is to be held this year on the 5th December. It was held last year on the 7th of that month, the change to the first Monday of December instead of the first Monday of June each year being then first established.

According to figures gleaned from the New York Journal of Commerce, the dividends already declared this month by industrial corporations in the Eastern States show a large falling off. The total now stands at $13,354,377, against $17,166,771 in November of last year. The decrease is accounted for by the passing of common stock dividends by three large concerns.

The Northern Securities stocks seem to have earned good surpluses last year. These surpluses were $15,229,311 for Northern Pacific, $14,115,520 for Great Northern, $12,814,916 for the Burlington, or a total for these three systems of $42,160,747. Altogether, the available earnings, after interest and other charges have been provided for, amount to 8 per cent. on $403,250,000 worth of stock.

The gold output of the Atlin district, according to a recent dispatch from Victoria, B.C., is estimated to amount to $600,000, or $100,000 in excess of last season. This increase in the clean-up is looked upon as being highly satisfactory in view of the extremely short season this year, the hydraulic companies not having been able to begin operations until June 7th instead of early in May as usual.

We learn that the Huron and Bruce Loan and Investment Company, one of the smaller mortgage lending companies of Ontario, head office Goderich, has been absorbed by the Standard Loan Company of Toronto. The paid-up capital of the Huron and Bruce was $180,433 at the close of 1903; it had deposits of $60,363, and held cash in hand $15,362 at that date. Its mortgage loans amounted to $233,190. The business in Goderich will be continued as a branch of the Standard Loan, and Mr. W. L. Horton will be as heretofore manager at Goderich.

Details of the reorganization of the Great Northern Railway of Canada are now being made public. The offer of the Canadian Northern to holders of 5 per cent. first mortgage bonds of the former is as follows: For each $1,000 bond of Great Northern of Canada with July coupon and all subsequent coupons there will be paid: Cash, $25; new 4 per cent. bonds, $750; total, $775. The new bonds are a part of an issue of $4,660,000 4 per cent. bonds, guaranteed unconditionally as to principal and interest by Canadian Northern. The cash payment represents the 2½ per cent. July coupon on the old bonds, which is in default. Taking the new bonds at 80, a conservative price, the exchange works out as follows: $750 bonds at 80, $600; cash, $25; per $1,000 bond, $625. This is a quotation of 62½ for the old bonds. The new bonds will be secured on the property and franchises now underlying the old bonds. The remainder of the new bonds, $1,165,000, will be used to pay off debts and for working capital and to provide the $116,500 required for the cash payment, as above. In future, Great Northern of Canada is to be operated by Mackenzie & Mann, owners of Canadian Northern.

* * *

FIRE INSURANCE MATTERS.

The insurance on property burned or otherwise injured at the Winnipeg fire of 11th ult. is placed at $274,080 gross. This is in 36 companies, namely, 18 English, 10 Canadian and 8 American.

Steam fire engines of a good type, not too heavy nor too complicated, continue to be in demand in Canadian cities and towns. We hear from Winnipeg that a contract has been awarded by that city to the Waterous Engine Works Company, of Brantford, Ont., for two of their 1,200 gallon steam fire engines. We understand that these engines are similar to the fire engines of like capacity purchased from this company by the city of Montreal and the city of Toronto.

It has transpired that at the recent severe fire in Winnipeg the fact that one wire was disabled on Bannatyne Avenue caused every fire alarm box throughout a large section on the east side of Main Street to be put out of business. Here are located several large mills and wholesale houses, and if fire had started in any of these there would have been no box close at hand at which the alarm could be rung in, and a most disastrous conflagration might have resulted. The argument is used with redoubled force that the fire alarm wires should be placed underground as soon as possible.

* * *

FOR GROCERS AND PROVISION DEALERS.

The Knight beet sugar factory at Raymond, Alta., has begun operations, turning out at present 1,000 bags of sugar daily. The beets are said to be yielding well and to be of good quality, while the crop of roots ranged from six to fourteen tons per acre.

Last week there was a distinctly improved market for Canadian apples in Liverpool. During the last few days an easier feeling is reported. Latest quotations are as follows: Baldwins, XXX, 10 to 11s.; XX, 8s. 6d. to 10s.; Greenings, XXX, 11 to 12s. 6d.; XX, 10 to 11s.; Spy, XXX, 12 to 14s.; XX, 9s. 6d. to 11s. 6d.; Kings, XXX, 13s. 6d to 15s. 6d.; Golden Russets, XXX, 12 to 14s.; XX, 9s. 6d. to 11s.; Ben Davis, XXX, 8s. 6d. to 10s. 6d.

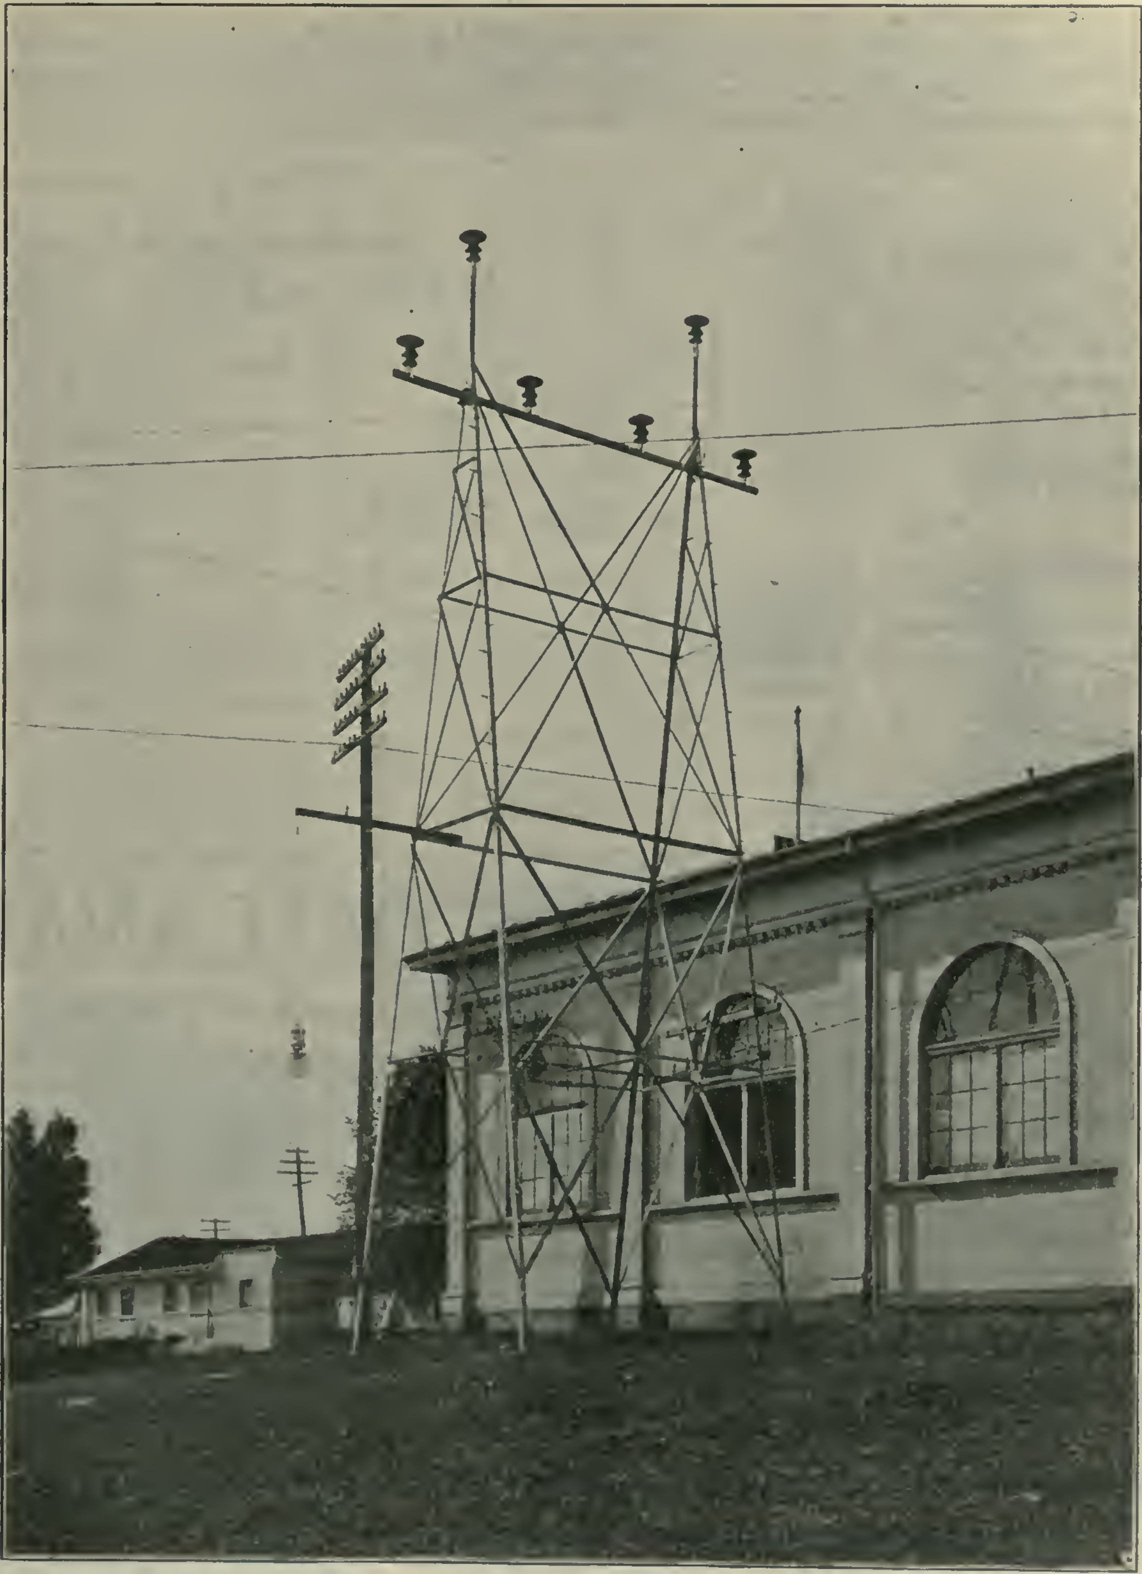
Remarking upon the fact that Canadian sheep and hog breeders cleaned up more than three parts of the prize money in all the classes in which they had entries at the big St. Louis Fair, the Star reminds us that the Canadian poultrymen are following in the footsteps of the hog and sheep men. Mr. A. P. Westervelt, the Ontario live stock commissioner, received a telegram from St. Louis, saying that Canadian poultry had won $3,000 out of a total of $5,000 prize money offered in the poultry section.

For last year the exports of leaf tobacco from Cuba, according to official statistics compiled in that republic, to the United States were valued at 9,940,406 peso (the peso in this reckoning, we presume, is in Spanish silver, and, therefore, worth about 80 cents in our money). In 1902, the exports were 10,554,033 pesos, that year, however, showing exceptionally large figures. The next largest exportation of leaf tobacco from the island went to Germany, which took 1,921,559 pesos' worth. The total exports of this article for last year were 13,255,146 pesos.

Growers of grapes in the Niagara district have been seriously alarmed this year as a result of the ravages of the rot which has caused thousands of dollars' worth of damage. This is the disease which a number of years ago wiped out many of the vineyards in the Essex and Kent districts, and forced many growers to give up raising grapes. Prof. Lochhead, of Guelph, who visited the vineyards of Ohio to see if the fruit-growers of that State had any remedy for the disease, announced that they have been able to control the disease by an application of a special spraying mixture at certain stages of its growth. It is probably true that the application of a similar mixture will save many a vineyard in Ontario. The matter 's treated in the November number of the Canadian Horticul. :rist.

The fruit-growers of Ontario are much pleased at the action of the Railway Commission in appointing a special

A COLOSSAL INDUSTRIAL ENTERPRISE.



Steel Tower for Transmission Line, Toronto and Niagara Power Company. These towers are being erected every 300 to 400 feet. There will be 2,800 towers in all.

committee, including the president of the Ontario Fruit Growers' Association, to visit points in the United States to see what measures have been adopted by the railroads and fruit growers across the border for the transportation of fruit. A special effort will be made by this committee to see if a car can be found that will be suitable for the transportation of fruit during the fruit season, and that the railroad companies will be able to use at other seasons for other purposes. The short season for shipping fruit has been the chief obstacle in the past to the supplying of properly fitted cars for the trade.

⁂

Wm. Cummings & Sons, Truro, N.S., have recently completed an extension to their skirt and jacket factories, and now can work at double their former capacity.

⁂

—Berlin continues to grow in population as well as to increase in industrial activity. Its population has just been ascertained by the assessors to be 10,855, which figures show an increase over this date twelve months ago, when the population was 10,470. This shows a very decided growth from the 7,400, which was Berlin's population ten years ago. There is a continued increase in the value of assessable property also. Last year at this time the total assessment of the municipality was $3,807,620; this month it is $4,098,050, which exhibits an increase of more than seven per cent.

⁂

—On Monday last the Halifax Board of Trade passed a resolution that Lloyds be invited to send a committee to Canada to examine Canadian ports, and that the city council of Halifax be asked to defray the expenses of the committee's visit to Nova Scotia. This action was taken in consequence of discrimination in the matter of marine risks against Nova Scotia ports. The Halifax Board accuses Lloyds of discriminating (unjustly, we presume), against Nova Scotia ports, and this is not the first protest that has been made in the premises.

⁂

—A report presented on Wednesday to the Montreal Harbor Board shows that the total receipts of the harbor from the opening of navigation to November 1st amounted to $238,998, compared with $265,646 last year. From local traffic the receipts were $6,434, compared with $6,687 for the same period in 1903. Considering the very heavy shipments of cattle last year, on account of the British embargo against New England ports, this is looked upon as fair. The total number of sea-going vessels entering the port of Montreal during the present year up to November 1st has been 742, with a tonnage of 1,719,000 tons, compared with 734 vessels of 1,725,000 tons last year, while inland vessels numbered 8,807, of 2,070,486 tons, this year against 9,675 vessels of 2,157,510 tons last year.

⁂

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing House for the week ended with Thursday, November 10th, 1904, compared with those of the previous week:

	Nov. 10.	Nov. 3.
Montreal	$28,040,627	$24,896,708
Toronto	18,844,482	17,606,480
Winnipeg	8,056,295	7,752,585
Halifax	1,847,452	2,082,596
Hamilton	1,242,601	1,264,025
St. John	1,262,195	1,121,804
Vancouver	1,696,681	1,491,466
Victoria	1,016,116	722,668
Quebec	2,022,600	1,466,100
Ottawa	2,405,948	1,836,284
London	1,200,692	965,123
Total	$67,675,689	$61,205,839

This week's is probably the largest week's clearings known.

EDWARD G. GOODERHAM,
Managing Director and Secretary-Treasurer The Toronto Silver Plate Co., Limited.

TERMS OF ISSUE.—$100 Shares will be issued at a Premium of 33⅓%, making $133.33 per share, payable in ten equal monthly payments of $13.33 each per share.

Shares may be subscribed for by Power of Attorney mailed to the undersigned.

By an executed agreement $300,000 of the Stock of the Bank at the above named price $133.33 per share, making a Reserve Fund of $100,000 thereon, in all $400,000, and fully paid up, has been secured by the Shareholders of the Home Savings and Loan Company, Limited. The agreement also provides for the taking over and continuing of the business of the Company by the Bank, and this will enable the Bank to begin business with funds on hand of at least **$3,500,000.**

Subscription Books will be opened on the 18th November, 1904, at the Head Office of The Home Savings and Loan Company, Limited, No. 78 Church St, Toronto.

——Further particulars on application.——

NORTH OF ENGLAND LETTER.

Perhaps nothing commercial is of more intrinsic importance than the new bunch of agreements in the iron trade. The Scottish and the English makers of ship plates have made peace, and will no longer trespass on each other's territory. Railway companies will lose, but the steel trade will gain. Then the rail makers of Great Britain, France, Germany and Belgium have shaken hands over a provisional bargain, which is to endure for three years. The arrangement relates to export sales, and it permits our forgemasters to appropriate somewhat more than half the market, say, 1,300,000 tons per annum, a proportion distinctly worth having. However, there is America to be remembered. The Steel Trust is no party to the bargain, and it is recognized that the Yankee may assail the European flank. None the less, the concordat has its importance, and those who follow steel prices, will not disregard the meaning of this new movement.

Mr. Robinette's "Canadians, and Canadians alone," speech has been noted here, as all contra-Chamberlain pronouncements, when made publicly, are. For tactical purposes, a portion of our press uses such emphatic assertions freely, and never ceases to say that our colonies are not to be markets for English wares. Of course, in their hearts the business public do not wholly approve this new insularity. Unless England can sell, she cannot buy, and knowledge of this incontrovertible truth makes one sceptical as to the perfect wisdom of showing the fist too freely. It conduces to more harmony to believe that Canada will give and take, and will foster her self-interests with an open mind. In that case it is assumed that she will not declare herself always a seller but never a buyer. As all know, that position has not been attained in practice by any nation; and think as one may about particular pleas for Protection, it can never be wise to get outside the area of fact. More applause awaits the politicians who insist that scientific care shall be taken to advantage the Empire by all circumstances and on occasion. Whatever the phrase may mean, it at least sounds less objectionably selfish to the English ear than an absolute notice to quit served on the British manufacturers.

Subjects of so much controversy are delicate matters to handle, but they are of high importance, and it is in the first degree desirable that the sober mean of home opinion should be reflected. It would be possible to make more of some of the expressions evoked by speeches of an uncompromising tenor. It seems wisest, though, to accept the spirit of the more moderate critics and to transmit that as a fair representation of views held here. In the same vein of conscientious justice, it is right to say that President Verveille's words: "We have repeatedly applied to the British labor party to aid in stopping the dumping of surplus labor in Canada" have excited little notice. It is right to add, too, that until better cause is adduced for preventing emigration, that our public would be sorry to see the figures falling.

The kind of emigration against which feeling is strong is the swindling sort that flourishes especially in California. Paid perjurers have lured out several hundred English people during the past few years to a "Garden of Eden" which is for sale. The fruit of evil appears to be the staple crop of this unholy garden. Ruin and disappointment are all that come to the gulls of a smartly managed fraud. An acquaintance of one's own, too poor, proud and shabby to return, is now cursing his fate in Los Angeles.

Mr. Marshall Stevens, after his tour in the States and Canada, is once more in England. He was the first general manager of the Manchester Ship Canal, and his elevation to that position was almost dramatic in its rapidity. At present he is manager of the Trafford Park Estates Company, an enterprise that the notorious Ernest Terah Hooley assisted to form. The concern warehouses goods and administers large real properties, which the waterway has brought virtually to the sea. One may say this now that a vessel of 13,000 tons has negotiated the Canal easily. Mr. Stevens at the period of the inception of the Ship Canal was a forwarding agent in Liverpool in no large way of business. The Canal never has shown a profit, and at an early stage its finances were stuck literally in the mud. Up came Marshall Stevens with a proposition, and provisionally it was accepted by the directors. The young and untried man insisted on the managership of the undertaking in case his arrangements should be effected. All went well, and Mr. Stevens got his reward. Some fault was found with his management by critics, but his rise to affluence and power was phenomenal in this effete old country at least. The Trafford Estates annual meeting is just pending. Meantime second debentures are quoted at a premium of 1⅞ per cent.

Thus far no confirmation of the rumored engagement of marriage between the Commercial Union and Hand offices has been vouchsafed. Liverpool, by way of its Chamber of Commerce, is forwarding a protest against the "inconsistent" anti-dumping regulations. They are so termed because the Dominion promotes dumping itself by means of its export bounties. Though some of our Chambers are mere tea-meetings for garrulous commercial washerwomen, the Liverpool body is an efficient and a representative one. The city, too, has very large Canadian interests, and these qualifications, perhaps, give Liverpool a special right to poke its nose into Canadian affairs. Whatever the fate of the present protestation, it is right that Liverpool's exceptional weight and influence should be remembered.

NORTH COUNTRY.

Manchester, Oct. 28th.

⁂

OUR AUSTRALIAN LETTER.

Business disappointing, but high hopes entertained that it will be better. Such is a fair description of the general commercial situation in Australia. Here and there, and now and then, are instances where it is better than the description, but there are also instances where it is much worse.

This hoping but not realizing has gone on for so long that anyone not an Australian would begin to despair. But the latter does not. If you ask him why, he will laugh; and, like a true John Bull, he'll say, "Things are bad, but we'll muddle through somehow; we always have, and we will again." The condition of things is not due to lack of volume of trade, for the Australian import of merchandise amounted to £36,551,542 last year, and the exports of its own produce to £45,578,935, including bullion and specie, but bullion and specie are as much the merchandise of Australia as its wool, wheat or coal. Now, this sum will appear to be large, even to the growing Canadian, and the population of Australia is only about two-thirds that of Canada.

A part of the dullness is due to the uncertainty of the future. Australia is at best a very uncertain country. Last year was one of good seasons all round, and this saved a good many people from bankruptcy, but not all. Another good year is needed to put people in the country on their legs. Some failures have recently shown that persons or firms cutting a good figure in fine premises have been doing so wholly upon the generosity of the banks, and it is feared all the weak ones have not been liquidated yet. Another good season may help these lame dogs to limp for a time longer.

So far this year has been favorable, but the summer has to be experienced; the rainfall has been timely, but much below the average in quantity. It has been enough to keep things growing in most parts of the Commonwealth, but not in all. The prospects are fair just now, and this is all that can be said.

The real trouble is that in proportion to the population there are too many in business and trade. The parasite has altogether outgrown its host. In the Sydney Exchange there was recently an exhibition of dairy products. It was of good quality, and illustrated what might be done. The striking part of the show was a map and its accompanying statistics. The map was divided into districts according to the rainfall, beginning with the well-watered coast line. Out of four and a half million acres of freehold land in this division less than two hundred thousand acres were under cultivation in 1902, and not much more last year. Out of

over forty-seven million acres of land occupied in this State but 2,153,314 were under cultivation, ten per cent. less than three years ago. The city of Sydney has probably added thirty thousand to its population in four years. The secret of this unfortunate state of affairs in a large measure is enormous taxation and enormous loans, the bulk of it going, even when spent out of the city, to build it up.

A new Government has come into power, elected on the promise of strict economy. The Premier has just brought down his budget, and he proposes to add to the old burden by levying fifty thousand more, and proposes to expend this year nearly eleven and a half millions, and this is only the ordinary expenditure. Just fancy the local governing of one and a half millions of people costing over fifty-five million dollars! Deducting twelve millions for operating the railways, there are still forty-three millions left. Can you match it in Canada or in the United States? New South Wales is credited with being by far the most extravagant State in the Commonwealth, but the others go the pace pretty well up to their ability. The worst of it is that every item of the extravagance has been supported, and some of the worst instigated by the Labor Party, a party that once was honestly advocating economy.

The cable says that the Unionists of Canada have invited the ex-Premier Watson to come over and put them up to Australian wrinkles. Would it not be well if they sent over a deputation to see whether the workingman of Australia is better off under his system than the Canadian? If he is, I pity the Canadian. Or if this process is too expensive, there must be a good many Canadian workingmen who paid their passage out here, and after a few months' experience *worked* their passage home in all sorts of ships. Their testimony would be that the wages per day were good if you could only get the work to do. One, who was a wharf laborer, recently said: "My pay was a shilling per hour, but my average earnings per week have not been quite twelve shillings for the last three months." The result of the Arbitration Court in the settlement of labor troubles has been in many cases to increase the wages per day, but to decrease the wages per month.

In New Zealand the authorities have now seen what others have seen for some time: the wages have gone up, but the cost of living has gone up faster. The head of the Labor Department in his report states that under arbitration the average wages have been advanced by twenty per cent., but rents and prices of the necessities of life have gone up twenty-two and a half per cent. The union of workers to force up wages resulted in a union of employers to keep up prices, and the latter has been the more successful of the two. The Government started a coal mine to break up one of these rings, but unluckily it could not supply the coal and pay expenses, even at ring prices. The newspapers assert that the same thing is in process here. This thing may answer for the worker and the middleman, but what about the man on the land? He has been unable to get up a union or a ring. No wonder he shows so little disposition to cultivate in New South Wales, and is getting uneasy in New Zealand. I am taking up so much of your space on this question because I presume the Monetary Times to be as desirous of seeing the workingman of Canada do the best he can for himself as I am of seeing the worker of Australia, and it is necessary to know what should be avoided as well as what to follow. The Labor Party here originally had correct ideals, but it has gone astray to impracticable Socialism, and is in great danger of degrading itself to becoming a mere political machine. Its early work produced some good, but its later demonstrates that its methods should not be copied.

The Australian banks had an agreement as to rates of exchange, but this agreement terminated a few days ago, and down the rate went to half the old figure, which reminds me of a statement I saw somewhere that someone had recommended a Canadian bank to establish a branch here to conduct the exchange on Canadian trade. It was not shown how a bank could live on the exchange of £375,000, even if it got the whole of it, which it could not, because so much bought in Canada is paid for in New York and London. The United States do ten times the trade that Canada does, but no bank has been established in consequence. When the trade is nearly equal on both sides there might be some gain in direct exchange, but with almost all the money going to Canada the account must be settled by giving an order on London or on the Continent, where Australia sells more than it buys.

Some Canadians are having trouble with the Customs out here, partly through defective invoices and partly through the severe manner in which the law is enforced. The Premier of the Commonwealth is a free trader, but the Minister of Customs is an ardent Victorian protectionist, and is bound to make the most of the tariff. The moral for Canadians is to see that your shipments are in order, and give no cause for suspicion. If you don't, you will suffer. Your trade will go or your pocket will be drained.

Sydney, N.S.W., 10th Oct., 1904. F. W.

⁂

UNCOMMONLY "ENGLISH" AMERICANS.

A Canadian gentleman who occupies a prominent position in Pittsburgh, sends to the Editor of the Monetary Times a booklet, issued by the Chamber of Commerce of that city, showing, among other things, what a hive of industry Pittsburgh is and how great an aggregate of manufactured goods she turns out annually. We shall take occasion to quote some of these figures shortly. What we wish now to do is to call attention to a postscript showing the extraordinary pro-British atmosphere which pervaded a recent function in that city. Mr. Wigley writes:

"Last night we had quite a 'function' in entertaining Hon. John Morley, and I enclose a report of the affair. I did not know when the event was over whether Edward was President or Teddy was King, things seemed to be so much in the family that we could hardly tell who was 'It.' I wish you would read the speech of the Rabbi Levy, on this occasion, if you read no other of the list. We have the best and the worst of the Jew in Pittsburgh, and I have always been a defender of the free Jew, when he has got accustomed to his freedom; and it did me good to listen to this eloquent man pouring out heartfelt sentiments of which every Briton is proud."

The speakers were: The president of the Chamber; Dr. Butler, president of Columbia University; Dr. McCormick, chancellor of the Western University of Pennsylvania; Rabbi Levy, Dr. Holland, with Congressman H. Kirke Porter as toastmaster. Andrew Carnegie was not there, although some of his friends were, and the sentiments of the speakers generally were very friendly to Great Britain. A very naive allusion to the fact that there are yet some Americans who do not claim that the earth is theirs and the fulness thereof, was made by Mr. Morley, in the following sentence, which we quote from the Pittsburgh Gazette: "I and my countrymen can find no fault in what was said here by your toastmaster when he referred to Great Britain as the foremost country in the world. (Laughter). I was delighted to hear it. (Laughter). I would never have ventured (in the United States), to make any such claims, but now that it has been said, I cheerfully and gratefully accept it."

⁂

ANSWERS TO ENQUIRERS.

W. E. A., St. John.—Have sent you the weekly figures of clearings for the twenty-three weeks from 1st June to now. You will observe that the average per week is $1,036,913, which does not greatly differ from the clearings for the same period of the present year.

S. P., Winnipeg.—Have written you. There are no exact figures quotable for the reasons given.

Bank Clerk, Detroit, Mich.—The number of chartered banks in Canada is thirty-four, and their branches exceed a thousand in number. By the last Bank Statement the paid capital of these banks is $79,642,000, and their reserve funds $52,479.000. The circulation of their notes exceeds $60,000,000. Their loans and discounts in Canada amount to $448,000,000. and outside Canada (mainly in the United States) $69,000.000. Several of our banks have branches in New York and Chicago.

COMPETITION IN LIFE ASSURANCE.

At the meeting of the National Association of Life Underwriters, held at Indianapolis last month, essays written in competition for the Calef Cup were presented. One by J. H. Jeffries, of the Penn Mutual Life, contained the following on "The Bounds of Competition:" All life is a struggle for existence. Everything in nature vies with every other thing of its kind for a larger life. Competition is inevitable and necessary to growth and progress. Civilization is not opposed to it, but refines and ennobles it and limits its operation by moral and altruistic restraints. . . . Where is the line beyond which fair competition becomes unjust condemnation and rightful comparison descends to defamation? Ethically considered, the bounds were clearly defined by Robert Burns, who advised a friend "to gather gear by every wile that's justified by honor." But at the same time, remember that "where ye feel your honor grip, let that aye be your border."

Common honesty is the boundary in one direction, while the white stone of the Golden Rule marks the limit in the other. Between them is a fair field for cultivation and the promise of a bountiful harvest for all who will work. He who goes beyond seeks to obtain that for which he has not labored. . . .

Time was when a rate book, an application blank and a persuasive tongue were considered a complete outfit for field representation. Solicitors sprang into the business, like Minerva from the head of Jove, "full panoplied for war." The successful solicitor of to-day, however, is a trained man, and time and money must be spent in his education. Where an agent has made advances, given guarantees and opportunities, in the hope of developing a profit-producing factor, he is entitled to his reward. No fair minded competitor will seek to allure a solicitor from the service of an agent to whom he is morally, if not contractually, bound. If a solicitor feels that he can better his condition by representing another company, the suggestion of change should come from him and not from a competing agency manager. . . .

It is impossible to state in definite terms the bounds of competition. Honest men, with just regard for the rights of others, will clearly see the boundary marks. The essay closed with this stanza from Thackeray:

Who misses or wins the prize,
Go, lose or conquer, as you can;
But if you win, or if you lose,
Be each, pray God, a gentleman.

* * *

EDMONTON A CITY.

About a year ago we had the pleasure of noticing the growth of Edmonton, Alberta, whose population was then 5,000, and is now probably much more. The country around it has since been filling up with desirable settlers, increasing the business of the place, which grows rapidly in dwellings and business concerns. The council borrowed on debenture something like a quarter million dollars to pay for waterworks, already in operation; electric light plant, already erected; sewerage, already begun, and to bonus the Canadian Northern Railway, which is building its shops there. The assessment, which was $3,208,000 in 1902, is now nearer $4,000,000.

The town was the scene of great rejoicings on the 8th inst., on that day being celebrated the donning of civic honors. Edmonton is now a city by special ordinance of the North-West Territories' Legislature. The hall in which the inevitable banquet was held was most elaborately decorated for the occasion, we are told, with flags, buffalo and deer heads, musk-ox robes, etc. At one end there was erected an imitation log cabin home of pioneers, while in a corner was a real tepee, occupied by real Indians. "Look on this picture and on that," one might well say in conjuring up a mental view of Edmonton of 1860 or 1870 and contrasting that with the Edmonton of to-day. Five or ten more years will witness another marvellous change in the aspect of the place.

ACTUARIAL SOCIETY OF AMERICA.

The transactions of the Actuarial Society of America at its May meeting have been on our desk for a week or two. Among the papers are the following: "On the Principles which should Determine the Maximum Single Risk and the Acceptance of Exceptional Classes of Risks," by Walter S. Nichols; "Notes on a Factor hitherto Overlooked, of the rate of Interest," by the late Charlton T. Lewis; "An Experiment with the Specialized Investigation," by Rufus W. Weeks; "The Decline in the Birth Rate in New South Wales," by Richard Teece; "Methods of Intervaluation Ascertainment of Reserves," by M. M. Dawson.

The October meeting of the Actuarial Society of America, which was held in Philadelphia, was attended by about sixty members and associates. The following papers were presented: "The Effect of Total Abstinence on the Death-Rate," by Joel G. Van Cise; "The Repayment of Loans by Contingent Instalment," by H. W. Robertson; "A Graduation of the Specialized Mortality Experience," by Arthur Hunter. At the banquet which followed, Mr. Henry C. Lippincott, in an after-dinner speech, as reported by the United States Review, scolded the actuaries roundly for departing from the strict principles of the contribution plan" of dividing surplus, which the speaker called "robbing Peter to pay Paul."

* * *

—We observe the increase of some fifty thousand dollars in the amount of securities deposited with the Government at Ottawa by the Royal Victoria Life Assurance Company for the security of policyholders. The par value of securities now on deposit is $250,553, while the market value is stated at $267,000.

* * *

—Judging from the permits for new buildings which have issued this year in the principal cities of the United States, there is little sign of hard times, or even of depression, in that country. Building operations during September showed the remarkable increase, compared with the same month of last year, of 84 per cent., a ratio which probably beats all records. According to official reports to the Construction News, permits were taken out in twenty-seven large American cities during September for the construction of 9,614 buildings, aggregating $37,014,194 in cost, against 7,108 buildings involving an estimated cost of $20,074,211 for the corresponding month a year ago, an increase of 2,506 buildings and $16,939,983. June was the busiest month of all in this regard. The most noticeable increase in activity has been noted in Pittsburgh. In New York, notwithstanding unsatisfactory conditions in the labor market, building permits for September aggregated the enormous sum of $7,153,385, more than double the amount for that month in 1903.

* * *

—The subject of forestry for this country is so important that we are glad to hear of the decision of the Canadian Forestry Association to publish a journal in its interests. Dr. William Saunders and Prof. John Macoun are members of the Editorial Committee. The new journal will include scientific and descriptive articles relating to the Canadian forests and their management, forest administration in other countries, the planting and care of trees and such other related subjects as are of public interest. The Association has steadily developed since it was organized in 1900, and has now a membership of about six hundred, representing all parts of Canada and several foreign countries. At a meeting of the board recently a resolution was passed expressing the opinion that in view of the annual destruction of timber in British Columbia and the difficulty of guarding the forests from fire, it is desirable that the Bush Fire Act of that Province should be amended so as to prohibit the starting of fires for the clearing of land between the first day of May and the first day of November in each year, unless a special permit for that purpose be granted by the forest ranger or other officer. The annual meeting of the board will be held in Quebec in March next.

The Bank of Toronto.

Mercantile Summary.

Darch & Hunter's seed store, in London, Ont., was on the 3rd inst. damaged by fire and water to the extent of $8,000 to $10,000, covered fully by insurance.

A company has been formed in Windsor, Ont., under the title of the Buffalo and Leamington Oil and Gas Company, Limited. Its capital stock will be $100,000.

The Dominion Natural Gas Company, of Hamilton, will take over the business of the People's Natural Gas Company, Limited. The former has an authorized capital of $500,000.

The Rainy River International Telephone Company, Limited, at Rainy River, Ont., has received a provincial charter. Donald Robertson and J. A. Mathieu are provisional directors.

An Ontario charter has been granted to the Welsh Tanning Company, Limited, which has a capital of $200,000. Head office will be at Hastings, Ont., and among the provisional directors will be John Welsh and T. H. Quigley, both of that village. It proposes to carry on a business of tanning and dealing in hides.

J. A. McArthur, of Sussex, N.B., and other capitalists, have purchased some 8,000 acres of land near Cranbrook, B.C., upon which there are trees enough, it is estimated, to make about 60,000,000 feet of lumber. They are forming a company to begin operating a lumbering business upon the same at as early a date as possible.

The Emerson extension of the Canadian Pacific Railway is now completed, and direct connection between Winnipeg, and St. Paul open. This new line connects the Canadian Pacific at Emerson and the Soo line at White Rice, and forms a shorter route to St. Paul. Heretofore, this journey was made over the C.P.R, to Gretna, and from there on by way of the Great Northern.

The St. Eugene Consolidated Mining Company, Limited, held their annual meeting in Toronto, on Tuesday, and re-elected the old board of directors. Since May last, before which time operations were suspended, the company has mined, it is stated, 50,450 tons of ore, which has been converted into 10,740 tons of concentrates. The financial statement for the year ending September 30th last showed a cash surplus of $131,965.

A welcome move is that towards erecting a large and handsome modern hotel on the site of the old Clifton House, on the Canadian shore of Niagara Falls. The concern which is building the hotel is incorporated under the laws of the Province of Ontario, and is called the Clifton House Hotel Co., capital stock, $250,000. The president of the company is W. B. Rankine, of Niagara Falls; vice-president, T. G. Blackstock, of Toronto; directors, W. B. Rankine, T. G. Blackstock, A. J. Wright, of Buffalo, and Dr. H. Y. Grant, of Buffalo. This is no flash-in-the-pan scheme; one would not expect it to be so with such a directorate. Not only have contracts been let, but work has been begun upon the site.

DEBENTURES FOR SALE.

We are offering the Bonds of the Electrical Development Company, (The Toronto & Niagara Power Company) with a large stock bonus at present.

Apply for further particulars—

C. A. STIMSON & COMPANY,
24-26 King Street West, TORONTO, Canada.

The people of Peterborough, Ont., will decide next January whether they wish to seek incorporation as a city. The present population of the town is 14,300.

The Uxbridge Piano Company is making an offer to remove its factory to Brooke, near Owen Sound, and asks for a free site, a cash loan of $20,000, and exemption from taxation for a term of years.

The ratepayers of Glace Bay, Cape Breton, recently voted in favor of borrowing the sum of $25,000 for electric lighting purposes. Of this, $10,000 would be expended in the erection of a power house, and $15,000 for extending the lighting system to Bridgeport.

The British Government, with a view to safeguarding the interests of the Empire, in the event of war, is said to be making arrangements for the assuming control of the Marconi systems of wireless telegraphy, in the United Kingdom, and to be sounding the Colonial Governments on the same issue.

The Robb Engineering Company, of Amherst, N.S., have just made extensive additions, and now may be said to possess one of the largest machine shops in Canada. Our readers will be interested to know that this enterprising firm has recently received several contracts for foreign countries, including some from the United States.

Unless the Toronto World is misled by its enthusiasm for municipal ownership to exaggerate local feeling, Whitby is aroused in favor of a municipal telephone system. A despatch of Tuesday last to that journal credits the inhabitants with "a general desire" for the same, and goes on to state that the town council decided unanimously to hold a conference with the Board of Trade on Tuesday night (10th instant), to consider the proposition to establish independent or municipal telephone systems there. "The town is now supplied with a fine system of waterworks, light and power, and a fire alarm telegraph is needed, as the Bell Telephone Co. gives only a day service."

Mercantile Summary

A commission merchant, who was long well known in Montreal, the late Mr. J. M. Douglas, has left a legacy of $5,000 to the Montreal General Hospital for its Endowment Fund, and $10,000 to establish a poor fund at Port William, Scotland, his native place.

From Sydney, N.S., we hear of the assignment of A. McLeod & Sons, general dealers, who on June last were asking an extension on liabilities of some $10,000.——Max Wener, dealer in clothing at the same place, recently reported as offering 30 cents, has also assigned.

An application has been made for a winding-up order in the matter of the St. Lawrence Waterproof Clothing Co., Limited, a Montreal concern, only recently incorporated, with an authorized capital of $25,000.——The London Rubber Co., a Montreal concern in a similar line of business, and of which Levi M. Rosenthal is proprietor, is also in trouble, a demand of assignment having been made upon Mr. Rosenthal. His liabilities are placed at about $16,000.

The firm of W. Balacan & Son, clothing dealers in Montreal, lately reported as failed, have compromised liabilities of about $4,000 at 20 cents on the dollar.——A Montreal druggist, by the name of J. E. Barnabé, has assigned, owing some $3,000.——Miss Bertha Lanthier, doing a small dry goods business, in the northern suburbs of Montreal, has assigned. She succeeded her late father in 1902.——E. Labelle & Co., another small dry goods concern of the same city, is reported as compromising liabilities of $4,700 at 30 cents on the dollar.

For twenty years, if not more, G. Lafortune, of Joliette, Que., has been engaged in the grocery business with apparently moderate success. But he recently spread out, attempting something of a jobbing trade, and also carried on a stand on the Bonsecours Market, in Montreal, where he handled provisions and produce. The expansion has proved too big an undertaking for a man of his comparatively limited education, and he recently approached his creditors with an offer of 50 cents on the dollar, which apparently has not been acceptable, and he has now assigned on demand. He is said to owe $26,000 direct and indirect.

At Shawinigan Falls, Que., the failure is noted of C. Gingras & Fils, sash and door manufacturers, who, two years ago, succeeded Goulet & Co., with whom the senior was formerly employed as foreman in the same business. He had previously been unsuccessful in Montreal.——C. G. Tremblay, general dealer, at Katevale, Stanstead County, Que., has assigned. In former years Mons. Tremblay was a hotelkeeper at Pointe a Pic, near Murray Bay, where he failed in 1894.——A demand of assignment has been made upon Dr. A. Fournier, doing a drug business at Ste. Anne de Beauprè, Quebec. The business was started only last spring. Apparently the doctor had miscalculated.

Mercantile Summary.

Parties, who are presumed to be acting in the interest of the Grand Trunk Pacific Railway, have secured an option on the charter of the Pacific, Northern and Omineca Railway from Kitimaat to Hazelton, B.C., which expires on January 1st next. The line in question is about 135 miles in length, and, it is believed, will be used as a distributing point for materials, etc., on the other side of the Rockies.

An interesting effort is being made in Utah to determine the exact effect of the smoke from smelters upon farm crops. Many growers, near Salt Lake City, claim that they have suffered damage by the injurious fumes given off from such establishments. The annual value of agricultural products in Utah amounts to $17,000,000, while the metallic output is practically twice as much, so it is of importance that conditions should be regulated so that neither industry is injured, either by direct effects or by restricting legislation.

CENTENARY FIRMS AND CORPORATIONS.

That an aristocracy exists among our American commerce is known perhaps to but few outside the limited list of venerable business and manufacturing firms which have been admitted to its select and honorable circle. This exclusive society, the Association of Centenary Firms and Corporations, it should be known, has for its apt motto, "'Gainst the Tooth of Time and Razure of Oblivion," and was formed about fifteen years ago in Philadelphia by eight firms that could meet the requirements of a century's active existence, under continuous management of the descendants of the original founders of the plant. There are in the nature of things few firms in America that have had a sustained vitality for 100 years, and even a less number that have remained in the same family during all the time. Yet this aristocracy of commerce has enrolled over thirty on its lists, the larger proportion being from Philadelphia, which boasts the three oldest firms of the same family, dating from 1687, 1718, and 1731, respectively. Two New England families appear on the list, in the A. H. Hewes Company, of Cambridge, dating from 1765, and the firm of William Bond & Sons, of this city, 1788.—Boston Transcript.

RE-INSURANCE POLICIES.

An important decision has just been rendered by the Supreme Court of Canada. On the appeal of the Victoria-Montreal Fire Insurance Company, defendants in a suit taken against them by the Home Insurance Company, of New York, on a policy of re-insurance, the Supreme Court dismissed the action with costs. Some of the points were interesting. The case was as follows: The Western Assurance Company insured the railway property of the Canadian Pacific and Canada Atlantic railway companies and re-insured a portion of this risk with the Home Insurance Company of New York. This latter company in turn re-insured a portion of its risk with the Victoria-Montreal Fire Insurance Com-

pany. Such contract of re-insurance was not in the form of a treaty contract, but the standard form of fire policy of New York was used, and a description of the risk contained in a typewritten rider attached to and forming part of such policy. The policy contained the usual condition that no suit or action for the recovery of any claim should be sustainable unless commenced within twelve months next after the fire. This same condition was contained in the policies of the Western and Home companies.

In the Ottawa-Hull conflagration on the 26th of April, 1900, a large quantity of railway property was destroyed. The loss was adjusted by the Western Assurance Co., and paid the following March. The Home paid its proportion of the loss under its re-insurance policy, but neglected to bring action against the Victoria-Montreal Fire Insurance Company until the following June—more than one year after the fire.

The case was tried before Mr. Justice Trenholme in the Superior Court, who maintained the action of the Home Insurance Company to the extent of $3,727.68 with interest and costs, holding that the printed condition limiting the right of action to one year from the fire was not applicable to a policy of re-insurance and that it was stipulated that liability for re-insurance should be as specifically agreed thereon, and that the substantial part of the contract was contained in the typewritten rider.

This judgment was unanimously confirmed in review, by Judges Mathieu, Lavergne and St. Pierre, and a number of United States cases were cited in support of such judgment.

The Victoria-Montreal Fire Insurance Company appealed to the Supreme Court, and that court, by a majority of three to two, reversed the decision of the lower courts, and held that the condition of the policy limiting the right of action to twelve months was applicable to a contract of re-insurance, and that the stipulation of the contracting parties in such respect must govern.

⁂

MONTREAL STREET RAILWAY.

The annual meeting of the Montreal Street Railway Company took place on 2nd November, and was very brief. Hon. L. J. Forget occupied the chair, and the annual report was passed with apparent satisfaction and very little comment. It came out that the removal of snow cost the company $80,000 in the twelve months, and ex-Alderman Cochrane said it cost the city as much more He declared half the aggregate was wasted, and the chairman admitted that there was a great waste. Mr. W. G. Ross, managing director, stated that the company had relaid 16 per cent. of their total mileage in the most substantial manner, using 96-pound rails with steel ties and concrete bed. The election of directors resulted in the re-election of L. J. Forget, K. W. Blackwell, W. G. Ross, F. C. Henshaw, Sir H. Montague Allan.

CANADIAN WEST INDIA STEAMERS

Sail from Halifax for Bermuda, The Windward Islands and Demerara every other Monday, and for Jamaica once a month.

The demand for Canadian goods in West India markets is constantly growing, and prospective exporters should inquire as to freight rates by this line.

PICKFORD & BLACK,
HALIFAX.

TORONTO MARKETS.

Toronto, November 10th, 1904.

Chemicals, Drugs, Etc.—Trade in general is fair; indeed, since the cold weather set in, it may be described as of good volume, particularly in the country districts. Several drugs are still on the upward grade, particularly carbolic acid, iodine, salts, menthol and such articles, for which the demand from the East is heavy. Opium, however, is in somewhat dull request. Cod liver oil is firm. New York advices speak of normal conditions in both drugs and chemicals, while dealers in the United Kingdom speak of slack trade both for home and export.

Dry Goods.—More activity has been discernible in general dry goods this week than for some time past. All seasonable goods are moving out fairly quickly. Woolens, especially underwear, heavy skirtings, etc., are in particularly good demand. Prices in both cotton and woolen goods still continues exceedingly firm.

Flour and Grain.—The flour market is steady. The price for ninety per cent. patents is $4.35 to $4.40, in buyers' bags, eastern or western freights. Bran and shorts are moderately active. Oatmeal is distinctly easy. Manitoba wheat has dropped a few cents. Peas have advanced 1 to 2 cents. Buckwheat has also gone up, being now quoted at 54 to 55c. Other grains remain unchanged. Not very much business is passing.

Fruits and Vegetables.—An active trade, considering the lateness of the season, is being transacted. Peaches are practically over, and the few now arriving are of poor quality. There are plenty of Malaga grapes now in the market. Florida oranges are beginning to arrive and sell readily at $3.50 to $4. Cranberries are somewhat easier. Apples, barrels, 75c. to $2.25; pears, 25 to 40c.; grapes, 20 to 35c.; cranberries, per barrel, $7.75 to $8; do., per box, $2.75 to $3; oranges, Jamaicas, barrel, $5 to $5.50; Floridas, $3.75 to $4; lemons, Messinas, $3.25 to $3.75; bananas, 1sts, bunch, $1 to $1.75; Malaga grapes, $5 to $6; tomatoes, 20 to 30c.; green peppers, basket, 20 to 30c.; red peppers,, 30 to 40c.; Canadian celery, doz., 20 to 30c.; sweet potatoes, barrel, $2.75 to $3; Spanish onions, case, $3.50.

Groceries.—In spite of the recent heavy advances in all grades of sugars, the movement is quite brisk. Evidently, many dealers are by no means assured in their minds that there will not be further advances. In other lines business is fully up to average, but is without special feature. A firm market still prevails for canned goods, especially tomatoes which are already quite scarce. Teas are moving with about normal freedom. Dried fruits are a little on the easy side, except currants, which retain a certain degree of firmness.

Hides, Skins and Leather.—A firmer feeling prevails for hides, which are quoted higher. Calfskins are steady. The leather market is dull. In tallow there is no change.

Hardware and Cement.—Prices for cement continue as before, with a good demand, no doubt due to the rush to complete building operations before the severe weather. In shelf hardware of a seasonable nature, the demand is brisk and both travellers' and mail orders are coming in satisfactorily. Builders' supplies, too, are in active demand. From now on until the close of navigation, there will no doubt be a busy time for the wholesalers. The same applies to metals of a heavy description in which the movement is fully up to the normal.

Live Stock.—The quality of the offerings at this week's market showed considerable improvement, and the demand was quick to respond. Prices made no quotable change, but the tone was distinctly better. There were some poor specimens of animals shown, however, and for these there was but little enquiry. This applies both to butchers' and export cattle. Good stockers and feeders sold readily. There is a steadily good demand for better grade milch cows. Calves were firmer. Hogs continue easy.

Provisions.—Deliveries of butter are larger, the factories devoting now more attention to this commodity than to cheese. The cheese market continues firmer, Old Country dealers, with small stocks on hand, having been forced to buy more freely. Eggs continue firm at somewhat higher prices. Poultry is unchanged with fairly good supplies coming in. Hops remain about the same as last week. The smoked meat trade has a firm undertone.

Wool.—Firmness still prevails, but little business is being done, domestic supplies being almost done.

⁂

—Mr. S F. Walker, of Bath, Eng., a well known electrician, expresses his opinion that in the future ocean vessels will be driven by electricity, stored in accumulators, so that by wind-engines every puff of wind can be utilized. Failing wind assistance, the crew itself might, he thinks, in extreme cases, be employed in charging the accumulators by means of the capstan. The effect of such a development of the use of electricity upon the coal question would be enormous. "Every wind-swept island, such as St. Helena, says this expert, becomes the equivalent of a coaling station, without the necessity of carrying coals there. The time will come when ships, instead of coaling, will go alongside a wharf or moor to a buoy and connect to a source of electricity, filling up their accumulators quietly, and without the dust and annoyance incidental to coaling."

THE KAWARTHA LAKES.

The Muskoka District has proved so increasingly attractive of late years as a summer resort, a health resort, a hunting region, and a place for a few days' visit at any time from May to November, that it is interesting to learn that efforts are to be made to popularize the Kawartha Lakes district for tourists. This charming stretch of water and forest has much to commend it. Those parts of Victoria and Peterborough counties from Fenelon Falls, on Sturgeon Lake, eastward some forty miles, are admirably adapted for summer visitors, who want boating and fishing in the summer or hunting in the fall. But the house or hotel accommodation has thus far proved but little inviting. Quite recently, the Sturgeon Point Improvement Company, Limited, has been incorporated, the object of which is to construct an up-to-date hotel on that beautiful spot, together with a number of cottages. The incorporators of this company are: Messrs. John D. Flavelle, and Thomas Stewart, of Lindsay; W. T. C. Boyd, of Bobcaygeon; J. A. Bucknell, of New York, and Dr. George Sterling Ryerson, of Toronto.

There are golf links within a short distance from the property owned by the company, and tennis courts are to be laid out. It is also stated that Sturgeon Point can easily be reached by automobile from Toronto and other central points. The climate is exceptionally dry and healthy, the elevation being indeed above that of Muskoka. The project seems an eminently feasible one, and we look with confidence for its success.

MONTREAL MARKETS.

Montreal, 9th Nov., 1904.

Ashes.—Quotations are firm at lately advanced prices, and are likely to continue so until the close of navigation a fortnight hence. Offerings are still very limited. We quote $5.90 to $6 for first pots of prime quality and good tares; seconds, about $5.50. There is still an entire absence of pearls.

Dairy Products.—Last week's shipments of cheese were pretty large for the close of the season, reaching 72,146 boxes, nearly 6,500 boxes more than for the same week a year ago. Butter shipments, however, were quite moderate, having been only 7,168, against 13,400 for the corresponding week in 1903. While the cheese market has made a pronounced advance since last writing, definite quotations are difficult to give at the moment, the views of holders and buyers being so far apart. For finest Ontarios from 10⅛ to 10¼c. is asked, and it is claimed sales of fine Quebec colored have been put through at 10c. or a shade over. Towards the end of last week some stiffness was shown in the butter market, which has not been fully sustained, but fine creameries are quoted pretty steady at 19½ to 20c.; dairy makes, 15½ to 16c. per pound.

Dry Goods.—City retailers in this line still report trade as quiet, and general

sorting business is not at all active, though a fair number of buyers have been visiting the city this week from the larger centres, looking for bargains in job lots, expected as generally to be offered in anticipation of stocktaking, which becomes general towards the end of the month. Payments on the 4th of the month are reported better than average. Several leading houses report returns approximating 90 per cent.; others report some calling for renewals from the Eastern Provinces, and in certain cases returns were not complete from the far West at the time of writing. With regard to values of textiles, nothing interesting is reported.

Groceries.—A freer movement is reported, especially in dried fruits and other holiday lines, and general collections are better than last month. The sugar market continues to display great strength, a further advance of 10 cents a cental having been established by the local refineries on all grades of refined since last report, and the general conditions in the foreign markets for raws would apparently favor the belief that some apparently hold in the probability of still further advance. The present factory price for standard granulated is $4.85. Molasses is steady at 28 to 29c. for standard Barbados in puncheon lots. In teas there is still an absence of any brisk enquiry.

Hides.—Since last report there has been a further advance in lambskins of 5c., making the present quotation 95c. each. Beef hides remain at 9c. per lb. for No. 1, with very fair sales reported to tanners at 9½c. per pound.

Metals and Hardware.—The general purchasing in these lines is still marked by a spirit of moderation. Values of iron and iron products show no special change, but in other lines of metals there is a distinct tendency to increasing firmness. Copper is now quoted up to 14½ to 14¾c. in an ordinary way; lead is advanced to $3.45 to $3.55; spelter, to $6 to $6.25; ingot tin, 31½ to 32c., and antimony is firmer at 7¼c. The market for sheets in England is firmer, but no local changes are noted in quotations. Tinplates of standard brand and weight are quoted at $3.65 to $3.90 for cokes and charcoals, respectively; Canadas, $2.25 to $2.30; ditto, galvanized, $3.50 to $3.90 for fifty-twos; black sheets, $2.20 to $2.25 for 28-gauge; galvanized sheets, $4 to $4.15; boiler plate, $2. Iron pipe is easy at $4.07 for inch, with concessions for lots. Pig and bar iron remain as before.

Oils, Paints and Glass.—Orders have been coming in very fairly the last week or two, and business is generally reported as satisfactory for the season. Linseed oil is quoted at 43c. for raw, and 46c. for boiled in an ordinary jobbing way, though these figures are reported to be occasionally cut for fair lots. Turpentine is steady at 81c. per gallon for single barrels. Fish oils are little asked for, and prices are unchanged. For pure, white lead, $4.50 is the nominal quotation. Window glass is very firm at $3.25 for first break; some small supplies have come to hand in this line lately, but general stocks are quite low.

* * *

W. M. Drader's stave and heading factory, at Chatham, Ont., has been destroyed by fire, at a loss of $20,000, and with a hundred men thrown out of employment.

After December 5th, the railroad freight rates on grain from Chicago to New York will be from 15 to 16½c. per hundred pounds for export, and from 17½ to 20c. per hundred for local delivery. It is understood that the Canadian Pacific and Grand Trunk Railroads will also shortly issue a new tariff embodying similar increases.

The ice-breaking experiments on the St. Lawrence are being watched with keen interest both by shipping companies and by the Marine Department. If successful, there appears to be a probability that the Government will charter two powerful tugs, for ice-breaking purposes, to steam between Lake Superior ports in the endeavor to prolong the period of navigation.

A PRAYER.

O, Powers that be, make me sufficient to my own occasions.

Teach me to know and to observe the Rules of the Game.

Give me to mind my own business at all times and to lose no opportunity of holding my tongue.

Help me not to cry for the moon or over spilled milk.

Grant me neither to proffer nor to welcome cheap praise; to distinguish sharply between sentiment and sentimentality, cleaving to the one and despising the other.

When it is appointed for me to suffer, let me, so far as may humanely be possible, take example from the dear, well-bred beasts, and go away quietly, to bear my suffering by myself.

Give me to be always a good comrade, and to view the passing show with an eye constantly growing keener, a charity broadening and deepening day by day.

Help me to win, if win I may; but—and this, O Powers! especially—if I may not win, make me a good loser. Amen.—Robert Frothingham, Advertising Manager, "Life."

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.

W. S. DINNICK,
Vice-President and Managing Director.

AMERICAN IRON AND STEEL MARKETS.

Speaking of the iron and steel markets of the United States, the Iron and Machinery World says it is a sellers' market for almost all products. The volume of buying is larger and prices are higher. There is a keen demand in all markets. There has undoubtedly been some increase in the consumption of iron and steel and chances favor a further increase in this consumption. But the present and recent rather spasmodic demand is not traceable to any sudden gain in the consumption. That has been gradually increasing for some time. The buying represents a change in the policy of the users. The bear market has turned to one of buoyancy, and it has stirred up a vast amount of enquiry and a very decided gain in the buying. The information that comes from Pittsburgh is bullish. Coke is reported to be considerably stronger, with evidences that large consumers are making heavy purchases. Bessemer iron has advanced in the valleys to $13, which is a gain of $1 in a very short time. This tends to increase the cost of steel, and that condition has been anticipated this past week in the advance of forging billets to the extent of from $2 to $9 per ton. There is believed to be a probability that iron ore will advance. The spurt in the new activity coming close to the end of the season of navigation there cannot be the replenishing of stocks for winter use that would have occurred had there been a few more weeks of good sailing weather, and all indications point to higher prices of ore for the new season. Foundry irons continue the strength they first exhibited several weeks ago. The southern makers have taken the lead and they are holding the same. Since October 1st there has been an advance of from $2.50 to $3.50 in the price of southern irons and the present policy of most furnace interests is to withhold quotations. Just what part the protracted strike of the coal miners now plays is not clear, but it is stated that the furnaces have generally resumed operations to a large extent and that the effects of the strike will soon be obliterated. However, there is little iron offered and at least some stocks which were believed to have been large are practically exhausted. In steel manufactures there is the same activity. Rails are the only exception. Some preliminary buying of southern rails indicate that for next year's use the purchases of steel rails will greatly exceed those of 1904.

HOW HONESTY PAYS.

Some years ago a Detroit firm failed —"went to the wall," as the saying is. One partner fled to Canada, appalled at the size of the crash. The other "faced the music," and paid every creditor in full, though at great personal hardship and sacrifice. He was reduced from comfort to comparative poverty.

Not long ago this man applied to a capitalist for a loan of $100 or so. The capitalist shoved over the money and a note at nominal interest.

"I will get an endorser," said the borrower.

"Never mind," said the capitalist, "I don't care for any endorsement."

"Why not?" asked the surprised borrower.

"No man who pays debts the bankruptcy courts would relieve him of, as you have done, needs any endorser in borrowing from me," was the reply. "You can take your own time about repaying. Never mind that 90-day clause. I want to give you some dividends on your honesty."—Detroit Evening News.

UNITED STATES FINANCES.

Henry Clews & Co., in their special circular, under date of New York, November 5th, say:

October witnessed an active stock market, with many securities at the highest point of the year. November opened with reactionary symptoms, which caused general profit-taking and a recession of several points in the active shares. At times the market was excited and feverish, ready to respond quickly to either favorable or unfavorable developments. One thing is certain, the "boom" tendency has been effectively checked, leading banking interests having openly opposed such wild speculation as brought on the crisis of 1902, and to their efforts must be attributed the first signs of reaction. The next causes of reaction were the war scare between Russia and England, followed by unexpected gold shipments. These influences induced a change in speculative opinion, and in place of a one-sided blindly optimistic and dangerous bull market, we now have a healthy division of opinion that promotes both activity and strength. The market was rapidly becoming topheavy and extremely hazardous, but the creation of a bearish element sufficiently strong to search out the weak spots and bring in a fresh buying element materially improved the undertone of the speculative situation, giving the market a breadth and strength which was previously lacking. As to the future of the market, granting all that has been claimed regarding the effects of a profitable harvest, of business improvement, of easy money, of increased railroad earnings and other favorable features, such as the activity in iron and copper, it must be recognized that these have been amply discounted. On their merits the majority of good stocks are really high enough, some in fact are too high, and bargains are scarce if not entirely absent. At the same time the speculative spirit has been thoroughly aroused and is being skilfully nursed by those who still have stocks in plenty to sell. The big banking houses are also interested in preventing any serious decline. There is an excellent investment demand for good securities, demonstrated by the rapid absorption of recent bond issues and affording bankers a desirable opportunity for carrying out long deferred plans. Some uneasiness was caused by the renewal of gold shipments. So far as the actual loss of the metal is concerned, there is no cause for anxiety. Our present stock is unusually large, and we produce about $80,000,000 annually, to say nothing of receipts from the Klondyke and Australia. The worst that could be anticipated would be a temporary reduction of the bank reserves and a hardening of money rates, the latter contingency one that would not meet with much disapproval in conservative banking circles. The prospects are for an active and irregular market, with possibly wide fluctuations. Higher prices may prevail before the top is reached, but values are already on a level and the temptation to take profits is increasing. A number of large traders have sold out and become bears for the time being; hence a division of opinion occurs which works for irregularity and more active trading.

Wanted.

A competent Inspector for the Province of Ontario on salary and commission basis. Only those who have had experience in Casualty Insurance need apply.

J. WM. MACKENZIE,
Chief Agent for Canada,
Maryland Casualty Co., TORONTO.

* * *

—Bradford, Eng., wool buyers, who purchased crossbred colonial wools at the last sales in London, report that, although they have been unable to dispose of their purchases at a profit for local consumption, United States users have taken most of them at top prices. In this way the market has been left with its stocks at an unusually low ebb, and holders of both raw wool and combed wool tops made from these sorts are quite prepared to hold on to any that they may have rather than make any concession in price to meet the views of the local users. At the present time business here is rendered most difficult, as wool in the raw state is worth more than when combed or in the form of tops, which, in their turn, are dearer than the yarn made from them, and yarns at their present quotation cost far too much to be profitably used for the manufacture of any kind of piece goods. It seems necessary, a correspondent of the Draper's Record says, for the general trade to take into account all the points of the present situation in regard to colonial crossbred wools, because in many cases wholesale merchants have now come to the end of their stocks of cheaply bought goods made from this kind, such as all-wool Bradford dress serges; and, as there appears to be a growing demand for these and similar fabrics, the probabilities of the course of the market must influence them in their future arrangements. In fine merino the markets, both in England and on the Continent, are extremely firm, and the reported weakness in the early days of the Australian sales has had no detrimental effect whatever. As there are distinct indications of an increased consumption of this article in the worsted and woolen trade, it would certainly be risky for buyers to defer cover-

Managers and Underwriters.

ing any orders they may have, in the hope of getting in at lower rates in the near future. The unusually large demand for the United States for both colonial and home-grown wools of a coarse-fibred nature continues. Stocks and prices have been much affected by the very large exports.

⁂

—A countryman gave the following reason for not subscribing to a local newspaper: "I get all the news there is. My wife belongs to the woman's club, one of my daughters works in the millinery shop, and the other is in the delivery window at the post office, and I'm the village grocer."—Boston Commercial Bulletin.

⁂

—If a man or woman come into your place of business and inquires for directions to some competitor's store, what do you do? The better plan is to tell it in as pleasant a manner as possible. Go to the door and show the way or make a pencil sketch on one of your own cards, showing the location so it can readily be found. Be just as courteous as you know how and you will be remembered. Don't take the person by the neck and turn on a hot air blast of your own, but give an exhibition of unobtrusive courtesy that will make its impression. Instances are not wanting to show the value of courtesy under all circumstances.

THE COMMERCIAL

THE WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, The Best Buying Provinces in Canada?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MacLEAN CO., Limited,
Publishers, Winnipeg.

Eastern firms should subscribe for The Commercial and keep posted on Western trade

The Altar Of Friendship

Do not hazard your all on the altar of friendship. Thousands of men have been ruined by going surety for friends. Better far for you to pay a strong surety company the premium on the bond. It will pay you to enquire about our policies.

Agencies in all principal Towns and Cities in Canada.

—The market for raw silk has continued quite inactive, and concessions offered by Japanese dealers and a decline in exchange that has made it easier to do business in the Canton and Shanghai markets have failed to stimulate demand. At the same time there has been continued improvement in nearly all divisions of the silk goods markets, both in this country and abroad. Many mills are increasing their production, and not a few new ones are being started or projected. This means an increased consumption of raw silk, and will force manufacturers into the market in the near future.—Dry Goods Economist.

* * *

—The country storekeeper in Canada and the States may have a hard time of it trying to compete with the mail-order houses, but may consider himself lucky, compared with the merchant in the smaller towns of Great Britain. There they not only have rural free delivery, but there is a parcels post by which boxes of dry goods or firkins of butter may be forwarded by mail. To add to the local retailer's woes, the Government is considering the establishment of a postal C.O.D. system, by which the letter carrier will collect the money for the mail-order concern. Naturally, the storekeepers are up in arms, and by a united "holler" they may succeed in having his obnoxious project squelched, at least temporarily. They have a system over there of deluging the Postmaster-General with postal cards saying, "No," to the proposed scheme.

* * *

—Business in the fancy departments of dry goods at Manchester has somewhat improved, and between now and the middle of November there should be a much brisker movement in these branches. The demand for heavy goods is, however, somewhat unsatisfactory, and in the linen and white goods branches are far from brisk. In the silk sections there has been more doing in dress goods of Continental makes, and Macclesfield articles, such as handkerchiefs and mufflers, have also been the subject of a larger enquiry, although trade generally in the town is not brisk. The movement in other silk districts is not large enough to call for special remark. There has been a fair turnover in the Belfast, Ireland, linen market during the week, and prices continue steady. Flax keeps high in price. Rates for Russian flax seemed to tend downwards for a few days, but have firmed again, and there seems little likelihood that raw material will be cheaper for some time. Export trade is moderate, and tends to improve. Orders from the United States are not coming forward as might be expected, but a better feeling is noted, and an expansion in business may shortly be looked for. Cuban trade should also show an improvement very soon. There is a steady demand from the South American markets. Canada is beginning to buy more freely, and there is a growing business with Australasia. The European markets are quiet.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1 800,000.00.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

30 Days of Grace

for the payment of Renewal Premiums is one of the many privileges the SUN LIFE OF CANADA grants its policy-holders. Should the Assured die at any time within the days of grace the claim would be promptly paid, even though the premium had not been paid.

HIDES AND THE ALLIED TRADES.

Just now more than the usual amount of interest is being displayed in the situation of the hide market. The trade has seldom seen hides manifest more strength than at the present moment. Prices are now very high—perhaps higher than ever before known except, it may be, in some ephemeral flurry. The cause is the universal lightness of stocks; in no part of the world, so far as can be seen, is there a surplus. A report from Chicago dated Monday last, stated that "there were no sales of common dry hides on Saturday, a condition due to the scarcity of stock, which is also responsible for the strength of the market. Prices are unaltered but well maintained on the basis of previous quotations, as noted below. The market for city slaughter hides is without change or new feature. Continued absence of important offerings restricts business and keeps prices firm on the former basis of 13⅛c. for native steers, and 11¾c. for branded. The market for calfskins is unaltered and steady at former values."

English reports are similar. Large quantities of hides are being bought there for foreign markets, that is, when they can be obtained, and the consequence is that there is an insufficiency for local requirements. The Toronto market reflects these world conditions, and prices are very firm. Steers, cows and calfskins have made no actual change since last week, but sheepskins are now quoted at 90c. to $1, and the undertone to the market is very firm indeed. Calfskins especially are very strong, due partially no doubt to the preference for box calf leather in the boot and shoe manufacturing business.

The butchers are jubilant at the present condition of affairs, but apart from them, it cannot be said that the situation is pleasing to any class. The tanning trade is unsettled, as well it may be under the prevalent high prices for their material. And the boot and shoe manufacturers also find that the value of their finished product is by no means high enough to be on a parity with the cost of leather. The general leather trade is affected by the same cause. Merchants feel unsettled, though from every source come anticipations of brisker conditions later on.

The boot and shoe manufacturers, both in Ontario and Quebec have enjoyed a fairly good season so far as it has gone. October was quite brisk, and the demand from the North-West was particularly active. The sale for winter goods has been stimulated by the cool, frosty mornings, and travellers almost universally speak hopefully with regard to the remainder of the year. As to the prospects for spring, they are still more optimistic. Some houses have already sent out part of their spring samples, and they seem to have been well received. Styles show no very decided change. Patent leathers are still in demand, but only the better qualities "go," and these are looked upon as accessories, merely, and additional to a good strong pair of box calf. There is a satisfactory demand for tans, but it is not markedly large. White canvas shoes seem likely to be in brisk request. Both men's and women's boots are tending towards a narrower range of toe, but particularly the latter. However, there is no tendency to extravagance in the opposite direction for either class of footwear. Trouble has again arisen in some of the Quebec factories, but so far as we can learn it has not yet amounted to much. Payments from the country districts are reported to be fully up to normal expectations.

THE TEXTILE STAPLES.

High prices for wool and extraordinary small stocks of it characterize all parts of the world. Canada is no exception; dealers remember no time when there was such a small surplus of wool on hand. Prices continue high, and at about the same level as quoted a week ago; but they have, under present circumstances, but little significance, as the business being transacted amounts to practically nothing. Conditions in the United States raw wool market are described as follows by the Dry Goods Economist:—

> "Despite the fact that no great amount of business has been transacted during the past week, the business done has been about up to the recent average. The prices, however, are showing a very distinct disposition to harden, and this disposition is growing stronger week by week. That manufacturers realize they cannot hold off is shown by the celerity with which they immediately take hold of any lots at particularly good prices that they can secure. Nor is this disposition on their part induced by a spirit of speculation. They realize that the supply is none too heavy, and that they are merely taking care of their actual wants in making these purchases. They are all well aware that the possibility of a considerable increase in prices before a great while threatens to become a reality. In the Boston market the situation remains the same. Prices there are very firm, and, while the demand is not over active, there is a good call for every class of goods. The supply is becoming rather limited, and there seems little chance of immediate relief. In the market this week have been some very large consumers, and the fact that the supply all over is short is well attested to by the presence in Boston of certain Philadelphia dealers."

Wholesale merchants in Canada state that while the above situation naturally causes values of woolen goods to be held to very firmly, yet they are moving out well. The demand from all parts of the country evidently showing large consumptive requirements, whatever may be the prevailing prices. Heavy blankets and underwear are in particularly good demand, and so are winter dress goods, especially, we are glad to note, of domestic make.

From the British woolen centres comes word of increased activity consequent upon the Russo-Japanese war. There is said to be an astonishingly large demand from Japan for heavy woolen clothing, blankets, etc., to such an extent indeed that the manufacturers in Yorkshire can scarcely keep up with orders, and certainly have but scanty stocks on hand for home requirements.

In the cotton market, the situation shows no exciting features. Raw material is fairly firm, but seems to have become settled on a quieter basis than that which prevailed a few months ago. Buying does not appear to be especially brisk, there being such a wide divergence of opinion between the holders and the mill owners as to probable future valuation. The prices of made-up goods, however, continue quite steady, and a normally good trade without special feature, is being carried on throughout the Dominion.

CUSTOMS REGULATIONS HAMPERING TRADE.

We have heard it said by importing merchants that if a Canadian dealer wants to bring his goods into Canada at the lowest possible expenditure for customs duties, he must go to the Germans, they being the most painstaking and accommodating as to furnishing low invoices and all that this implies. Next to the Germans, they declare, come the United States exporters or manufacturers, with consciences only a little less elastic; while the British are the most honest of the three groups. Such a sweeping statement must not be taken to include the whole of any country's traders, however, but only those who, for the sake of increasing their trade, are willing to get "on the windy side of the law" and make a more or less dainty compromise with the exact truth.

Among foreign exporters of this class, the officers of the Canadian customs have a difficult time, for it will go hard but conscienceless ingenuity will often get the better of departmental red tape and even of intelligent experts. We learn from the Montreal Gazette's last London letter that the British Chambers of Commerce are still much dissatisfied with the Canadian customs regulations. They are unanimously agreed in condemning the regulation that every British shipper must declare the value of the goods in this country, and the price charged to the Canadian importer. The view is held that "although ostensibly directed against unfair dumping, it means that the importer in Canada is to be fined for making a good bargain in purchasing British goods, and it also places British shippers under suspicion in a way they despise, for English traders, as a rule, do not readily submit to customs regulations, which imply that they are suspected persons." Several British Chambers of Commerce have declared that the new regulations altogether are calculated to hinder trade between Canada and Great Britain, and they are expecting when the turmoil of the Canadian general election is over, (this was written on October 29th), "that whichever Government is returned, these obnoxious regulations will be reconsidered."

HUMBUGGING THE ENGLISHMEN.

From time to time we hear echoes of the warnings which were addressed by this journal during 1902 and 1903 to exporters of the United Kingdom that they were being misled, and money obtained for advertisements dishonestly from them by a clever canvasser for two Montreal trade journals. We obtained from Ottawa last year, and printed, proof under the signature of the Canadian Minister of Justice of the bad faith of this man in professing to represent a journal subsidised and vouched for by the Federal Government, which was, however, never so vouched for. The "Shareholder," of Montreal, and the "Canadian Manufacturer," of Toronto spoke out roundly upon the dishonesty of the canvasser, and upheld the stand the "Monetary Times" had taken in the interest of decent journalism.

In the issue for October 26th of an important London weekly, the Commercial Intelligence, we find a letter pointing out at some length, that "British manufacturers are wasting thousands of pounds in bringing, or supposedly bringing, their goods to the notice of the Canadian buyer." And instances are given where goods not used or likely to be used in Canada are advertised to no purpose; while expensive catalogues and circulars respecting English boots, articles of personal wear, and metal manufactures are being wasted in thousands on supposed Canadian buyers in other lines of trade. The whole upon the absurd belief, fostered by certain Canadian journals canvassed for in England by a person who dares not canvass any decent house in Canada, that trade with Canada can be forced by misrepresentation. Says the letter: "I say it with regret, that although we have a number of trade papers which offer an excellent field, and are conducted on honorable lines, we have more of which the same cannot be said; and in his own interests the prospective British advertiser will do well to make careful enquiries into the standing of the mediums brought under his notice. * * * What is urgently needed is the weeding out of those who, trading on the respectability of others, make a living out of their sheets without the slightest show of carrying out their own part of the agreement."

On October 20th, a Liverpool hardware house desiring Canadian trade, wrote us a letter. It describes how a canvasser for the Montreal Trade Review, after promises and representations obtained from them a signed order for an advertisement. "He was to bring us the next day lists of firms where he could influence business, and to arrange with us the matter for the advertisement. We have never seen him since." The unscrupulous canvasser, however, cut the firm's card from another paper and it appeared in the Trade Review. Then, in spite of instructions from the Liverpool house to discontinue, the advertisement was inserted, and repeated drafts made for the price, which drafts were refused payment. Next came a letter from a Montreal firm of solicitors, whose names are given, threatening proceedings to compel payment. "Any help you can give us to resist what is evidently a fraud will greatly oblige."

The present is the third or fourth year during which this kind of disreputable game has been played upon scores and scores of British houses, and we are glad to learn that reputable journals in Canada are joining in the exposure of it, and also that English houses who have been imposed upon in this way are combining to protect themselves against its continuance.

⁂

FROZEN HYDRANTS.

Last winter many Canadian cities suffered from the freezing of hydrants causing not only inconvenience to firemen, but increasing the peril from conflagrations to an alarming extent. No doubt the primary cause of the frequent recurrence of the difficulty in question last winter was the extraordinarily long periods of severe freezing weather which were experienced in most parts of the continent, but "Insurance Engineering" very seasonably takes the practical view of giving suggestions for a remedy. Leaving out of consideration the question of temperature, it says that the freezing of hydrants is due to an accumulation of water in the barrel or stock, caused by general use, faulty design, leaky inlet valves, failure to drain hydrants after use, lack of drain valve, impermeable soil, etc. The freezing of branch pipes or laterals connecting the hydrants with the street water pipes is due to not laying them below the frost line, and also to the fact that the water in these pipes does not circulate. It should be noted that in private hydrant systems the latter remark applies also to the main water pipes.

Steam is commonly used for thawing fire hydrants and is probably the best method. Electricity has been used with some success for thawing frozen water mains, but it seems to be the general opinion that it is not so well adapted to this purpose as dry steam. Syracuse used electricity last winter, and Inspector E. A. Fitzgerald, of the Underwriters' Association of New York State, speaks of its experience as follows:

"In Syracuse the electrical method of thawing out water services and small mains has been in use all winter. The practice is to carry transformers on a wagon, attachment being made to primaries near point desired. This method keeps the lighting secondaries clear of ground. The service pipe to be thawed out is disconnected from meter. One side of thawing secondary is attached to the house end of service, and the other side to street hydrant or to service in neighboring house. In the latter case, the service in the neighboring house is also disconnected from the house piping. It is important that house piping be disconnected from services, in order that the house pipes be not charged with a dangerous potential."

⁂

TRUTH IN INSURANCE MATTERS.

It is rather important, we may say to our readers, for a person to tell the truth when asked questions by a life or accident assurance office. We are not insisting so much just now on the prime obligation of truthfulness as a principle as upon the sometimes unpleasant experience that lying does not always pay. Here is a case in point, an account of which is cabled from London on Monday last. The widow of one John Jewsbury of Birmingham or thereby, made a claim on an English company for a thousand pounds under a policy on the life of her deceased husband payment of which the company disputed, alleging untruth on the part of the applicant.

A Birmingham jury which tried the case found that Jewsbury had correctly answered all the questions put to him when insuring his life, but on an appeal being taken the Lord Chief Justice decided that the contrary was the case, but granted a stay of execution pending the further appeal.

It was elicited at the appeal trial that Jewsbury had told the company he had never met with an accident. Some time after insuring his life he had a fall while in a Turkish bath and sustained burns from the tiled floor. Blood poisoning developed and proved fatal. But it was discovered at the same time that he had been the victim of two previous accidents. In 1901 he fell while in a theatre and sprained his thumb, and in 1903 he slipped on a banana skin in the street, as a result of which he suffered from water in the knee for five weeks. As neither of these accidents had been disclosed the company refused payment of the claim, and they appear to have been within their rights. The fall which killed him may have been the result of the preceding injury to his knee. There is a curious sentence by a Spanish author which says: "Truth may be stretched but cannot be broken; and always gets above falsehood as oil does above water." Truth in the present case got between Mrs. Jewsbury and her thousand pounds. At the same time we must express the opinion that most Canadian or American companies would hardly refuse to pay a claim on grounds so narrow as those given in this case.

⁂

—A feature in dress goods next spring will be materials formed of a mixture of silk and wool. For house or evening wear they are expected to meet a large demand. They appear most prominently in eolienne and crepe de chine weaves, and nothing more elegant can be seen among the season's offerings.

THE IMPORTANCE OF FORESTRY.

The question is frequently asked, of the trained forester in America, "what is Forestry?" And Mr. E. J. Zavitz, M.A., who contributes an article on forestry education to the University of Toronto Monthly for November, gives a quotation from one of Professor Fernow's writings which helps to furnish an answer: "A forester is not, as the American public has been prone to apply the word, one who knows the names of trees and flowers,—a botanist; nor even one who knows their life history,—a dendrologist; nor one who, for the love of trees, proclaims the need of preserving them,—a propagandist; nor one who makes a business of planting parks or orchards,—an arboriculturist, fruit-grower, landscape gardener, or nurseryman; nor one who cuts down trees and converts them into lumber,—a wood-chopper or lumberman; nor one set to prevent fires or depredations in woodlands,—a forest guard; nor one who knows how to produce and reproduce wood crops,—a silviculturist; but, in the fullest sense of the term, a forester is a technically educated man, who, with the knowledge of the forest trees and their life history, and all that pertains to their growth and production, combines further knowledge which enables him to manage a forest property, so as to produce certain conditions resulting in the highest attainable revenue from the soil by wood crops."

Mr. Zavitz contends that forestry is an art depending on business and scientific knowledge. In an address recently, President Roosevelt said: "The United States is exhausting its forest supplies far more rapidly than they are being produced. The situation is grave, and there is only one remedy. That remedy is the introduction of practical forestry on a large scale; and, of course, that is impossible without trained men—men trained in the closet, and also by actual field work under practical conditions." And indeed in the United States, rapid strides are being made towards a rational forestry policy. The Bureau of Forestry at Washington is composed of technically trained men, assisted in the summer by students from various forestry institutions.

After showing what progress has been made in forestry by different countries of late years, Mr. Zavitz concludes by asserting that technical training is as necessary for the proper treatment of forest lands as it is for the operation of mining or agricultural interests. "A Forestry School in the Province of Ontario is evidently the next step towards the formation of a rational forestry policy. This step should not be difficult, as we have guidance in the experience of many older countries. The natural place for a Forestry School is in a state or provincial institution, such as the University of Toronto. Very valuable relations could be established between such a school and the Crown Lands Department, which has the administration of our forest reserves."

* * *

JAPAN'S FOREIGN TRADE.

The war expenditure of Japan, as is naturally to be expected considering the prolonged and desperate character of her struggle with Russia, is reaching great proportions. And the exhaustive nature of this heroic struggle is made evident by the onerous terms of Japan's most recent borrowing in the money market. As we have shown elsewhere, Japan's requirements for blankets and winter clothing are making whole districts of Yorkshire busy, and in other countries her orders for various kinds of merchandise are enormous.

Nevertheless, the commercial and industrial development of the Flowery Empire continues apparently unchecked. Statistics of Japan's foreign trade for eight months of the current year quoted by the London Economist, indicate that the war had not up to the 1st September checked the country's development. The total exports amounted to 189,595,727 yen, compared with 179,615,518 yen last year, and the total imports to 234,505,482 yen, against 225,486,025 yen. As regards exports, there were increases of 11,929,743 yen and 3,481,044 yen in manufactured articles and half-wrought articles respectively, and a decrease of 5,430,578 yen in raw products. The exports of silk tissues increased by 6,385,000 yen, and cotton tissues by 1,098,118 yen; but raw silk was practically stationary, the figures for 1903 being 41,841,398 yen, and for the present year 41,813,441 yen. Coal exports decreased to the extent of 2,878,239 yen, and those of coarse and refined copper by 2,337,564 yen. In imports an increase of 9,019,457 yen is shown. Raw cotton fell to the extent of 4,862,790 yen in the eight months, and shirting and cotton prints were down by 4,104,423 yen. Raw wool, however, shows an increase of 3,691,555 yen, steam vessels 6,081,131 yen, kerosene oil 5,971,428 yen, and "others" 15,377,720 yen. There were also appreciable increases in machinery and engines, but the imports of rice decreased by 3,430,181 yen, and oil-cake by 5,480,076 yen.

* * *

MONTREAL MANUFACTURERS.

At the monthly meeting of the Montreal branch of the Canadian Manufacturers' Association, held last week, some very strong language was used condemning the delays experienced with express parcels going through the customs examining warehouse. "If an importer of goods wants his goods in a reasonable time, he should have them sent by freight, rather than express," was the way one man put it. And a committee was instructed to wait upon both the Canadian Express Company and the Collector of Customs to register complaint. To further place themselves on record regarding the matter, the Association passed a resolution, as follows: "That in the opinion of the executive committee of the Montreal branch of the Canadian Manufacturers' Association, it is advisable that the express companies should be placed within the jurisdiction of the railway companies." The president, Mr. J. J. McGill, was in the chair, and the members in attendance were: Messrs. W. T. Whitehead, Clarence F. Smith, Charles B. Gordon, D. Lorne McGibbon, J. S. N. Dougall, S. W. Ewing, G. W. Sadler, and D. Williamson.

* * *

A LONDON JOURNALIST'S VIEWS.

It is well to take note of what intelligent observers from other countries think of Canada's arrangements and prospects, especially when such observers betray reasonable reserve, and are not in haste to declare themselves positively and at large with only a globe-trotter's day or two in which to make their observations. Mr. George Paish, editor of the London Statist, gave to a Montreal interviewer the other day his conclusions thus far reached in the course of a visit for the especial purpose of studying our railway system and the prospects of the Grand Trunk Pacific road. He also visits the United States

"The prosperity of Canada," said Mr. Paish, "is governed by three conditions. Firstly, the state of the crops; secondly, by the inflow of new population, and of capital, and, thirdly, by having a good market for its produce. The general condition is favorable to continuous prosperity, because Canada is certain to obtain at least two out of the three necessary conditions, and, inasmuch as the third depends entirely upon the weather, there is no reason to apprehend an unfavorable outlook."

He regards the immigration conditions as promising. "The North-West, I consider to be especially promising, and I am borne out by many American pioneer farmers, who tell me that it is more than probable that the inflow of settlers from the United States will continue. This, I consider to be a very favorable sign, as they are the best type of American farmers, and men who understand their business." While he has no doubt as to the necessity of the G.T.P. from the Great Lakes westward, yet "as to the value and necessity of a line from Lake Superior to Moncton," he cautiously avers, "I have not yet formed an opinion." He is trying to gauge public opinion upon the tariff, but is pronounced in the assurance that we have given England a preference for which she is duly grateful.

* * *

CANADA'S MINERAL RESOURCES.

Canada's mineral resources are only beginning to be known. We purpose giving in this article some circumstances which show that we are thus far only on the fringe of things in that respect. Few people probably realize the great mineral wealth which exists in the Lake St. John region, north of Roberval, Que. Almost forgotten records, however, as well as recent explorations, show that this part of the country is likely to yield large quantities of gold, copper and asbestos. This is saying the least, for there is every probability that with further research other deposits of different character will be discovered. One person who has faith in that country is Mr. Peter McKenzie, of Montreal, who last year found rich beds of asbestos, copper and gold quartz in the neighborhood of Lake Chabugamooc. Some samples of gold quartz and copper assayed by the Government assayer show that the former will yield $64 to the ton, and the latter $55. The breadth of the vein is said to be thirty feet, with a depth of 2,000 feet. Vast quantities of iron ore are also said to exist in the same vicinity, some mounds of iron ore being 200 feet high. A company has been formed to develop these and any other mineral areas which may be discovered, under the name of the McKenzie Trading Company.

According to a report by Mr. W. E. H. Carter, of the Ontario Bureau of Mines, new and important bodies of high-grade hematite ore have been struck in the lower levels of the Williams iron mine on the Algoma Central Railway. This is an entirely new iron area, and if the bodies prove to be continuous may develop into an important field. North of Temagami, he says, there are two promising prospects, one for iron pyrites (sulphur ore), and the other for arsenical pyrites. There are also a number of other iron pyrites and arsenical properties in the district.

The Huronian Company, a subsidiary concern of the Canadian Copper Company, of Copper Cliff, is now completing water power works at the High Falls, on the Spanish River, four miles north of the C.P.R., at the new station, Turbine. The operations are on an extensive scale, the dams being of concrete, and at present the development of 11,000 horse-power is aimed at, perhaps to be increased later.

At the Massey Station copper mine and the adjoining mine, the Hermina, in Northern Ontario, active work is now going on. Further west the Shakespeare gold mine is putting up a five-stamp mill, and at the Avon mine, near by, development work is going ahead.

* * *

CANADIAN BANKERS' ASSOCIATION.

The sessions of this body last week were devoted almost exclusively to the discussion of matters not intended to be made public; matters, that is, which pertain to the relations of banks to each other, and those which are of a routine character. One matter, however, was discussed on Friday which evoked a certain degree of interest. This is the formation of a Bankers' Institute. A committee was appointed to consider the formation of an institute of bankers, the members of which would be the present members of the Bankers' Association.

The gentlemen whose names follow were elected officers of the Association for the ensuing year:

President—Mr. E. S. Clouston, Bank of Montreal.

Vice-Presidents—Mr. Duncan Coulson, Bank of Toronto; Mr. George Burn, Bank of Ottawa; Mr. H. Stikeman, Bank of British North America; Mr. M. J. A. Prendergast, Banque d'Hochelaga.

Council—Mr. B. E. Walker, Canadian Bank of Commerce; Mr. Thomas Fyshe, Merchants Bank of Canada; Mr. D. R. Wilkie, Imperial Bank of Canada; Mr. Thomas McDougall, Quebec Bank; Mr. James Mackinnon, Eastern Townships Bank; Mr. W. E. Stavert, Bank of New Brunswick; Mr. James Elliot, Molsons Bank; Mr. P. A. Lafrance, La Banque Nationale; Mr. G. P. Reid, Standard Bank of Canada; Mr. T. G. Brough, Dominion Bank; Mr. E. L. Pease, Royal Bank of Canada; Mr. G. H. Balfour, Union Bank of Canada; Mr. D. R. Clarke, People's Bank of Halifax; Mr. H. S. Strathy, Traders Bank of Canada.

* * *

DEATH OF MR. DAVID DEUCHAR.

Intelligence of the death of Mr. David Deuchar, general manager of the Caledonian Insurance Company, was cabled last week from Edinburgh to New York. The deceased gentleman was well known in the United States, which he had frequently visited, and had made warm friendships in Canada, too, when he visited his Dominion manager, Mr. Lansing Lewis. He was comparatively a young man, but had done a lot of work in the course of his busy life, and it is quite possible that excessive work and strain shortened his life. The cause of his death, we understand, was suppressed gout.

The deceased gentleman had a long career in the insurance business, for he entered as a boy of fifteen the Standard Life office, whose secretary he rose to be. In 1866 he was appointed assistant actuary of the Caledonian, and three years later joined the Edinburgh Life Insurance Company, becoming secretary and actuary of that company. Not long afterwards he was invited to return to the Caledonian as general manager, which position he continued to hold until he died.

Mr. Deuchar's standing in the insurance world was high. He was an F.I.A. and an F.F.A., and his services as an expert actuary have frequently been in request. He was repeatedly vice-president and president of the various actuarial societies in Great Britain, and was chosen president of the Insurance Society of Edinburgh, lately formed two years ago. From November, 1878, to April, 1887, Mr. Deuchar acted as secretary of the Scottish Committee of Fire Insurance Companies, which brought him into association with the changes made in home tariffs and rules during that period. During the thirty years or more that he has had the management of the Caledonian Fire and Life Insurance Company it has continued to show progress and increased strength. Its insurance and annuity funds now approach three millions sterling. Boasting of being "the oldest Scottish" assurance company, this fine company will next year celebrate its centenary.

* * *

BANKING AND FINANCIAL MATTERS.

The Committee of the Toronto Stock Exchange has elected Mr. J. O. Buchanan to the vacancy on the committee caused by the retirement of Mr. J. Lorne Campbell.

A New York journal hears the story that a membership in the New York Stock Exchange was transferred last week for a consideration of $81,000. This represents an advance of $1,000 from the previous sale.

We hear from Montreal of the formation of a partnership by F. H. Manley and Archibald P. Christmas to do business as financial agents under the firm name of Manley, Christmas & Co. Their offices will be in the Merchants

Bank building. The firm intends to deal in Government, municipal and corporation bonds. Mr. Christmas used to be with Hanson Bros., and Mr. Manley had the agency for some New York house.

We notice the resignation of Mr. George McGill from the managership of the Bowmanville branch of the Ontario Bank, which he has held for the past twenty-seven years as manager. Owing to ill-health he was forced to resign after forty years' service, and intends going to California, where his sons reside. The Ontario Bank staff presented Mr. McGill with a handsome russet leather club travelling bag. He received also a gold-headed cane from his church associates. Mr. McGill is a much-esteemed member of the community of Bowmanville.

Toronto Board of Control a few days ago considered the by-law providing for the purchase of gas stock. As then submitted, it provided for the expenditure of $500,000, and authorized the mayor and other officials to pay such prices for the stock as they deemed fit. The proposition was made at the meeting, however, to provide for an expenditure of $1,000,000, and, this meeting with approval, was passed on to council on Monday, when it received favorable consideration. The by-law was amended so as to meet the new proposal to issue debentures for $1,000,000, and, after receiving two readings, was held over for further discussion.

United States official reports show that more than 50,000,000 money orders were issued by post-offices in that country in the last fiscal year, aggregating $378,788,488 for domestic orders and $42,550,150 for foreign orders. This method of sending small remittances is thus utilized to an enormous extent. Another function of money orders, and a somewhat curious one, is mentioned by the Boston Herald thus: "They also are used by those who do not care to carry too much money with them in making a journey. In more than one instance men have sent money to themselves by money order, thus making it certain that they could not spend the amount so deposited until they arrived at their destination."

We find it stated in the Commercial and Financial Chronicle of New York that Mr. John Gault, who has managed very successfully, since its establishment eight years ago, the foreign branch of the Guaranty Trust Company of that city, will sever his connection with the company at the end of the year and will travel abroad for a prolonged period. Mr. Gault was for many years connected with the Merchants Bank of Canada, and went to New York as its representative. His thorough practical knowledge of banking acquired in thirty-five years' service has been of much benefit to the company he is leaving. He will be missed, adds the Chronicle, by a large circle of friends in the financial district.

Banks and bankers in the United States occasionally give the larger cities a rest from building sky-scrapers, and provide them with really neat and reasonable resorts near terra firma. For example, Messrs. Kidder, Peabody & Co. have moved into their new banking quarters on Devonshire Street, Boston, which are of modest but symmetrical proportions. The building is two and a-half stories high, and was erected by the firm for its sole use at a cost of about $100,000. The structure is especially attractive, not only in interior furnishing, but in exterior arrangement. The architecture of the latter is of the Roman composite order, the most striking feature being two massive pillars. Two large electric lamps above the entrance add to its attractiveness.

We are interested to learn from Amherstburg that the Cuddy-Falls Company, private bankers and financial agents of that place, have sold out to the Molsons Bank, and that Mr. W. S. Falls, so long identified with the company as its local manager, will be the Molsons Bank agent. It is perhaps twenty-five years ago that a handsome, slender, grey-eyed young Irishman, named Loftus Cuddy, came to the old town of Amherstburg—known among the picturesque places in southwest Ontario—and opened a private bank as a branch of one then existing in Strathroy. Mr. Alexander Johnston was the proprietor, and Cuddy was his nephew. People of that day looked local disapproval of the enterprise, for it was supposed that there was no room there for a bank. But Loftus Cuddy made, it is said, $50,000 in ten years in the then sleepy old town, paid off Johnston and assumed the business. He had native shrewdness and honesty, together with breadth of view, a great memory and a firm will, so that his continued success, and the further fact that he is now numbered among the rich men of Cleveland, Ohio, were to be inferred from his earlier career in Amherstburg. It can hardly be more than ten or a dozen years since Mr. Cuddy, having determined to go into the coal business in Cleveland, formed the Cuddy-Falls Co. to conduct the private banking in Amherstburg, and placed in charge of it Mr. W. S. Falls, a trustworthy and excellent representative, who now becomes a chartered bank manager, as we have said. Mr. Cuddy is one of the brainy Canadians who are leavening the financial and industrial lump in the United States.

* * *

FIRE INSURANCE ITEMS.

Toronto Board of Control has decided to recommend the council to pass a by-law providing for an expenditure of $700,000 for improving the city's fire protection equipment. It also adopted the report of the Fire and Light Committee, except in the matter of the amount asked for a fire-boat and a special gas main.

The Insurance Press understands that the German American (fire and marine) will put the western part of its Canadian business under the control of Manager Sage of the Western department at Chicago. Manitoba and the western and central portions of Ontario will report to him. Mr. Sage expects to visit the new territory soon and become acquainted with the situation there.

According to the record of the Bureau Veritas, the marine losses during August, 1904, were as follows: Sailing Vessels: 4 German, 7 American, 16 British, 11 French, 4 Dutch, 5 Italian, 3 Norwegian, 3 Russian and 1 Swedish; total, 52. Steamers: 1 German, 11 British, 1 Belgian, 2 French, 1 Italian, 3 Japanese, 1 Norwegian, 2 Russian and 1 Swedish; total, 23. The average loss record of August for the past seventeen years is 63 sailing vessels and 18 steamers. In August, 1903, 64 sailers and 26 steam vessels were lost.

Figures published by Le Conseiller des Assurance, Paris, show how the French fire companies fared last year. In the year 1903 the French fire insurance companies secured in premiums an aggregate income of $23,684,526, or $624,000 more than was received the previous year. The combined loss ratio of the companies was 50.41 per cent.; in addition 25.30 per cent. was required for commissions and 9.50 for general expenses, leaving as profit the very comfortable margin of 14.79. The largest individual company income was received by L'Union, its premium account being $3,406,808. Its loss ratio was 54.73.

An apparatus has been invented by a Frenchman to enable firemen to remain in places where, without its use, they would find it impossible to breathe. It is composed of a tube containing a provision of oxygen sufficient to last a man for breathing purposes for more than an hour, and a helmet of aluminum, fitting the head exactly by means of a pneumatic pad. The oxygen is supplied automatically to the man's mouth, and the air exhaled is received in a compressible bag. It passes through a regenerator with granulated caustic potash, which absorbs all the carbonic acid. In a test made the other day a fireman, provided with his apparatus, went down into a cellar in which piles of damp straw had been lighted, and, although there was suffocating smoke therefrom, he remained in it for nearly three-quarters of an hour without inconvenience.

* * *

—Apparently there are a good many growers who think that, in order to comply with the Fruit Marks Act, all that is necessary is to label the best specimens of fruit this year in their orchards, as grading No. 1, even though the best in their particular orchards may be poor in quality. The standard for XXX. is absolute, and does not vary from year to year according to the general average of quality prevailing in any particular season.

LIFE ASSURANCE NOTES.

At last week's meeting of the board of directors of the Confederation Life Association, Mr. D. R. Wilkie, vice-president and general manager of the Imperial Bank of Canada, was chosen upon the directorate.

We learn that the general manager for Canada of the Provident Savings Life Assurance Society, Mr. C. T. Gillespie, has just returned from an extended trip to Quebec and the Maritime Provinces. While in that interesting eastern country, we are told, he made several new appointments in the interest of his company.

Quoting a large part of the two recent articles in the Monetary Times illustrating the course of assessment societies in North America, the Insurance Press copies the figures which show decline in membership and increase in cost of conducting those societies. In conclusion, the Press says: If any evidence were necessary to demonstrate the weakness and unreliability of assessment insurance the figures here given furnish it. The man who, conscious that he needs life insurance, will deliberately enter a fraternal society in order to get it, will buy oleomargarine for butter, quartz for diamonds, and sand for sugar. In other words, he is a plain fool.

Here is a specimen of the comments being made by the press of the United States on a new scheme, emanating, we believe, from Boston, called the "American Birth Insurance Company." This extract is from the Sun, of Lowell, Massachusetts. The project aims, at least, in the direction of increasing the American birth-rate, where certain naughty influences were lowering it: "We are hereafter to have children designed, planned and moulded just as this society may direct. The naughty irregular stork is to have its wings clipped and trimmed so that it will not call when it is not wanted. The laws of nature are to be modified, corrected and improved so that the rule of this new insurance order will supplant the designs of the Creator. Hereafter the children of chance will be tabooed, and only the offspring of certain lines of thought will be vouchsafed admission to the terrestrial sphere and receive a premium from this insurance company. For each of these the company will pay a liberal premium. Unfortunately we are informed that the applications for admission are so numerous that the society may die a-bornin'."

* * *

FOR GROCERS AND PROVISION DEALERS.

The list, given in our Montreal correspondent's letter, of the components of "Jacona's" cargo from the Mediterranean, is sufficiently varied. She shows Denia, Valencia and Malaga fruit—grapes, currants and almonds.

Our Montreal market letter refers to the continued advance in sugars, the price for standard granulated having reached $5.10 in barrel lots, the highest for years. As a reason for expecting still further advance, it is there stated that an undoubted shortage exists of both cane and beet sugar. Molasses, too, is tending upward.

Reports from the various cranberry sections indicate that the crop this year across the border is somewhat below that of last, when the yield was 1,275,000 bushels. For this season one million bushels seems to be about the average crop forecast, although a number of authorities are below that figure. Prices may be quite firm, but are not expected to go really high.

The shipments of cheese at Montreal for Europe last week were very heavy. One steamship alone loaded 40,000 boxes for Bristol. The week's shipments were 104,919 boxes, which is more than double the same week of 1903. The export of Canadian cheese during the entire navigable season is, however, short of last year's, to date, by 274,000 boxes. Butter export, on the other hand, is much greater this year than last, viz., 478,294 packages, as compared with 333,054 packages for same period of last year.

A number of wholesale brokers in Manitoba and the North-West met together recently in Winnipeg and formed the Western Wholesale Brokers' Association. Several prominent firms have, we hear, already joined, and the following will act as officers for the coming year: President, James Tees; vice-president, Ed. Nicholson; secretary-treasurer, Geo. Adam; Executive Committee, Messrs. Gordon, Duncan, E. A. Scott, and G. B. Thompson.

The improvement in the cheese trade has continued to a very marked extent. Quite a different complexion has been thrown over it by recent reports from Great Britain. Dealers there seem to have satisfied themselves that they have done sufficient to atone for the over-optimism which netted them so many losses last year, and are now acknowledging that their stocks are altogether too small and need replenishing. The result is that cheese on the side has made several fractional advances during the past two weeks, and now may be said to range around the 10 cent mark at the boards, though slightly under is as yet the more usual selling price.

* * *

—For the three months ending September 30th last, the Intercolonial Railway report shows a loss of $201,986, as compared with a profit of $569 for the same period of last year. The working expenses amounted to $2,052,,465, whilst the receipts were $1,850,485. For a similar period of 1903 the working expenses were $1,740,703, and the receipts $1,797,653. Last September the receipts from passenger traffic were $252,896, and from freight, $367,648. The loss was $66,179. In September, 1903, the passenger traffic yielded $236,914, and the freight, $342,245, the profit being $48,987.

* * *

—The Fruit, Flower and Honey Show, which was held in Granite Rink, Toronto, this week, opened very successfully, and much interest has been taken in it. Owing to the lateness of the season, the sorts of fruits shown were naturally limited, but the quality of these was, on the whole, very fine. The flowers, especially the chrysanthemums, are described as magnificent, while honey, the production of which should be made more of a feature in our rural districts, was of many shades and flavors. An important work was the demonstration of best ways of packing fruits, by Government experts, a task which even now, in the light of recent reports, is badly needed in some quarters.

Principal and Interest payable Semi-Annually, June 1st and December 1st, in London (England), New York, Montreal, Toronto and Winnipeg.

Price, = 100 and Interest.

Full Particulars upon Application.

—It is satisfactory to hear the announcement of President Roosevelt that Mr. John Hay will continue to be his Secretary of State until 1909. Mr. Hay, in addition to being a man of experience and prudence, is a gentleman. In his negotiations with foreign countries he has shown tact as well as sense, and the United States have not always been as well served in that high office. There are some members of the United States Cabinet even now who are likely to be the better of Mr. Hay's restraining influence.

* * *

—Everybody will note with satisfaction that the late Mr. Shields had succeeded in putting the organization of the Soo industries on such a smooth-working basis that little difficulty will be experienced by the remaining officers in carrying on operations pending new arrangements. The coke blast furnace is now stated to be in successful operation, and the quality of pig that it is turning out excellent. The rail mill, which is working on orders, is turning out over 550 tons a day, and Mr. T. F. Drummond, vice-president of the corporation, expresses the opinion that the quality of the product is superior to any turned out at present in any rail mill in the United States.

* * *

A Manchester correspondent of the Drapers' Record says that the position in the home trade of that centre has improved somewhat, but there is still much leeway to make up, and orders in Lancashire are not received in sufficient volume to keep machinery fully employed. From the East, however, important cablegrams are to hand, shipments are being forwarded rapidly, and heavy cloths suitable for the Manchurian winter have provided much work for Yorkshire looms. The linen position has improved of late, but orders for damasks have fallen off. In the carpet branches there has been more activity, and sales amongst home trade houses for the spring business have grown. The competition between Kidderminster and Kirkcaldy is resultant in what is practically a "draw." Linoleum has made a place for itself, and it does not seem possible to displace it. South of the Border, however, the production of this class of floor-covering is increasing, while the carpet trade suffers from the fact that squares are popular.

* * *

—A dispatch from Pittsburgh, Pa., of recent date stated that all the associations controlling the prices of steel are about to meet in New York, and continue in session until the whole list of prices has been revised to suit the conditions which have arisen in the iron and steel markets. The associations included are the billet, bar, rail, structural, plate, wire and others. The prospects are that the scale of prices determined upon will be those that will rule until well into the first quarter of the coming year, and it is considered fairly certain that prices will be advanced in most of the lines.

BANK EXAMINATIONS, ETC.

At the convention of the Illinois Bankers' Association, held last month in St. Louis, Mr. Wm. George, of Aurora, retiring president, occupied the chair, and there were 740 delegates and guests present. The president-elect is Mr. E. D. Durham, of Onarga. A feature of the occasion was an address by Hon. Wm. B. Ridgely, comptroller of currency of the United States. His subject was "Bank Examinations and Failures." We select a couple of the humorous incidents with which he illustrated his address:

Humorous Incidents.

In spite of the seriousness of bank examinations and failures, they have their humorous sides and incidents, too, like almost everything else, and we have some very queer cases. One small bank of $25,000 capital and $20,000 surplus had about $150,000 of deposits, making about $195,000 total funds available. One man owned all the stock, but enough to qualify four other directors, and ran the bank himself. The examiner reported that he had loaned $150,000 or more to one concern or group of concerns, which he also owned and ran, the collateral being receipts for cotton and cotton seed. Of course, a very strong letter was sent him at once, and he came to the Comptroller's office in person. He explained that good loans were hard for him to get, and that what he had done was absolutely safe, and the best thing he could do with the money. He saw the cotton and cotton seed every day; it was all insured, the bank was protected by a wide margin in price, which was true, and the money could be had on demand by shipping the cotton any day on an hour's notice. He said to the Comptroller nothing could be safer than those loans. "I would rather thave the notes than money any day. I could not do anything with the money I would know so much about; and, my Lord, Mr. Comptroller, don't I know whether or not I am going to pay myself that money when I want it?" He was told if the money could be collected so quickly and easily he must do it at once and reduce his loan to the legal limit. This he did within a few days. He was doubtless right about the loan being good, and I doubt if he yet realizes the impropriety of loaning himself so much of other people's money when he was so dead sure he would pay it back to himself when he needed it.

Another bank in the cattle country, prosperous and otherwise in excellent condition, had an enormous overdraft by one man, which was criticized severely by the office. The president of the bank, who was East, came to answer the letter in person, and proved to be a character almost equal to Owen Wister's Virginian. He told the Comptroller all the circumstances of the transaction. The man who owed the money and he had gone West together. Both had been cowboys, and they had slept side by side on the ground, sometimes with only one blanket for the two. They had saved money together, and had been partners in cattle raising. The proceeds of this overdraft had bought a lot of cattle this old partner was grazing, and expected to feed and fatten. The banker had no interest with him now, but he saw the man almost every day and the cattle frequently. He said: "Mr. Comptroller, that man isn't going to cheat me. He would not move those cattle off if he could, and could not if he would, without my knowing it. I know that man is as honest as any man that ever lived. Me and him know each other better than most husbands and wives know each other. He knows me and I know him better than his Maker. I know he will pay me that money when he sells the cattle, and he knows I would kill him if he didn't. That overdraft is just as good as his note, so what is the use of my taking a note? If I did, he would not want to pay me but twelve per cent., and now he is paying me eighteen." A slight difference of six per cent. must rather appeal to men who sometimes loan at two, or even one per cent., on stock, however, which you count by shares rather than by the head, and in markets where bulls are, perhaps, even on the weakest days, more plentiful than steers. It is possible also that the contemplated means necessary as a last resort to enforce the ultimate responsibility should be given some consideration in determining a proper remuneration for the service rendered. I took some pains to learn the result of this operation, and was glad to know that the cattle did well, and the cattle man paid the overdraft and had a good profit left after paying his old partner eighteen per cent.

Value of Knowing Your Customers.

As a matter of fact, our cowboy banker had in his own way applied a true principle of banking credit to this transaction, and in spite of the surroundings the relation between them was the ideal one between a banker and his customer, based on a thorough knowledge of each other. He knew his customer and his business thoroughly, and he knew he was worthy of the credit he gave him. If the same relation could exist between all bankers and their customers, there would be less need of bank examinations and all the precautions I have been discussing.

The point I wish to emphasize, however, is that the responsibility for bank management is by the law placed upon the board of directors. By accepting a place on a bank board and taking the oath of office, a man accepts this responsibility, and swears he will diligently and honestly administer the affairs of the association. He is under every moral and legal obligation to perform his duty fully and completely. If every board of bank directors in the country, both National and State, would fully realize the importance of the trust reposed in them, and diligently, as well as honestly, do their full duty by the bank, failures of such institutions would be exceedingly rare. It is certainly not asking too much of men who accept such trusts that they simply do their plain sworn duty.

* * *

ANSWERS TO ENQUIRERS.

Accountant, Ottawa.—The paragraph on page 616 of last issue was written hurriedly, upon receipt of the Montreal figures by telegraph at eight on Friday morning last, and was based upon a rapid glance through the pages of our Bank Clearing Register for 1902-3-4. Now that we have had more time to look over the statistics we find the opinion then expressed, that the Canadian bank clearings for the week of November 10th were the largest ever known in Canada, was so nearly correct that the total has been only surpassed once, and that by a fractional amount, namely, in the week ended 9th July last year, when the aggregate clearings of Canadian banks were $67,927,824, whereas last week's clearings were $67,675,689. We append a group of the larger totals of weekly bank clearings for the last three years; the average has been growing steadily:

Aggregate Bank Clearings.

Week ended October 9, 1902............	$62,371,616
" " January 8, 1903............	64,071,380
" " June 18, 1903..............	64,904,733
" " July 9, 1903...............	67,927,824
" " November 12, 1903........	60,659,879
" " October 13, 1904..........	62,464,880
" " November 10, 1904........	67,675,689

T. G. H., London, and R. R., Montreal.—The booklet you mention as reviewed last week, "The Art of Wise Investing," is published by John Moody Publishing Co., 35 Nassau Street, New York. We do not know that it is on sale in Canada.

F. C. B., Windsor.—Will write you after enquiry. It is not an easy matter to advise upon. Our present impression is that it will be safer to take the money now.

Bank Official, Truro, N.S.—The total stock of money in the United States, which was $2.763,052,000 at 1st January last, has increased to $2,848,292,000 at the 1st November. The Bankers' Magazine, of New York, gives the following particulars as at the beginning of the present month: Gold coin and bullion, $1,363,047.081; silver dollars, $567,795,589; silver bullion, $2,494,572 (it was $11.579,000 in January); subsidiary silver, $110,993,172; United States notes, $346,681,016 (the same during all the year); National Bank notes, $457,281,500. Total, $2,848,292,930.

BRITISH WOOD MARKET.

There is nothing startling in the accounts given of the wood markets of Great Britain for the month past. The Timber Trades Journal of November 5th says: "The hopeful tone of the London market continues, and in fact seems to be gathering strength; the feeling being widespread that prices have touched bottom, and that if the many enquiries lead to business, a recovery of the market is in sight. With a fair winter demand and an absence of political disturbances, we can look forward to an improved spring trade." Again it is said "it is generally thought that the position of deals will improve at the opening of the year, if shippers do not force selling too early, and that there will next season be a good demand for battens and boards. This view receives confirmation from the fact that already good offers are reported from the Continent for White Sea boards for next year's shipment." At Cardiff, "things are jogging along steadily." At Hull and on the Tyne there is plenty of wood coming in, but demand is slack. At Glasgow, "business better of late, and more enquiry in the market.

Farnworth & Jardine's circular of 1st November has the following from Liverpool: Aggregate tonnage to this date from all places during the years 1902, 1903, and 1904 has been 434,449, 438,924, and 425,151 tons respectively, and the arrivals from Canada during October show a reduction. "The market during the past month has shown more steadiness, but otherwise there is little change to report. The arrivals have been moderate, but the deliveries generally disappointing, and stocks are ample. Values show little change. Canadian Pine Timber—The import of waney has been moderate; the demand continues quiet and the consumption small, but values are steady; stocks are ample. Square Pine—With little demand, stocks are sufficient. Red Pine—Limited enquiry, the stock is small, and prices are steady. Oak logs from Quebec—There has been no import this season, and with little enquiry deliveries have been disappointing; stocks are said to be sufficient; values are steady. Rock elm stocks are light; values are firm. Ash—No import, and little demand. Pine deals have arrived very freely; the deliveries have been fair, stocks are too heavy, and values are difficult to maintain. Red Pine Deals—The demand is dull, and stocks are adequate. New Brunswick and Nova Scotia Spruce and Pine Deals.—The arrivals show a reduction in the month, and also compared with last year, viz., 9,320 stds., against 10,640 stds., in 1903; the deliveries have been large, and values show a further slight improvement but stocks are still too heavy, and it is most desirable consignments should be restricted. Pine Deals—The demand is very dull, stocks are large. Birch—Of logs the arrivals have been on a moderate scale. The consumption has been fairly satisfactory, but stocks are sufficient, values are unchanged. Planks—There has been a moderate import, and the deliveries have about kept pace; there has been more enquiry, values have improved, and stocks are light. British Columbian and Oregon Pine—There have been no fresh arrivals, the consumption has been fair, but stocks are still heavy; values are steady."

THE ORIGIN OF LLOYD'S.

A very interesting interview with Sir Henry Hozier, secretary of Lloyd's is published in a recent number of Commercial Intelligence. In it is given in some detail the history of that wonderful and far-reaching establishment. Like many other great and lasting enterprises, it had but a small beginning, having had its origin in the reign of Queen Elizabeth, in a small coffee house in Tower Street, London, kept by one Edward Lloyd. This Lloyd was an enterprising man, and through his business contact with sea-faring men and merchants enlisted in foreign trade, foresaw the importance of improving shipping and the method of marine insurance. He was the founder of the system of maritime and commercial intelligence which has been developed into its present effectiveness. Before his time, maritime insurance in England was conducted by the Lombards, some Italians, who founded Lombard street, but after Lloyd embarked in the business Britons conducted marine insurance in London. The subjects of marine insurance are the ship, the cargo, and the freight, all of which may belong to different parties. In time of war there is what is termed the maritime risk—danger from accidents, collision, and stranding—which is distinctly separate from the risk of capture and seizure by an enemy. This class of marine insurance had its inception in the conditions arising during the seven-year French-English war of 1757 to 1763.

Lloyd's moved to Pope's Head alley in 1770, and in 1774 removed to the present quarters in the Royal Exchange. In 1871 Lloyd's was incorporated by act of Parliament. This act defined the objects of the society to be: (1) The carrying on of the business of marine insurance by members of the society; (2) the protection of the interests of members of the society in respect of shipping, cargoes, and freights; (3) the collection, publication, and diffusion of intelligence and information with respect to shipping. The corporation of Lloyd's and the committee of Lloyd's, who are the executive body of the corporation, and the secretary of Lloyd's, have practically nothing to do with marine insurance in the way of taking risks or paying losses. Their duty in this respect is to afford marine insurance brokers who wish to effect insurances a place of meeting with those who undertake the risks.

DRY GOODS.

A correspondent in Chemnitz, Germany, of the Dry Goods Economist says that most manufacturers of gloves are complaining; only a very few report satisfactory business. Prices of gloves have been getting lower for the last two months, wages having fallen off. If the market should pick up, however, these will soon go back to their former place. Buyers will do well to place their orders at once. The goods could then be made up with the proper amount of care, which could not be the case if the orders came in late. The Milanese lisles and Berlin gloves with two clasps are selling well. One-clasp goods are not taken so freely as last season. Some orders for silk gloves have lately been placed, but the demand for these is not nearly so large as it was last season. Manufacturers are now preparing their fall lines. What is going to be the leading article is still difficult to say, but as several enquiries have already been made for knit gloves and ringwoods, it is expected that these will be better than they were last winter.

A report from Boston says that the situation in wool continues to increase in strength, and prices have again advanced. With the steady diminution in supplies caused by the constant demand and large purchases made by the big consumers, the excitement in the market shows no abatement. It has, in fact, increased since our last report, the demand for certain grades of stock considerably exceeding the available supply. This is especially true of medium clips and quarter and three-eighths blood graded wools. There is no question, if stocks of this class of wool had been readily obtainable at previously quoted prices, that a much larger business than we are able to report could have been accomplished. The speculative tendency among dealers has apparently increased, and a larger portion of the business done in the past week has consisted of swapping among dealers than has hitherto been the case. The great bulk of the purchasing is still done by consumers, but proportionately there is more being done by the dealers, especially in scoured wools.

The market for yarns in the States during the past week was more active than it has been for some time, and every spinner and dealer is confident that by the middle of November normal conditions will prevail. In fact, the price is the only check to a normal volume of business at the present time. Undoubtedly the condition of the fabric market is responsible for the impetus, and it is also certain that buyers of the finished product are seeking to purchase a supply at prices lower than the manufacturer can, with safety to himself, grant. The pressure on the manufacturer for lower prices is reflected in the yarn market when the manufacturer seeks to buy his needed supply of yarn at figures that will not yield the spinner a new dollar for an old one. Some few manufacturers have taken orders at such prices that they are able to pay the price and then realize a fair profit. It would seem that if a few can sell their goods

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

at an advance sufficient to cover the increased cost of the raw materials the others should also be able to do so.—Wool and Cotton Reporter.

Many people will be surprised to know what a difference to some branches of British trade is being caused by the war in the East. The value of orders placed for the East since the war commenced cannot be readily ascertained, but it is known that many thousands of looms in the West Riding of Yorkshire have been kept engaged since June in the supply of Japanese demands. The taxation proposals brought forward by the Japanese Government have not yet been fully understood, but it is believed that raw silk will be affected, says the Drapers' Record. The trade is an important one, and Scotch houses are now taking larger supplies than usual from Yokohama. The available stocks of Japanese silks are somewhat below the average, and, as New York buys freely, the upward movement in quotations noted of late is not surprising. Exports of silk piece-goods from Yokohama to the States have grown in volume, and the old complaints as to the strength and continued vigor of Oriental competition are revived more keenly than ever. Cloth for English consumption from Japanese mills is said to be fighting keener competition on the part of Cheshire, Yorkshire, and Scots millowners than formerly, the light weaves, at the production of which the Easterns are experts, being turned out by power-looms in the United Kingdom at as low a price as anything Manchester importers can offer.

* * *

—Some highly important movements in the grain markets of the world are now in process, if only one were acute enough to trace the ultimate destination of the various currents now eddying around. Only the other day it transpired that hundreds of thousands of bushels of Canadian wheat were being taken into Minnesota for treatment by the millers there. And now comes the announcement that certain large milling interests in Richmond, Virginia, is about to import Russian wheat. This indicates that the millers of the United States are looking abroad for their supplies of raw material to a greater extent than was generally supposed, and it also indicates that the tariff duty on wheat has enabled the men who have been in control of the grain markets of the United States to force the prices, temporarily, at least, above the level of the world price formed by the meeting of the supplies from the exporting countries in the markets of the importing countries. It is supposed that the Richmond mills will probably manufacture the Russian wheat into flour for export, and will apply for a drawback of ninety-nine per cent. of the duty, less the amount apportioned to by-products, under the present drawback law. Russian wheat, it seems, can be delivered at Newport News at $1.05 per bushel, as against $1.26 to $1.30 for domestic No. 2 red winter wheat, and it possesses a milling value of at least five cents a bushel more than the domestic wheat. In other words, a bushel of Russian wheat, costing, with the duty of twenty-five cents, $1.30 per bushel, possesses the same milling value as a quantity of domestic No. 2 red winter wheat costing from $1.31 to $1.35.

* * *

—Dun's Index Number, showing the prices for the United States of commodities in general consumption stood on the 1st of the month at ninety-nine dollars and a fraction ($99.431), compared with ninety-eight and a fraction ($98.394) on October 1st, and compared with $97.825 a year ago, making an advance of about 1 per cent. Five of the seven groups showed more or less advance; meats and miscellaneous food products alone declining. Breadstuffs do not exhibit the sharp rise that the variations of wheat would seem to warrant, as these figures are compiled for the first of the month. Dairy and garden products reflect the advancing season, lower temperatures curtailing the supply of milk, butter and vegetables. These changes in articles of food are not particularly significant, but the gains in the last three classes indicate the better demand for manufactured products, testifying unmistakably to improvement in business. Textile products and footwear go more freely into consumption, the raw materials of these industries being strengthened by dwindling stocks, and the long dormant steel industry has roused from its lethargy, buyers being compelled to make concessions instead of the mills.

* * *

—The mineral deposits near Haileybury and along the line of the Temiskaming and Northern Ontario Railway, which were discovered some twelve months ago, seem, for beginners, to be turning out very well. During the summer, according to Prof. W. G. Miller, Ontario Government geologist, who has just returned from that section, these have yielded at least $200,000 worth of cobalt, nickel, silver and arsenic. Prof. Miller found the iron range in the Township of Boston, some distance north of Haileybury, and through which the railway will pass, to be similar in character to the other ranges in the northern part of the Province.

* * *

—The Rubber Shoe Manufacturers' and Rubber Jobbers' Associations held a meeting in Toronto a few days ago and discussed a number of subjects affecting the handling of this class of goods. It was determined to make a few changes that will be of interest to the trade. For some time there has been an agitation to have determined what, under the selling terms, is meant by a "Jobber," it being contended that the word should be so defined as to make a distinction between the jobber and the large retailer. It has been agreed that the only fair way to determine the point is according to the volume of business transacted. The minimum amount has been placed at $15,000 annually, and the wholesaler who handles less than that quantity of rubbers will not hereafter be eligible to membership in the Rubber Boot and Shoe Jobbers' Association of Canada.

* * *

—Word comes from Sudbury of an important character. It is that the water-power on the Wahnapitae river, now in course of development, will be in a position to deliver power next spring. The dam has been completed, and machinery is being installed. Arrangements are already made to supply the town of Sudbury with electrical power for light and waterworks, and it is probable that power will also be supplied to the Mond Nickel Company, who are taking the water from their mines at Victoria Mines, west of Sudbury. These mines have been closed for one year, and are preparing to resume operations with vigor. The Canadian Copper Company was using the Mond Nickel Company's smelter for bessemerizing their standard mattes, and this will, of course, be now required for the latter's own use. The new furnaces at the Copper Cliff mines are reported to be running steadily and smoothly.

* * *

—The total production of pig iron in the world last year is figured by the best authorities at 46,733,000 metric tons. The United States output was nearly stationary, and several countries, such as Canada and Russia, showed decreases, but in spite of this the total exhibits a gain of 5.5 per cent. over the previous year, and is evidence of the activity of trade and construction all over the world. The increase was attributed largely to the gain of 20 per cent. by the German blast furnaces, though it was assisted by other European countries, all of which, except Russia, had a prosperous year. The German increases kept up the proportion of the total made by three leading producers, which was 79.9 per cent. of the total in 1903, against 79.1 per cent. in 1902; although the proportion furnished by the United States alone fell from 40.6 per cent, in 1902 to 38.9 per cent. last year. It is interesting to note that over three-quarters of the iron made in the world reaches the consumer as steel, and less than one-quarter in the various forms of cast and wrought iron. Over three-quarters of the pig passes through the converter or the open-hearth furnace before it is manufactured into finished forms. A marked feature of the iron trade in 1903 was the withdrawal of the United States, to a large extent, from the list of exporting nations. The active condition of the trade at home during a large part of the year induced manufacturers to give up their foreign business.

The Bank of Toronto.

Dividend No. 97.

Mercantile Summary.

The fall fair buildings, at Port Perry, used as an apple evaporator works, have been destroyed by fire. Loss, $6,000; insured for $2,500.

The Windsor Hotel Company held their annual meeting in Montreal last week, and re-elected the old executive, as follows: Mr. C. Garth, president; directors, Messrs. J. P. Dawes, H. Joseph, N. Dawes, D. McIntyre, and F. L. Wanklyn.

Two gentlemen have just arrived from Paris, representing the Compagnie Generale de Produits Metallurgiques de France, which has, it is understood, several large iron and steel factories in that country, and are looking up the prospects for establishing a similar industry in Canada. Montreal or Ottawa is mentioned as a possible scene of operations.

The coal trade between Montreal and the lower ports during the navigable season of 1904, has done something to keep up the ocean freight record of the port, which would otherwise have shown a comparatively dull season. During seven months 309 steamers brought 1,352,863 tons of Nova Scotia coal to Montreal. Here is the list:

	Steamers.	Tons.
May	42	196,628
June	67	277,239
July	45	252,677
August	55	240,354
September	37	160,875
October	42	180,461
November	8	44,629
Totals	309	1,352,863

The greater number of these steamers in fact, 233 out of 309, belonged to the Dominion Coal Company. The others represented H. Dobell & Co., F. A. Routh & Co., Intercolonial Coal Company, Inverness Railway and Coal Company, Andrew Baile, and the Acadia Coal Company

It is stated that as a result of the construction of the Northern Colonization Railway through the country north of Montreal, there have been established already fifteen large pulp and lumber mills in that section, representing an investment of over a million dollars. It is not unpleasing to be told, moreover, that the most fertile part of the region had not yet been reached, and only will be when the Colonization line is extended through to the L'Orignal Rapids district. Besides having the most fertile district this is also the one in which the best water power is situated, and different firms are said to be only waiting for the line to be extended to locate there. The Colonization Railroad is now being operated by the C.P.R.

Mercantile Summary

The Canadian Northern Railway Company are beginning the construction of a bridge at Battleford, Sask.

The Canadian Pacific Telegraph Company have decided to place all their wires in the city of Winnipeg underground.

We learn that Mr. J. S. N. Dougall, of Montreal, has been unanimously re-elected president of the Dominion Commercial Travellers' Association.

—The Maritime Sulphite Fibre Mill, near St. John, N.B., has been sold to George Keyes, of the Nassau Paper and Pulp Company, East Pepperill, Mass., for $250,000, and will soon be again in operation.

It is stated that the steamship "Germanic," formerly of the White Star line, will next season ply between Montreal and Liverpool, as one of the Dominion line of vessels. She is at present being renovated in Belfast.

The asphalt plant, belonging to the Winnipeg municipality has been destroyed by fire at a loss of $18,000 or over, and with insurance of only $5,000. This incident puts an end to steel construction for the year, and many workingmen, who have come from the United States, are returning to their homes.

A fire last week, which started in Horner's harness shop, at Cardston Centre, in the Mormon district of Alberta, led to a conflagration which proved the most disastrous that has ever visited that place, which is without adequate fire protection. Damage amounting to $200,000 was done. The insurance is not stated.

The Great Northern Railway Company has completed surveys for an extension from the Iron Range country of Minnesota to Beaudette, where a junction with the Canadian Northern is to be made, for the purpose of completing the road from the head of the lakes to Winnipeg. The surveys to the boundary begin at Dewey lake, a point north of Hibbing, and extend northward and slightly west to a point immediately south of the Bois Fort reserve, and take a course thence almost due northwest through the Red lake unceded lands to Beaudette, on the Rainy river, just below the Lake of the Woods. From Winnipeg into Beaudette the Canadian Northern is now operating a direct line.

The report of the British Columbia Electric Railway Company, Limited, Vancouver, has been published. The gross receipts for the twelve months ending June 30th last showed an increase of $138,445, and the net earnings, after charging renewals, showed an increase of $60,649. A dividend has been recommended on the deferred common stock of 3 per cent. for the half-year, and $35,000 has been transferred to reserve fund. The number of lights in use increased by 19,812 during the year, making a total on June 30th of 112,911, while the number of passengers during the year was 8,869,486, or an increase of 1,505,197. Evidently Vancouver, like many other cities in the Dominion, is having its growing time. The construction of the new power installation is proceeding very satisfactorily.

One of the great prizes offered for physical research, the Rumford medal, offered by the Royal Society of Great Britain, has been won by Mr. Rutherford, who is professor of physics at McGill College, Montreal. It is understood to be conferred because of Mr. Rutherford's researches into radio-activity. Both the winner of the prize, and the institution he represents, are to be congratulated on his high distinction.

Mercantile Summary.

It is now positively announced that the Canadian Pacific Railway Company will add two new vessels to its Atlantic fleet in the spring, and possibly two new ones to its Pacific service as well.

Amongst the press news from the Eastern Townships, we note the discovery of a rich deposit of iron ore on the Talmage farm, near Sweetsburg, Missisquoi County, sixty miles southeast of Montreal. Some of the ore is to be smelted, in order to test its quality.

We hear of the following Government appointments: Mr. W. H. White, of Peterboro, superintendent of public works, has been appointed to succeed the late Thomas Walters, of Lindsay; Dr. R. W. Bell, of London Asylum, is transferred to medical inspector of the Provincial Board of Health, and succeeded by Dr. W. C. Herriman, of Kingston, Dr. Herriman is followed by Dr. MacNaughton, of London, whose place Dr. W. T. Wilson, of Hamilton, will fill. Dr. W. P. St. Charles, of Mimico, becomes relieving officer to public institutions, and Dr George M. Biggs, assistant superintendent at Mimico.

It would be in keeping with the natural order of things for a considerable immigration to take place into the Dominion of Frenchmen, and this is what seems likely to occur, according to recent reports. M. Paul Dupont, of Paris, for instance, who has been on an extended tour through Manitoba and the North-West, says that, owing to the unsatisfactory state of things in France, arising from poor government and the socialistic leanings of the populace, there is likely to be a very extensive movement in this direction. Of course, we do not know how far personal politics is responsible for this opinion. Many have been hoping for, but no one has ever seen, any great emigration from France into Canada.

The president and directors of the Dominion Radiator Company gave a complimentary banquet at McConkey's on Saturday night to some two hundred of the employees. The affair was in the form of a welcome to the new superintendent of the works, Mr. J. Murchey, a Canadian who has been connected with some of the largest plants of a similar character in the United States. He comes back to Canada to take charge of the Dominion Company's foundries, as successor to Mr. Hockin. The harmony which exists between the departments and the loyalty to the management were shown in the various speeches. The toast of the president and directors was proposed by Mr. T. Watson and responded to by Messrs. Joseph Wright, C. N. Shenstone and John Stark. Mr. Wright proposed the health of the superintendent, and Mr. J. J. Main and George Thom also spoke to the toast. Mr. Murchey was enthusiastically received and made a fitting reply. "The Employees" was wittingly proposed by Mr. Peter McMichael, and responded to by Mr. T. Watson and Mr. J. Jeffrey. Messrs. John Stark, W. J. Fulton and T. Worthington spoke for "The Office Staff," and Messrs. W. J. Cluff and W. J. Fulton replied on behalf of "The Ladies."

A new wooden dam has been put in at Ragged Rapids, and the town of Orillia, which has been deprived of electric power for several months owing to the breaking away of the old power-house dam, is now enjoying it again. When fully completed the power transmission plant will have cost about $300,000.

Mercantile Summary.

The Canadian Northern Railway Company recently received from the manufacturers, in Dunkirk, N.Y., several extra powerful locomotives. In all, their contract calls for eighteen of the most modern and powerful engines which it is possible to make, the necessity for such arising from the prodigious growth of the freight business in the West.

Some Peterborough business men are said to be taking measures for the establishment of an electric smelter. The idea is to make use of ore from the Belmont iron mines, about thirty miles away. This ore, which is said to be of excellent quality, was formerly worked and shipped across the line, but the cost of freight rendered the enterprise unprofitable. With the expected completion of the Trent Canal, however, these conditions would no doubt be changed.

The following Canadian patents have been granted during the week: Nos. 89,821, Simon Scott, Wellington, N.Z,, moulds used in the manufacture of short bread and similar cakes; 89,829, Alfred Bonnier, Cairnside, Que, pipe coupling and points; 89,861, Franz Kommick, Elbing, Germany, presses for artificial sandstones; 89,890, Messrs. Thibault & Forest, St. George de Windsor, Que., milk ærating apparatus; 89 907, Jos. Elsner, Berlin, Germany, lifting and transporting apparatus; 89,911, Messrs. Alexander & Smith, Bairnsdale, Australia, gate post falls; 89,937, Joseph Alph. Vallee, Ste. Anne de la Parade, Que., automatic windows; 89,967, Walter G. Anderson, Toronto, Ont., wardrobe.

Westmount (Montreal), council has decided in favor of taking over and operating the electric lighting of the town, and the question will be presented to the ratepayers early next month. The present contract existing with the Montreal Light, Heat and Power Company expires in December, 1906. If the citizens sanction the new measure, Westmount will instal an electric plant sufficiently large to supply the town with light and power. A garbage incinerator is also to be put in, which will aid in supplying the power to run the plant. The expense of installing the plant is to be met by a loan of $225,000 raised by debentures payable in forty years and bearing interest at four per cent. per annum. The debentures will be for $1,000 each.

The Kamloops, Nicola and Similkameen Coal and Railway Company will, they now propose, run their road to Princeton, a distance of sixty miles further than originally intended, and they are asking for subsidies from the Dominion and Provincial Governments for the additional mileage. The former has already granted the sum of $6,400 per mile for the main portion of the line. The object of the company is to develop the company's coal mine at Nicola lake, and to furnish transportation for the Similkameen Valley, which is described as being very rich and most fertile, with a large area of land admirably adapted for fruit growing. The coal is a coking coal, and a large market is said to be awaiting it on the Pacific Coast.

MESSRS. L. CHAPUT, FILS & CIE,

Groceries, Wines and Liquors, — Wholesale.

CONSISTING OF

$300,000.00

WORTH OF

Groceries, Wines and Liquors

of every description. Mostly all in original packages, and a small portion only damaged by water, and will be sold in lots to suit the trade.

Sale arranged by The Gans Salvage Company.

LEOPOLD GANS, Manager.
FRASER BROS., Auctioneers.

Further particulars in circulars, which can be had on application to the Auctioneers

J. W. Sutherland's soda-water factory at Hamilton has been damaged by fire to the extent of about $3,000; covered by insurance.

John Knox Company, Limited, with a capital stock of $100,000, and headquarters at Hamilton, have received a charter from the Ontario Government. It will buy, sell, and deal in and manufacture articles of general merchandise. Among the provisional directors are John Knox and David McMurtrie, of Hamilton.

CANADIAN WEST INDIA STEAMERS

Sail from Halifax for Bermuda, The Windward Islands and Demerara every other Monday, and for Jamaica once a month.

The demand for Canadian goods in West India markets is constantly growing, and prospective exporters should inquire as to freight rates by this line.

PICKFORD & BLACK,
HALIFAX.

W. Kirkwood has opened an iron rolling mill, in Winnipeg, for the manufacture of all kinds of steel and iron supplies for railway and other enterprises.

The Canada Machinery Company, Limited, of Point Edward, has received an Ontario charter. It proposes to manufacture and deal in tools of every description, and carry on the business generally of metal workers, machinists and foundrymen. David Milne and Charles Mackenzie, of Sarnia, are mentioned among the provisional directors.

It is said that the New York Central and some other railroads in the United States are about to experiment on a large scale with steel, as a substitute for wood for use as ties. The matter is a very important one, for not only are huundreds of thousands of acres of timber swept bare every year for the use of the railroads, but there are serious signs of a coming shortage in supplies at convenient shipping points throughout many sections. However, so far as experience has already gone in the use of steel ties, they cannot be said to have proved universally satisfactory, though there is always a possibility of some new ingenuity in treatment or manufacture removing the present defects.

* * *

FINANCIAL CONDITIONS.

Aemilius Jarvis & Co., Toronto, in a circular letter dated November 11th, said that a number of things have happened which have an important bearing on the stock markets. Probably the event carrying the greatest weight was the overwhelming return of the political parties which were in power both in the Dominion and in the States. It was generally felt that the two Governments would be sustained, therefore the elections were freely discounted in the stock markets. Notwithstanding this the advance in prices continued after the results of the elections became known, the general public seeming to take more interest in the market than at any time for two years. The trading in New York the day after the election is stated to have been the largest in over two years. The upward movement of prices undoubtedly originated with the big holders of securities, who desired to interest the public. They have begun to accomplish their end, and are managing the situation in such a way as to maintain and enlarge the interest taken in the market. It looks as though the price of a great many securities on the list would advance. Industrials naturally are leading in this advance at present, owing to the increase of business and better trade conditions. The demand for strictly investment stocks is strongly evidenced by the appreciation of certain of the Banks. The Banks are continuing to make very heavy profits, and there must come a time when the piling up of reserves will give way to the dividing of surplus profits in some form amongst the shareholders. The result of the elections has been to materially help the Steel stocks, it being realized that the duties recently enacted would be maintained.

Henry Clews & Co., in a circular under date of New York, November 12th said:

As for the stock market, the election has been highly stimulating, speculation having broken out into almost record-breaking proportions. The prospects are that this activity will continue for some time to come, with sharp fluctuations and unusually good opportunities for quick traders. Prices are high enough for most of the active shares on their merits, but the speculative furore is aroused and cannot be checked until it has exhausted itself. Big banking interests, who have plenty of securities to sell and more to follow, seem inclined to check any too rapid advance and are equally intent on preventing any serious breaks. The investment demand is excellent, as proved by the heavy movement of bonds, which, though partly speculative, shows a steady absorption into strong boxes. January disbursements are not far distant, and with these in view the market is in little danger at the moment from home influences. Money may rule somewhat firmer and gold exports continue, but crop funds will soon return, and there is nothing in the local monetary situation to warrant concern. The weakest point in the outlook is the war between Russia and Japan, with its consequences in other financial centres. An active and irregular market may be expected for some time to come, but profits should be taken on all sharp rallies and purchases attempted only on the pronounced declines.

* * *

WRECKS ON RAILROADS.

The Railway Commission is now considering the reports sent in by inspectors who have been enquiring into the nature and causes of a number of accidents on Canadian lines. All people are interested in the reducing of the number of casualties on Canadian railroads—the companies themselves, their employees, and the public generally; and the Commission hopes by its present attempts to arrive at some useful conclusions. The evidence so far presented causes the commissioners to believe, (1) That none of these accidents can properly be attributed to overwork or lack of opportunity for sufficient rest on the part of the employees who are held responsible. Parenthetically, however, it should be said that there are many well qualified people who are absolutely assured

that overwork has been the cause of several accidents, even if not those specifically enquired into. (2) That in collisions a large percentage of the loss of life is in second-class or smoking-cars, due, no doubt, to the fact that old and comparatively weak first-class cars, which have been in service for years, are often used as smokers or second-class cars, while there has been a great increase in the weight and strength of more modern coaches—baggage-cars, first-class cars and sleepers. One of the questions now engaging the attention of the board is whether it should not, from time to time, formally request the Attorney-General of each province to put the law in motion, and promptly proceed with a prosecution in every instance in which negligence, carelessness or failure to observe working rules or orders has resulted in the destruction of human life. At present the railway companies simply dismiss their negligent or guilty employees. Further punishment is rarely thought of; and when it is, the parties concerned are usually allowed to escape the country. This, it is thought, does not tend to insure the safety of the travelling public; and it undoubtedly increases the risk to engineers, firemen and others who are in charge of trains.

⁂

A BOGUS BEGGAR.

It was Charles Lamb, the most kindly of Londoners, who lamented the decay of beggars in the metropolis, and advised us not to steel our purses even against the imposters, for when we were deceived by their counterfeit looks, their comedy was worth the half-pence. Surely the gentle Elia would have been delighted with the antics of an imposter who has been arrested this week near the Bank. He was a familiar figure to city men on 'Change, crooked and palsied and helpless, he appealed mutely with a trayful of matches slung on his shoulder. In the police court it was stated his sickly paralytic figure was assumed. At the close of his day's work he stood erect, and with his pockets well lined with the silver and coppers of the charitable, who, like Lamb, are not proof against beggars' eloquence, he made off to his little villa in the suburbs, where his young wife had no suspicion that her "city man" pursued such a disreputable calling. The police declare the scamp made £300 a year by his acting the palsied cripple.—London Letter.

⁂

FIRST NEW ENGLAND THANKSGIVING.

In the autumn of 1621, the Pilgrims gathered their first harvest. There was a large crop of corn and a fair crop of barley; some of the other crops were not as good, but on the whole the harvest was satisfactory. Four hunters were sent for fowl, and on their return the colonists feasted together and entertained King Massasoit and ninety men for three days, partaking of venison, waterfowl, wild turkeys, and other delicacies. This was the first Thanksgiving.—Boston Transcript.

Mercantile Summary.

L. Gingras, formerly a grocery clerk, who began business at retail for himself, at Quebec, about 18 months ago, has made an assignment of his estate.

The Ontario Winter Fair is to be held at Guelph from Monday, 5th December, to Friday, the 9th. Some of the railways are offering round trip tickets good to return until 12th December.

The hardware firm of Jarvo & Co., at Cornwall, Ont., is reported as failed. Alex. Jarvo was before unsuccessful in 1901, when he did not get a settlement, and the assets of the estate were bought in for his wife, who has since been the legal owner of the business. The principal creditors have since then been protected by chattel mortgage.

The assignment is noted of H. Locas & Co., general dealers, at Cheneville, Que., which is in Ottawa County, not far from Papineauville, the liabilities being about $4,000. Locas, who was formerly bookkeeper for a Montreal wholesale grocery house, was unsuccessful after starting in business here at retail eight or ten years ago, and has latterly been doing business under cover of the name of an aunt, Dame Cesarine Painchaud.

A general dealer, at Black Lake, Que., named Louis Weinstein, has assigned. He failed in 1889, at Coaticooke, and has since been a regular "rolling stone," his record fully bearing out the old adage. From Coaticooke he went to St. Jerome, and thence to St. Jovite, where he failed in 1894. He next tried his luck in Montreal, with a branch at Actonvale, and has also since been in business at Thetford Mines. "If at first you don't succeed, try again," does not seem to have done him much good thus far; but it will be observed that he has always been able to obtain goods on credit.

The following item is from the Liverpool advices of the Timber Trades' Journal, 5th November: "Spruce deals have for some weeks past dragged upon the market, and in consequence of this A. F. & D. Mackay, failing to get what they considered fair offers, decided to offer the cargo, per "Ella," by auction. The result must have justified their action, as the cargo averaged £6 8s. 9d. per standard, "ex-quay."

A small dealer named J. P. St. Laurent, in general business at Isle Verte, Que., Temiscouata County, Que., since the spring of 1904, and formerly in business at Ste. Flavie and Father Point, down the St. Lawrence, has turned over his estate to the assignee. He never has seemed to show much aptitude, and his business has always been reported ot a slow, dragging character. He owes about $1,800.——J. Edmond, in the tinsmithing line at Amqui, Que., is also reported insolvent.

W. T. Gregory, of the Empire Tobacco Co., Leamington, says that South Essex will turn out this season between four and five million pounds of tobacco. The crop has all cured well. Nine-tenths of it was produced along the Lake Erie shore, and so was not frost bitten. The fall weather has been excellent for curing, and he thinks that though last year's output was the finest grade, this year's crop should average up as well if not better. It will be a few weeks yet before buying begins, but asked as to probable price on the start, he would not say other than that good fair prices will rule. It looks as if South Essex farmers will receive in the aggregate more money for tobacco than any year since they started to grow it.—Amherstburg Echo.

The list of recent insolvencies among Montreal traders is as follows: Malouf, Thoun & Co., a firm of Syrians, doing business since last spring in the fancy goods line, have been put into insolvency. Thoun is reported to have left town a little while ago, with a portion of the assets. They owe about $5,000, are evidently not burdened with conscience, and creditors are likely to fare poorly.——A. C. Galarneau, a grocer in a comparatively small way, has assigned.——Madame Lena de Paul, milliner, is insolvent, owing about $2,000.——Theoret Freres, in the grocery business since 1901, have assigned, and show only nominal assets of $1,100 to pay about $2,990.——Sansregrets & Freres, also in the same line, are offering their creditors 25 per cent. on liabilities of about $1,500.——A building contractor, by the name of Edmond Germain, who has put his estate into the hands of a creditor, shows liabilities of nearly $7,000, with assets of about $2,000.——Upon demand, an assignment has been made by M. Ostrogursky, clothier, etc., whose liabilities are figured at $10,000, and whose affairs are likely to turn out poorly for his creditors. He was in business several years ago, when his record was not of a favorable character, and he withdrew from active trade for a time, but resumed again last spring.——Harry Wolofsky, doing business in dry goods, under the style of Wolofsky Bros., is another late insolvent; his liabilities have not yet been ascertained.

MONTREAL MARKETS.

Montreal, 16th Nov., 1904.

Ashes.—Under the demand occasioned by the desire to make some fair shipments by last outgoing steamships, dealers have been quoting from $6 to $6.10 for first pots, with the result that some moderate lots have been coming forward, but there is practically no stock in store at the moment. Second pots are quoted about $5.60 per cental.

Dairy Products.—For the close of the season cheese shipments last week were unusually heavy, reaching 104,919 boxes, as compared with 50,896 boxes for the same week of 1903. One vessel alone took nearly 40,000 boxes to Bristol. The deficiency, as compared with last year's figures to date, is now reduced to about 274,000 boxes. Butter shipments have shown some falling off of late, but the aggregate for the season is much ahead of last year, and is only about 11,000 packages behind the figures of the banner year of 1902. Last week's exports amounted to 12,169 packages, and the total to date is 478,294 packages, as against 333,054 packages for same period of last year. Cheese prices rule at about 10 to 10½c. for fine fall Westerns; Quebecs, 9½ to 10c. Finest grades of creamery butter are quoted at 19¾ to 20¼c.; mediums, 18 to 19c.; dairy makes, 15 to 15½c. per pound.

Dry Goods.—Travellers' letters continue to speak of finding pretty full fall stocks on the retailers' shelves throughout the country, and as a consequence they are not doing much business in the way of sorting orders, but are sending in some

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.

W. S. DINNICK,
Vice-President and Managing Director.

good orders for spring stuffs. Complaints as to dull trade are quite frequent among the Montreal retailers, and discount sales are being advertised earlier than usual, with the evident idea of helping off slow-moving stocks. With regard to values of textiles, there is not much new to report. An active demand is shown for serges of all kinds, which are coming strongly into favor again, but prices are high, being from 25 to 30 per cent. above the figures of three years ago.

Groceries.—Sugars keep booming skywards, and several further distinct advances have been established since last writing, aggregating in all 25c. per cental, and making the present factory figure for standard granulated, in barrels, $5.10, the highest notch reached for a good many years. For bags the price is 10c. less. Yellows now range from $4.50 upwards. The situation with regard to raws seems to be strengthening daily, there being an undoubted shortage of both beet and cane sugar, and still higher prices are looked for in the market for refined. In molasses there is also some tendency to stiffness, but jobbing prices for Barbados remain at 29 to 30c. for Barbados. Canned goods are still held at high prices, $1.25 being asked in a jobbing way for standard tomatoes, and $1.10 to $1.15 for corn. The steamer "Jacona" has discharged her cargo of Mediterranean goods, which comprised 1,845 whole cases of currants, 14,170 halves, 2,015 quarters, and 25 barrels; of Valencia raisins her manifest shows 22,827 half-boxes, 100 quarters, and 1,760 eighths. From Malaga she brought 3,844 boxes of raisins, 2,754 quarters, and 3,270 cases of shelled almonds. Teas continue inactive. Late cable advices report an advance of about ¼d. to ⅜d. in Indian teas, and Ceylons are also reported a little dearer for common grades.

Metals and Hardware.—Winter freight rates go into effect to-day, and it is expected the movement, especially in the heavier lines, will now show some falling off. In the general run of metals there is a continued tendency to advance. Ingot copper has made a further strong upward move, being now quoted at 15½ to 15¾c.; lead is up to $3.50 to $3.60, and spelter stands at $6.25 to $6.50; tin, 32 to 32½c.; antimony, 7¼ to 7½c. In bar iron there is apparently little disposition to concede in price, and $1.70 to $1.75 is quoted firm. Boiler plate exhibits a stiffening tendency, and there may be an advance on the old $2 figure. In sheets of various kinds there has been no recent change.

Oils, Paints and Glass.—Some good business is still reported with the West, but a general slackening in the demand is now about due. The only notable change is a decline in turpentine, which is now quoted at 79c. per gallon, by the single barrel. The larger dealers would like to advance prices of window glass, but the smaller jobbers still hold to the old figure, namely, $3.25 per 100 ft. per first break. In linseed oil, and other lines under this heading, there is no change.

Wool.—A comparatively light business is reported as passing in these days, millmen just buying from hand to mouth, and a disposition is shown to hold off until capitalist shoved over the money and a the results of the London sales, opening on the 22nd inst., be seen. We quote Capes at 17½ to 19c., according to condition and quality; fine B.A., 38 to 42c.; fine crossbreds, 27 to 32c.; coarse ditto, 24 to 26c.; Canadian pulled, 25½c.; North-West, 17½ to 18½c. per pound.

⁂

TORONTO MARKETS.

Toronto, Nov. 16th, 1904.

Chemicals, Drugs, Etc.—Trade continues fully up to average. Opium is firm at the recent advance, but there is not much doing. The same may be said of quinine. Chloral is tending higher, and so also does carbolic acid, which indeed has made several small advances during the past two weeks. There is a scarcity of this drug in most markets owing to the abnormal demand from the Far East. Some complaint is heard in New York as to dullness of trade. Reports from Manchester, England, respecting the chemical trade, speak of a better feeling being maintained, contracts for next year having been placed more freely. Many articles retain a firm valuation, and some are higher. Further improvement is looked for in many lines, as trade is believed to be on a sound basis.

Dry Goods.—Reports that have come to hand during the past week or ten days are more than usually bright in their tenor. This is particularly the case with regard to the North-West, from which payments early this month were considerably better, not only than had been anticipated, but than usual. Seasonable goods are moving out in satisfactory quantities. Staples of all sorts fully retain their firmness, but there is nothing new worth recording under this heading.

Flour and Grain.—There is so much divergence of idea as to real values existing as between holders of grain and the millers, that trade is comparatively quiet, though there seems to be no disposition to let down prices. For ninety per cent. patents, in carload lots, $4.50 is asked. Greater firmness is to be noted for bran and shorts. Oatmeal is still somewhat on the easy side. Wheat has made advances ranging from 1 to 2c. Other grains remain unchanged. Not a great amount of business is passing.

Fruits and Vegetables.—The season may now be said to be over for domestic fruits, though a few grapes still make their appearance. Southern fruits are beginning to come in in larger quantities, but there is no special feature. They sell at good steady prices.

Groceries.—Still another advance took place in all grades of sugars this week,, as was partially anticipated. The rise this time was of 15c. per cwt. The movement continues fairly active in this as well as in general lines of groceries. Throughout the rural districts it may be said to have made distinct improvement. Canned goods are still very firm, a condition from which there is no particular likelihood of change, so far as can be seen.

Wanted.

A competent Inspector for the Province ot Ontario on salary and commission basis. Only those who bave had experience in Casualty Insurance need apply.

J. WM. MACKENZIE,
Chief Agent for Canada,
Maryland Casualty Co., TORONTO.

Hardware.—Great activity has prevailed in the wholesalers' warerooms ever since the opening of the month. Retailers want to take advantage of shipments before navigation closes. For all seasonable articles the demand is good, and orders very satisfactory. In Great Britain, pig iron moved much better during October and prices advanced steadily. The outlook is distinctly better than it was. The same may be said of the heavy metals on this continent.

Provisions.—For really choice butter there is a good demand. Cheese is firm in

City of Moose Jaw,
ASSINIBOIA.

TENDERS.

The City of Moose Jaw, a firmly established railway and agricultural centre with an exceptionally strong financial position, invites tenders for the purchase of **$160,000** Five per Cent. Fifty Year Debentures. Offers will be received up to and including December 15th, 1904. No tender necessarily accepted.

For full particulars apply to

J. D. SIMPSON,
Secretary-Treasurer.
Moose Jaw, Assiniboia.

TENDERS FOR SUPPLIES, 1905

The undersigned will receive tenders up to noon on Monday, 21st inst., for supplies of butchers' meat, creamery butter, flour, oatmeal, potatoes, cordwood, etc., etc., for the following institutions during the year 1905, viz. :—

At the Asylums for the Insane in Toronto, London, Kingston, Hamilton, Mimico, Brockville, Cobourg, Orillia and Penetanguishene; the Central Prison and Mercer Reformatory, Toronto; the Institution for Deaf and Dumb, Belleville, and the Blind at Brantford.

Exception—Tenders are not required for the supply of meat to the asylums in Toronto, London, Kingston, Hamilton and Brockville, nor for the Central Prison and Mercer Reformatory, Toronto.

A marked cheque for five per cent. of the estimated amount of the contract, payable to the order of the Honorable the Provincial Secretary, must be furnished by each tenderer as a guarantee of his bona fides. Two sufficient sureties will be required for the due fulfilment of each contract, and should any tender be withdrawn before the contract is awarded, or should the tenderer fail to furnish such security, the amount of the deposit will be forfeited.

Specifications and forms of tender may be had on application to the Department of the Provincial Secretary, Toronto, or to the Bursars of the respective institutions.

The lowest or any tender not necessarily accepted.

Newspapers inserting this advertisement without authority from the department will not be paid for it.

J. R. STRATTON,
Provincial Secretary.

Managers and Underwriters.

tone. The market in Britain for eggs has shown a much better feeling of late, and as a consequence they are steadier here. They are by no means plentiful, however. A good deal of poultry is coming forward, but prices keep firm. There is no special feature in hog products, but they are in small stock, while the demand is good.

Wool.—Prices are firmer than ever, and in England they are expected to show a slight advance at the forthcoming London sales. There is really no surplus in any of the world's chief woolen centres. and the natural result is great strength.

* * *

FRUIT GROWING AS AN INVESTMENT.

In British Columbia, fruit growing has made such great strides in recent years, and the number of fruit trees being planted is so large, that some such remark as the following is by no means uncommon: "Oh, there are so many trees being planted these years that the market is sure to become overstocked and the industry an unprofitable one in years to come." To expressions of this kind we have listened for several years, and yet, remarks the Farmers' Advocate, it is a question whether fruit-growing in British Columbia ever was more profitable than at the present time. Nor has the future any-

THE COMMERCIAL
The Weekly Financial, Commercial & General Trade Newspaper of the Great West

Reaches direct 90 per cent. of the retail, wholesale and manufacturing trades of Northwestern Ontario, Manitoba, the Territories and British Columbia in advance of, and publishes more interesting commercial and financial news than any other similar newspaper in Canada.

Do you want to sell or increase the sale of your goods in these, The Best Buying Provinces in Canada?

Estimated that 200,000 new settlers will arrive this year. Will the retail merchant offer them your goods?

Our advertisers our best references. We beg the favor of an enquiry.

THE HUGH C. MacLEAN CO., Limited,
Publishers, Winnipeg.

Eastern firms should subscribe for The Commercial and keep posted on Western trade

thing else in store for Canadian fruit grown in the West. Upon the plains of Western Canada there is to-day a large population who have learned to eat and enjoy fruit. Their numbers will be rapidly increasing, as will be also, as years go by, their supply of cash for buying the choice edible products of their sister province to the West. There will be no better fruit market on the continent in years to come than the wheat-growing plains of the Canadian West, and no country is in better, nor, in fact, as good, a position to supply that demand as is British Columbia. If there are those at present who are attempting to grow fruit and market it at a profit without success, it is because they either have not the proper varieties, are not giving their orchards or vineyards the proper attention, or are not presenting their fruit in the best possible condition to the consuming public. The time is not very far distant when British Columbia fruit will move east by the trainload, instead of the carload, and when that time arrives a market will be easier obtained, and the profits will be correspondingly greater. The City of Winnipeg, this year alone, received and distributed over 1,000 carloads of fruit, and with a population rapidly increasing in numbers and in wealth, the demand for all classes of fruit will be greatly increased.

* * *

FUTURE OF STEEL AND IRON PRICES.

The report of the secretary of the American Iron and Steel Association shows that notwithstanding the reaction which set in during last year in the iron and steel industry, the production of pig iron, the basic material, was greater than during any previous year. There was a falling off in the latter half, and the decline continued in the first half of this year. It continued in fact through the third quarter of the present year, but lately there has been a revival of activity with promise of a resumption of production on the scale of 1902-3, with possibly a new advance. All reports nowadays indicate new activity and increased production at the iron furnaces and steel mills, stimulated by a growing demand for the finished products, and the expectation seems to be that another year will see a decided revival of prosperity for the iron and steel industries. During the depression there has been a considerable reduction in the price of pig iron, where competition is least restrained, and the prices of certain forms of steel have had to give way in spite of "pools." The high prices for finished products had checked the demand and the works were forced to curtail production. In their need of a market for what they did produce, competition and cutting of prices could not be prevented, and some of the pools were constrained to yield in order to save themselves, explains the Journal of Commerce, but the closest and strongest of them has kept steel rails at the top prices of 1902. Now that there are signs of an increased demand for the products, and of increased activity in supplying them, the price of pig iron has considerably advanced, and there are plans for "pegging them up" again throughout the range of production from billets and blooms to the finished articles of steel.

* * *

—It is stated in the "Broad Arrow" that to test the effect of alcohol upon marksmanship, a whole Swiss battalion has been practised: (1) After total abstinence, (2) after drinking the previous evening, (3) after drinking the same day—in moderation, and (4) after a heavy bout of drinking on the day of practice. The result has been held to prove stimulants good for short distances, and harmful for long ranges.

* * *

—"The carnage was fearful," read Mr. Spyem, from the paper. "All about us the dead were piled in ghastly heaps, and the air was filled with the groans and shrieks of the wounded. The slaughter was ——" "Oh, I wish you wouldn't read those dreadful war stories!" interrupted Mrs. Spyem. "This isn't a war story," said Mr. Spyem, testily. "What is it, then?" "Why, it's only an Englishman's account of a journey on an American railroad."—"Cleveland Leader."

* * *

—Several of the mills in the Eastern States are beginning to feel the results of the improving state of trade throughout the country. At Lowell, Mass., the Brott cotton mills, which have been closed for the past three months, resumed operations on the 31st ult. The mills will be operated full time all winter. From Providence, R.I., comes word that the mills of the Hope Co. in the villages of Hope and Phœnix are now on a full time basis again. They have about 500 employees, who for four months have been working only four days each week because of a dull cotton goods market. The Oriental cotton mills of Providence, which were closed down about a year ago owing to the high price of cotton and the low price of goods, are resuming, about 250 hands being employed. The Edwards manufacturing company's cotton mills, at Augusta, Me., were started last week after a shutdown of four months, due largely to the dullness in trade. A ten per cent. reduction in wages went into effect, but about 75 per cent. of the 1,300 operatives went into the mills. Others are expected to report later, says a recent report, as a large number of the workers went to Canada after the shut-down.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

A MARITIME EXHIBITION.

Nova Scotia will make a strong effort to secure the holding of a Dominion Exhibition in Halifax in 1906. And since it is true that Governmental assistance by way of subvention has become customary in the case of great fairs, having been granted other cities in Ontario and Manitoba for such occasions, there is no reason that Halifax should not get the next Dominion Exhibition. And, indeed, we hope that the formidable array of advocates, namely, President Longley, Mayor Crosby of Halifax, and Senator Black of Sackville (which though over the New Brunswick border, is loyal to Halifax in this matter), together with the eighteen members of Parliament for Nova Scotia, who are to press the Government for the $50,000 subvention, will be successful, and that the Dominion Exhibition of 1906 will be held in Halifax.

That proud old city will make, we have no doubt, great efforts to provide a worthy display of Maritime Province field and mine and factory products. And if she is wise she will call to her aid the Cape Breton and New Glasgow industries, the fruit and fish canneries scattered over Nova Scotia, the factories of Moncton and Sackville, the wood and fish firms of the Miramichi, the granite and marble products of St. George. There are important concerns in Amherst, such as the Robb Engineering Company and Rhodes, Curry & Co., whose output is varied enough. And there are great firms and companies in St. John who could furnish large and admirable industrial displays. Nor must the halcyon Island of Prince Edward be forgotten. Let Halifax add these to her own resources, and put the right kind of men to manage the affair, and she can produce an exhibition worthy of the name and aid of the Dominion.

* * *

AFFAIRS IN HALIFAX.

Our Halifax letter of Monday states that the flour merchants of Halifax have organized an association in connection with the Board of Trade of that city, the objects being to secure better terminal facilities for handling the export trade and the securing of fair freight rates from the West to that port. At the present time Halifax jobbers control a portion of the flour trade of the West Indies and practically all the flour trade of Bermuda, but are compelled, it appears, to make their shipments by American ports on account of the lower freight rates afforded these ports by the Canadian railways. The discrimination against Halifax and in favor of American ports on Manitoba flour amounts, it is alleged, to 21 cents per barrel, while on Ontario flours the rate to Halifax is only two cents per barrel higher than to New York. If it pays the railroads to carry flour for export from the Ontario mills to Halifax for only two cents more than the rate to New York it does not appear reasonable that they should demand a 21-cent discrimination in the case of Manitoba flour which must pass through the same Ontario points to both Halifax and New York. If the Intercolonial Railway were a company road it would long since have provided a proper flour warehouse at Halifax, for then it would be under the necessity of doing all in its power to bring business in its direction. But as a citizen complains: "Being a Government road and able to saddle the taxpayer with its deficits, nothing in this direction has so far been done." It will be the work of the new flour association, working as a committee of the Halifax Board of Trade, to bring influence to bear in favor of the removal of the difficulties under which the flour trade has now to be carried on.

The Board of Fire Underwriters in Halifax has decided to re-rate the city, and when this is done to add certain percentages until such time as specified improvements are made in the fire-fighting facilities of that city. The demands of the underwriters came up for consideration at a joint meeting of the Fire Commissioners and the Board of Trade recently. According to figures submitted on that occasion, it was estimated that the additions asked for would cost $34,000 over and above the $29,000 which the Halifax Fire Department now costs annually. It is claimed by some citizens that the city is much better equipped with fire-fighting apparatus than many others in the Dominion. This contention is much the same as has been claimed from time to time for other cities or towns when asked by the fire underwriters to make improvements to their fire appliances or their water supply. But it is not a convincing form of argument to say, "Our city is as well provided in this respect as its neighbors." There are conditions peculiar to every city or town which may render it impossible to compare it fairly with any other in the matter of defence against fire. We learn that finally the Halifax commissioners decided to prepare a report on what they are willing to do to improve the fire service and then call a conference of the underwriters, the Board of Trade and the Fire Commissioners. It is to be hoped that in a matter of so much moment to the safety of an important seaport, breadth of view may characterize the deliberations of these bodies. Narrow comparisons on the one hand or extreme exactions on the other ought not to prevent an understanding that will be fair to both the underwriters and those whose property they have undertaken to protect.

GROCERIES AND PROVISIONS.

There has been yet another upward movement in the price of sugar, all grades having been advanced 10 cents per hundredweight on the 16th inst. Not only this, but from several different points of the world come reports of stiffening values for raws, the consequence of which is to make holders in Canada very firm in their ideas. Some of the wholesale grocers in Ontario, however, seem inclined rather to watch the course of events, and to buy merely for immediate requirements until such time as the situation clears. It is not improbable that, while there has been and is a good deal of justification for the present extraordinarily high range of values, based on the statistical position of sugar throughout the world and on the poor crops which have been harvested in some sections, yet speculators have seized the occasion to further their own interests. In sympathy with the strong position of sugar is a very similar feeling in molasses. That from Barbados has already advanced about two cents, and a further rise is deemed not unlikely.

Another strong feature among groceries is coffee, though during the past few days some degree of easiness has developed in that article. It is believed by most authorities, however, that the recession is but temporary, and that receipts of Brazilian coffees will gradually diminish. Teas continue dull, and both Indians and Ceylons are a little easier. Chinas are meeting a comparatively slight demand just now, while Japans continue steady. Many of the spices are very firm, with a tendency towards higher quotations.

Canned meats and canned vegetables are even firmer than they were. Tomatoes are held by some dealers at $1.30, while in corn the pack seems now to have been a little larger than was believed at the beginning of the season. Its firmness, however, continues unabated. There is no doubt that an appreciable scarcity will make itself manifest by next spring or before, unless importation takes place from the States, which has happened before with high prices ruling here. For canned salmon there is the usual good request. The demand which usually springs up at this time of the year for dried fruits is this year fully up to the normal. Large quantities have already arrived from the Mediterranean; and dealers have been busy distributing. Valencia and Sultana raisins are both somewhat easier, though increased firmness is looked for shortly. California peaches and apricots have declined a little. Currants have declined, but there appears to be a likelihood of their returning to the former valuation owing to the general lightness of stocks, not only in Greece, but in most of the large consuming centres. Great Britain, however, a very important market, has eased off in her demand.

In smoked meats there is a good active enquiry for all lines in spite of the continued mild weather, which would tend to bring about a desire for reduction of stocks. Naturally, however, it is important to ship supplies before the close of navigation. Prices are quite firm for all provisions. Good dairy butters continue somewhat scarce, as also do first-class creameries. An upward tendency is discernible in both. Cheese is very firm, in sympathy with the strong statistical position in Britain. Dealers there would appear to have over-estimated the stocks in hand on this side. Those in this country, on the other hand, have the situation well in grasp, and, while they recognize the danger of unduly inflating prices, as was done to some extent last season, they yet mean to obtain full value for their goods. There can be but little doubt that the make in Canadian factories has not been so large as was at one time believed. It is satisfactory to note that cheese experts in Ontario consider that the September and October output from the factories in that Province shows a material improvement in quality compared with former years. Another point which may well cause pleasure to those interested in the agricultural welfare of the Dominion is the recent decision in an English court as to the purity of a large shipment of Canadian cheese, about which there was controversy. It is becoming more clearly understood that any interference with the good name of such a valuable asset of the Dominion as the reputation of its food products is a national crime.

Of eggs there are at the present time practically no receipts, the trade being supplied mainly from pickled and storage stocks. The market continues firm, but dealers do not anticipate the famine prices again which prevailed last year. There has been a somewhat better export demand lately, and dealers think that this will be increased by the cold weather now reported to be prevailing on the other side of the Atlantic.

* * *

BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian Banks for October, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.

	Oct., 1904	Sept., 1904.
Capital authorized	$100,546,666	$100,546,666
Capital paid up	79,747,011	79,642,783
Reserve Funds	52,480,152	52,479,464

Other securities	56,016,633	55,873,822
Call loans on bonds and stocks in Canada	36,233,712	35,827,396
Call loans elsewhere	44,603,469	49,364,845
	$268,369,900	$263,530,242
Current loans in Canada	416,344,885	412,197,377
Current loans elsewhere	19,426,308	19 746,702
Loans to Dominion and Provincial Governments	2,547,759	2,048,689
Overdue debts	2,358,554	2,362,612
Real estate	793,193	723,728
Mortgages on real estate sold	731,310	764,803
Bank premises	10,336,420	10,141,570
Other assets	6,054,756	8,134,531
Total assets	$726,963,269	$719,650,434
Average amount of specie held during the month	16,848,041	16,502,339
Average Dominion notes held during the month	35,120,194	34,693,132
Greatest amount notes in circulation during month	72,716,817	65,179,548
Loans to directors or their firms	9,933,136	10,087,846

Some of the items in the present statement are deserving of note: circulation, deposits, and loans are all remarkable for their growth. Of course, circulation and loans must have been expected to reach high figures, for the bank clearings in the different clearing cities have been mounting up week by week for months, being almost invariably greater in the aggregate than those of the same time last year. In twelve weeks of September, October and November the clearings at eleven cities reached $693,336,000, where in the corresponding twelve weeks of 1903 the amount was $635,139,000. And the amounts advanced for the movement of the crops prepares one for a marked increase in circulation in October. This year, however, the increase is conspicuously large, for where the amount was $63,795,000 in September, it was $72,226,000 at the end of October. Last year's figures in this regard, which were considered notable, were not so great as these; indeed, it is pretty safe to say the circulation was never so high.

It was to be expected from the growth of the country and the prevailing activity in business of almost every kind that bank loans should swell. And they have shown a growth from $404,000,000 of current loans in October last year to $432,000,000 in September and $435,000,000 in October this year. To these totals may be added in round numbers $80,000,000 loaned on call in Canada and elsewhere. The balances due from Great Britain and the United States are also this year large.

That people's savings, the result of prosperous industry, are increased is shown in the deposits of the public in the banks. These deposits were in October last year $394,000,000, and by October this year they had reached $446,000,000, a growth of a million dollars a week. Between September and October this year there is an increase of $7,317,000. Evidently Canada is growing and prospering.

* * *

GRADE RAILWAY CROSSINGS.

The disaster of Thanksgiving Day, when at a level crossing on Queen Street East, Toronto, a street car was run into by a railway freight train and several persons were killed and more wounded, is a warning as to the daily and hourly danger of the level crossing that cannot be disregarded. Whether the blame for these killings and woundings is to be placed upon a defective car or a confused motorman has yet to be decided, the inquest not being over. But behind and beyond the immediate circumstances of such a frightful collision is the permanent cause, namely, the level crossing. Will something *now* be done to provide a tunnel or a bridge? The need has long been recognized; the City Engineer has for some time had plans for a subway ready. There is now a clear duty devolving upon the Toronto city council to have this greatly needed improvement proceeded with, of a crossing of the Grand Trunk tracks at Queen Street east by the tram cars by means of a subway or a bridge. And there is another grade crossing of railway tracks in the north-western part of the city that needs similar looking after.

The authorities have been slow to perceive the congestion of traffic arising at Queen Street east where it crosses the river Don. The great bulk of the traffic of the south-eastern part of the city passes along Queen Street, the bridge at Eastern Avenue relieving it but little, and the Gerrard and Winchester bridges hardly at all. Year after year the congestion has increased, and the sight has become more and more frequent of the farm, factory, and pleasure traffic, vehicular and pedestrian, of a great district of this city being stopped for minutes at a time many times a day by the closing of gates because a railway train is passing. It is utterly unworthy of Toronto; and the long delay in conceding so evident a requirement has given rise and given excuse to the cry which has arisen: "Anything for the west end—nothing for the east."

If our council want data and precedent for dealing with grade crossings they may be found in the experience of Detroit, which long ago awoke to the crying need of overhead crossing of railway tracks. Not to go so far as Detroit, there is Buffalo, which has been provided with improved railway crossings by a commission established by New York State Legislature some fifteen years ago at the instance of the Chamber of Commerce. It is satisfactory to know that the Toronto Board of Trade has arranged for the presence in Toronto shortly of the chief engineer of that commission, Mr. Guthrie, to address the Board on this weighty matter. The present division of the cost of this work in Buffalo is that the railways are called upon to pay 50 per cent. of the cost of the work, the city 25 per cent., and the State 25 per cent. We may add that the commission which has this important work in hand are men of high character, and are not remunerated for their services.

NOTES UPON FISHERIES IN NEW BRUNSWICK.

St. John Harbor fishermen have caught within the past few weeks about 12,500 barrels of the little fish known as sardines. Of these, we are told, 5,000 barrels were sold to Nova Scotia lobster fishermen for bait, and will be kept in cold storage until the season opens in January. The remaining 7,500 barrels being sold to the canneries. The fish sold for bait brought $2.25 per hogshead of five barrels, and the remainder $2.50 per hogshead. This is the second season in which sardines have been caught in St. John Harbor, but it is believed these little fish have been going to the harbor for years, and even at the low prices prevailing this year the fishermen of St. John found it profitable to prosecute the business. A number of fishermen from down the bay ports also came to the city to prosecute the fisheries. They found that St. John men controlled the best privileges, those purchased from the city at the annual sale in January of the harbor fishery rights—bought heretofore only in connection with the salmon and gaspereaux fisheries. These outside fishermen will be competitors in the annual sales at the coming January, and the result should be a considerable increase in the revenue received by Saint John from this source. With the sardines came many herring, which the fishermen captured by thousands, so the fall fishing of south-western New Brunswick has considerably augmented the receipts of those engaged in that industry, and all this adds to the wealth of the community.

Further on the subject of the fisheries of that province it is of interest to recall that the Dominion Government maintains at St. John a pond in which salmon caught by the local fishermen are stored each summer until breeding time, when the eggs are taken out of the fish and sent to the hatcheries. This year more than five million eggs were taken from the salmon. Eight hundred of the fish caught were tagged with little brass tags, and then let go free, and it is hoped by these means to learn, if any are captured in future years, something of the habits of the fish: how much they increase in weight in a year, and whether or not they spawn each season. The eggs taken from the salmon are sent to hatcheries in different parts of the Dominion, there hatched and the small fish placed in rivers where the salmon are thought to be getting scarce.

HALIFAX BOARD OF TRADE.

The Board of Trade of Halifax, we are informed, has decided to vacate its present premises on Bedford Row in that city, and occupy the first floor of the McManus building on the corner of Hollis and Sackville streets, over the offices of the Intercolonial Railway. The entrance and stairway are to be improved and the building remodelled, so as to render the premises attractive and up-to-date. The regular quarterly meeting of the Board was held last week, when a large number of members were present. The most of the time was occupied in discussing the question of the fast Atlantic steamship service, and the unfair treatment of Nova Scotia ports in the matter of marine insurance. The secretary submitted a number of proposals intended to make the Board more useful and effective, and these were referred to a special meeting of the council for consideration.

BANKING AND FINANCIAL.

It is worth noting that the appreciation of value in eighty-four of the most active stocks on the New York Exchange has, since the beginning of the year, amounted to no less than $1,194,883,000.

It is understood that the Canadian Northern Railway Company has succeeded in placing in New York $5,000,000 worth of 4 per cent. bonds. They are guaranteed by the Government of Manitoba, and are part of an issue at the rate of $10,000 per mile on the company's lines in Manitoba.

The bankers of Cleveland, we are glad to hear, are making a determined fight against the vertical system of writing They claim the pupils lose their individuality of signature through its use. The young men whom they employ must write a hand that shows individuality, they say. The vertical system is, to our thinking, an unnatural fad.

The half-yearly statement issued by the Sovereign Bank at the close of the half-year ending October 31st, reports business generally satisfactory throughout Canada, and gives evidence that the bank is getting its share from the increased industrial and commercial activity. The bank's assets are $10,201,954, as compared with $7,209,920 a year ago, a growth which is quite remarkable. The number of its accounts, too, is great; we do not remember any bank which had opened so many at a like period of its existence.

At the annual meeting of the New York Clearing-House Association the other day, Dumont Clarke, president of the American Exchange National Bank, was elected president of the Association, succeeding James Stillman. The annual report of the manager of the clearing-house showed that the total transactions for the year amounted to $62,778,655.380. In the fifty-one years since the clearing-house was established transactions reached the immense total of $1,640,353.025.530. These figures show how greatly the transactions of 1903 exceed the average of those fifty-one years—they are more than double.

In regard to the proposal of the Ottawa council to take over the local electric railway, the company has now made an offer to sell on the following terms: There are in the corporation ten thousand $100 shares, and these the directors say they would recommend shareholders to sell at $250 each, payable in City of Ottawa 4% bonds. This would make $2.500,000, or, including the company's bonded indebtedness of $500,000, a total of $3,000,000. The financial statement of the company for last year shows earnings of over $128,000, after paying running expenses. Of this amount, about $9,000 went to the city for mileage, $5,000 for taxes and $20,000 was taken to pay the bonded interest. This left a net profit of the year of over $94,000. The company last year declared a dividend of 8 per cent., and transferred the balance to the contingent fund.

It is nearly twenty years since Mr. B. E. Walker, general manager of the Canadian Bank of Commerce, was put in charge of the Windsor branch of that bank. He remained at this post until 1878, afterwards going to New York. It was an interesting occasion, when a dinner was given him a week ago by Mr. D. Macgillivray, the present manager of the Windsor branch, at the Crawford House in that city. The Bankers' Club, of Detroit, took advantage of Mr. Walker's presence in the West to secure him as a speaker before their semi-annual gathering, held in the Cadillac Hotel. Mr. William Livingstone, president, was in the chair, with the two United States Senators from Michigan, a former comptroller of the currency, E. S. Lacey, and Mr. Walker, near him, and John L. Hamilton, Mayor of Hoopeston, Ill., and vice-president of the American Bankers' Association, the guest of honor. In his reminiscences, Mr. Walker described how in 1875, when a young man of 27, he was made manager of his bank's branch in Windsor, and lived there for three years, forming friendships with Detroit bankers which had survived to the present day. Three, to whom he said he owed a great deal—M. W. O'Brien, Emory W. Wendell, and Hamilton Dey—sat near him at the banquet table, and he paid them a pleasing tribute of gratitude and obligation. Launching forth from his manuscript, Mr. Walker said he deplored the prejudice which seemed to exist against banks in the United States, an evil which he attributed to the act of Andrew Jackson, which destroyed the large bank with big capital and established the smaller banks at isolated places. He disagreed with Mr. Hamilton (who had proposed the enactment of a law permitting national banks to loan up to one-third of their capital and surplus on real estate mortgages at from one-half to two-thirds of the value of the property) on the question of real estate loans, and believed the restrictions on banks in this regard are sound. Mr. Lacey, who is now president of the Bankers' National Bank, of Chicago, declared himself in favor of a system of more active daily redemption and a greater volume of currency.

* * *

OUR HALIFAX LETTER.

The quarterly meeting of the Nova Scotia branch of the Canadian Manufacturers' Association, held at the Halifax Hotel last week, was of more than usual interest on account of the presence of W. H. D. Miller, the transportation expert. Action was taken on two important subjects, viz., the placing of the Intercolonial Railway on the same footing regarding legal suits as company roads, and the placing of express companies under the jurisdiction of the Railway Commission. At the present time suits can only be brought against the I.C.R. with the consent of the Government. Seven new members were enrolled.

The wholesale grocers of Nova Scotia have signed an agreement shortening the terms of credit to thirty days net, or 1 per cent. off ten days. Where not paid in thirty days, interest at the rate of 6 per cent. will be charged. Formerly much longer credits were given, but now the grocers of this province are in line with those in other parts of the Dominion. The new terms go into effect on January 1st, 1905.

The steamer "Ionian," the first of the winter mail boats, arrived in port on Friday with 573 passengers and 180 tons of freight for Halifax, and 1,280 tons for St. John and the West.

The local Government has appointed Professor Melville Cummings to be principal of the new Agricultural College, established at Truro. The college building is not ready for the regular opening, but in the meantime a number of short courses in Animal Husbandry are to be put on. The new principal is a native of Truro, but has for some time been on the staff of the Guelph Institution, and is considered a very suitable man for the work. Prof. Sears is to be director of horticulture, F. L. Fuller, farm manager, and Joseph Landry, manager of the poultry department.

Two embezzlers are in prison here. Walter A. Dickie was arrested at Stewiacke, the crime alleged being committed in Brooklyn, N.Y., and Joseph Pierre was arrested on the arrival of the steamer from Newfoundland, on the charge of selling cattle and appropriating $265 of the proceeds. Dickie will oppose extradition.

Mr. F. A. Barbour, of the engineering firm of Snow & Barbour, of Boston, arrived in the city on Friday, having been notified by the City Clerk that the council had decided to engage his firm to report on the waterworks system of Halifax. At a meeting of the council, subsequent to the passing of the resolution, Mayor Crosby exercised his right and vetoed the resolution on the ground that the engineer in question was a resident of the United States, and that there were plenty of competent engineers to be had in Canada. The veto was sustained by the council. It has since transpired that Mr. Barbour is a British subject and formerly resided at St. John, but the Mayor refuses to recede from the position he has taken on the matter.

Halifax, 21st November, 1904.

* * *

REAL ESTATE CONDITIONS IN MONTREAL.

There is an increasing interest shown by Montreal citizens in small or medium-sized house properties, the demand being principally from actual consumers, and not so much for investment. Judging from the rental enquiries in October, the pressing need just now is more dwelling house accommodation of the right kind for people in the middle walks of life. "With rents going up all over the city," says the Real Estate Record, "the increase must soon reach the point when—in spite of the increased cost of labor and materials—it will pay to build, but the supply of houses cannot come soon enough to meet the demand next spring."

There appears to be a change during recent years in Montreal with respect to tenement houses, which used to be so general. To-day, says Mr. Cradock Simpson, speaking generally, the majority of householders in Montreal prefer the single or self-contained house to any tenement, flat, or apartment house, There is no change in the mortgage loan market, but money is plentiful enough when the right kind of security is offered. Five per cent. is still the lowest rate quoted. The sales recorded during the month of October in the suburban municipalities amount to $390,774. They were largest in St. Henri, Mile End and Cote St. Paul, and smallest in Cote des Neiges and Outremont.

There were 182 real estate transfers in the city wards and town of Westmount recorded at the registry offices during the month of October, amounting to $676,268, as compared with 161 transfers, amounting to $755,266, in October last year. The transfers were most numerous in Westmount and the wards of St. Mary, St. George, St. Joseph, and St. Louis.

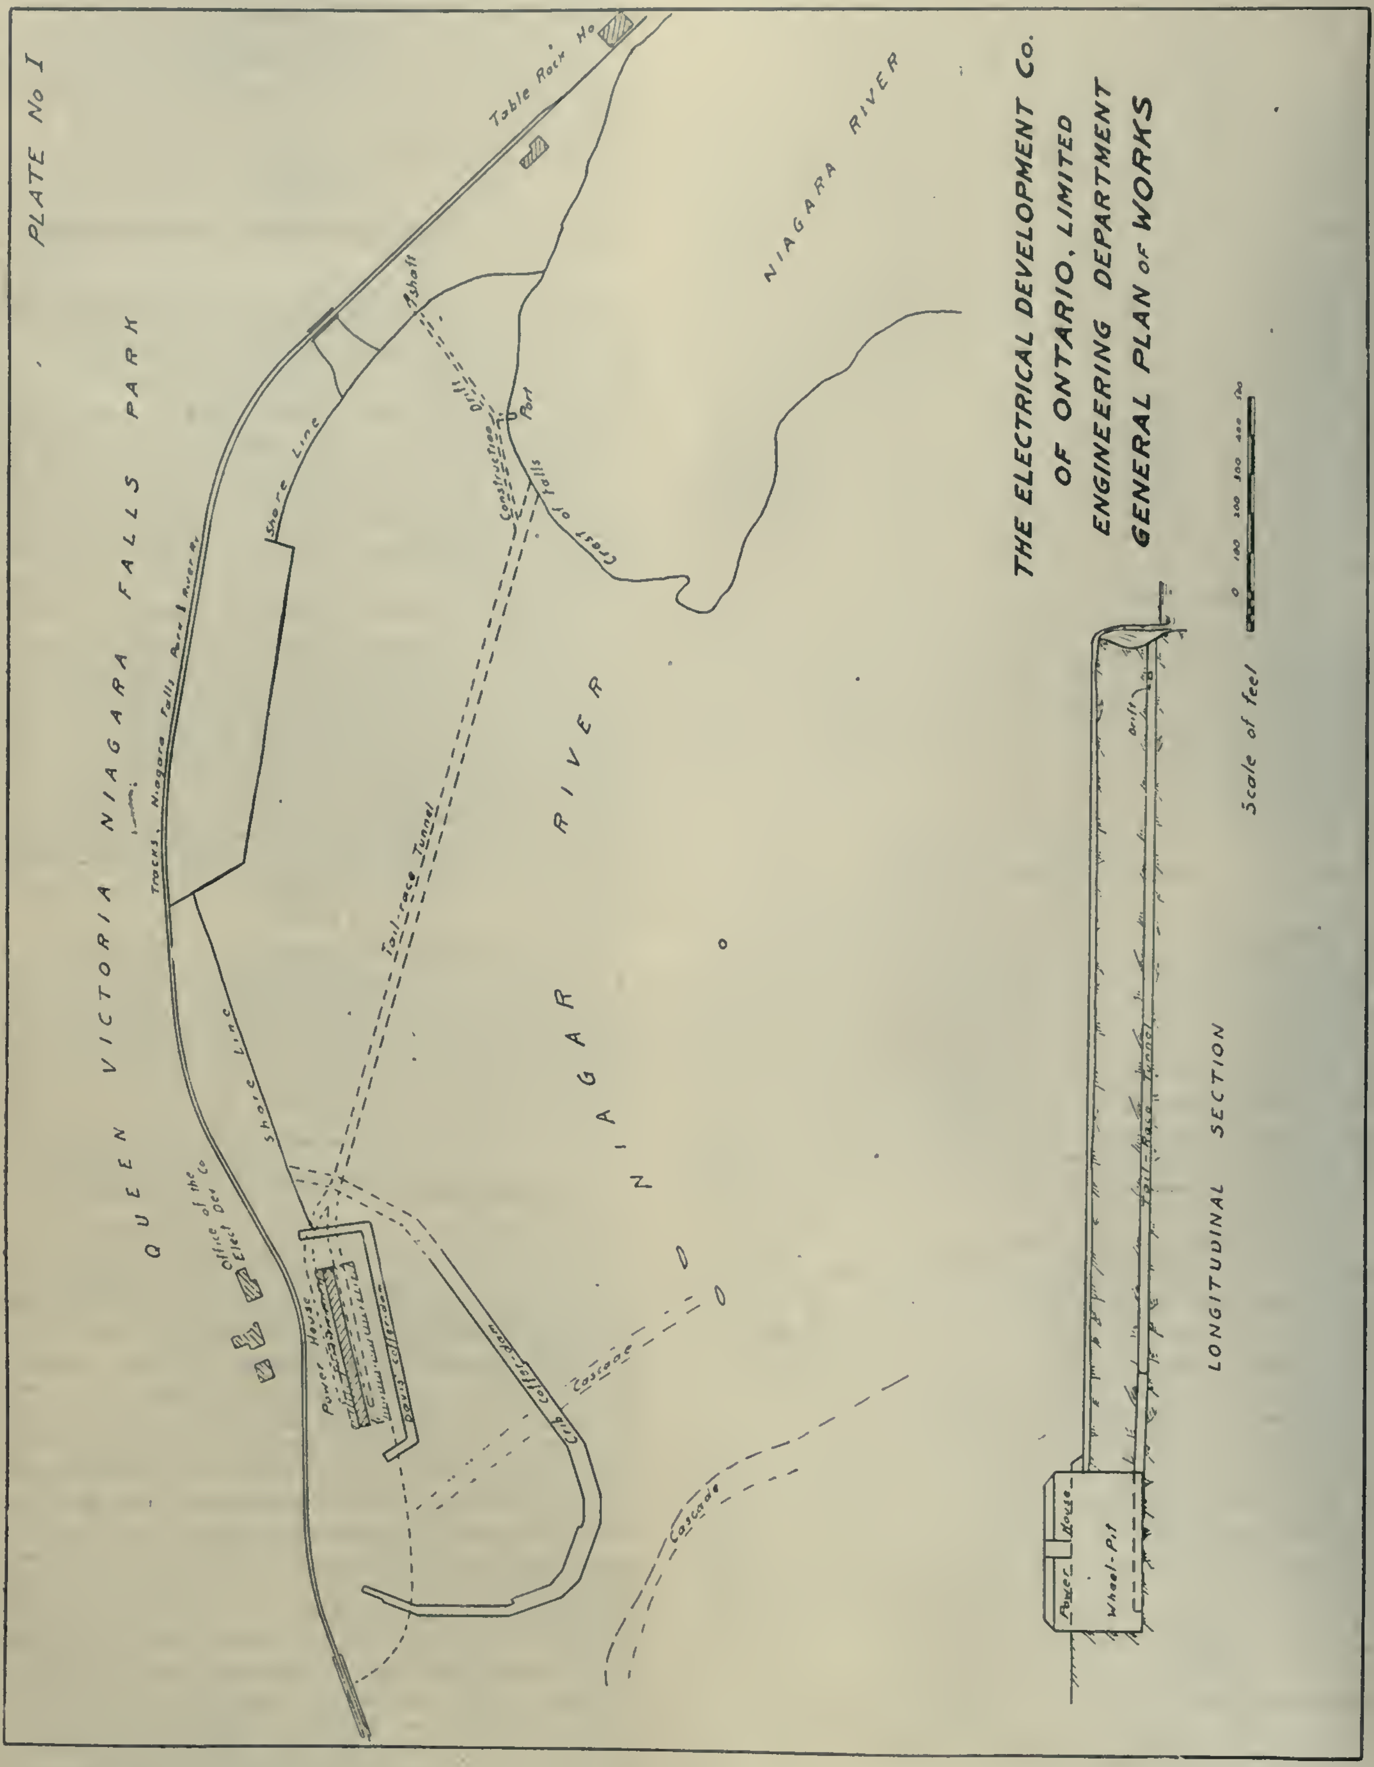
A COLOSSAL INDUSTRIAL ENTERPRISE.

The illustration given in these pages a fortnight ago of a steel tower to support wires for the transmission of electrical power, has increased the curiosity of the public, judging by some enquiries we have had upon the subject of the Toronto-Niagara Power Company. People seeing these towers erected at intervals along the highway between this city and Niagara Falls are for the most part puzzled to know what they are for. It is worth while to state, somewhat at length, what part they play in the working of the enterprise.

The power which will be generated at the power-house of the Electrical Development Company of Ontario, or a portion of it, will be brought to Toronto by the Toronto & Niagara Power Company. This company has already secured a private right-of-way with a minimum width of eighty feet, and in doing so has had an eye to the construction of a double track line of railway, as well as the placing of poles for the transmission cables. The right-of-way has been surveyed from Tempest Point to Scarlett Road, Lambton, a distance of 75½ miles, and is being staked out and fenced in as rapidly as possible. At Lambton between fifty and sixty acres of land have been purchased, we are told, for terminal purposes. On these steel towers wire will be strung, on which to bring the current to the transforming station on Dupont Street, Toronto. The large building now under construction in front of Mr. Nordheimer's residence is for the purpose of containing a number of huge "transformers" as electricians call them. The volume and intensity of the electric current has to be changed before it can be fed to various industries.

In to-day's issue is a map, or plan, giving an idea of the operations of the Electrical Development Company in and under the Cascade Rapids, and on the Canadian shore of Niagara River. The site is shown of the power-house, of which our readers have had an illustration, and the contour is also indicated of the crib coffer-dam and the permanent dam, one end of which was shown in one of our pictures. In the upper right-hand part of the plan is given the course of the construction drift, from the shaft sunk 150 feet down at the shore, and its junction with the tail-race tunnel, 2,000 feet in length, which will discharge waste water under the Horse Shoe Falls. At the foot and towards the left of the plan is shown, in section, the dimensions of the power-house and wheel-pit, the tail-race tunnel leading to the Falls and the surface water (shown as if smooth, in the plate, but in nature rushing in mad waves and spray), making its way to the cliff. The scale of feet supplied will give to any one who desires to measure the distances a notion of the great scale on which this enterprising company has projected its works.



* * *

—The last ocean-going steamers of the season leave Montreal harbor this week, and take the closing consignments of dairy products and other merchandise for the season.

INSURANCE INSTITUTE OF TORONTO.

The November monthly meeting of the Insurance Institute of Toronto, held on the 22nd inst., in St. George's Hall, was largely attended by both life and fire members. The president, Mr. F. Sanderson, F.F.A., was in the chair. The paper of the evening was contributed by Mr. Percy C. H. Papps, A.I.A., actuary of the Manufacturers Life. The subject dealt with was: "The Analysis of Life Office Accounts," and in so able a way was it presented that this paper is likely to be an authoritative guide for the life assurance men of Canada. Among the points touched upon was the matter of the various ratios so commonly used by agents in field competition. As to the unfairness of these, Mr. Papps spoke in no uncertain way.

"The number of different ratios, which can be thought of by an agent who is trying to make a comparison with another company, which will be favorable to his own, is really remarkable. It is not necessary to do more than mention a few of these in a paper of this kind, because these will serve to illustrate the ingenuity displayed. These examples are given to illustrate what has been previously said in regard to to the unfairness of the ratios generally used.

"The company or the agent that refrains from making comparisons with other companies, but endeavors to sell insurance on its merits, and on the record of the company for fair and generous treatment of its policyholders, will be farthest ahead in the long run."

Another interesting feature of the evening was a discussion, led by Mr. E. L. McLean, secretary of the Underwriters' Inspection Bureau, upon the paper on "Sprinkler Equipments," given at the previous meeting by Mr. E. V. Starkweather, B.Sc., of the Western Assurance Company.

It was announced by the educational committee that arrangements had been made with Principal Pakenham, of the Toronto Technical High School, whereby Institute students could have evening tuition in several of the subjects upon the examination syllabus. This will be of great aid in successfully covering the work laid down for the Institute's diploma.

* * *

FIRE AND MARINE INSURANCE.

The Yorkshire Fire and Life Insurance Company has taken over the home business of the National of Ireland. The Yorkshire is a respectable and strong company, founded in 1824, and has a subscribed capital of £556,000, and funds of £1,500,000. Speaking of this union, a London insurance journal says: "From this [union] nothing but good can come. In the first place, although the National of Ireland is undoubtedly solvent as compared with its liabilities, there is no doubt that it has had some unfortunate foreign experiences in the way of fires and that the proprietors of the stock of the company may possibly find it getting monotonous and welcome with acclamation the acquisition of the company by such a conservative, profitable and at the same time energetic office as the Yorkshire, which is second to none in its prudence of management and its profit to its policyholders."

A subscriber in the Province of Quebec writes: "I wonder a little that you have not referred to the death of an excellent man, Mr. A. H. Sawyer, president of the Agricultural Insurance Company, of Watertown, N.Y. He was a prominent man and an influential. A lawyer, in practice for thirty years, or perhaps forty years, he had been counsel for the company since 1878. Then he was made its president in 1898. He was a judge in Jefferson County for several years, and an officer or director in several banks and manufacturing concerns. He was one of the general counsel retained by the committee which prepared the standard policy of the State of New York, and was a member of the executive committee of the National Board. So I think he deserves a bit of a notice for his life work."

A meeting was held last week to complete the organization of a mutual fire insurance company, with head office at Waterloo, in the Province of Quebec. It was decided to call the company the Dominion Mutual Fire Insurance Company of Shefford County. The following were elected as the first board of directors: Messrs. A. F. Savaria, Louis Jodoin, George Moynan, J. H. Jones, L. V. Marchessault, A. A. Sargent and Dr. S. H. Martin. Mr. H. N. Whitcomb was appointed secretary pro tem. The company expects to begin business just as soon as it receives its charter from Quebec.

We hear from Montreal of the sudden death of Mr. Chas. D. Hanson, the well known fire insurance adjuster. He was one of the best known citizens of Montreal, and a man who counted hosts of friends. For many years he was a prominent figure in connection with fire insurance business and was consulted on many important matters of adjustment.

An advice from Peterboro is to the effect that in order to meet the increased consumption of water by reason of the town's growth, a new concrete dam is to be built in the Otonabee river, which will cost $80,000. A new auxiliary 12-inch main is also to be laid to give additional fire protection.

The municipality of Maisonneuve (Montreal), has just closed the purchase of a Waterous steam fire engine.

* * *

LIFE ASSURANCE MATTERS.

At the memorial service at Hartford recently, Mayor Henry, of that city, paid a tribute to the late James G. Batterson, of the Travelers Insurance Company. Thus: "He never took a position without having been forced into it by the strength of his convictions. If ever a man had convictions and the courage of them that man was James G. Batterson. Seeking for the right with a conscientious earnestness that was sometimes painful, when he arrived at a conclusion his mind was as steadfast as the everlasting hills. No consideration of expediency, no suggestion of personal advantage could induce him to swerve by a hair's breadth from a determination once arrived at. And this was the source of his power."

An insurance contemporary recklessly makes fun of the very serious matter of a Board of Directors "sitting round" a table in blue robes and fur collars for the purpose of examining persons proposed to be insured, and goes on frivolously to remark that the table in the board room is generally oblong, and so forth. We will substitute "at a table," for the phrase, "round the table," and add that we have seen these venerable persons ourselves, and they asked questions on which the lives were either passed or rejected. It was an imposing sight, but not much business was done in those days. There was a certain amount of innocence about the blue-robed gentlemen that was quite refreshing. On an applicant for insurance stating that he was a journalist, a member of the board of the old Equitable asked if that meant he was a person who kept a journal. He might have answered that it was the journal that kept him, but he was awed into silence, and respectfully replied that he wrote for newspapers. These were the gentlemen who passed lives in the old days.—London Review.

* * *

FOR GROCERS AND PROVISION DEALERS.

We learn from a London, Ont., paper that one company, at Centralia, a few days ago, shipped a carload of dressed turkeys to Vancouver. The shipment weighed 24,000 pounds.

There is talk to the effect that the Dominion Government will place some legislative restrictions on the sale of sardines caught in Canadian waters, to Americans. There are dozens of canneries in the State of Maine which are maintained primarily by reason of the sardine catch in Canadian waters.

A serious complaint is made by the Canadian trade agent at Bristol, England, to the effect that some shipments of flour from this country had proved not to be equal to samples on which orders had been given. Unbusinesslike methods of Canadian shippers in other particulars also are referred to.

During the past few years Germany has been importing an average of $13,000,000 worth of apples, chiefly from Austria, Switzerland, and other European countries. From Canada last year the imports were only $25,000 worth, but there can be little doubt but that the quantity could be greatly increased. The bulk of the imported apples sold in Hamburg, the chief importing centre, are packed in barrels, but boxes are preferred for fruit of first-class quality. When filled the barrels should weigh about 143 pounds and the boxes 40 to 50 pounds each.

The Hamburg fruit brokers dispose of the consignments they receive in much the same way as their confreres in Liverpool or London, namely, at public auction. Apples coming into Germany bear no customs duty.

A distinctly improved situation may be noted in the apple market. There is an upward tendency in price for all lines of first-class apples in Britain. Prices at latest advices were quoted at 10s. to 13s. 6d. for Greenings, 9s. 6d. to 13s. for Baldwins, 11s. 6d. to 16s. 6d. for spies, 11s. to 14s. for russets, 13s. to 16s. for Kings. The indications are favorable, providing only good stock is sent.

Mr. Cowie, the Scottish herring expert, who has been on a trip of investigation to British Columbia, is of opinion that the herring fisheries of that province should be as productive as any in the world. The fish have more oil than the Atlantic herring, and dry salting would probably have to be used in curing them. There is an unlimited market for these fish in Japan, China, Straits Settlements, and other Pacific Ocean markets.

The report of the British Board of Agriculture for 1904 gives some interesting crop statistics. It appears that there was a decline of 25,969 acres in the total area under crops and grass, as compared with last year. This decrease, however, is attributed largely to the demand for land for railway and building purposes. The decrease is entirely in arable land, which, including fallow, is 189,530 acres less than last year. On the other hand, there is an increase in permanent pasture of 163,561 acres. Of the principal crops wheat, barley, and rye show a decline—in fact, the 1,375,284 tirely in arable land, which, including fallow, is 189,530 acres roots show an increase, and there are 5,903 acres more given up to potato-growing than there were in 1903. The acreage under small fruit shows a continual tendency to increase, and this year's return of 77,947 acres is the largest ever recorded. Orchards of the country have increased by 3,525 acres.

* * *

DRY GOODS ITEMS.

It is stated that stockholders in the Fall River textile mills, as a result of the strike, have already lost $458,000 in dividends, while the employees have lost $2,400,000.

The American Federation of Labor in session at San Francisco, has declared in favor of raising $75,000 immediately to aid the strikers in the Fall River, Mass., cotton mills. Meanwhile the manufacturers are holding firm.

Mrs. Twickenham—"I want to show you what my dear, good husband gave me for a birthday present. There! What do you think of that for a sealskin cloak? It didn't cost less than £200." Miss Summit—"How lovely! And what did you give him?" Mrs. Twickenham—"Oh, the loveliest little pen-wiper you ever saw!"—Tit-Bits.

A new wholesale dry goods and millinery firm has been organized in Toronto, under the name of Beatty, Kerr & Verner, Limited. It is capitalized at $100,000. Among the members are J. M. Kerr, and T. H. Verner, formerly employees of the Wyld-Darling Co.

The total catch of seals by British Columbia schooners this year is estimated at nearly 140,000 skins, the smallest crop for several years. Last year the number of skins taken was 20,470, while in 1900 and 1901 it was over 35,000. The season on the British Columbia coast has been strong, which probably accounts for the comparatively unsuccessful operations.

* * *

—The Canadian Preference League was organized by a number of prominent men in various parts of the Dominion with the aim of giving effect to practical patriotism. This can best be done by always purchasing Canadian products and Canadian-made articles whenever the quality of the same is as good and their cost does not exceed those coming from foreign countries. Members are also expected to show a preference for the educational, financial, and other institutions of this country, when other things are equal. The League has now been put upon a thoroughly broad basis and, with the object of strengthening its members and the Canadian people generally, in their resolve to encourage home enterprise and home manufactures, will publish a monthly journal under the title of "Canada First." Such an organization and such a journal should certainly do a great work for the development of our common country, and we have no doubt that thousands of applications for membership will pour in within a very short space of time. Full particulars may be obtained from the Secretary of the Canadian Preference League, Room 20, Home Life Building, Toronto.

* * *

The Milwaukee chapter of the American Institute of Bank Clerks has issued a programme for its winter's work. The course embraces fifteen lectures. Dr. Scott, of the Wisconsin University, will speak on banking in England, France, Germany, and Canada. Prof. Howerth will speak about the theory of exchanges, and on "Banks and the Public."

* * *

Mr. Charles A. Conant, of New York, addressing the New York chapter of the Institute of Bank Clerks, spoke of the educational needs of the modern banker. The London Institute of Bankers, he said, is one of the most influential institutions of the country, and if American financiers were to occupy the international field which their growing power inevitably opened to them, an institute of bankers comparable with those of foreign countries is indispensable.

* * *

—Our Montreal market report upon metals and hardware contains some items of interest to retailers, illustrating the strong upward general tendency. Antimony, for example, is up to 9¼ to 9½c. per pound, and scarce; copper, 15¾ to 16c. Ingot tin, lead and spelter are all higher on spot, and tin plates are advanced in Britain. Pig and bar iron show firmness, in line with the trend of the United States markets described in the article from the "Iron and Machinery World," which we copied a fortnight ago. The Eastern Bar Iron Association has this week advanced its prices by two dollars the ton.

* * *

Prof. Chapman, of Manchester University, has begun an investigation into the effect of speculation upon the steadiness or otherwise of the price of cotton. As to the question of whether "futures" raised or lowered prices, he does not think there is much to be said for either view, but there might be something in the contention that deals in "futures" tended to unsteady prices. He has met with difficulty in finding a satisfactory method of investigating this point. One line of argument based on a comparison of markets before and after the introduction of "futures" yielded a probability that deals in "futures" had tended to steady prices. He has expressed the opinion that so far it appears likely that if the market was under the control of experts, and supposing the experts neither attempted to "corner" or to set afloat incorrect information for their own ends, then "futures" must steady prices, but these conditions are never fulfillled. He thinks the general view of the amount of "cornering" taking place is considerably over-estimated.

* * *

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing House for the week ended with Thursday, November 24th, 1904, as compared with those of the previous week:

	Nov. 24th.	Nov. 16th.*
Montreal	$29,432,805	$22,906,712
Toronto	24,246,551	15,776,240
Winnipeg	9,665,265	7,057,256
Halifax	1,914,863	1,360,259
Hamilton	1,361,203	1,287,099
St. John	1,185,157	562,390
Vancouver	1,721,300	1,423,748
Victoria	470,095	794,660
Quebec	1,846,797	1,553,057
Ottawa	2,814,437	2,102,057
London	1,068,821	886,101
Total	$75,727,294	$55,709,579

WINNIPEG DOINGS.

You will probably consider it quite natural that I should first speak of the wheat crop, and its movement, for this is the topic which is first in the minds of a great many Winnipeg people. I am told that the quantity of wheat inspected up to Saturday, 19th inst., was 15,000,000 bushels, the inspection last week having amounted to 2,080,000 bushels. As to the total yield of wheat by the last harvest, if you go to the Bankers' Association you will find them fairly well satisfied to believe that it is 45,000,000 bushels. But if you go to the Corn Exchange you are assured that 55,000.000 bushels is nearer the true figure. Either figure suffices to produce a very comfortable feeling in the minds of Manitoba people, for the price is very satisfying.

Advices from Tacoma, in Washington State, are to the effect that the wheat crop of Oregon, Idaho, and Washington is much smaller than had been stated some weeks ago, namely, 40,000,000, instead of 55,000,000, bushels claimed. Eastern millers are making demands for this wheat, although 10,000,000 bushels or more have already been sold to the East. The Minneapolis mills are said to have got the bulk of it, but want still more, and do not get it easily. According to the Chicago Record, 80,000 bushels of Manitoba No. 1 Northern wheat of high grade has been purchased, and is on its way to that city by boat from Fort William. It is needed for a class of trade which demands something better than No. 1 Northern grown in the States this year. This is an unusual purchase, and the grain will cost between $1.25 and $1.30 per bushel laid down in Chicago, for it has to pay a duty of 25 cents per bushel.

Winnipeg has another string to its bow in the way of railroad connection, since the first passenger train over the new "Soo" line made the run between this city and St. Paul. It is another link, as Callaway puts it, between Winnipeg and the States to the south. There are now four trains a day between St. Paul and Winnipeg, namely, the Great Northern, the Canadian Northern, the Northern Pacific, and the Soo lines. These all cater to the growing trade of this rapidly growing city. And the continuous influx of American immigrants to Manitoba and the Territories of course gives traffic to all these roads. The Winnipeg newspapers of Saturday and to-day contain advertisements of shares in companies formed to develop the oil fields of Alberta. There is one company, I see, named the Rocky Mountain Development Company, Limited, which has in the Telegram display cuts of derricks and tanks, and loud boasts as to the quality and quantity of the oil, and predictions of the future greatness of the industry.

It is a little more than five weeks since (October 11th, 1904), the great Ashdown-Bulman fire, which resulted in a loss of about a quarter of a million dollars, and those five weeks of fine weather have been used to great advantage by the above-named firms in the city. Bulman Bros. have erected a one-story temporary structure on the corner of McDermott and Francis streets, about four blocks west of Main street, and have installed a complete lithographing, engraving and printing plant, which was ordered by wire the morning after the fire. They are doing business in that limited space at the present time, and will probably build another large block next spring. The J. H. Ashdown Company has almost completed the ground floor of their new structure, to replace the one burned down. This new building, when finished, will be a credit to that portion of Main street. The firm expect to occupy the premises early in December, in time to handle the Christmas trade. As their wholesale building was not within the fire zone, they will have no trouble in stocking up at this new retail place. The other buildings damaged by the October fire have practically all been put in good shape without loss of time or business.

Considering the enormous amount of house-building which is going on all over the city, which includes departmental stores, business blocks, churches, apartment buildings and private residences, the vigor and despatch, as well as the thoroughness, which have been characteristic of this work of construction, are highly commendable. Some things not altogether complimentary have been said about the water supply at the fire, but I consider that the fire brigade did wonders in handling that threatening blaze as it did. There have just been installed men and apparatus in two new fire-halls in Fort Rouge and the North End, respectively, to be known as No. 4 and No. 7. Ten men have been allotted to each station. Considering the rapid and continuous growth of the city, such fire-fighting arrangements in outlying parts are very necessary.

Winnipeg, 21st November. B. M. L.

* * *

PITTSBURGH AND ITS ENVIRONS.

A Wonderful District.

On a recent page of the Monetary Times (620) we had occasion to mention "Facts about Pittsburgh," a pamphlet issued by the Chamber of Commerce of that Ohio city, certain of the contents of which we now proceed to notice. Some of the statistics given are very striking, and show what a wonderful industrial centre that city is. Most of the contents refer to the activities and resources of Pittsburgh district. Now this district, as we learn upon the authority of Mr. George H. Anderson, vice-president of the Chamber, is embraced in a radius of forty miles, and we understand includes 175 square miles of country. Within this territory are, besides Pittsburgh itself, with 359,000 people, Allegheny, McKeesport, Braddock, Homestead, and twenty more towns or suburbs having 316,000 more, along the rivers Monongahela and Allegheny or on the Ohio river beyond the junction of those two great streams. A space 22½ miles in length by 9½ in width is represented by a map which forms part of the pamphlet, and the population of all this area, included in what is called "Greater Pittsburgh," is put down at 675,000.

There are 174 banks in Pittsburgh District, whose aggregate capital is $63,586,000; their deposits, $301,870,000, and their loans, $254,862,000. The clearing-house exchanges of the city are remarkable; they reached in 1903 no less than $2.356,875,000, which is equivalent to $45,000,000 per week. There are many particulars about churches, schools, colleges, and the Andrew Carnegie Technical Schools, which we should like to copy did space permit, but we must only note that the city gave a site of 32 acres for these schools, which are projected to accommodate 4,000 students, and which when built Mr. Carnegie will endow.

Among the natural resources which have helped to make Pittsburgh the great manufacturing centre she is, natural gas is one. There are two thousand wells and four thousand miles of pipe line supplying this gas, the daily consumption of which is stated at 350,000,000 cubic feet. A thousand mills and factories are supplied with it, and 130,000 families. Pittsburgh is said to be "the centre of the greatest car-building industry in the world." Two hundred cars a day are made and 500.000 tons of steel per year used to make them. Tubing, tin plate, structural iron and steel, air brakes, railway switches, metal cables—all these are produced to an aggregate of millions each. Speaking of electrical manufactures and railway safety appliances, the pamphlet states that Pittsburgh turned out $40,000,000 worth of these in 1903, while the output of all the rest of the United States was $136,475,000. Window glass, plate glass pressed glass, lamp glass are produced, total value of glass produced, $14,276,228. There are forty-three blast furnaces in Pittsburgh District, fifteen Bessemer converters, and 116 open hearth furnaces, the united capacity of these is 14.500,000 tons. The 28,092 coke ovens produced over 14,000,000 tons. Sometimes the statistics are for 1902 and sometimes for 1903. The following five, from tables showing comparisons with other countries, are for 1902:

	The World.	The United States.	Pittsburgh District.
Coal produced, tons	884,803,000	301.590,000	36.137.000
Pig iron, tons	44.558,000	18,303.000	4,260,000
Iron and steel, tons....	33,352,000	13.944.000	5.580.600
Steel rails, tons	5,238,000	2.948.000	712.300
Petroleum, barrels	125,909,000	67,775.000	30,000.000

A summary on page 3 claims that there are, in that district, 5.000 manufacturing establishments with $500,000,000 invested in them. The value of the product of these is stated at $450.000,000 yearly, and it is claimed that they give employment to 250,000 hands. Such figures are difficult to grasp, and only those accustomed to dealing with large quantities in weight or large amounts in money are properly qualified to understand them

fully. But there can be no doubt that the growth of Pittsburgh and its district has been phenomenal. Certainly, it ranks high among the great workshops of the world, and more than any other place in that wonderful country has helped to make the record of the United States the handsome record it is in the iron and steel products.

There is an error on page 4, however, which ought to be corrected. In comparing Pittsburgh's tonnage with that of leading ports of the world, the compiler makes out that her tonnage movement for 1902 is 86,636,680 tons, that is to say, 76,950,000 tons by rail and 9,686,680 tons by water. In the same diagram the tonnage of London, England, is put down at only 17,564,110 tons, New York, Antwerp, Hamburg, Liverpool are put down at only from seventeen to thirteen millions each, but the whole five not equalling the tonnage of Pittsburgh! The compilers have taken the steam and sail vessel tonnage of these places and compared that with the total tonnage *by rail as well as by water* of Pittsburgh. We discover this in turning to the Statesman's Year Book for 1904, in which the inward and outward tonnage of London and Liverpool, respectively, carried in sail and steam vessels, excluding coast wise craft, is given at 17,564,108 tons and 13,157,714 tons respectively, which are exactly the figures which the Pittsburgh compiler uses for his comparison, assuming that they are the total tonnage of these two English cities. Doubtless the same limitation applies to the other German and American cities quoted. Their rail tonnage is not given at all, only water; but Pittsburgh's rail tonnage, which is eight times greater than her water tonnage, is here used in an unjust way. This unfortunate comparison needs to be amended. The Chamber of Commerce of the City of Pittsburgh, which is the tenth city of the Union, after New York, in population, is far too dignified a body to wish to indulge unfairly in the boastfulness which sometimes besets Americans when they are comparing their country with any other. Besides, there is so much about the city to be legitimately boasted about that there is no need for them to try and gain renown by improper means. And so, we apprehend, the next issue of the hand-book of Pittsburgh will contain the rail tonnage of those English and German cities, or at all events a revised version of the boastful diagram and table of figures on page 4.

* * *

NORTH OF ENGLAND LETTER.

At the moment of writing there is a general feeling that the threatened war has been averted. Men of all parties are disposed to congratulate Lord Lansdowne on his skilful handling of the situation. That statesman left the War Office amid howls and groans of public execration, and he doubtless is not ill-pleased to rehabilitate himself in popular favor. At the same time that a feeling of relief is recognisable, there is another spirit in the air. Business men feel that we can afford to take no more nonsense from Russia. It is said openly that the time has come for England to declare her limits and to warn the Czar's advisers that no apologies will be accepted for further transgressions. The "try on" has always been a favorite expedient of Russian ministers. They have trespassed and, if compelled, have retired with a few perfunctory protestations of regret. England is in no mood to submit to any more tentative antics at present, and moreover, is grimly determined to exact the fullest compensation after the war for such damages as have been inflicted on British shipping in Chinese waters.

If commercial and financial Britain does not want war it is not because the enemy is feared, or because a successful issue is in much doubt: we lose even when we win; and as a highly desirable revival in trade appears to promise, peace is doubly wished. One of the symptoms of better times is the movement in iron. Cleveland pig quoted 43s. on September 29th, is being settled for at 45s. 9d. to-day, and is 46s. 5d. for three months forward. Metal shares are being picked up by some of the early birds in anticipation of good returns during the next two or three years. As several iron companies are in arrears of dividends, some tempting prices are to be obtained. In this stage at any rate the operation is somewhat in the nature of a gamble. Exactly why one cannot say, but a settlement of the Japanese war is calculated upon to stimulate production.

The managing-director of Lloyd's Bank before the Institute of Bankers the other day, had somewhat to say of our gold reserves. It is notorious that our banks cut the margin very closely, and at the end of each half-year a stringency in money results from the run made on available resources by managers "dressing their windows." There are few banks that permanently maintain so large a store of coin as is laid in to adorn the balance-sheet. Mr. J. Spencer Phillips is not alone in deploring this state of things, and his suggestion that banks should publish monthly or weekly statements of accounts is a valuable one. The greatest banker of them all, the Savings Bank department of the Post-Office, has some 200 millions sterling on deposit, against which barely a single sovereign is held. Of course the Post-Office has a huge number of branches, and it would be expensive indeed to stock all of these with coin up to the largest probable demand. But one does expect a Government to set a good example, and to do its share towards maintaining the the financial equilibrium.

The annual report of the Companies Liquidation Department shows 1,632 deaths of companies, and 3,692 births of companies during last year. The total nominal capital of the latter aggregates 115½ millions. Since 1899 company formation has been diminishing rapidly, as our newspaper proprietors have sore cause to know; in that year the total of new capitals was 229½ millions sterling. The modern company of the baser sort issues no prospectus and registers its head-office in Guernsey (Channel Isles), as so evades numerous charges and some salutary though distasteful supervision. The Official Receiver sardonically alludes to the Sapphire Corundum Company as "an interesting example of the inflation of capital." The Crown Corundum Co., of Canada, sold the mines for £15,000 in cash and £30,000 in shares. The Sapphire (surely Sapphira had been a more apt name!) promoters put the new capital at £1,000,000, and promised thmeselves the modest little profit of £855,000 as a reward for their enterprise and impudence. Despite this wealth of paper there was a dearth of funds, and the game collapsed before more than a mere preparation for mining had been accomplished.

A case that is possibly unique will be of common interest to traders and insurance people. The Manchester firm of Ellinger & Co., had large sums due to them from Max Firnberg, and this debt they sought to protect by a policy of life insurance of £4,000 for five years, with the Mutual of New York. Firnberg filled a proposal form which contained the following declaration: "I also warrant and agree that I will not commit suicide, whether sane or insane, during the period of one year from the date of the said contract." The policy was issued in May, 1902, and in February, 1903, Firnberg, being insolvent and insane, took his life. Ellinger & Co. sued on the policy, maintaining the clause quoted was no more than a personal undertaking by the assured; that the insurance company could only take their stand with Firnberg's other creditors for any damage caused by breach of this promise; and that the suicide did not destroy their claim to recover on the policy. Mr. Justice Bigham had already decided against Ellinger's contentions, and the ruling was confirmed in the Court of Appeal by the Master of the Rolls and two law Lords.

LONDON ENGLAND—The National Bank of Scotland.

with the boring apparatus. The New Brunswick Company, the parent concern, is continuing preparations to build an oil refinery.

George McArthur, a St. John builder, who has a contract from the Dominion Government for new buildings on Partridge Island at the mouth of St. John harbor, for use in connection with the quarantine of immigrants coming to Canada from the Old World, met with a serious loss in last Monday's gale. A new two-story hospital building which he had well advanced was blown from its foundations, and completely wrecked. The building was to have been finished for this winter, but that is now impossible. The contractor's loss, unless the Government helps him out, will be fully $3,000.

The city of St. John stands to make a good bargain out of its purchase of the Mispec pulp mill for $115,000. The mill was on the Mispec River which drains Loch Lomond. The city is extending its water system to the lake, and by the purchase of the mill got control of the stream and wiped out any possible claims for damages. It has had several offers for the purchase of the mill at an advance on its bargain, leaving to the city all its rights in the water. None of the offers have as yet been considered, as the city is desirous of getting the best terms possible.

The pulp mill at Chatham, Miramichi, which has long been closed down and in litigation, will soon again be in operation. It has been purchased by owners of the Nashua, N.H. paper company, and James Beveridge, manager of the Cushing pulp mill at St. John, has been appointed manager of the new mill. He is now at Chatham preparing to start work.

The winter port season at St. John will be started with the arrival here about the end of this week of the C.P.R. steamer "Montrose" from Antwerp. Canadian Pacific Railway freight men who have been here during the past few days declare the business done this coming season will probably be the heaviest since shipments were sent through St. John.

A St. John merchant, Josiah Fowler, manutacturer of edge tools, has just returned from an extended trip to the Pacific Coast, where he arranged for the sale of his goods. Alexander R. Wilson, manufacturer of saws, has begun the erection of a large building on Union Street, into which he will move as soon as it is ready for occupancy, probably before the end of the year.

Messrs. David A. McLeod, William A. Cathers, James McCarthy, William White and Frank McCarthy, all of St. John, are asking incorporation as the Imperial Wine & Spirit Company, Ltd., with a capital stock of $25,000, divided into shares of $50 each, to carry on a general wholesale and retail wine and spirit and tobacco business, with head office at Hampton, N.B. The main store of the company will be in St. John, for Hampton is in King's County, where the Scott Act rules.

The Bank of New Brunswick is arranging to open a branch at Fairville, one of the suburbs of the city. The Bank of British North America has just opened a branch at the Corner of Union, Sydney, and Waterloo streets, in the heart of St. John, and is keeping it open late on Saturday evenings. This, it is reported, is securing many savings bank accounts.

Recently, an official of the geological department, Ottawa, visited here and made an inspection of iron deposits at or near Lepreaux, which is in Charlotte County, New Brunswick, a few miles west of St. John. His report is said to have been very satisfactory, and plans are now making for the development of the property

The Star Line Steamship Company, operating the boats on the St. John River between St. John and Fredericton, have just purchased in Philadelphia the twin-screw steel steamer "Pokanoket," and will have her on the service next season. She is the first twin screw boat to be used on the river.

* * *

St. John, New Brunswick, 18th November, 1904.

—Only two or three more ocean liners are booked to arrive at Montreal this season. Seven arrived between Friday and Monday last, two of them passenger boats, the "Tunisian" and the "Lake Manitoba." Four ocean steamships left the port on Sunday, leaving fourteen in port.

* * *

—It is common to hear, in the cities, expressions of satisfaction with the continued mildness of the weather. And indeed November has been thus far ideally mild and fine, a great contrast with November last year. Still the people who are finding some cause to grumble at the mild weather thus late in the year are the retail dry goods dealers and country storekeepers, who find it keeps people from buying heavy winter goods. Furriers have a similar ground for dissatisfaction.

* * *

—A syndicate has been organized in Halifax, we are told, under the name of the Inverness Copper Company, Limited, for the purpose of buying and enlarging the smelting works at Pictou, N.S., and then developing the industry to as large an extent as possible. There should be ample material in our Eastern Provinces to keep a smelter running.

* * *

—A Chicago land and mineral development concern is lodging a complaint with the Dominion Government against the diversion of waters in the northwest part of Minnesota and along the International boundary by the Minnesota Canal and Power Company. It is claimed that Canada should take cognizance of the proposed enterprise, because it is likely to affect adversely the water-powers near the border.

* * *

—The new extension of the Canadian Pacific Railway track from Regina to Arcola, Assa., was opened to general traffic on the 14th inst. The region through which the new line runs is already, as our readers know, extensively settled by Americans, who, realizing the good qualities of the land and believing they would soon have transportation, settled upon it when it was a wilderness.

* * *

—A despatch from Brussels says that steel manufacturers in Belgium, France, Germany, and England have agreed to form a European trust, controlling the prices and output of steel rails, to compete against the American manufacturers, who are now underselling the Europeans in their own markets. The proportion of production, the despatch continues, is to be distributed as follows: England, 47 per cent.; Germany, 32; Belgium, 16; France, 5. We shall be interested in watching to see the working of this arrangement, supposing the information to be exact.

Mercantile Summary.

The woodenware factory of Weiler Bros., in Victoria, B.C., has been destroyed by fire. Loss, about $3,000; covered by insurance.

The Canadian Pacific Railway will build a branch railroad connecting their branch line through the Columbia Valley, B.C., to Fort Steele Junction, in the Crow's Nest Pass.

Prairie fires, which started in Montana, are now sweeping through the Canadian North-West. In the vicinity of Moose Jaw and Lethbridge, considerable damage has been done.

The Bellingham Bay and British Columbia Railway Company are about to extend their line from Maple Falls, across the divide in Coast Range, near Mount Baker, and on to Spokane.

It seems now to be a settled policy on the part of the officials of the Delaware, Lackawanna and Western Railroad to equip that road as speedily as possible with electric power. They have been studying and testing the question for some time past, apparently with the result aforesaid.

On Monday evening last was held the regular monthly meeting of the Institute of Chartered Accountants of Ontario. An enjoyable feature was an address on "Negotiable Instruments," by J. W. Johnson, F.C.A., Belleville. Mr. Johnson is a clear and forcible speaker, and made his subject decidedly interesting.

The steamers "Lake Erie" and "Lake Manitoba," on their last trips to Montreal, brought an aggregate of 5,000 tons of English speigel to be used in the manufacture of pig iron at the Algoma Steel Company works, Sault Ste. Marie. This is one-half of a 10,000-ton lot ordered.

There was a meeting of the Hamilton branch of the Commercial Travellers'. Association of Canada in the Board of Trade room, when the following officers were nominated: Fred. Smye, first vice-president; J. H. Herring, second vice-president; E. J. Fenwick, H. G. Wright, Geo. Mathieson, James Hooper, E. W. Moore and G. M. McGregor, directors. Messrs. Thomas McQuillan, Toronto, president of the Association, and J. C. Black, treasurer, spoke on the mortuary benefit system, which is not regarded as satisfactory. One account says that a change will likely be made in it at the annual meeting of the parent association.

Most people in Toronto, and many people outside of it, know how much good has been done by the Hospital for Sick Children and the Lakeside Home on the Island. Mr. Jno. Ross Robertson and those who work with him in these most deserving enterprises—which are supported by voluntary contributions—have found for years a generous response when they made an appeal for assistance to maintain them. We do not doubt that this really provincial work will receive the usual liberal response to the request now being made for funds to help the work. Contributions may be sent to J. Ross Robertson, chairman, or to Douglas Davidson, sec.-treas., of the Hospital for Sick Children, College Street, Toronto.

The steamer built in England to be an ice-breaker on the river St. Lawrence, had a successful trial trip, and left London for Canada last Friday. She is named the "Montcalm."

A resumé of the report of the directors of the Acadia Sugar Refining Company, of Halifax, has been made public. The report will be placed before the general meeting of the company, to be held on December 1st. The net profits shown are $188,585, after providing for depreciation. A 3 per cent. interim preference dividend was declared last June, and now a further preference dividend of 5% is to be paid, and a dividend of 1 per cent. on the ordinary shares.

A Montreal firm of patent attorneys, Messrs. Marion & Marion, have compiled statistics about inventions and patents, which make rather interesting reading. The year past has been a busy one for inventors, and, unless all signs fail, manufacturers in the United States intend placing upon the market many new products not heretofore known. During the last year, 31,699 patents were issued by the United States Patent Office. The number of patents which expired in the United States in 1903 was 21,797. The number of allowed applications awaiting the payment of final fees was 10,545, and there is $5,682,540.61 to the credit of the Patent Office in the Treasury of the United States. Messrs. Marion & Marion tell us that they secured one-fourth of all United States patents issued to Canadians in 1903. Altogether the volume of business done by the United States Patent Office last year was the largest in the history of that office. Germany has purchased land, and plans have been prepared for a new Patent Office building in Berlin to provide accommodation for two thousand employees. Commencing January 1st, 1905, the British authorities will follow the method of examination now practised in Canada, the United States and Germany.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 31st Oct. 1904.

Mercantile Summary

The Eastern Bar Iron Association of the United States has advanced the price of its products by $2 per ton.

The Public Works Department of the Dominion Government has awarded the contract for the new Stratford Armories to an Ingersoll firm, the price being $47,793.

Some Michigan capitalists have purchased a large area of timber lands situate on the Toga river, near the British Columbia coast. On the land there is said to be something like 600,000,000 feet of standing timber, chiefly fir, cedar, hemlock, and spruce, and it is the intention of the purchasers to start at once developing the property.

The steamer "Ocean," belonging to Wentworth Company, and plying between Hamilton and Montreal, was the other day destroyed by fire at Port Dalhousie. The vessel was an old and well known one; she was valued at $30,000, and the loss is covered by insurance.

The new general manager for the Consolidated Lake Superior factories at the Soo will be Mr. Willard N. Sawyer, a member of the large Pittsburgh engineering firm of Wellman, Leaver & Morgan. Mr. Sawyer is said to be a steel expert and contractor of international renown.

The Dominion Government has granted a charter to the Miller-Morse Hardware Company, Limited, Winnipeg, capital, $1,000,000. They will carry on the business of ironmongers, foundrymen, machinists, plumbers, etc., on a large scale. Hyman Miller and F. W. Morse, of Winnipeg, are prominently connected with the new organization.

St. John, N.B., lost a well known citizen the other day in the person of Ezekiel B. Ketchum, manager of the Lawton Saw Works, who died at the age of 73. In his earlier life, Mr. Ketchum was a highly successful master mariner. Afterwards he engaged in general business, became interested in mining, and next became connected with the Courtenay Bay Cotton Mills.

Mr. Eugene P. Poisson, inspecting engineer for one of the largest contracting engineering firms in France, has been on a visit to Canada with a view to investigating the opening for a factory for building railway supplies, beet sugar machinery, etc. Mr. Poisson was particularly pleased with the Canadian West. He thinks his firm may invest something like 200,000,000 francs in this country.

Cassier's Magazine devoutly prays for a noiseless typewriter. The clatter of the average machine ought to have been a fruitful stimulus to inventors long ago, but typewriter ingenuities seem to have followed other lines rather than that of producing noiseless working, so that the problem is still an open one. Not only is the constant din of the machine nerve-straining to others than the operator, but from an engineering point of view it means wear and tear of mechanism and misspent energy—imperfect design and construction — which thoughtful consideration ought to overcome in measurable degree.

The Montreal Street Railway Company have opened a line through the municipality of Delorimier.

The Vancouver, Westminster, and Yukon Railway Company are about to establish a telegraph line from New Westminster, B.C., to Vancouver.

John Kay, Son & Company, Limited, Toronto, carpet and furnishing house, have purchased the old-established furniture business of Charles Rogers & Sons, Company, Limited.

The Maple Leaf Flour Mills Company, Limited, Ottawa, has received a Dominion charter. The company, the authorized capital of which is placed at $1,000,000, will do all kinds of grain milling, elevator and warehouse business, lumbering, mining, etc. Mr. J. Flavelle, of Lindsay, Ont., and D. C. Cameron, of Winnipeg, are among the charter members.

On the 16th inst. there was a serious fire in Brockville, Ont. It broke out in a large shed belonging to the Central Canada Coal Company, and spread rapidly to the wringer department and the tool works of the James Smart Manufacturing Company. The loss to the latter is estimated at $30,000, fairly well covered by insurance; the coal company lost about $5,000, half insured.

Mercantile Summary.

A despatch from Albany says that Superintendent Boyd has fixed upon Saturday, November 26th, at midnight, as the date for the closing of the New York State canals. This is a few days earlier than usual, December 1st having been the ruling date for many years. The authorities expect severe weather early in December.

A despatch from Newfoundland, dated Friday last, says that Henry M. Whitney, of Boston, president of the Newfoundland Timber Estates Company, has transferred to Sir Alfred Harmsworth & Bros., the London publishers, lumber areas in this island on which the Harmsworths purpose establishing large pulp mills. The price paid was $500,000. The Harmsworths propose to spend $2,000,000 in erecting pulp mills.

A letter from Amherstburg, written on Thanksgiving Day, 17th November, gives some information as to matters in the southwestern portion of Essex County: "The weather has been exceedingly dry; until a few nights ago some flowers were still blooming in the open. Our farmers hereabout do not lose much time or energy over elections. They are killing their hogs even now, and it is not likely that the next election will be on before a good many hogs are on their way to Montreal. Money should begin to come in plentifully soon, probably during December. Then, again, the corn will be selling in considerable quantity probably by the first of January." This news about the Indian corn crop is satisfactory, especially as there had been no maize to speak of for the two years preceding. In 1903, the wet spring prevented its planting till late, and it did not ripen; while in 1902 the conditions were unfavorable and the crop was extremely limited.

—The adjourned annual general meeting of the Lake of the Woods Milling Company, Limited, was held in Montreal last week, when the following board of directors was elected: Robert Meighen, Thos. Fyshe, Robert Reford, Hon. Robert Mackay, Albert Maclaren, Ottawa; Cyrus A. Birge, Hamilton; W. H. Murray, St. John, N.B.; Robert Thomson, St. John, N.B.; David Russell, Montreal. The officers are: Robert Meighen, president and managing-director; Thomas Fyshe, vice-president; G. V. Hastings, general manager; W. W. Hutchison, eastern manager; F. E. Bray, secretary; Frank S. Meighen, treasurer; R. Nelson, assistant secretary.

Montreal papers announce that D. B. Martin & Co., of Baltimore and Philadelphia, have purchased the East End Abattoir, Frontenac street, across the Canadian Pacific Railway tracks from the Angus shops, in Montreal. The firm make stearine tallow, size, etc., the bi-products of an abattoir, and have a branch manufactory on the canal bank near the Western Abattoir. Mr. Cook, the firm's manager, says that the property is worth $400000, and that the Canadian Pacific Railway Company, which held the controlling interest, and the minor shareholders had been bought out.

Mercantile Summary.

The International Navigation Company has secured the contract from the Dominion for a steamer service between Campbellton, N.B., and Gaspe, Que. A boat is in course of construction by a Glasgow firm, and will be ready for the service next spring.

The Newcastle, N.B., Advocate says: "About half the usual number of men are now in the Miramichi woods. A prominent operator stated that he expected that just about half of the usual cut would come out of the woods. Everett Parker, usually a large operator, is not cutting at all this winter, and other operators will curtail their cut one-half.

It is satisfactory news that the big steel freight steamer "Augustus B. Wolvin" has been able to find easy passage up the Kaministiquia River, at Port Arthur, Ont. This boat is one of the big steamers of the Great Lakes. She is 560 feet long, her tonnage is 10,000 tons, and she carries 330,000 bushels of grain.

A warning is sent out by the C.P.R. to shippers who have been consigning goods to Prince Edward Island. It is to the effect that on and after December 1st, freight for Prince Edward Island via Point du Chene and Pictou will be accepted only subject to delay, though it will be hauled from these points as long as weather permits.

The popular house, Brown Bros., Limited, wholesale stationers and bookbinders, who suffered so seriously from fire twice within the present year, have resumed business at their old stand, 51 and 53 West Wellington Street, Toronto. The firm are now in a position to attend to all orders promptly, and will be glad to see all their old friends at their new establishment.

Up to two years ago W. J. Steele worked upon his father's farm. Becoming imbued with commercial aspirations, he then launched into a general store venture at Calumet, Que., and his has been the experience of many others who have gone into retail trade without the necessary experience or aptitude. Mr. Steele has never been found either methodical or prompt in settlements, allowing himself to be sued from time to time, and he has now been asked to assign.

A special to the Montreal Gazette dated Saturday last, says that the Three Rivers saw mills all closed down last week. Alex. Baptiste's, Great Falls Lumber Company, the Burrell Lumber Company, the Union Bag and Paper Company, and St. Maurice Lumber Company. This year, owing to the lateness of the drive the mills were run as long as possible, as a great many logs remain over on the St. Maurice River. About 75,000,000 feet were cut by these mills during the season. There is no snow yet, but booms at mills are frozen up. Logging operations, on a large scale, will be carried on this winter.

"The pupils and staff of that enterprising Institution, The Dominion Business College, are issuing cards for an 'At-Home' to be held in their class rooms on December 1st. We have to hand an interesting little story, issued in elegant form by the College. This will be sent to anyone on receipt of a postal card at the Dominion College. Address, 4 Richmond St. East. Everyone interested in Telegraphy or Shorthand should write for it."

The Gazette understands that a rich deposit of iron ore has been discovered on the farm of William Talmage, near Sweetsburg, Quebec. The vein is being uncovered and a quantity of the ore will be smelted in order to test its quality.

In a serious fire which took place in Montreal last week the premises of John H. Barry & Co., wholesale millinery, and of Walter H. Barry & Co., dry goods, were damaged to the extent of about $45,000. J. P. A. Destroismaisons & Co., wholesale milliners, also suffered severely from smoke and water.

A demand of assignment has been made upon J. D. Plourde, formerly traveller for a Montreal dry goods house, who only last spring started on his own account in general storekeeping at St. Raymond, on the north shore, near Quebec. A few months later he also bought out a store at St. Tite, and later started even another branch, and to this over-expansion is attributed his undoing.

An official abandonment has been made by O. J. Beauchamp, Jr., of Ste. Rose de Lima, Que. Possessing some experience as a clerk, he began storekeeping about two years ago on a comparatively small capital. A year or so ago he opened a branch store at East Templeton, which evidently over-taxed his means, as he has since then shown signs of financial strain, with quite numerous recent suits appearing against him.

T. T. Blais & Co., dry goods dealers at Sherbrooke, Que., have voluntarily assigned. The name has been a prominent one in Sherbrooke business circles for over thirty years, and in its earlier history was apparently fairly prosperous, but in 1894 the firm failed, compromising at sixty cents, and they again assigned in 1899, when a settlement was not extended them, but the stock was bought in for Mrs. Blais, who has since been the legal owner of the business. The present liabilities are put at about $12,000.

CANADIAN WEST INDIA STEAMERS

Sail from Halifax for Bermuda, The Windward Islands and Demerara every other Monday, and for Jamaica once a month.

The demand for Canadian goods in West India markets is constantly growing, and prospective exporters should inquire as to freight rates by this line.

This Debenture is issued by the Town of Portage la Prairie for Granolithic Walks.

The highest or any tender not necessarily accepted.

F. A. WHITAKER,
Town Clerk.

Portage la Prairie, Man.
November 16th, 1904.

Middlesex 4 per cent. Debentures.

Sealed tenders endorsed "Tenders for Debentures" will be received at the office of the undersigned up to two o'clock p.m. on Monday, December 5th, 1904, for the purchase of $33,000 County of Middlesex Consolidated Debt Debentures, bearing interest at four per cent., payable semi-annually, on the 15th of June and the 15th of December. Principal payable in gold on the 14th day of December, 1924.

Each tender must state a lump sum, payable at the Bank of Toronto, in London, Ontario, on the 15th day of December, 1904, where and when the debentures will be delivered.

A. M. McEVOY,
Treasurer.

County Buildings, London, Ont.,
October 26th, 1904.

WHAT ABOUT THE COAL DUTY?

In the affairs of this Dominion, the little Province of Nova Scotia has been heard from in the past, and since the events of the 3rd of November, is not likely to be dumb. Just now the coal question is bothering her. She is commencing to raise a surplus of coal, which she wants a market for. New England would do for the market if a United States duty of 53 cents per ton against outside coal did not interfere. Ontario would suit also but the Pennsylvania coal can be delivered there at most points at cheaper prices than the carriage alone on Nova Scotia coal. The proposition is thrown out that Nova Scotia may ask Mr. Fielding to double the duty in favor of Nova Scotia coal.

The battle cry of the manufacturers, "Sufficient protection to hold the domestic market," is equally good for coal producers, and while the manufacturers may not relish the presence of these new allies in their procession to Government Hill, they may have to keep step with them. Meanwhile, what the consumer would like—the person who buys coal for his home or business—would be to see the duty on coal abolished altogether.—Ottawa Journal.

⁂

RAPID HANDLING OF MONEY.

Handling money is one of the most delightful pastimes in which one can engage. The speed with which the accomplished bank clerk can count accurately a pile of bills wins the admiration of the spectator, and shows the perfection which can be acquired in an art constantly practised. A contest is in progress under the auspices of the American Institute of Bank Clerks, which will decide who is the most expert manipulator of bank notes. Recently twelve packages of bank bills of $5, $10 and $20 denominations, aggregating $6,000 each, were delivered to twelve Chicago bank clerks, to be counted. The first prize was won by Lemoyne S. Hatch, of the First National Bank, in twenty-one minutes, six and four-fifths seconds. Method, accuracy and speed were the essential points in the contest. The winner finished his task one minute ahead of the counter who received second prize. The man who stood third finished in twenty-five minutes ten seconds. Men from different banks added up on machines 500 cheques, running from ninety cents to $350,000, and aggregating $1,500,000. The first prize was won by Fred. B. Robyn, of the First National, in eleven minutes thirty-nine and four-fifths seconds. His nearest competitor, performed the work in twelve minutes fifteen and four-fifths seconds.—Philadelphia Ledger.

⁂

TORONTO MARKETS.

Toronto, November 24th, 1904.

Chemicals, Drugs, Etc.—No special change has taken place in the situation. Prices continue steady. Opium is a little firmer, and quinine fully as steady or somewhat more so than it has been lately. New York advices speak of dull trade,

while British reports, on the other hand, are more optimistic.

Dry Goods.—Considerable activity has prevailed since the Thanksgiving holiday, and travellers report good prospects for all lines of seasonable goods. Products of Canadian mills are in particularly good request, both in regard to dress goods and clothing materials. Wool and woolen staples are firmer than ever. Cotton goods are little changed.

Flour and Grain.—Little business is being done at the moment in flour. Ninety per cent. patents are quoted at $4.30 to $4.40. Manitoba is unchanged. Millfeed is about steady, while oatmeal is easy, with somewhat large quantities coming in from the States. Wheat has gone down 1 to 2c., both Ontario and Manitoba. Barley is unchanged from last week's quotations. Oats have gone up 1 or 2c. Peas are 1 to 2c. higher. Rye, corn, and buckwheat are unchanged. Not very much grain is coming into market even now, the farmers taking advantage of the prolonged open weather for fall farming operations.

Hardware.—The wholesale merchants are extremely busy rushing out orders before the close of navigation. The articles usually in request at this time of the year are moving out quite rapidly. Prices of ordinary shelf hardware are unchanged. Glass is extremely firm, and prices are likely to be advanced as a consequence of the shortage, which was caused by the strikes in European factories. Metals are moving with about average freedom. Pig-iron, in fact all iron products, are a little firmer in tone. Copper, too, has advanced somewhat.

Fruits and Vegetables.—About the only sort of domestic fruit now to be seen on the markets is grapes, which have proved a more plentiful crop than was anticipated. Oranges are coming in more freely from Jamaica, but many of the receipts are still somewhat green. The feature in domestic vegetables is the strength of onions. Red onions are moving out in very large quantities, but stocks are by no means large. Prices are very firm. The demand for Canadian apples in the Old Country has increased with the diminution of home supplies, and prices are improving.

Hides & Skins.—A quiet market now prevails for hides, with moderate offerings. Values remain the same as quoted last week. Offerings of calfskins are not coming in very freely. For sheepskins the quotation is 85 to 95c. Tallow is dull.

Seeds.—There is not much demand and the market continues dull. Prices range about as follows: Alsike, fancy, $6.50 to $7.25 per bushel; medium, $4.50 to $5.50; common, $3 to $4; red clover, choice, $6 to $6.75 per bushel. Timothy, $1 to $1.25.

Live Stock.—Offerings of cattle lately have been somewhat scanty, and this would have sufficed to raise the tone of the market, had it not been for their poor quality. The mild weather perhaps affects the demand for butchers' cattle to some extent. Feeders and stockers

SOLD BY ALL LEADING WHOLESALE HOUSES.

have been in fair demand. Sheep and lambs are firm, though receipts have been quite heavy. Hog prices are still fairly firm.

Wool.—With little business doing, values continue very firm at about the same quotations as reported last week.

* * *

MONTREAL MARKETS.

Montreal, 23rd November, 1904.

Ashes.—No. 1 pots still bring $6.10, and seconds about $5.60, but the market will likely decline after the last ocean steamers leave this week. At the moment there is quite a little spurt to get together as much stock as possible for immediate despatch. A small transaction is reported in pearls, the first for some months, the price realized to maker being $7.50, less commission.

Cements and Firebricks.—A fair aggregate of moderate orders is reported in cements, prices of which are likely to be subject to some revision, now that the close of ocean navigation is at hand. We quote English and American cement at $1.95 to $2.15; Belgian, $1.75 to $2.10. Firebricks, $18 to $23 per thousand.

Dairy Products.—Cheese shipments last week were fairly large, aggregating 84,386 boxes, but these figures were 12,282 boxes short of the exports for the same week of 1903. The shipments of butter were light, being only 3,364 packages. Last ocean going vessels leave this week, taking out closing direct consignments for this season. The movement in cheese continues a restricted one, holders and buyers in England being still far apart, and the moderate business passing is almost altogether in undergrades. Finest Westerns are held at 10¼ to 10½c.; Townships, 10⅛ to 10¼c.; Quebecs, 10 to 10⅛c., and ordinary French country goods, 9½ to 10c. For fine creamery butter there is a good local demand, and some fair amount of export trade. We quote finest creamery, 20 to 20¼c.; medium to good, 19 to 19¾c.; dairy, 15½ to 16c. per pound.

Dry Goods.—From all over the Dominion, even from the North-West, reports indicate unusually mild weather, while earlier than this last year winter had a firm grip of the country. As a consequence, retail stocks are moving off rather slowly. It is gratifying to be able to report, however, that remittances are being generally well sustained, and that failures of traders are comparatively few. As the result of the higher prices at the London raw wool sales, which opened on Tuesday, cables have been received from Bradford, intimating that an advance in dress goods, etc., would likely go into effect at any moment.

Furs.—Business in raw furs has not as yet assumed any active phase, nor is likely to do so until there be a fair snowfall. Dealers have not as yet issued new prices, and the only receipts consist of a few small lots of coon, skunk, rats, etc., mostly in prime, in quality, which shippers have difficulty in realizing on.

Groceries.—Immediately after wiring a week ago a further advance in refined sugars was announced of 10c. a cental, bringing granulated in bbls. up to $5.20, with the lowest figure for yellows now $4.60, and the market has since remained firm at these figures, with no apparent signs of any easing off. There has not been the sympathetic advance in molasses that some observers seemed to expect, and Barbados is quoted in fair lots between houses at about 26½ to 27c., with the jobbing figure for single puncheons at 29c. In teas there is a continued dullness, which is hard to account for. In other lines of groceries there is nothing new. The trade movement is still a very fair one.

Hides.—A well maintained demand from tanners exists, which fairly absorbs offerings of beef hides, and values are steady at 9c. per lb. for No. 1, with the usual advance to tanners. The quotation for lambskins remains at 95c. each.

Metals and Hardware.—Business in general hardware is fairly brisk, but there is some falling off apparent in the demand for heavy metals. The principal feature of interest is the continued strong upward movement in the general metal market. Antimony has advanced almost 2c. a lb. during the past week or so, with the cable quotations now standing at £39 a ton, and the local market has been almost cleared out of stock in the anxiety of consumers to get in supplies; in a jobbing way from 9¼ to 9½c. is now asked. For copper from 15¾ to 16c. is now asked, and a pronounced revision of quotations for all lines of brass goods is looked for shortly. Spelter is very firm at $6.25 to $6.50 per hun-

JOIN THE CANADIAN PREFERENCE LEAGUE

100,000 MEMBERS WANTED

THE object of the League is to educate Canadians how best to apply the Canadian Preference sentiment. Members of the League are expected, when making purchases, to give preference to the products of Canada and to all articles of Canadian manufacture, when the quality is equal and the cost not in excess of that of similar foreign products or manufactured articles. Each member is also expected to give preference to Canadian labor and to this country's educational and financial institutions. A monthly journal will be published in the interests of the League and mailed to each member. The annual membership fee and subscription for the Journal is $1.00.

CUT THIS OUT, SIGN, AND SEND TO
The Secretary, THE CANADIAN PREFERENCE LEAGUE,
Room 20, Home Life Building, Toronto
WRITE PLAINLY

Please enroll my name as a member of the Canadian Preference League. Enclosed is $1.00, my membership fee and subscription for one year to "CANADA FIRST," the journal of The Canadian Preference League.

Shipment by SS. "Pretorian" just arrived.

The Keith & Fitzsimons Co.,
Limited.
111 King St. West, - TORONTO

dred, and lead quotes at $3.55 to $3.60; sheet zinc, $6.75; ingot tin is steady at 32 to 32½c. The English market is stronger for Canada plates, which are now cabled at £7 17s. 6d., an advance of about ten shillings a ton, and the local quotation is firm at $2.30 for fifty-twos, and $2.40 for sixties. Tinplates are firmer in Britain, but cakes are still quoted at $3.65, and charcoals at $3.90. Galvanized sheets are rather dearer at $4.30 for best brands. There is not much doing in pig-iron at the moment, and last quotations will hold. Bars are very steady at $1.75 in a jobbing way.

Oils, Paints, and Glass.—Business in all these lines is quieting down perceptibly, and some houses are now stocktaking. Quotations have not undergone any change during the week. For turpentine 79c. is still the figure in single bbls., and 43c. is the general quotation for raw linseed oil. Window glass is very firmly held at $3.25 per 100 ft. for first break, with possibility of advance now that no further direct supplies are available.

A LIFE WELL LIVED.

There is always room in the world for kindness, for the sympathy of one person with another, for the pleasant word, the helpful deed, to those less fortunate than ourselves. And when people see this generous spirit shown they rarely fail to admire the man who possesses and exercises it, although such things may often be thought unnoticed by an apparently heedless public. Thus sunniness, unselfishness, consideration for others, are characteristics which sooner or later commend their possessor to his fellowmen. A man who was an exemplar of this sort of kindliness and brightness was Tom Hazell, the grocer, of Hamilton. All too soon, for he was not forty years old, this radiant and friendly man was taken from this world. We shall leave others, more intimate with him than we, to speak of his loss to the community. But we think it a beautiful as well as a singular proof of sorrow at his death that the retail grocery stores of Hamilton were closed during his funeral. This is evidence that the value of his honorable and serviceable life was appreciated. The Hamilton papers have sympathetic notices of his career. The following we take from the Herald of Saturday last:

"There is not a wide moral difference between the man who devotes his life to self-culture with no other end in view than the gratification of his own intellectual or aesthetic tastes and the man who devotes his life to the gratification of his sensual appetites. One is a higher and rarer form of selfishness than the other—that is all. Both of them starve their poor little souls.

"A man died in this town yesterday who did not give much thought or time to intellectual or aesthetic culture. He was an unpretentious man—a grocer, diligent in business, honorable and faithful in his social and business relations, but modest in his estimate of his own worth. He would have laughed heartily at the notion that he was worthy of eulogy. He thought little of himself, but very much about others. There was one form of culture that he prized highly and practised earnestly—the culture of brotherly kindness, of charity in the true sense. Of this grace he sowed in abundance—and he reaped an abundant harvest. A young man, not yet 40, there was probably no other man in this city for whom a real affection was felt by a greater number of people. Who can estimate the range and value of good influences that have had their source in the kindly, wholesome, manly, sympathetic nature of Tom Hazell?

"No self-centred devotee of self-culture, he. But the culture of which he was an exemplar is perhaps quite as worthy of attention as that of the library and the studio and the laboratory, and its fruits are not to be despised."

MEXICO'S SILVER PRODUCTION.

The production of silver in Mexico, has increased in a remarkable manner during the last few years, and has actually become greater than that of the United States of North America.

Mexico now marches at the head of the white metal-producing nations, and when its actual mines are scientifically exploited, and explorations in and along the Cordillera, which traverses the country from north to south, are made, which will happen in a short time, the production of silver in Mexico will reach colossal proportions. The production of silver for the past five months was $36,-

City of Moose Jaw,
ASSINIBOIA.

TENDERS.

The City of Moose Jaw, a firmly established railway and agricultural centre with an exceptionally strong financial position, invites tenders for the purchase of **$160,000** Five per Cent. Fifty Year Debentures. Offers will be received up to and including December 15th, 1904. No tender necessarily accepted.

For full particulars apply to

J. D. SIMPSON,
Secretary-Treasurer.
Moose Jaw, Assiniboia.

Debentures for Sale.

TOWN OF RED DEER, N. W. T.

The town of Red Deer, N.W.T., has fifteen thousand dollars' ($15,000.00) worth of debentures for sale, covering twenty years, and bearing interest at 5 per cent. These debentures are issued for the installation of a water-works system.

Sealed tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to DECEMBER 30TH, 1904. The debentures will be sold in whole or in blocks to suit purchasers.

L. C. FULMER,
Secretary-Treasurer.
Red Deer, N.W.T.

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.

W. S. DINNICK,
Vice-President and Managing Director.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, dated New York, November 19th, 1904, say:

After the first flush of Republican victory bullish enthusiasm quieted down, temporarily at least. Large gold exports, firmer rates for time money, increasing flotation of new issues, profit-taking by traders and big insiders, and the plain purpose of leading bankers to prevent a runaway market, all combined to cause hesitation in speculative ardor. A dangerous spirit of over-confidence was developing and a gentle snubbing was both needed and timely. It came largely by natural means, and may have been aided by artificial means. In any event the speculative craze has met with obstructions, and the result is a feverish and excited state of affairs. Many good market leaders are of opinion that the bull movement is not ended, and that prices will ultimately go higher in spite of intermediate recessions. These views have been supported by renewal of the advance movement at close of the week. Conservative investors and speculators, however, whose opinions are of value, believe that prices are as high as justified by either present or prospective conditions; they believe that we are over-discounting prosperity, and that many good securities are selling beyond intrinsic value, to say nothing of the extravagant advances which have occurred in some of the lower grade securities. They point out, too, with force that the advancing tendency of time-money materially modifies the inflationary effect of low interest rates, which have unquestionably been a very influential factor in the advance. They argue that stocks earning 5 per cent. were a much more tempting purchase on a 2 per cent. time money rate than on 4 per cent. rate which is now established. Our foreign trade returns for October were better than expected. The check to grain exports imposed by high prices rendered a falling off in our export trade extremely probable. Higher rates seem likely for money. Bank reserves have been much reduced. Treasury deposits may be called after January 1st, and legitimate business demands which come before speculative accommodation are increasing. On the other hand, crop funds are returning from the South and West and money is plentiful to good borrowers. No stringency is probable; but the extreme low rates which prevailed during the last few months are fortunately past. They did no good, and only fostered unhealthy speculation.

⁂

The following patents have been recently granted to Canadian inventors in this country and the United States: Canadian patents, J. P. Cook, detachable hat or cap bands; J. A. Law, cultivator; Mr. Beber, car fender; J. W. Deckert, cylinders for hide; J. W. Deckert, hide-working machinery; J. G. Thomas and D. E. Lewis, safety couplings for electrical wires connecting railway coaches. United States patents, Henry C. Biette, machine for imprinting pencils; Peter Dierlamm, building block; John H. McLean, saw teeth; John A. Watt, fire escape.

—Charles Hawtry, the actor, is responsible for this story: He was talking with a friend of his the other day about peculiar names and initials, when he quietly observed: "By the way, I have a friend who is in a most unfortunate position. He actually has no initials." "No initials?" queried the friend in amazement. "Why, how can that be? Hasn't he got any name?" "Oh, yes," replied Mr. Hawtry, with a twinkle in his eye, "but you see his initials happen to be H. H., and being an Englishman, he always drops his h's."

⁂

—A year ago or more a case known as the Bachrack-Margolius case was tried in Montreal. The defendants named were accused of fraud; particulars were given in this journal at the time. A Toronto merchant, Mr. W. Blackley, was made a party to the suit. He sent a letter to the Attorney-General of Quebec declaring that Crown Prosecutor Cooke had been guilty of actions not creditable to a man in his position. Mr. Cooke issued a warrant for the Torontonian, alleging libel, and a long trial followed, but was brought to a close before a verdict was reached through the death of the presiding judge, the late Justice Wurtele. A second trial of the case was impending when on Monday last the now famous case came to a sudden end in the Court of King's Bench. The prosecution announced a nolle prosequi, declaring that they did not wish to continue the case and suggesting that the defence had agreed to the action. This counsel for the defence denied, but agreed that they had no other option that to accept the decision. Mr. Justice Hall then discharged Mr. Blackley, and upon motion of counsel set a date for the hearing of a motion for costs.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

COMMERCIAL TRAVELLERS' ASSOCIATION.

This is one of the important commercial bodies of the country. The Association is composed of some 6,400 commercial travelers who pay $10 each annually for transportation privileges. Some years ago it was found that the management had been so excellent and economical that it took only some $2 per member for the expenses of the body, the other $8 being utilized for the benefits payable on the death of members. During its early years when the members were young and deaths comparatively few, a fund of between $300,000 to $400,000 was accumulated. Each year the membership has been growing, and the prospective death benefits increasing until at the close of 1902, when the late William McCabe, F.I.A., the Association's then Actuary, pointed out that it would be absolutely essential to reduce the mortuary benefit from $1,000, or increase the annual subscription fee. This statement immediately appealed to a large section of the membership, and a committee was appointed to recommend a modification of the mortuary benefit.

The whole question of mortuary benefits has been gone into by the Board during 1903 and 1904, and a sound permanent scheme proposed which, if put into effect, will place the Association upon such a financial basis as it has never heretofore enjoyed, and which will insure its perpetuity.

There has fallen into our hands a circular signed by Mr. E. Fielding, which document is a plea that the mortuary benefit of the Association shall be maintained at $1,000. The circular is not worthy of being taken seriously, for it is full of fallacies and absurdities. It is such a deliverance as might be expected from a person ignorant of the first principles of life contingencies. Mr. Fielding, or any of his friends who are familiar with merchandise of various kinds, would laugh in scorn if an inexperienced clerk was taken out of a life assurance office and sent to Europe to buy goods for one of their wholesale houses. It is not a bit less laughable to see Mr. Fielding setting himself up to correct actuaries and financial men as to what is and is not necessary in mortuary calculations.

We shall now refer to only four points in this circular of his. The first is, his building up a structure on the Canada Life's mortality experience and applying it to the mortuary benefit scheme of this Association. The Canada Life's experience is the result of examination of lives which have been first carefully selected by agents, then by local medical examiners, and finally by the chief medical referee at the company's head office. Of those who apply, at least one-tenth were rejected, the result being that the experience of the Canada Life shows a more favorable rate of mortality than that enjoyed by any other life company. The Commercial Travelers' Association does not select its lives, but admits all persons who state that they are commercial travelers and who pay the regular fee; and consequently a number of uninsurable lives will find entrance. Moreover, the actuary of the Canada Life specifically stated in his report "that it should not be too hastily assumed that companies and associations in Canada acting under somewhat different conditions would show as favorable a mortality experience as the Canada Life."

Mr. Fielding goes on to say that the Canadian census confirms the experience of the Canada Life. This is merely an unproved statement. The census of Canada includes persons from age 0 to extreme life, and consequently its results cannot be compared with the mortality experience of a life company in the way in which Mr. Fielding states.

Again, Mr. Fielding has fallen into the error which many amateurs playing with life contingencies fall into by utilizing the expectation-of-life table. This table is never used by actuaries and those versed in life contingencies for mortuary benefit purposes. Results are based upon it are incorrect and misleading.

In dealing with the finances of the Association, which have been admirably administered during the past twenty years, Mr. Fielding states that a 4 per cent. rate of interest may, according to his calculations, be expected to be realized for a period of forty-five years. The merest tyro in finance might enlighten Mr. Fielding upon his visionary expectancy. Most certainly no sound financier would dare to base calculations for forty-five years upon a 4 per cent. rate of interest if the funds of the Association are to continue to be invested in such first-class securities as are contained in the last balance sheet. It may be that Mr. Fielding has in view the investment of funds in speculative securities, which we hope the Association will seriously set its face against.

But probably the feature of Mr. Fielding's scheme which characterizes it as absolutely unreliable is his calculation that during the next five years the 217 members between the ages of 66 and 86 will have passed away. The total mortuary benefits of these 217 members amount to about $200,000, and therefore, Mr. Fielding calculates that on an average $40,000 per annum for the next five years will be paid out to these 217 members. As the mortuary benefit allotment of the Association is only about $40,000, we should like to know from Mr. Fielding how he proposes to pay the death losses which will occur amongst the other 6,184 members. Will he be able to have such a grip upon "Old Mortality" that he will be able to guarantee that during the next five years there will be no deaths amongst the remaining 6,184 members?

Mr. Fielding's circular, as previously intimated, is so full of error and fallacy that the members of the Association will be well advised to pay no attention whatever to it. His advice, and the speeches, at the meeting the other evening, of those who join in the cry, "A thousand dollars mortuary benefit or nothing," are misleading and ill-timed, full of danger to the prosperity of this important body. And to make Mr. Fielding treasurer of the Association would be a menace to the prudent administration of its affairs if this circular is a specimen of his financial opinions; for it is a specimen of that false science which "leads only to bewilder and dazzles but to blind."

* * *

THE INDEPENDENT ORDER OF FORESTERS.

It is quite a little while since we had occasion to notice one of the many ceremonious functions of the I.O.F. We believe the last one was that of May, in Toronto, when some 1,240 new members ,"from Hamilton and Toronto," were added to the Forestric family, as it is called. The turn of Hamilton for a blow-out had to come, and it took the form of a gathering in the drill-shed in that city on Friday evening last. The various city courts were represented; and very attractive names they had. There was Court Alert—and they were very alert; Court Amity—and none could be more friendly; Court Hamilton—as was most proper; Court Orient—of which we do not quite see the appropriateness; Court Ideal—the very name of which puts it beyond criticism; and five more. It seems a pity that no Court Gibson was among them, but as Hon. Bro. Gibson was chairman of the big meeting, that position was perhaps deemed honor enough.

The programme of songs and recitations on the occasion was appropriate, for there was sung "The Syren and the Friar," and if there be such things as male syrens, the S.C.R. is assuredly one; "The Veteran," and indeed there are veteran book-keepers, canvassers and braggarts in the order; "Call me Back," which may have had reference to the wishes of some of the emissaries of the I.O.F. now in foreign countries. The lady guard of honor from the Toronto Temple executed an intricate and martial drill, a feature of which, the newspaper accounts tell us, was the prayer to the Great Orator, "which exemplified that the order holds the Almighty as its highest official." It is pleasing to be told that the members admit some personage in the universe to be superior to Dr. Oronhyatekha, but this is the first time, so far as we know, that it has ever been conceded. The Senior Woodward and the Chief Woodward (novel officers, surely), and the Chief Butler are, it seems, among the attendants who officiated on this occasion. Let us hope that the Chief Butler may give no offense to his forestric king, as did his prototype in the Scripture narrative, and get put "in quod" as was the fate of that poor Egyptian. There were odes recited on Friday night, definitions given, and pledges made, and "the initiation pledge was read and endorsed by the candidates placing their hands over their hearts,"—what a beautiful ceremonial!

After patriotic and emotional songs, and a comic song by a Barrie brother, came the climax to which all the other tom-foolery was but a prelude, namely the presentation of a bouquet of roses *and* an address to Dr. Oronhyatekha. He always manages, as an exacting master of the spectacular, to have pretty women, flags, flowers, ritual, and song to tickle the ears and dazzle the eyes of the simple, while glorifying himself. His speech in reply was semi-historic, demi-egotistic, and altogether optimistic. But the Doctor's excursions into the domain of arithmetic are never satisfying. His statistics do not hang together. He can readily "make the unskilful laugh," but he often "makes the judicious grieve" by his extravagant statements. And it should never be forgotten that there are some judicious members in the order who are far from pleased with these periodical and costly frolics. The Big Chief was introduced by Hon. J. M. Gibson, who added to the farcical and hilarious character of the proceedings by suggesting, seconded by Dr. Montague, "that Oronhyatekha be premier of Ontario for the next five years." Dr. Montague's speech was measurably sane; at least it was devoid of the highfalutin that so often characterizes the deliverances made at these gatherings. But it was mathematically loose in texture, as an instance or two may show.

At the beginning of November, 1903, said Dr. Montague, "there were 1,152 members of the order in the city of Hamilton. To-day there are just a few less than 2,000." Let us apply a little arithmetic at this point: 1,152 a year ago with 1,200 added makes 2,352. There ought to be 2,352 members now, if all the 1,152 of last year "stuck." It is clear that they did not if there are only 2,000 now. Why did they lapse? The World says 1,267 new members were enrolled last Friday in Hamilton. Then 1,267 plus 1,152 makes 2,419; and there must therefore have been 419 who dropped out in twelve months. In the usual rhodomontade about the "growing strength of the order," its present blessings and its future benefits, indulged in by these speakers, the expenses of the I.O.F. in securing new members and taking care of its funds were asserted to be much smaller than those of certain old line companies. No one who has read the report of the Connecticut Insurance Department on the book-keeping and spending methods of the I.O.F. will take any stock in the assertion. (Many will look with curiosity, by the way, in the next report of the order for the amount it has taken to erect the large, and at night resplendent, Alexandra Palace Flats, in the College Avenue). Then the authorities of this body persist in boasting of their "surplus." They have no surplus. A surplus is a sum of money or of assets in hand after the risks of death among the membership have been provided for. But their risks are very far from being covered. What the I.O.F. people talk about is really their reserve. This reserve, we are now told, has risen to over $2,000,000. But with a membership of 223,000 it needs several times this sum before the heirs of its members can look to be indemnified. Herein lies the fallacy of all their boasts of strength and security.

⁂

DAIRY PRODUCE EXPORTED.

Another year of large export in cheese and butter was practically closed last Saturday when the last ocean liner leaving Montreal finished her cargo with some thousands of boxes and packages of both. The aggregate shipments of dairy produce from that port during the season of navigation of 1904 were as follows: Cheese, 2,112,398 boxes, as compared with 2,390,702 boxes in the corresponding period of 1903, showing a decline of 11.64 per cent. Butter, 485,468 packages, as compared with 338,287 packages in the like period of 1903, an increase of more than 30 per cent. It is gratifying to find that though there is a decline in cheese export this year the shipment of Canadian butter across the Atlantic is increasing.

⁂

WHO IS RIGHT?

The daily newspapers have recorded meetings of the Fire and Light Committee of the Toronto City Council and of the Board of Control to consider proposals for establishment of a high pressure system of water mains for the centre of the city, and it would seem from the printed reports of the meetings that the Council propose to go with a scheme which is not in any way in accordance with the suggestions of Mr. Howe, the special water-works expert employed by the insurance companies. It is quite possible that Mr. Howe is wrong and that the method which the City Council proposes is the best. It must be remembered, however, that while Mr. Rust is one of the best City Engineers which Toronto has been so fortunate as to have occupying that position at the City Hall, that he is not and does not profess to be a water-works expert.

Some years ago the City Council at Toronto employed Mr. Mansergh to report upon the water-works of the city, and while at the time there was a great outcry at the cost of procuring his opinion, there can be no doubt that the sum of several thousand dollars paid to him was one of the best investments the City Council ever made, as it saved a great many more thousands of dollars which might have been expended without accomplishing the end desired.

It has been stated that the method proposed by Mr. Howe would cost no more, and possibly would cost less than that proposed by the city authorities; that it would accomplish much better results, and that the future cost of maintenance would be considerably less. It should be borne in mind that at present practically all the water used in the city of Toronto north of College Street has to be pumped twice, first by the pumps at the main pumping station on the water-front, and subsequently by the pumps at the high-level station near Poplar Plains Road.

The plan proposed by the City Engineer will continue this condition of affairs, while it is asserted that the plan proposed by Mr. Howe will do away with this double pumping. It would seem to be prudent that where two experts like Mr. Howe and Mr. Rust disagree, an opportunity be taken to submit the matter to some other recognized water-works authority, of whom we have several in Toronto, such as Mr. Willis Chipman, or Mr. John Galt; before expending a large sum of money as proposed.

⁂

FRENCH SAVINGS.

The interest which attaches to the savings of a nation, especially in savings banks, is of an economic as much as of a moral nature. These are of peculiar value because they not only offer an opening to the most modest investments, but at the same time help to diminish the number of unproductive individual enterprises which are apt to cause money to pass into unprofitable channels. The Paris journal, Le Rentier, in discussing the question of the thrift and savings of the French people, which according to various statisticians are only placed seventh (and sometimes even only tenth) among the European nations, points out the error of these calculations and incidentally makes some interesting remarks upon investments in general.

The main thing to be remembered, in considering the thriftiness of the French people is the fact that deposits in the savings banks are by no means the only savings made by them, nor are they the most important nor the most significant in character. It may be true in some countries that almost all the disposable funds, that is, of the common people, may be found in these institutions, but in France, they generally serve merely as temporary reservoirs until such time as the accumulations shall have become large enough to buy governmental or other safe securities. The people's savings go into national bonds, bonds of the city of Paris, the Crédit Foncier (agricultural bonds), railroad securities, etc., investments which offer to the public a great variety of chances for excellent security, while at the same time they afford a larger percentage of profit than is yielded by the banks, public or private, and in some cases more than is yielded by shares in the ordinary companies. The share obligations quoted on the Paris Bourse on January 1st last represented a value of over $1,158,000,000. And a striking feature is that most of these may be bought and held by the very poorest, since a half or even a fifth part of a share may be dealt in. Altogether there are $28,950,000,000 of securities quoted on the exchanges of Paris and other centres in France, of which $10,615,000 are French state, railroad and other securities paying a fixed regular interest, and the largest amount is parcelled out amongst millions of ordinary citizens of the middle and poorer classes.

The public believes in these securities; it knows it has nothing to fear for either principal or interest, no matter what may be the fluctuations in the stock market. The shares of the city of Paris and of the Crédit Foncier of France make up, with the small sums in the savings banks, the investments of the laborers, the humble artisans, and small investors. Each is able thus to open the door to a modest fortune by placing his savings where they are sure to be safe. As the savings increase, the choice of securities increases. The investors begin by putting their pennies into the savings banks, then they buy a share of some safe concern, and end by buying Government securities or shares in the great railways, with their fixed returns.

Foreign securities, and what are called in America the "industrials," are never or seldom approached until the attainment of a competence, or at any rate until the first investments have reached and rest upon a solid foundation. Evidently, the get-rich-quick idea has not made so much progress in France as it has in this country.

* * *

TORONTO UNIVERSITY.

It is excellent news that the Grand Trunk Railway proposes to pay to the Ontario Government now in a lump sum the amount agreed upon as the price of the old Parliament buildings site on Front Street, Toronto, namely, $180,000. The railway company, which has erected freight sheds on the site, was given under the agreement, the option of purchasing within five years at the sum mentioned, instead of continuing to pay a rental. Upon learning the company's decision the Government decided to take a forward step in regard to the University of Toronto, the necessity of which has been recognized, namely, the addition of a physics building to those now comprising the departments of the University. When this $180,000 is paid to the Provincial treasury it is to be put to a special account for the purpose named, instead of going into the general revenue.

It has been repeatedly urged that a physics building had become essential to the continued progress of the physics work, and the Government has now reached a decision that will be gratifying, of course, to all friends of the University. At the same time it is satisfying to be assured that the new building will be erected in such a manner as not to encroach upon recreation or park grounds. The erection of a physics building and of the other structures in progress or projected in connection with the University is going forward in accordance with a general plan drawn up both with a view to the appearance of the buildings as a whole, and the necessity of having them within a certain area. Torontonians who pass along College Avenue will note that the new School of Science, in connection with the University, built by the Government at a cost of $300,000, is almost completed, and is likely to be occupied in January, while the handsome medical building, has been in use for some time. It may be also recalled that in 1903 the Government voted $50.000 towards the cost of the proposed convocation hall. This is intended to be placed not far from the Observatory building in the campus.

* * *

—The exhibits made by Canada at the World's Fair in St. Louis have shown, once more, that if a thing is worth doing, it is worth doing well. Our exhibits over these were, on the authority of many visitors, Canadian and other, good, some of them extremely good, and attractive as well. The attractiveness of a display at such a place, it should be remembered, is half the battle. Hon. Mr. Blair brings home the intelligence that one of the leading men, the head of the United States Mineralogical Department, told Mr. Hutchison, the Canadian official in charge, that he considered the Canadian mining and mineralogical exhibit as absolutely the best commercial mining exhibit that had ever been put together. We may assume his meaning to be, from the use of the word 'commercial, that this mining exhibit was of service quite outside of its interest to geologists or other scientists. It was so arranged as to stimulate curiosity among men of the world, business men, and thus to lead the man in the street to understand what the scientist already knew, that Canada is a great storehouse of minerals and metals as well as other things.

* * *

—The shipment of wood to Britain from the Miramichi region of New Brunswick has closed for the season, and word comes that the lumber shipment from that section of the province aggregated about 94,000,000 feet. This is nearly 6,000,000 feet less than for the previous year. It is stated that the Miramichi lumbermen propose to follow the example of lumbermen in other parts of the province, and reduce their cut of logs during the coming winter, in the hope of thus strengthening the English market. A prominent English buyer now in that district says, however, that even if this be done, it will be August next before such a course produces any effect upon the market of Great Britain. The October arrivals of Canadian lumber in English ports had already shown a lessening as compared with the previous October.

* * *

—The United States Government through the Bureau of Forestry is carrying on some interesting experiments in order to determine the rate at which different kinds of timber will season. Certain kinds of timber, it is known, are improved by being soaked in water for different periods of time, but the chemical or physical changes which occur are not fully understood, with the result that the best economic usage of timber is largely a matter of accident. The enquiry referred to may prove highly valuable in discovering means for the arrest of decay, the best utilization of certain parts of the tree, and so forth.

* * *

—The word "inexhaustible" when applied to the richness of a soil is only a comparative term at the best, notwithstanding the flowery language of Government writers of immigration literature, and the optimism of western wheat-growers themselves. Sir Richard Cartwright, in his recent trip to the West saw enough to impress him with the truth of the reports of the wonderful fertility of the land in Manitoba and the Far West. But he saw enough, as a wise man, to be convinced that, even there, the land would have to be treated scientifically in order to continue producing good crops for future generations. This is a question which means literally hundreds of millions of dollars to future Canada, and Sir Richard is evidently very right to be insistent in drawing immediate attention to a possible remedy. He is convinced that it is time for the Government to take steps to guard against the exhaustion of this fertility in the North-West, such exhaustion as has taken place in the Western States through constant wheat cropping, and advises that an active campaign be begun to insure proper crop rotations. To this end experimental stations and demonstration bureaus should be established throughout the wheat-growing region and a persistent campaign undertaken, even though the cost should amount to several millions.

OUR AUSTRALIAN LETTER.

The commercial situation is simply monotonous. Even busy New Zealand has to report demand for imports less brisk and money a little harder. These tight little islands have been enjoying a remarkably good time of it for five years, and the war in South Africa being over, and Australia being able to supply its own food, the trade of New Zealand which so much benefited by these calamities, must slacken. It is not likely to be serious, but it will check the expansion that vied with that of Canada, New Zealand almost doubling its trade in eight years.

The resources of New Zealand, even agricultural, are as yet but partially developed, and the country has many years of growth before it, though at a slower rate than for some time back. The Canadian share of her trade is slowly enlarging, but is not a tenth of what it might be, and as yet there appears to be no determined effort to get more. A glance at these figures will indicate the truth above stated:

	Total Imports	Imports from U.S.	Imports from Canada.
Australia	£26,770,169	£2,779,590	£212,039
New Zealand	12.778,675	1,441,358	68,329

The disproportion of Canadian exports to New Zealand is due to the absence of direct shipping connection. It is true that Germany has no direct connection, but it has the advantage of preferential freights. It has been proven that British ships carry freight from Germany, including a transhipment in England, at rates ten to forty per cent. below rates charged on British goods. It seems to me that the transportation problem is the difficulty which Canada has to solve before it can secure a fair share of this trade.

A striking feature of the trade is the wide variety of the articles imported from Canada and the smallness of the quantity in lines in which there is a large market. Take a few instances of manufactured goods:

	INTO AUSTRALIA.		INTO NEW ZEALAND.	
	Total Imports, £	From Canada.	Total Imports, £	From Canada.
Ale	403.595	4	38,610	None.
Cartridges	74,842	1,125	6,542	None.
Blacking	4.180	....	9,244	None.
Boots and shoes.......	219,065	3,278	235,254	6,866
Rubber shoes	24,147	384	10,359	518
Brushware	48,735	24	23.605	None.
Canvas	140,765	....	44,939	42
Canned fish	272.572	11,490	48,636	5.013
Furs	8.413	....	5.756	10
Rubber goods	197,297	832	12,680	60
Organs	12,077	818	7,277	206
Pianos	156,980	231	85,507	None.
Leather	202,054	12	84,341	153
Electrical appliances ...	167,786	....	111,038	None.

These figures are not absolutely reliable, because some goods from Canada are credited to the United States, but it may be taken as approximate. In some lines the trade is growing, as in boots and shoes, but in most articles the trade is just doddering along in a petty fashion. In some instances the small progress is due to poor representation, in others to inability to supply the goods or else bad business methods. The cause of non-growth may be known in Canada but not here. As to articles like pianos, Canada cannot make them cheap enough to compete with Germany. In the case of fish, Canada would appear to be doing a fair share of the business, but when it is considered that England supplies four times the value, it may be taken for granted that Canada is not putting up the fish in quality and variety, such as this market will take.

The most striking figures are those relating to wheat and flour and oats. In 1903 Australia imported wheat to the value of £1,909,483, flour, £647,485, and oats, £229,395. Canada had the hard wheat, the strong flour and the milling oats that this market required, yet her share of the trade was only: Wheat, £11,541; flour, £108,558, and oats, £10,006. The Monetary Times gave fair notice that the demand was likely to come, but when it did come, it found no one and nothing ready to undertake it, and much of what was done was unsatisfactorily done, mainly through defects in transportation. There is much room for improvement before Canada takes ' proper position abroad.

The Commonwealth High Court has passed judgment upon two cases of general interest. One was to declare that all Federal salaries are exempt from State taxation. The case goes to the Privy Council. The other is that the drawer of a cheque, if he by carelessness gives facilities for altering, is liable for the raised amount. Thus, if a cheque for eight pounds has space before the eight to write twenty, then the bank paying the larger amount can collect it from the maker. The Chief Justice, however, stated that the circumstances of the drawer must always be considered, what would be carelessness in a business man accustomed to drawing cheques would not be carelessness in a farmer not so accustomed. This is a broad doctrine. It is easy enough to guard against a cheque being raised from eight to twenty-eight, but it requires only a small space in both letter and figure to raise eight to eighty. This judgment is based on old precedents, but it is doubtful if many drawers of cheques are aware of the principle.

One of the difficulties in governing this country, where Socialism has such a grip, is that the simplest teachings of political economy are ignored. The Newcastle coal miners, north of Sydney, are in a bad way because the coal of that port cannot meet the competition abroad. The miners agreed to base their wages on the selling price of coal, but have managed to evade the agreement so far. Some mines had to shut down and others to put in machinery. The workmen in mass meeting resolved to urge the Government to fix the selling price of coal by statute to prevent lowering it; and this in face of the fact that three-fourths of the output is sold outside the State. Worse still is that three members of Parliament, one of them an ex-member of a Government, were present to support the foolish proposition!

Sydney, New South Wales, F. W.
1st November 1904.

* * *

OUR ST. JOHN LETTER.

There seems to be "a move on" in the pulp business in this vicinity. A representative of a large English pulp and paper company is here to-day negotiating with the city for a lease or purchase of the Mispec mill, recently bought by the city in connection with its new water system. It is announced that the American syndicate which recently purchased the pulp mill at Chatham in this province, is preparing to erect a large paper mill in connection with the works. A new pulp mill is also to be erected immediately on the St. Croix river, near St. Stephen, and it will prove a great boon to people living on both sides of the boundary line between New Brunswick and Maine.

Announcement is made to-day that the Eastern Steamship Company, running the steamers between St. John and Boston and other points, will build two big turbine boats, one to be put on the St. John route and the other to run between Boston and Bangor, Maine. The boats are to have a 25-knot speed, and are expected to be the finest in the passenger trade along the coast.

Messrs. Hamm Brothers, bakers and biscuit manufacturers of St. John, have dissolved partnership, and Mr. Philip N. Hamm will move to Moncton, where he intends to open a business.

The A. Booth Company, of Chicago, will establish a branch of their business at Loggieville, and will compete with the local dealers in buying and shipping smelts to the American markets.

The Miramichi shipping season has closed and statements show that the lumber shipments from that section of the province aggregated about 94,000,000 feet or about six million feet less than for the previous year. The Miramichi lumbermen will follow the example of lumbermen in other sections of the province, and materially reduce their cut of logs during the coming winter in the hope of thus strengthening the English market. A prominent English buyer now here says that such a course will not produce any effect on the market before August.

Messrs. T. McAvity & Sons, brass founders, of this city, have a number of men employed making brass posts, to be used in marking the boundary between Canada and Alaska.

The City of St. John has purchased, and on December 1st will take over, the business of the Carleton Electric Light Company, which runs the street lamps and does private lighting on the western side of the harbor. [Carleton is a suburb of St.

John]. For some time the city has been operating the lights in the North End of the city, but has not up to the present furnished any lights to private parties. It is figured out that the new purchase will prove a fairly profitable venture.

The Winter Port season is now well under way. All the berths in the harbor are occupied by steamers which are bringing and taking away large cargoes, and a fair number of immigrants are coming in also. This year, for the first time, the Dominion Government is taking control of the work of caring for immigrants who are detained for sickness, such as tracoma, fevers, or other causes. Heretofore, the transportation companies have looked after these people, but now the Government has fitted up a hospital, and is managing the business.

There are rumors that the Canadian Pacific Railway Company is planning to bridge St. John harbor. Surveys have recently been made, it is said, and further announcements on the subject are awaited. At present traffic from the West by the C.P.R. enters the city by a cantilever bridge across the falls of the river St. John. This was built some years ago, and is not heavy enough for the modern engines. The bridge is owned by a private corporation and the tolls are said to be a heavy charge. To-day there is a rumor that the bridge company will strengthen the piers and put up a new and heavier superstructure, one that will give a second track for the street railway, and thus forestall action by the Canadian Pacific.

St. John, N.B., 30th Nov., 1904. * * *

* * *

CANADIAN LIFE INSURANCE OFFICERS' ASSOCIATION.

The annual meeting of the Association was held on Thursday, the 24th of November, in the rooms of the Toronto Insurance Institute, Toronto. There were present: Mr. David Dexter, president, Federal, in the chair; Mr. John Milne, Northern; Mr. J. G. Richter, London Life; Mr. Thomas Hilliard, Dominion; Mr. L. Goldman, North American; Mr. J. F. Junkin, Manufacturers; Mr. E. Marshall, Excelsior; Mr. J. K. Macdonald, Confederation; Mr. George B. Woods, Continental; Mr. F. Sparling, National; Mr. C. H. Fuller, Continental; Mr. F. Sanderson, Canada Life; Col. W. C. Macdonald, Confederation; T. Bradshaw, Imperial; Mr. David Burke, Royal-Victoria; Mr. A. McDougald, Pelican and British Empire; Mr. B. Hal Brown, London and Lancashire; Mr. Robert Junkin, Manufacturers.

Several important matters of business were considered by those assembled, the details of which, however, can hardly be regarded of sufficient public interest to be referred to in the press. The work accomplished by the Association, there is reason to believe, is having a beneficial effect upon the general conduct of life assurance, bringing about improvements of a desirable character. The officers elected for the year 1904-1905 were: T. Hilliard, president; David Burke, 1st vice-president; J. F. Junkin, 2nd vice-president; T. Bradshaw, secretary-treasurer; E. W. Cox and F. Sanderson, auditors. The executive committee comprises the foregoing officers, and Messrs. David Dexter, B. Hal Brown, L. Goldman, and Col. Macdonald.

* * *

BANKING AND FINANCIAL.

James Sirior, of Grand Falls, recently arrested in Campbellton and tried in Rimouski for passing partly worthless Mexican money, was found guilty and sentenced to two years in the penitentiary.

The Standard Oil Company has declared another dividend of $7 per share, payable on 17th prox. This makes a total dividend for the year of 36 per cent., compared with 44 per cent. last year.

The shareholders of the Canadian Pacific Railway Company, at a special meeting last week, decided to make a call for 80 per cent. on the new issue of $16,200,000 ordinary stock, payable by July 31st next.

The Trust and Loan Company of Canada held their half-yearly general meeting last week in London, England, and declared a dividend at the rate of 6 per cent. per annum, besides which, a bonus of ½ per cent. for six months was declared on the company's paid-up capital.

The Grand Trunk Pacific Railway Company will shortly issue $6,000,000 first mortgage Lake Superior division bonds and $8,000,000 prairie division bonds, to bear 4 per cent. interest, and run fifty years, both principal and interest being guaranteed by the Grand Trunk. It is announced that these issues will be financed by Speyer & Co., New York.

About a week ago the bank branches in Woodstock, Ont., adopted the plan of giving clerks rooms in their respective bank buildings in which to sleep, the idea being that they would prove a safeguard against burglars in view of the many instances of safe-blowing which have occurred lately in Western Ontario. The banks in Woodstock are the Commerce, the Imperial, the Molsons, and the Traders.

The first instalment of interest on the mortgage bonds of the Lake Superior Corporation, amounting to $250,000, came due on the 1st inst., and it is believed was met without difficulty. The first half-year's interest on the loan of $2,000,000, at five per cent., guaranteed by the Ontario Government by the act passed last session, and amounting to $50,000, was paid when it fell due, two or three weeks ago. We are glad to hear that nearly all the various departments are now in full swing. Last pay list showed 3,934 persons actively employed, and the wages totalled $127,000 for the month.

It has been resolved by the directors of the Toronto Land and Investment Corporation to dispose of that company's assets by sale by tender subject to ratification by the shareholders. The company has been in business since 1885, and has a paid-up capital of $243,730. According to the last annual report, the company held in loans and mortgages $59,187, while the real estate held was valued at $178,352.01. There had been sold real estate to the value of $25,370, on account of which the company received $11,380. The officers are: President, George R. R. Cockburn; vice-president, Frederick Wyld; directors, Hon. George A. Cox, Donald Mackay, J. Gordon Jones, Robt. Kilgour, and John Catto. The manager was Mr. John C. Copp.

In Prussia and Saxony the thrift of the people is shown in the accumulation of money in the savings banks. According to the Deutsche Industrie Zeitung (German Industrial Times) of July 29th, 1904, the savings banks in Prussia have shown a remarkable increase of deposits during the years 1887 to 1902, inclusive. In round numbers they were as follows: Deposits in German savings banks, 1887-1902:

1887	$636,000,000	1895	$1,035,000,000
1888	687,000,000	1900	1,367,000,000
1889	739,000,000	1902	1,601,000,000
1890	781,000,000		

They have thus more than doubled in the twelve years between 1890 and 1902. What is true of Prussia is largely true of all parts of the Empire. During periods of prosperity the savings of the whole country approach the Prussian average. In some parts, such as Saxony, they may pass beyond those of Prussia, but never to any very great extent.

On the 16th inst., a meeting was held in St. Thomas, Ont., of the creditors of the Atlas Loan Company, other than currency debenture holders, and resolutions were passed as follows: (1) That the costs of all the parties be fixed and paid by the liquidator out of the estate. (2) That the currency debenture holders be forthwith paid a dividend of 37 cents on the dollar. (3) That the currency debenture holders be paid equally with other creditors any dividend that may be paid to all creditors in excess of the said rate of 37 cents on the dollar. (4) That all creditors whose claims have been approved of by the court, other than the currency debenture holders, be paid dividends as speedily as may be out of the funds remaining on hand after deducting the said dividend which is to be paid to the currency debenture holders, and out of the moneys to be realized on the assets still unrealized upon, until said creditors have been paid dividends equal to 37 cents on the dollar, after which all creditors, including debenture holders, are to rank equally. The Master has the proposal before him for confirmation.

Much interest is being displayed in a new departure shortly to be made in banking practice by the First National Bank of Chicago. Under the present system, the bank's customers are classified arbitrarily on the ordinary alphabetical system, and the officials who make loans are thus obliged to keep themselves informed as well as possible upon, it may be, a dozen or more different lines of business carried on by the various parties who come under their respective alphabetical division. By the new system, it is proposed to classify customers according to their occupations. There are to be seven groups and twenty-six divisions. One group will include such divisions as collateral stocks and bonds, grain, flour and feed, meat products, leather, wool, live stock commission and coal. Another group will include dry goods and all branches of the clothing business, and still another will take in agricultural implements, iron and steel products, lumber and furniture and manufacturing sundries. The first object in making this change of system is to minimize the bank's losses. The second is to increase its business. There will be a departmental system for handling the business of their customers with a view to making the official staff a group of specialists in the various lines of trade and industry that are followed by people who do business with the institution.

According to the New York Financial Chronicle, the gross earnings of United States railroads for September made a gain for the month of $3,328,100, or 2.76 per cent. Expenses decreased $1,277,075, and net earnings increased $4,605,175, or 11.22 per cent. One point on which emphasis is laid is that the comparisons are now becoming better with each succeeding month, a remark which applies not alone to the net earnings, but also to the gross earnings.

Nothing shows so clearly the recently developed tendency of Old Country joint stock banking institutions to cultivate a connection with small depositors, formerly regarded by many as undesirable, than the step taken last week by the Lancashire and Yorkshire Bank. It announces the inauguration of a savings bank department in which deposits of one shilling and upwards will be accepted. Seeing the importance of the bank making the comparatively new departure, it is one which is sure to be watched with great interest. The proposed rate of interest is considerably lower than that offered by the Post Office Savings Banks, but this drawback may be offset by the absence of troublesome formalities in withdrawing deposits.

⁂

LIFE AND ACCIDENT ASSURANCE.

Members of the Life Underwriters' Association of New York held their first gathering of the season at the Hotel Marlborough one night last week. The feature of the evening was a paper on "Life Insurance and the Times," read by Mr. Franklin Webster, editor of the Insurance Press.

The Travelers Life and Accident Company has issued a circular which gives "a very few instances, drawn from the history of the past few months, when somebody blundered." The instances are twenty-two in number, the blunder in every case but one causing a fatal accident. Altogether in the twenty-two cases the number of lives lost was 1,966, and the number of persons injured, 852. The Iroquois theatre and Slocum steamboat disasters were largely responsible for this showing.

We observe that by a very decisive vote, 4,000 as against 600, the delegates to the special session of the Ancient Order of United Workmen, in grand lodge, decided that the A.O.U.W. of Manitoba and the Territories should secede from the parent body in the States and form a separate order. The difficulty is that not enough young men are joining the order in the Eastern States, therefore, the Western, and younger branches were burdened with an assessment out of all proportion to their death losses.

A month ago the Committee of Ten, to whom was delegated the preparation of plans for the creation of a National association of casualty underwriters, met in this city, says the New York Chronicle, and after several hours of earnest discussion appointed a sub-committee of three to put into proper form the conclusions reached. This sub-committee, composed of Mr. Oscar Ising, general manager of the Ocean Accident and Guaranty; Mr. Edson S. Lott, secretary and general manager of the United States Casualty, and Mr. Walter C. Faxon, secretary of the Ætna Life, has completed its work, which has been sent the Committee of Ten. When finally approved by the latter body copies of the document will be sent officials of all casualty insurance companies and associations throughout the country, and their co-operation in the proposed movement urged.

According to Winnipeg advices, dated Sunday last, Mr. Fred. J. Holland, a well-known insurance man, of that city, died of typhoid fever at Los Angeles, Cal., after several weeks' illness. He was a son of R. H. Holland, police magistrate, Port Hope, Ontario.

Referring to the fact that some life companies take risks on teetotalers at lower rates than other people, and that this practice is likely to become general among companies, the New York Times says: "If this is true, or, rather, if the companies carry out the plan, a blow will be struck at the Demon [of Drink] that will wound him even more severely than has the practical enforcement of total abstinence by many of the larger corporations upon their employees. Such a discrimination of rates would make a very direct appeal to a part of the human mind that is entirely logical as well as extremely sensitive."

It may not generally be known that the Mutual Reserve Fund Life Company is doing business in Great Britain and also in Australia. We learn from the Manchester Guardian that in the Chancery Division there last month, Mr. Justice Buckley concluded the hearing of the case of Cross v. the Mutual Reserve Life Insurance Company. The plaintiff, Mr. John Cross, became a policyholder for £200 in the defendant company, in 1887, he asserting that he was told and understood the premiums payable were fixed according to age at the time of entering the society. After he had been a member for some time, however, he was asked to pay calls on an increasing scale, which he paid under protest. He contended there had been misrepresentation on the part of the company and their agent, and claimed rescission of the policy and repayment of all the sums he had paid to the company. The latter said plaintiff knew the terms of the policy and denied any misrepresentation. His Lordship found in favor of the plaintiff, with costs. It was stated during the case that there were 66 other actions pending of a similar nature.

⁂

DRY GOODS.

According to the report of an important Milan silk association, Italy at the present time possesses 1,065 spinning mills, with 58,748 basins or tubs. Of these tubs 2,642 are idle. There are 346 twisting shops, with 705,262 spindles in operation and 49,050 idle. There are 165 weaving shops, with 9,703 hand looms, of which 159 are idle, and 7,459 automatic looms, of which five are idle. Mechanical or self-acting looms are employed only in Piedmont and Lombardy.

The Stanley Mills Company, in Hamilton, a year or so ago, offered to all employees in their large departmental store an opportunity to become shareholders in the business, with a view not only to assist them to develop habits of thrift, but in the likelihood of obtaining the very best service from those who had a personal interest in the company's business. These objects are said to have met with such gratifying success that the management are encouraged to go on. It has now opened a savings department in connection with the business, where employees may put their small savings, receiving a low rate of interest and leaving them there until such time as they total the value of one share in the company. Then the employee receives the share, upon which there is a much higher rate paid.

Dry goods men are pleased at a recent decision by the Department of Customs, dealing with the application of the special duty in the anti-dumping act on importation of goods the market value of which at time of export is higher than when the goods were purchased in a foreign country. The revised clause reads as follows: "The amount of any advance in the market value of the goods between the time of their purchase by the importer and the date of their exportation to Canada, shall not be subject to special duty after 9th November, 1904, provided the goods have been exported in the usual course and the actual date of purchase established to the satisfaction of the collector by contract, or other sufficient documents produced for his inspection and attested to. Provided, however, in respect of goods subject to an ad valorem duty, that the ordinary duty shall be collected (as heretofore) on the fair market value of the goods as at the time of their direct exportation to Canada—under the provisions of Section 58, of the Customs Act."

The National Wool Growers' Association, an organization in the United States standing exclusively for those engaged in the sheep and wool-growing industry, will hold its annual convention on January 10th at Denver, Col., in conjunction with that of the National Live Stock Association.

The world's visible supply of cotton, according to figures issued this week, is estimated at 3,874,078 bales, as against 3,342,996 at this period of last year. Of this, the United States total is 3,326,078 bales, against 2,847,996 last year. Of this year's world's visible supply, Great Britain and the Continent hold 1,892,000 bales, against 1,687,000 last year.

The offerings of wool at the London auction sales on Friday last were 15,074 bales. Merinos were firm, Americans buying several lots. New South Wales greasy clothing crossbreds were in active demand, coarse realizing the highest rates since 1895. This advance was due to the placing of large orders for army clothing by the Japanese, coupled with important purchases of coarser colonial crossbreds, and English wools, for shipment to America. Lambs' wool was offered freely, but it did not sell well. Medium grades were unchanged, but inferiors fell 7½ per cent. below the September prices. Cape of Good Hope and Natal was in demand, and sold quickly to the Continent. Greasies advanced 5 per cent. in sales.

FIRE AND MARINE INSURANCE.

A report submitted at the annual meeting of the Underwriters' Bureau of New England in Boston, the 16th November, showed that fires in sprinkled risks had been more destructive than usual during the year covered by the report.

Shipping men are giving a good deal of interest to the announcement that the Dominion Coal Company's steamer, "Bonavista," will make a voyage from Sydney to Montreal this month with a cargo of coal. Towards the end of the ordinary season of navigation, marine insurance rates become very high, more particularly when compared with those in force on vessels going to Boston or New York, and there is no doubt but that a large proportion of the traffic at that period goes to United States ports as a consequence. It will be seen, therefore, that the present experiment is an important one, both from a shipper's and an insurance point of view. We understand that the risk, or a part of it, in connection with the voyage of the "Bonavista," is being shouldered by the Dominion Government.

We are informed of the appointment of Mr. Robert Chapman as general manager of the Caledonian Insurance Company, in succession to the late Mr. David Deuchar. Mr. Chapman, who was a protege of his immediate predecessor, has been connected with the Caledonian since 1875. For several years past he has been secretary of the company's London office, and was previously agency superintendent, during his occupancy of which office he organized several successful branches. He was in charge of the Dundee and of the Aberdeen branches of the company's business before being brought to the London branch. He is described as a vigorous and somewhat aggressive man, 43 years of age, and, in virtue of long study of and acquaintance with life and fire assurance, both of which are transacted by the Caledonian, is likely to make a satisfactory chief.

GROCERS AND PROVISION DEALERS.

At the Live Stock Show in Chicago this week, Canadians made good wins in nearly every class of sheep exhibits.

A bright spot in the industrial position of present-day Ireland is the progress being made by the flour milling industry there. The London Miller says neither American wheat nor American flour has been seen in Ireland for months, and the hearts of the Irish millers are lighter than for a generation.

It is believed in Portland that a plan is being made to combine the two largest salmon packing companies on the coast with the view eventually of securing control of the entire production of the Pacific coast, including that of British Columbia and Alaska.

There is a shortage in the British Columbia salmon pack. The total pack on the Pacific Coast this season is given at 2,853,003 cases, of which 67,753 were put up on the Fraser, as compared with 204,849 last year. Only one of the British Columbia Packers' Association cohoe plants has been in operation this year, we understand. A large portion of the British Columbia pack will go to Britain direct by steamer this year.

A despatch from Chicago says that a carload of Manitoba wheat has reached that city, the first that ever arrived there. The grain was not imported by a bonded mill, but by a miller who finds that he absolutely needs Manitoba wheat of the best grade to maintain his flour standards, not sufficiently high-grade wheat being available in the Chicago market. The importer had to pay the duty of 25 cents a bushel, and it is estimated that it cost the miller from $1.30 to $1.35 a bushel at Chicago.

We learned the other day, with a good deal of surprise and pleasure, that the Mildura fruit settlement in Victoria, Australia, about which there was much talk a few years ago, and which met with considerable difficulties and failures at the offset, has now become an unqualified success. The chief crops raised are grapes and raisins, for which latter industry the climate, which is very dry and sunny, offers special advantages. Australian raisins now have almost complete control of the Australian market, and not only this, but home-grown currants are meeting with growing favor. Mildura also grows fair quantities of figs, oranges, and lemons.

The Pillsbury-Washburn Flour Mills have made application to the United States Treasury Department to bond one of their mills and one of their elevators in order to be able to grind Canadian wheat. This shows forth in an extraordinary manner the absence of high-grade wheat this year across the border. The mill in question has a capacity of 4,000 barrels daily. The action necessitates giving a $50,000 bond to the Government, the employment of a Government officer to supervise the mill, and also a Government officer at the grain elevator. The duty of 25 cents per bushel will be paid on the Canadian wheat used, and a rebate of 99 per cent. of this duty will be made as soon as the flour from this wheat is exported. This action will, no doubt, be made in bordering States a text for reciprocity with Canada.

* * *

—According to a special of last evening to the Toronto Star, the price of rubber has advanced from $1 to $1.33 a lb., and there is every indication that the price would be further advanced. This price is the latest announced, says Mr. McGibbon, general manager of the Canadian Rubber Company. The price has been rising steadily, owing to the decreasing supply, and in, we think September last, the price in New York was $1.10. The present figure, as quoted above, is beyond anything previously known.

CALGARY AND ITS SURROUNDINGS.

The Calgary Summer Fair—The Calgary Commercial Convention—The Growth of Calgary—The Municipal Finances of Calgary—all these we have had the pleasure of noticing during past months. Now we have the annual report of the Calgary Board of Trade, being for the year 1903-1904, and we scan its contents with interest. It is replete with information respecting the growth and development of this progressive western city, as well as that of Central Alberta, appropriately referred to as the "sirloin of Canada." The first part of the volume is devoted to the reports of the president and secretary, which indicate that the Board enjoyed a prosperous year. Then follow a number of statistical tables showing the value of city property to be $260,975. The assessment of Calgary has grown from $1,876,000, in 1896, to $2,778,000, in 1903, and the total annual expenditure from $34,000 then to $70,000 now. The internal revenue collection at that point has increased over twenty per cent. within one year, and the customs collections, as far as the present district is concerned, by nearly forty per cent. in the same period. The population of Calgary is now stated at 10,000, and during the year 1903 half a million dollars was expended on buildings. It is estimated that the value of buildings erected during the present year exceeds a million dollars. The annual pay roll of the Canadian Pacific Railway alone at that point is nearly a million dollars.

This latter item would be almost sufficient to keep a good-sized town going, but the material growth and prosperity of Calgary is due to quite another development. Wholesale houses in Eastern Canada have at last appreciated the unsurpassed position of that city as a distributing point, and as the marvellous expansion of the westerly portion of the Territories is daily emphasizing the necessity, Eastern Canada wholesalers are providing for the more expeditious filling of the wants of their retail customers in the West. The situation of the city naturally claimed their attention as the most convenient point at which to establish warehouses, and as a result a regular procession of wholesale firms have invaded the city and built large and commodious business blocks. It is extremely likely that the remarkable progress Calgary has made during the last three or four years may be almost wholly accounted for by this development.

It would seem, however, that Calgary does not rest its claim to attention upon this foundation only. The present Board of Trade report devotes some forty pages to the agricultural and pastoral resources of the magnificent district of Central Alberta, which surrounds the city. The bracing climate and the wonderful effects of the warm chinook winds, which blow during the winter season, are fully dealt with. It is set forth that the average yield per acre of grain for the whole of the Territories for the past six years has been: Wheat, 19.42 bushels; oats, 34.32 bushels, and barley, 28.04 bushels. For Central Alberta only during the same period the yields have been as follows: Wheat, 21.60 bushels; oats, 38.93 bushels, and barley, 28.04 bushels, thus showing a substantial increase in the average yield, which places Central Alberta considerably above the average as a grain producer.

Irrigation is a subject which comes in for considerable attention. The great Bow River Canal project, undertaken by the Canadian Pacific Railway Company, is fully dealt with in the pamphlet. This canal heads at Calgary, and is designed to supply water throughout the district east of the city. At a meeting of shareholders of the Canadian Pacific Railway Company, some years ago, Sir William Van Horne, in discussing the possibilities of the West under irrigation, made the characteristic statement that the company would fairly make the country "stink with flowers." This project proves that he is as good as his word. The company has now entered upon the construction of this canal, which will ultimately cover one and one-half million acres of land, and cost between four and five million dollars. Construction operations are for the present confined to the first division of the scheme, and some idea of the magnitude of the undertaking may be formed when it is considered that this division alone involves taking out twenty miles of main canal, one hundred and fifteen miles of lateral ditches, and nine hundred miles of distributaries. The area to be irrigated by the first division covers 300,000 acres and has attached to it an additional grazing area of 600,000 acres. The area lies between Calgary and Gleichen. It is expected that the main canal of the first section will be completed by next autumn, and the secondaries by 1906, when the company expects to be in a position to supply water. The total cost of this division is estimated at $1,300,000.

The industrial side of Calgary's progress has not been overlooked. Reference is made in the report to a number of manufacturing enterprises located in the city, several of which have an annual pay list of from $25,000 to $40,000. Mention is also made, under the heading: "Industrial Opportunities," of openings which now exist for the manufacture, at or near Calgary, of cement, calcium carbide, building lime, furniture, etc., and the need of pork-packing, tanning, and woolen industries. The illustrations are a good feature of the book. Copies of this useful report may be obtained by applying to the Secretary of the Board of Trade, Calgary, N.W.T.

* * *

HALL MINES, NELSON, B.C.

The annual report of the Hall Mining and Smelting Company, Limited, was read at the general meeting of shareholders in London, England, on 31st October. The report submitted by Mr. Campbell, the business manager at Nelson, referred to the stimulating effect of the Government bounty on lead, taking effect in February last, but it had only affected four months of the company's year which ended with June. No less than 12,409 tons of ore had been bought during the year. "Recovery from the results of the depression is slow, moreover, and apart from the temporary cause mentioned, the output from the Slocan is falling very far short of estimates made by the Silver-Lead Mines Association six months ago. . . The lead refinery at Trail of the Canadian Smelting Works is now working successfully, and some of our base bullion has been treated there, and it is now intended to increase its capacity considerably. Lead corrosion works are about to be started at Montreal, which will greatly increase our home lead market."

The smelter manager, Mr. R. R. Hedley, gave figures to show the increase (some 8,000 tons) of this year's quantity of ore treated over last. The lead bullion shipped carried, he says, 1,096,415 ounces of silver and 9,201 ounces of gold, while the copper matte carried 41,294 ounces of silver, 130 ounces of gold, and 130,800 lbs. of copper, making a gross value for the year of practically $1,000,000. He gives some further particulars as to improvements made and contemplated. The smelter made a little money, for the profit on smelter account is put down at £8,394, and that on mine account £1,043: but this is subject to some expenditure on maintenance account.

This profit, though but a small one, gave a cheerful tone to the proceedings of the annual meeting, for it contrasted pleasantly with the result of last year's operations which was a loss. The reason, as the chairman showed, that the property had been able to make this profit was 1st, the bounty on lead, and 2nd, the possession of a fourth interest in the Emma mine, which afforded fluxing ore, and is considered a good investment. The chairman, Lord Ernest Hamilton, seemed sanguine that this profit would be not only maintained but increased. The company has agreed to join Mr. Davys, the lessee of the Silver King mine, in unwatering the mine down to the seventh level, which if it disclosed the quantity of ore supposed to exist will be a good, possibly a very successful, stroke of business. "The whole of the business," said Lord Ernest, "looks healthier at the present moment than it has done for some years past." Mr. George Freeman seconded the motion, and congratulated the shareholders on the company having, as he believed, turned the corner, so that they might look forward to a very fair measure of success in the future. This elicited applause, and the resolution was then put and carried unanimously.

The chairman did not omit to express the appreciation by the board of the services of its Canadian representatives. This, he said, was no mere matter of form, but meant "that we as a board, thoroughly appreciate the services of our representatives on the other side. We think they have worked extremely well over there and they have served the company in a manner of which I can hardly speak too highly." In the opinion of Canadian observers qualified to judge, the commendation here expressed of the management of Mr. Campbell and Mr. Hedley

Tenders for Debentures.

Sealed tenders will be received by the undersigned up to 3 p.m. on December 15th, 1904, for the purchase of one Local Improvement debenture for the sum of $14,559.42, repayable in twenty years. Interest 5 per cent., payable half-yearly. First payment of interest due on July 2nd, 1905.

This Debenture is issued by the Town of Portage la Prairie for Granolithic Walks.

The highest or any tender not necessarily accepted.

F. A. WHITAKER,
Town Clerk.

Portage la Prairie, Man.
November 16th, 1904.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

KEEP POSTED

and their energetic staff is thoroughly deserved. And the hope and expectation is general in Kootenay that the arrangements now made, together with a full year's operation (from June 30th, 1904, to June 30th, 1905) of the lead bounty, will enable the Hall Mines to show the profitable working which untoward circumstances have heretofore hindered.

PORT HOPE BOARD OF TRADE.

It is always pleasing to the sensible inhabitants of a town or city to find a man who shows public spirit; who will make a change, take up a new project, or revive an old one, in a way that the careless citizen or the lazy citizen would not, or at least did not, attempt. We assume, therefore, that the business men of Port Hope feel thankful to Mr. A. B. Barker and to Mr. Gray for organizing a meeting to resuscitate the Port Hope Board of Trade. Indeed, they must do so, for a despatch assures us that practically every business man of Port Hope attended the meeting of Friday night last in the Town Hall. The tone of the speeches made was confident. The speakers were Messrs. A. B. Barker; Craick; F. J. Travers, manager of the Canada Radiator Co.; E. M. Thurber, manager of the Nicholson File Works; the retiring treasurer, R. A. Mulholland, a leading hardware merchant, of Barrett's Mills, and H. T. Bush, manager of the Standard Ideal Sanitary Mfg. Co. The last named gentleman declared Port Hope to have great advantages as a manufacturing centre. It was in a central position and had excellent shipping facilities. It was a remarkably pretty town, and had great social advantages. He thought it should not be overlooked by Americans seeking sites for factories. Mr. Travers also referred to the work before the board, and said that it should obtain for Port Hope the outlet of the Trent Valley Canal, C.P.R. connection and an electric railway giving street service as well as connection with Toronto. He spoke of Port Hope's excellent water, climate and healthfulness, and suggested various ways in which the board could aid the town. At the close of the meeting, nearly a hundred members signed the roll.

Officers were elected as follows: Hon. presidents, H. A. Ward, M.P.; Dr. L. B. Powers and G. M. Furby, manager of the Midland Loan and Savings Co., who is the retiring president; president, A. B. Barker, manager Bank of Toronto branch; vice-president, R. A. Mulholland; secretary, R. Gray; treasurer, D. M. Muir, manager of the Traders Bank branch.

DEATH OF JOHN BERTRAM.

John Bertram is dead. Canada is the poorer for it. He should have lived twenty years more to give this country the benefit of his knowledge and his wisdom. Yet he did much in his four and forty years of Canadian life that has benefited his adopted land and will be of further benefit in years to come. For the first dozen years after he came, a very young man, from Haddingtonshire to Peterboro, he was quietly working, planning, observing. He was a merchant; but was doing more than buying and selling goods. He travelled our northern country, remarked its enormous water-powers, studied its great timber areas, grew to understand the woods and love them. Later he had opportunities of applying the results of his observation, for his sterling qualities made themselves known and commanded a wider field. For six years he represented Peterboro in the House of Commons, and if he had remained in that arena would have undoubtedly come to the front rank as an administrator. Removing to Toronto, where he engaged with his brothers in the hardware trade, besides becoming a manufacturer of lumber on the Georgian Bay, he lent active aid to the work of the Board of Trade and gave his keen mind to scientific discussions in the Canadian Institute.

The Bertram Engine and Shipbuilding Works were presently founded, with his brother George in charge—another valuable man, too soon called away—and Mr. John Bertram was filled with the idea that Canada should have a great steel fleet on the North American lakes. Reticent, strong, almost grim man as he outwardly was, his brother's death affected him forcibly. "Yes," said he, in 1900, to the writer of these lines: "George is gone; and here am I, in my sixty-fourth year, compelled to learn another business"—referring to the management of the shipbuilding works, which he had then to undertake in addition to all his other interests. But he grappled with the position manfully. Unsparing of himself, he was like granite in his resolution to master any task or any study he undertook. The Ontario Forestry Commission was a public duty he assumed with a calm decision, finding it in accord with his tastes and aware that his knowledge would be of service to the country. His counsel in the direction of afforestation, tree preservation, and the setting aside of forest reserves, finds enduring record in the report of the commission and in enactments of the Ontario Government. His advice was repeatedly sought by the Federal as well as the Provincial Government, and his advocacy of coasting regulation enforcement, as well as the encouragement of Canadian shipbuilding, will be remembered. His latest activity in public service was upon the Transportation Commission, of which he was made a member in 1903. This task was interrupted some months ago by his illness, which has now terminated fatally and sadly. A brave, sane, clear-brained, kindly man, he has gone to his reward, and his loss is sorrowed for by all who knew how firm was his patriotic faith in Canada, and how determined he was to work for the development of his adopted land.

CANADIAN MARBLE.

A letter comes from Glasgow this week to the secretary of the Toronto Board of Trade. It asks for a general description of the marble being quarried in Canada, clear and natural, pointing out what defects, if any, exist, and asking for the names and addresses of the quarries and their agents, the size of the blocks available, with prices per cubic foot. Enquiry is also made regarding mode of delivery and cost thereof. This is a very circumstantial and business-like enquiry, and should have a comprehensive answer. The Ontario Bureau of Mines can give valuable aid in filling the requisition, and the Ottawa publications of the Geological Survey. We would suggest correspondence with the Nova Scotia Department of Mines, or with the Crown Lands Department of Quebec. These provinces are both nearer the source of the enquiry. At the present time, so far as known, only two marble quarries are being worked in Ontario, both in the neighborhood of Renfrew. There are, however, several unworked quarries in different sections, while in Algoma there is said to be marble of an excellent quality. According to Prof. Carter, the reason so few of these quarries are being worked lies in the demand for Tennessee marble, which has gained quite a market in Canada, though in many respects Ontario marbles are just as good. All the interior marble used in the Parliament Buildings, at Ottawa, is Renfrew stone. There is but little doubt that nearly all the marble quarries in Ontario could be easily and cheaply worked, and there seems no good reason why a strong demand should not be created for their products.

COMMERCIAL TRAVELLERS' ASSOCIATION.

A meeting of the Commercial Travellers' Association of Canada was held on Saturday night last in St. George's Hall, Toronto, Mr. Thomas McQuillan in the chair. Nominations for officers and directors for the ensuing year resulted as follows: President, Thomas McQuillan (elected by acclamation); first vice-presidents, John Everett, H. Googman; second vice-president, Lewis A. Howard (elected by acclamation); treasurer, J. C. Black, E. Fielding.

The following representatives were elected by acclamation to their respective boards: Guelph, C. Auld; A. Hill, Montreal: vice-president, S. O. Shorey; directors, Wm. Cauldwell, E. E. Starr, Winnipeg; board, G. F. Galt, and H. Miller, Vancouver; board, W. J. McMaster, and R. Martin, Brockville; board, J. L. Upham.

A feature of the meeting was the dissatisfaction expressed loudly by some members as to the prudent arrangement made not long since to conserve the interests of the mortuary benefit scheme connected with the associated Travellers. This arrangement limited the mortuary payments to such figures, depending upon the age and the contributions of the deceased

member, as could properly be made, and yet the accumulated funds of the society be safely kept from dissipation. A good deal of pains was expended to get expert actuarial advice before this step was taken, and we believe the step to have been a wise and needful one. It is neither wise nor seemly, therefore, to have a section of the membership clamoring now for "$1,000 or nothing," as the amount of the death payment without regard to circumstances. These men should take pains to inform themselves, and not be led away by a cry, or even by smart and talkative but ignorant advisers.

* * *

THE METRIC SYSTEM.

Editor The Monetary Times:—

Sir,—May one ask you to be good enough to reproduce the following extract from an article in the New York paper, "Electrical World?" It has been widely circulated in the English daily newspapers and will encourage the Canadian supporters of the decimalization of Imperial weights and measures, and English coinage and money-tables.

The efforts of the London "Decimal Association" are bearing fruit, and the necessity of modern changes will become more apparent as intercolonial communications increase in both trading and social circles.

Yours faithfully,
INTERCOLONIAL.

London, Eng., 19th November, 1904.

METRIC SYSTEM INEVITABLE.

Strong pressure is being brought at the present time upon the British Empire to adopt the Metric System compulsorily. Unless action is soon taken by our Congress, the initiative will fall to Great Britain, and we shall then be placed in the position of being compelled by the force of circumstances to supinely follow where we might have led. The Metric system sooner or later must become universal.—"Electrical World," New York.

* * *

NEWFOUNDLAND TELEGRAPHS.

On the expiry of the monopoly of the Anglo-American Company, in April last, the Reid Company, which owns a railroad running across the Island, successfully contracted with the Newfoundland Government for a monopoly of the telegraph lines for a period of fifty years, the contract to expire in 1948. In addition to this, the Reid Company, it is alleged, by virtue of their monopoly, have been using the whole of the other telegraph lines under their influence for the furtherance of their commercial relations, not only in the interior, but with the shipping around the coast. The advantages to the Reid Company, of course, apart from their relations with the Government, have been considerable—so much so, that the Government has deemed it advisable to approach them for the surrender of the monopoly, with the exception of the telegraph line to operate the railway exclusively. This matter has been under arbitration for the past several weeks, Hon. Edward Blake representing the Government of Newfoundland, Mr. Donald McMaster the Reid Company, and Mr. P. S. Archibald, formerly chief engineer of the Intercolonial Railway, acting as a third impartial arbitrator. It is now announced that a judgment on the difficulty will be given out on the 9th of January next. Part of the duties of the arbitrators will be to decide upon a just compensation for the abandonment by the Reid syndicate of their rights.

* * *

—November was a small month in the matter of coal tonnage from Cape Breton ports to Montreal, being only 94.938 tons, but the season's carriage was not small. It began with 186.638 tons in May, went to 275.989 tons in June; 249.698 in July, and 251.367 in August. Then it declined to 159.275 tons in September, and 183.676 tons in October, with but half the last-named amount in November. But the total reached 1,401,611 tons. The business is over for the season.

ANSWERS TO ENQUIRERS.

Bank Official, Glace Bay, C.B., asks us to tell him where he can "get a book on 'Exchange.' Exchange in the ordinary business sense; a book dealing with the monetary systems of the world, giving all coin issues and their values in American money, nations classified as to gold and silver standard, etc." [We reply that the likeliest book to fill these requirements is perhaps: "Monetary Systems of the World," by Maurice L. Muhleman, Deputy Assistant Treasurer, U.S.A. Published by Charles H. Nicoll, 189 Broadway, New York.

* * *

—In Halifax, on Friday last, W. B. Ross was elected president of the Trinidad Electric Company, filling the vacancy caused by the death of the late John F. Stairs. J. J. Stewart was elected a director.

* * *

—The Dominion Coal Company, as a result of recent highly satisfactory tests of its coal in Vera Cruz, Mexico, have received an order for 25,000 tons of that material, to be used on one of the railroads of that country. The coal is to be shipped mostly from Louisburg, Cape Breton, during the present winter.

* * *

Charles Scott, manufacturer of car springs, long identified with Philadelphia business and charitable enterprises, died last Friday, aged 76 years. He was well known in the iron trade, having been a manufacturer of car springs. Among his enterprises was a steel car spring plant in Canada, which is now known as the Montreal Steel Works, Limited.

* * *

—The total arrivals of immigrants in Canada for the four months ending October 31st were 40,880, of whom 10,926 came from the United States, and 29,954 through ocean ports. For the same period of 1903 the total number of immigrants was 38,792, of whom 13,827 entered from the United States, and 24,965 through ocean ports. Canadians are returning to Canada in increased numbers. Eleven hundred returned in those four months.

* * *

—Dr. Laberge, Montreal's public health officer, draws attention to a crying need of many of our Canadian cities when he states that at least $60,000 is needed by Montreal for public lavatories and public baths for winter, as well as summer, use. Visitors from other countries often remark upon the lack of such conveniences in this country, and it is a lack for which there can be little excuse.

* * *

—A New York magistrate decided the other day that the taking possession of a parcel or other article left on the sidewalk, even if it may be in front of the owner's store, is not theft. A man had been charged with taking away a parcel containing a purse of some value from in front of an express office, and the manager of the latter naturally prosecuted the man. The accused claimed that property found lying on the public thoroughfare might be presumed to be lost property, which the finder had a right to retain unless the true owner should be found. The magistrate upheld this view and gave it as his opinion that business houses or offices or express companies which allowed their property to remain loose outside, did so at their own risk.

* * *

—There was an interesting conference a few days ago, at Glace Bay, C.B., between representatives of the Dominion Coal Company and the various workmen's associations and provincial mining lodges. The men had been rather expecting a proposal to reduce wages during the winter months, but instead of that they were surprised to receive a proposition for a three years' contract at present wages. Mr. Wanklyn and Mr. Duggan explained that such an agreement would put the company's business in a more stable condition, and enable them to enter into contracts without fear of complications from labor troubles. The men took the matter into consideration at their various lodges.

Mercantile Summary.

The Hardware Specialty Company, of Aurora, Illinois, are contemplating the erection of a branch factory in Dresden, Ont., or some other Canadian town.

Latest reports from the surveying parties at work on the proposed extension to the St. John City water system, say that the results are proving satisfactory for a successful carrying out of the work.

We hear that a syndicate of English, Canadian and American capitalists has obtained the renewal of a franchise for 500 miles of railway in China, and is on the eve of obtaining a franchise for 1,500 miles more, with Pekin as the central point.

Calgary, Alta., council has now decided to submit a by-law to the people to raise $60,000 for the installation of a municipal electric lighting plant. The local company had made a proposition, but would not submit to a clause restricting the charge for domestic lights.

An offer of compromise was recently made by Caroline Brousseau, wife of P. F. Bowen, jeweller, Quebec, doing business under the style of P. F. Bowen & Co., The rate was 50 cents on the dollar, which was declined. The liabilities are stated at about $5,000.

The Canadian Pacific Railway during last season made additions to their rolling stock totalling 90 locomotives, 165 passenger coaches, and 3,400 freght cars. Altogether, the company now owns an equipment comprising 1,024 locomotives, 979 passenger coaches, and 30,406 freight cars.

J. U. Gagnier, a general dealer, at Ste. Martine, Que., who was unfortunate in being burned out last August, has approached his creditors with an offer of 50 cents on the dollar.——The assignment is noted of Joseph Simard, general storekeeper, at Causapcal, on the Metapediac river, Que. He was originally a farm laborer, having apparently crude business ideas, and began as a trader about three years ago. He is said to owe $3,000.

C. F. Dunham, of Digby, N.S., who has done a paint and oil business for the past 20 years in a small, unprogressive way, is trying to settle with his creditors at 40c.——An offer of 20 cents on the dollar is made by C. R. Stoneham, dealing in pianos and organs at Yarmouth. He owes $9,400, and shows assets of about $2,000.——R. J. Brindley, a miller in a small way of business, at Chebogue, N.S., has assigned.

There is trouble again reported in the Quebec shoe and leather trade, one of the older boot and shoe manufacturers, Thos. Migner, has suspended, and at a meeting of creditors, held a few days ago, he made a proposition to settle at 25 cents on the dollar, in instalments at two, four and six months, showing liabilities of about $45,000, with assets of $28,000. As the result of this failure two local curriers have also become embarrassed. Joseph Thivierge, who is said to be a creditor of Migner to the amount of $4,000, is seeking a compromise at the rate of 50 cents on liabilities of $8.000, and A. Racine offers his creditors 20 cents on liabilities of $4.700.

Preston, Ontario, Canada

The Dominion Iron and Steel Company have received so many orders for wire rods, etc., that they are putting on a double shift of men in that department, so as to keep up with them to advantage. The rail mill is expected to be ready for operation next April. The company has already purchased machinery for a plate mill, which is to be installed as soon as possible.

The Laurentide Paper Company, of which the president is Sir William Van Horne, is issuing $1,200,000 worth of preferred shares, though we believe the entire stock has been underwritten. Some $800,000 of this amount is intended to pay off the company's indebtedness to the Bank of Montreal, while the remainder will be used in improvements to the company's plant at Grand Mere.

Mercantile Summary.

A fire at Farnham, Que., last week did damage to the Oddfellows' Hall, W. Mann's baker shop, and others to the amount of $8,000, partly covered by insurance.

Continued good reports come from the St. Eugene mine, at Moyie, B.C. The ore appears to improve with depth, and there is now twice as much blocked out as there was three years ago, before the mine closed down.

Efforts are being made to find a market in South Africa for Cape Breton coal. The Dominion Coal Company shipped 3,000 tons of coal last week from Sydney on the steamship "Melville," consigned to Cape Town and New London.

Mr. W. C. Schultz, representing a company who have taken over large tracts of land near Kennedy Lake, on the west coast of Vancouver Island, is superintending the construction of a very large lumber mill, at Clayoquot Sound. The machinery will be particularly adapted for fir timber, in which it is proposed to work up a large export trade.

A retailer of general and oil clothing in quite a fair way of business, at Halifax, R. R. Kennedy, who was burned out in September last, making some loss over his insurance of $15,500, finds himself unable to pay in full, and has made an offer to creditors of 75 cents on the dollar. He shows general liabilities of about $16,000, and some $4,500 of insurance was on consigned goods.

The Hamilton, Ancaster and Brantford Radial Company are now said to have succeeded in making definite arrangements for running rights through the various townships along their proposed line traversing Wentworth County. The route is now being surveyed, and work is to start in the spring. An arrangement has also been made with the Brantford Street Railway Company, by which the Radial may run cars over the former's lines in order to secure an entrance into Brantford.

Recent Montreal failures are noted as follows: B. Vaillancourt, a manufacturer of boots and shoes, has assigned voluntarily, and is said to owe $6,000 to $7,000. A few years ago he was unsuccessful while doing business under the style of the Vaillancourt Shoe Co.——A retailer in the same line, by the name of O. Chicoine, has also assigned, and has likewise had an unsuccessful record, having previously failed in 1896, and again in 1898.——A. Chartrand is another boot and shoe retailer, who is in embarrassed shape, and he makes a proposition to pay his creditors 60 per cent. of their claims, which aggregate some $7,100. He has been in business since 1898, when he began with assistance from his father.——C. Fregeau & Frere, who began in the grocery line last May, have been obliged to assign, and are said to owe some $4,000.——Another new beginner, but in the furniture line, L. Therien, by name, has also assigned; in business less than a year.——A demand of assignment has been made upon J. T. Pigeon, a suburban grocer, and he has turned his affairs over to the assignee, showing an indebtedness of about $2,000.

Real Estate Department.

This Department has been organized under an experienced officer to furnish property owners, solicitors, executors, or liquidators with a thoroughly reliable agent for the management of their real estate.

The Corporation undertakes the purchase or sale of real property, the collection of rents, payment of taxes, etc., at lowest current rates of commission.

Mercantile Summary

The Caledonian Mills, at Bowmanville, Ont., owned by John Mackay Company, Limited, manufacturers of oatmeal, split peas and pearl barley, were on the 28th ult. destroyed by fire at a loss of over $20,000, mostly insured. It is doubtful whether the mills will be rebuilt.

The Canada Tinned Plate and Pressed Steel Company proposes to start a factory at Morrisburg, obtaining motive power from the Williamsburg Canal. A hundred and fifty men would be employed as a beginning, of whom the majority, it is suggested, would be drawn from Wales, the home of the tinplate industry.

The new ice-breaker, "Montcalm," built in Scotland for the Dominion Government, and of which mention has been made already, has arrived at North Sydney. She is 245 feet long, 40 feet beam and 18 feet deep. The "Montcalm" will endeavor to keep the river clear all winter between Quebec and Montreal, and will also be employed as lighthouse tender.

Some Ontario lumbermen who purchased timber limits at the last public auction are endeavoring to secure from the Provincial Government a reduction in taxation from that under the new regulations, which provide for an increased tax of 5 cents per cubic foot on timber, instead of the old rate of 2½ cents, and $2 per 1,000 foot stumpage, instead of $1.25, the old rate.

The shipments of ore from Rossland camp, British Columbia, for the week ending last Saturday, and for the year, amounted to 7,201 tons and 285,208 tons, respectively, divided as follows:

	Week.	Year.

The Canada Car Company, an organization controlled largely by the Pressed Steel Car Company, of New York and United States capitalists, has purchased, we are told, some forty acres of land near Cote, St. Paul, (Montreal), part of it from the Grand Trunk Railway, which had planned large workshops there. The new company will build passenger and freight cars on a large scale.

Mercantile Summary.

The Canadian Pacific Railway definitely announces that it will begin next spring the construction of a 2,000,000-bushel grain elevator at Fort William, Ont.

The Scott Act prosecutions in Glace Bay, C.B., this year number 117. Eighty-five convictions were secured, and $3,509.75 collected in fines. Fifteen illicit dealers have been driven out of the business.

A by-law is being prepared in Kingston, Ont., for the purpose of raising $150,000 with which to improve the gas and electric light plants. At present, neither of these plants is able to meet the demands of the citizens.

From London, Eng., comes the announcement that an issue has been made of £75,000, four per cent., prior lien bonds on the Quebec and Lake St. John Railway. The issue price is eighty-seven and one-half per cent. The bonds are repayable at par in April, 1921.

The first twenty miles of the International Railway, from Campbellton towards the St. John river, New Brunswick, is now practically completed. A heavy bridge is being built over the Upsalquitch river at a cost of about $20,000.

The Cape Breton Coal, Iron and Railway Company has practically completed the purchase of two waterfront properties in Sydney for the purpose of erecting a shipping pier. The properties are located on King's Road. The company intend to build a line of railway from their coal mines, at Cochrane's Lake, now being developed, to Sydney, where the coal will be shipped.

Mr. Justice Hall, of Montreal, has given his decision in the application on behalf of Mr. Blackley, to have former Crown Prosecutor Cooke taxed for the costs in the famous libel case, terminated by the withdrawal of Mr. Cooke. Judge Hall decides that Mr. Cooke is responsible for the costs, which will amount to between three and four thousand dollars, it is estimated.

"What have you to say for yourself?" demanded the bailie of the drunk and disorderly prisoner. "Am verra sorra, sir," returned the charge, "but a cam' up frae Glesca in bad company." "What sort of company?" "A lot o' teetotalers." "What!" roared the bailie. "You mean to say, sir, that teetotalers are bad company." "Weel," rejoined the prisoner, "ye ken how 'twas. A had a hale mutchkin o' whiskey wi' me an' a had to drink it all to mysel'."

Mercantile Summary.

The Boundary district of British Columbia shipped out last week 15,849 tons of ore, the chief shippers being the Granby, 10,740 tons, and Mother Lode, 3,160 tons. Total for this year up to date, 710,650 tons.

The Carter White Lead Company, of Chicago, will establish in Montreal a plant for making white lead. Material will be obtained from the Trail, B.C., refinery.

The Canadian Pacific Railway Company is having the ground between Lennoxville and Lake Megantic looked over with a view to the construction of a more direct route than the present, and with easier grades.

The rail and steel mills of the Illinois Steel Company, at Chicago, a branch of the U.S. Steel Corporation, have been closed for an indefinite period, throwing 3,000 men out of work. The cause of the shut-down is declared to be lack of business.

The Dominion Government has awarded the contract for supplying 40,000 ft. of 10-in. tubing for the post-office pneumatic tube system in Montreal and Toronto to a Glasgow, Scotland, firm. The cost will be $1.32 per foot. The work of excavation and installing the tube will begin early next spring under the superintendence of Mr. John Galt, C.E., Toronto.

The Southern Light and Power Company has received from Toronto City Council permission under certain provisions to erect poles on Bloor Street from the western city limit to Keele Street, and also to carry wires across Indian Road, College Street and Sorauren Avenue to the Dundas Street bridges for the purpose of supplying power to the factories in that district.

The council of administration for the new railway department of McGill University has been appointed and will be composed as follows: Mr. Charles M. Hays, President of the Grand Trunk Pacific Railway; Sir Thomas Shaughnessy, President of the Canadian Pacific Railway; Messrs. C. B. Greenshields, R. B. Angus and C. J. Fleet. This council will act largely in an advisory capacity, but will also determine upon the curriculum to be adopted by the faculty.

Westmount (Montreal) council is presenting for the approval of the ratepayers a by-law to borrow $225,000 on debentures payable in forty years with interest at 4 per cent. per annum, for the purpose of establishing an electric light plant for domestic and municipal purposes. The lighting of the streets is now done at a cost of $90 per lamp per year, whereas it is figured that the municipality could do it at $73.50 per year, and besides this it is believed the work could be combined with a process of incineration, for which a plant, if the by-law goes through, would be erected at the same time.

The Rat Portage Miner suggests the improvement of the navigation of Winnipeg River to Big Sandy Lake as important to the people of Rat Portage and Keewatin. The Board of Trade has made representations to the department of public works regarding the matter, and an official of the department will examine the river with a view to removing the obstructions. The proposed crossing of the Grand Trunk Pacific, says the Miner, is now said to be near the lower end of Big Sandy Lake, on the C.P.R. where there is water connection with the new transcontinental. Navigation of Winnipeg River, says the Miner, must be made practicable for boats of larger draft than those now running on the river. It will not only be of benefit to the towns, but also of distinct advantage to the Government in the construction of the G.T.P. line.

* * *

—In connection with the subject of "Humbugging the Englishman," to which we have devoted a good many articles, we have a letter this week from Mr. J. A. Hunter, Hipperholme, Halifax, England, referring to "Doctor" Griffin, about whose escapades English exporters are now at last aroused: "A note in an editorial (p. 546), interested me. You speak of a 'clever cheat of a Doctor' representing Montreal trade papers. One man told me that his firm had neither paid, nor been asked to pay, for advertisements that were undeniably ordered and inserted. That fact seemed to add the last touch of comedy to an amusing situation. I never chanced to see the individual, though I plainly remember a description received from various persons two or three years ago. The man toured the country in a gorgeous chariot with flunkies, and—I fancy—a gorgeous wife and resplendent family. He was dressed like a regency buck, with frills to his shirt and adornments all over his person. The splendor of the creature took the breath of his customers, but I surmise that a second tour will be somewhat of a disappointment. He did create a sensation temporarily, and—though I forget whether the fellow called himself Doctor—I imagine this one must be the same man." Speaking of advertising and advertising people, "a New Yorker (the owner or manager of a dry goods paper) was shown the door recently for telling a friend of mine that he had heard in several quarters that my friend's people were ruddy fools. No end of invitations to dinner could make affairs any more pleasant. Neither rudeness nor surface glory seem to do much for transatlantics in the long run."

CANADIAN WEST INDIA STEAMERS

Sail from Halifax for Bermuda, The Windward Islands and Demerara every other Monday, and for Jamaica once a month.

The demand for Canadian goods in West India markets is constantly growing, and prospective exporters should inquire as to freight rates by this line.

PICKFORD & BLACK,
HALIFAX.

East Toronto
Debentures for Sale

Sealed tenders addressed to the undersigned and endorsed "Tenders for Water Works Debentures," will be received at my office until Wednesday, the 7th of December, 1904, for debentures amounting to **$55,000.00.**

The debentures bear five per cent. interest and extend over a period of thirty years payable in equal annual instalments. The proceeds of the debentures will be used for an extension of the water works plant which produces a large revenue, and it is anticipated that the revenue will be very much increased by reason of the supply of water to the G.T.R. shops at East Toronto.

The highest or any tender not necessarily accepted.

For further particulars apply to
W. H. CLAY,
Treasurer, East Toronto.

SOCIALISM IN PRACTICE.

The chief clerk in one of the local Government offices doesn't think much of Socialism, for he says it don't work out in practice. He told this story to support his contention that otherwise than theoretically the socialistic scheme is a failure:

"There were two Irishmen talking politics one day. One of them was a staunch Democrat and the other a follower of Eugene Debs. The latter was trying to convert the Democrat, but the Democrat would not be converted. At length he began to question the Socialist on the very strongest points of his argument. Asked he:

"'Now, Pat, if you had two horses would ye give me wan of thim?'

"'Aye, that Oi would,' replied Pat.

"'But, Pat, an' if ye had two cows would ye give me wan of thim?'

"'Aye, that Oi would.'

"'But, Paddy, if ye had two goats would ye give me wan of thim?'

"'That, Oi would not,' was the decided answer, 'because Oi have two goats, me boy.'

"That's Socialism as it at present exists," said the Government man. "A fellow goes into it for all he is worth while he has nothing, but when he gets a fair share of the world's goods the proposition doesn't look good to him saving in the most remote theory."—Seattle (Washington) Post-Intelligencer.

⁂

FINANCES IN THE UNITED STATES.

Henry Clews & Co., in their circular under date of New York, November 26th said:

Higher rates for money and foreign exchange, new security issues, and a disposition among big banking interests to restrain speculative enthusiasm combined to cause a moderate reaction in Wall Street. The result has been an active, irregular, and somewhat feverish market. No loss of undertone can be detected; for underlying conditions are still satisfactory and sound, but overconfident bulls have suffered some slight disappointment, and the speculative situation has undoubtedly been modified by liberal profit-taking. There is no doubt but that many of the stocks bought by strong parties during the low-priced period of 1903 are being gradually distributed, and that the market has now lost much of the support it once had from that quarter. Selling of this sort has not, however, been of sufficient extent to materially change the character of the market. General conditions in agricultural, industrial, mercantile and financial circles all remain exceptionally satisfactory. In fact, it is not often that all the great divisions of industry and trade are in as sound and as hopeful a state as they are to-day. Higher money was the most potent cause of reaction that preceded Thanksgiving. Rates had been abnormally low for many months past, and 4 per cent. time money is unquestionably a more wholesome figure than 3 per cent. Bank reserves are low, and since November 1st over $12,000,000 of gold has been exported, while about $100,000,000 of new securities have come upon the market. Such developments as these inevitably affected the money market and checked speculation.

The speculative situation, however, is divided. Underlying conditions, as already stated, are strong and in favor of an upward movement, and the monetary situation is safe enough not so seriously interfere. On the other hand many securities are selling as high as justified, especially if interest rates advance, and there is much less concentration of holdings. While there is no safe ground for a bear campaign, there is an opportunity here and there for professional traders to bring on temporary reactions; and the leading banking interests do not want a runaway market, as that would clearly imperil their plans.

⁂

TORONTO MARKETS.

Toronto, December 1st, 1904.

Chemicals, Drugs, Etc.—A fairly large crop of small orders is coming in and general trade may be described as fully

up to normal. There is little worth of special comment, however. Prices continue steady. Camphor and carbolic acid are advancing. The vegetable drugs, many of them, seem to be on the scarce side. Opium, however, is dull, in spite of unsatisfactory crop reports. Menthol is weaker. Considerable strength still exists in the quinine market, though, as there is another important bark sale in Amsterdam on the 15th, it is not probable there will be any price changes until the results of that are known.

Dry Goods.—Cotton goods are even firmer than they were, in sympathy with the renewed bullish conditions in the market for raw material. Staple woolens are exceedingly firm, and raw wool higher-priced than ever. The colder weather gave a needed impetus to the demand for underwear, blankets, and heavier goods generally. The Christmas trade promises to be highly satisfactory and already there is a good enquiry for fancy articles, handkerchiefs, umbrellas and other goods suitable for presentation purposes. As to the spring trade which is already beginning to cut some figure, the indications are all good.

Flour and Grain.—Little business is being done in flour, millers considering the prices offered too low in comparison with the cost of grain. The quotation on ninety per cent. patents is $4.25 to $4.45 in buyers' bags, eastern or middle freights. Wheat is 1 to 2c. lower, and dull at the decline, the millers considering prices prevailing too high for Ontario wheat. Barley is unchanged. Oats are also unchanged, though still firm. Peas and rye are a cent higher. Oatmeal is easy, though no further decline has taken place. Bran and shorts are in average demand, with no special feature.

Hides, Skins and Leather.—Values for hides are about the same as last week, and are likely to remain so as long as the quality keeps fair, which does not usually happen after winter sets in. Calf and lambskins are firm. Tallow also is firm. Leather keeps up and a fairly good business is being done.

Groceries.—No further changes in sugar have taken place this week, but the market retains its firmness. General trade continues good, and is likely to remain so, as far as present indications point, until after the Christmas holidays. In teas, trade keeps dull, but coffees are quite active still. Canned goods are firm, as before stated. Dried fruits are moving briskly.

Provisions.—Creamery has been not quite so plentiful this week, but no change is noted in price, as other lines are quite abundant. Cheese is very firm. Eggs have advanced a little owing to the cold snap, which stopped laying to some extent. Turkeys are in keen demand, and the price for young ones is 13c., or a little more. Old fetch 10 to 11c. Ducks and venison are both rather scarce. Chickens are steady.

Wool.—No change has occurred in the situation since last reported, and practically no business at all is being transacted.

MONTREAL MARKETS.

Montreal, 30th Nov., 1904.

Ashes.—Though the shipping season is now over, the falling off in prices is not so marked as usual, and as high as $5.95 has been paid this week for first quality pots; seconds would be quoted at about $5.40; pearls, from $7.50 to $8 per cental.

Dairy Products.—The last ocean-going liner of the season left port last Sunday, the 27th, and shipments of cheese for the closing week of navigation were 12,276 boxes, making the grand aggregate for the season 2,112,398 boxes, compared with 2,390,702 boxes for the season of 1903, a deficiency of 278,304 boxes. Of butter, 3,800 packages were shipped last week, against nil for the corresponding week of 1903, making total shipments for the season 485,468 packages, a gain on last year's figures of 147,181 packages. The cheese market is at present inactive, with no prospect of much doing before the new year, but holders are very firm in their ideas at 10 to 10½c. for finest Westerns, with fall ends quoted at about 9¾c. Finest creamery butter is quoted on spot at 20¼ to 20½c., and dairy makes from 15½ to 16c. per pound.

Dry Goods.—Stock-taking by the wholesale houses is now general, and sales are not large. Among city retailers November has been an unusually quiet month, and prospects do not appear altogether encouraging for an active Christmas trade. Country collections keep up very fairly, and travellers on the road say they are doing well with spring samples. An advance of 10 to 12½ per cent. is announced in serges and other lines made from cross-bred wools.

Furs.—New quotations for raw furs as now published show a material decline in bear, as compared with last year, and some moderate depreciation in fox, but prices for other lines are not materially changed. We quote choice black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark, brown $4, pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia, Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall, 10 to 15c. for prime winter; otter, $8 to $12, fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50, short stripe, $1.10, long stripe, 60c., broad stripe, 20c.

Groceries.—The great firmness in the sugar market is unabated. In fact, since last writing the St. Lawrence Sugar Refining Co. has established another advance of 5c. on all grades of refined goods, making their present quotation $5.25 for standard granulated, and $4.65 the lowest for yellows, but the Canada Sugar Refining Co. has not followed suit, their present figures being $5.20 and $4.60 respectively. Both refineries have been buying up all the available stocks of West India raw grocery sugars here and in the Lower Provinces, and they have also been recent heavy

The Keith & Fitzsimons Co., Limited.
111 King St. West, - TORONTO

City of Moose Jaw,
ASSINIBOIA.
TENDERS.

The City of Moose Jaw, a firmly established railway and agricultural centre with an exceptionally strong financial position, invites tenders for the purchase of $160,000 Five per Cent. Fifty Year Debentures. Offers will be received up to and including December 15th, 1904. No tender necessarily accepted.

For full particulars apply to
J. D. SIMPSON,
Secretary-Treasurer.
Moose Jaw, Assiniboia.

Debentures for Sale.
TOWN OF RED DEER, N. W. T.

The town of Red Deer, N.W.T., has fifteen thousand dollars' ($15,000.00) worth of debentures for sale, covering twenty years, and bearing interest at 5 per cent. These debentures are issued for the installation of a water-works system.

Sealed tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to DECEMBER 30TH, 1904. The debentures will be sold in whole or in blocks to suit purchasers.

L. C. FULMER,
Secretary-Treasurer.
Red Deer, N.W.T.

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.
W. S. DINNICK,
Vice-President and Managing Director.

purchasers of molasses, some 2,500 puncheons, in all, it is reported, for a part of which they are said to have paid close on to 28c. per gallon, but jobbers of these goods are still selling at 29c. by the single puncheon. Teas continue dull and inactive. Some revival of interest is evinced in the Valencia raisin market. Denia cables advise lower values, and, as Californias are higher, and Canadian imports of Valencias this year are the lowest known for the past couple of decades, local agents of Denia firms are calculating to do some further business. Walnuts are exciting attention, as prices are moving upwards owing to stocks of new Mayettes, Marbots and the better selections of Cornes being about exhausted. No new crop filberts are yet to hand, but first arrivals by steamer "Welshman," via Halifax, are about due.

Hides.—Lambskins are put up to $1 each, and a further advance of 5c. is looked for on Monday. Beef hides are unchanged at 9c. per lb. for No. 1, paid by dealers, with the usual advance of half a cent to tanners.

Metals and Hardware.—All the recent advances in metals are maintained, and ingot tin is even firmer at 33c. in a jobbing way, while for copper 16½ to 16¾c. is now quoted. Antimony is held at 9½c.; lead at $3.55; spelter, $6.15, and sheet zinc, $7 to $7.25. Galvanized sheets are firmer in Britain owing to the advance in spelter, but Gorbals and equal is still being sold locally at $4; galvanized Canadas, $3.90 to $4 for fifty-two sheets. Canada plates are now quoted up to £8 in England, and local price is firm at $2.30; Ternes, $6.25; tinplates unchanged. Bars and wire are firmly held, and the local rolling mills are said to be very busy. Iron pipe remains at $4.07 for inch.

Oils, Paints and Glass.—Trade in these lines is now of a very quiet character, and some of the houses are busy taking stock. The only change reported is a decline of one cent in turpentine, making the barrel figure now 78c. per gallon.

Mercantile Summary.

The Disston Saw Company, of Philadelphia, are about to erect a factory in Toronto at a cost of $150,000.

The hope of Vancouver people for the turning of English Bay into a pleasant high-class summer resort seems to be fading. A proposed by-law to raise $50,000 for this purpose has been turned down by the council more than once.

Langlois & Bros.' general store, Mathiot's dry goods store, and several other buildings at Victoriaville, Que., were on Tuesday last destroyed by fire at a total probable loss of between $12,000 and $18,000. The outbreak is attributed to incendiarism.

Considerable interest is being manifested by civic circles in Montreal in the discovery of what is said to be an efficient method of purifying large bodies of water by means of a copper-sulphate solution. This would no doubt have a tendency to destroy all algæ and fungous growths. However, in practical work on a large scale there would no doubt be many difficulties to overcome.

It is stated on excellent authority that a large and old-established Melbourne firm wishes to be placed in direct communication with a Canadian paper mill. For years past, the concern in question has done a very large business in newspaper and all kinds of printers' supplies, and the enquiry affords a good opportunity for Canadian paper mills to establish a direct purchasing agency in Australia upon a solid basis.

WHEN THE CANAL IS COMPLETED.

The Portland Exposition has stimulated the people of San Francisco to plan for a World's Fair on a very large scale in 1913. That will be the 400th anniversary of the discovery of the Pacific Ocean by Vasco Nunez de Balboa on the 25th of September. It will be called the Balboan Exposition and will be made broadly international, like those of St. Louis and Chicago.

The thrifty San Francisco people have another string to their bow. They expect the Panama Canal to be completed about 1913, and they intend to make their fair a celebration of that event also. There is a good deal in this.—Minneapolis Tribune.

⁂

SITUATION ON THE LAKES.

The lake season is finishing in a thoroughly sound and healthy condition though the freight rate is not what owners expected, says the Marine Review. It has ruled at 80 cents from the head of the lakes during the past week and there seems to be little probability of any further advance owing to the fact that the demand for tonnage has fallen off. The Steel Corporation, which went out of the market over a week ago for wild tonnage, expects to end its season next week. Other large shippers are hoping to have all their

cargoes down by the end of next week. Very little unsold ore has been brought down and in a broad way it can be said there will be no unsold ore on Lake Erie docks this winter. In other words, some of the furnaces will be short of ore before the season opens next year. The Steel Corporation's reserve of ore is about as it was last year, which was approximately 3,500,000 tons. Trade conditions are undoubtedly improving, and if signs indicate anything whatever, much business will be done during the next two years. Better prices will be obtained for ore next season that this, as higher prices have already been given for blocks of ore over the price fixed by the ore association at the beginning of the year. This will make for a better freight rate. The present year has been a less one in that respect, even the larger vessels earning only a fair return upon the investment. Coal has been moving a little more freely than for some time past and the grain trade has been quite satisfactory.

* * *

UNION PACIFIC RAILWAY.

The annual report of the Union Pacific Railroad shows a record for the fiscal year, ending with last June, which the New York Journal of Commerce remarks is a noteworthy exception to the rule for that period. There is an increase of over $4,200,000 in gross earnings above those of the previous year, and of less than $1,686,723 in operating expenses, so that net earnings show an advance of more than $2,500,000. This occurred when on most of our important railroad lines there has been a tendency toward reduced receipts and such an increase of expense as to diminish the net returns. There was a moderate increase in expenditure for maintenance of way and structures and of equipment, and $1,500,000 was spent from income upon betterments and additions, or $500,000 more than the previous year, while the cost of conducting transportation showed an increase of less than $460,000, with a substantial advance in traffic receipts. The physical condition of the property has been fully maintained, and an increase of traffic has been moved with decrease of 716,389 "locomotive miles," due to a larger average train load. The percentage of operating expenses to gross receipts was reduced for the rail lines from 52.32 to 51.52.

* * *

MONTREAL FIRE DEPARTMENT.

The fire committee of the Montreal City Council has been aroused to the need of infusing more system and thoroughness into the routine procedure of the Fire Brigade of that city. Some rules framed years ago and nominally in force have been, it appears, more honored in the breach than in the observance. These rules, it is now intended, shall be observed strictly. For example, one rule says that 1. In order to familiarize themselves with all buildings in their districts, the captains shall make periodical inspections of all colleges, convents, churches, factories, hotels, theatres, warehouses, stores and other buildings used for the purposes of business, instruction or amusement, and keep a written record of all such inspections with a description and drawings of the buildings inspected.

2. They shall report in writing, in their respective districts, all places where fireworks, explosives and combustible materials are kept or sold without permit or contrary to law; all violations of the law concerning fire escapes and proper precautions against fire—accumulation of waste paper, rubbish, defective furnaces, etc., and buildings generally which may be considered dangerous from any cause; all encumbrance to hydrants and any abnormal condition of fire alarm boxes; also all buildings provided with automatic sprinklers and standpipes, with condition of same, location of valves and connections so that they may be reached promptly in any case of emergency.

3. They shall keep a record, on maps furnished for that purpose, of the number and location of hydrants, so that a correct record of the number of hydrants for the entire city can be kept on duplicate maps on file at headquarters.

4. All the foregoing reports, in each case, to be separate and in duplicate, giving a brief statement of the facts.

5. For the purpose of giving effect to the above, the city is divided in districts, called "Station districts," in which the respective captains shall perform the inspection duties assigned to them, with such help and assistance as they may require and obtain from the members under their command.

Each of said districts is comprised within boundaries and limits, and bears the corresponding number of the station in charge thereof. There are twenty-one such stations. These regulations are eminently sensible; and if the Captains of Stations will obey them, and induce their subordinates to attend to their duties intelligently, industriously, with regard to the spirit as well as the letter of their instructions, the character of Montreal as a fire-waste city will be immensely raised, and her insurance rates can hardly but come down.

CENTRE STAR MINE.

The annual meeting of the Centre Star Mining Company was held in Toronto on Tuesday last. In his report, Mr. George Gooderham, the president, stated that the Centre Star and War Eagle mines, which have been operated under the same management, have so far produced 553,932 tons of ore, which has averaged about $14.40 per ton, or a total value of $8,076,661. Of this, more than $4,872,834 has gone to pay railways and smelters for freight, treatment, refining and marketing charges. The balance, amounting to about $3,200,000, has been received by the mines, but all of it has been disbursed for labor and supplies in connection with the mining of the ore and the development and equipment of the mines. This, while a good thing for the country, is scarcely satisfactory so far as the company is concerned, though it is hoped that with the new appliances recently installed, a change for the better will speedily make itself felt.

* * *

—The latest failure of one of the oldest banking and commission houses, says the Boston Herald, is explained by the statement that it found its commission business dull before the late boom in stocks began Then it took to speculating on the bear side of the market. That covers the ground

PEOPLE who admire substantial growth will be delighted with the record of the Sun Life of Canada for 1904. This Company has had many great years, but the year that is closing is the greatest.

——Have you seen the leaflet "From the Blue Book"? It shows at a glance why the Company is proclaimed "Prosperous and Progressive."

MANAGER FOR CANADA:

B. HAL. BROWN.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy holders and addition to Reserve.
$53,841.18	per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government for the protection of Policy-holders in Canada, $1 800,000.00.

NORTH BRITISH & MERCANTILE
INSURANCE COMPANY.

ESTABLISHED 1809.

MANITOBA AND THE TERRITORIES.

For some time there have been indications of a feeling in our North-West Territories that their basis of representation in the councils of the Dominion should be altered. And indeed Mr. Haultain, the Premier of the Territories, has made a plain demand in that direction, which it is understood Sir Wilfrid Laurier was to consider, if not grant, after the Dominion election which has just taken place. It cannot be wondered at that such a demand should come, nor, we think, can it be successfully argued that increased representation should be refused. As to its taking the form of provincial autonomy, there may be reasons of state which cause the Government at Ottawa to delay approval of such a step. Nevertheless, something more than mere formality will have to be urged to quiet the demand.

The people of Manitoba, according to a speech of the Premier of that province at Manitoba, on Monday last, are in sympathy with the people of the Territories in their effort to obtain self-government, and Mr. Roblin declared that the time has arrived when it is possible to take common action. He went on to say that:—

> The opportunity is not one to be neglected by Manitoba to press her claim looking toward the extension of her boundaries. He was not prepared to urge any encroachment on the Territories to the west, but he thought that the time had come when Manitoba might insist that her northern boundary might be extended to Hudson Bay, so as to include a sea-port, which, connected by rail with the more populous centres of the province, must prove of inestimable economic and social benefit to Manitoba and the North-West. The Provincial Government will use its best endeavors to secure this extension, and, once accomplished, it would fall within its province to construct the necessary railway, thus giving Manitoba direct connection with the markets of Europe.

It is further significant that the speech from the throne read at the opening of the Manitoba Legislature on Tuesday, referred to the success of the railway policy of that province, "which will be continued where possible on the lines of Government control." We must remember that there are now some 870,000 persons in that Great West of ours, with the probability that by the end of another year there will be a million. The existing population is largely composed of the very best quality of the Canadian people, penetrated with the western spirit of enterprise and self-reliance; that they have a magnificent country, whose populace feel that their affairs are past the territorial stage of development and that they are entitled to the kind of self-government that suits their ideas best. Therefore it will be well for the authorities at Ottawa to make no necessary delay in meeting the wishes of our western brethren; to meet them indeed in a spirit of large compliance. Any one who has been much among our western folk must know that they are apt to be disdainful—sometimes unjustly so—of "The East," and that red tape is a thing of which they are impatient. Any delay that is needless under the circumstances will only serve to heighten the feeling that they are being kept out of their rights. And this, in the interests of harmonious nation-building, is heartily to be avoided.

⁂

THE BANK OF MONTREAL.

In the statement laid before shareholders, and in the address of the general manager on Monday, the continued progress of the Bank of Montreal is made manifest. If the profits have not progressed during the year in equal ratio with the large increase in deposits and loans, this is accounted for mainly by the low rate of interest in foreign markets where much of this money is loaned so as to be readily available.

The low price of lumber, consequent upon a glut in the British market, and the disappointing result of the dairy produce trade are features of the year which prevented its being characterized as an universally prosperous one, while certain industries have suffered from foreign competition. But "some of our important industries," by which doubtless are meant the Dominion Iron & Steel Works at Sydney and the various industries at Sault Ste. Marie, "are now reviving under more experienced and intelligent management." Mr. Clouston's paragraph on domestic and foreign trade is interesting, showing that while our total external trade increased to $454,642,000 in 1904 from $450,040,000 in 1903, the export of domestic products declined in value sixteen millions, while our imports rose by over seventeen millions, making a loss in balance of trade of more than thirty-five millions. This circumstance, however, is offset by the capital brought in by immigrants, by investments of American and British money in our lands and water-powers, and in other ways.

The country is growing, however, growing rapidly, and we believe not unsafely. The farm, our greatest resource, is doing nobly, our mines are showing improved results, and there was never a time when there were so many industrial projects put forward. It may be that there are somewhat too many of these in certain directions, and that undue haste or excessive capitalization is being shown. But new factories or additions for which there is real need are being erected in many places by our own manufacturers, and we are getting branch establishments erected in our midst by Americans besides. So that if a portion of the many companies now applying for charters prove but flashes in the pan, we shall still have sound industries enough to provide for a vastly increased and legitimate demand. It is very reassuring therefore to find so competent an observer as the executive head of our largest bank declaring that "there is increasing belief that this country has entered upon an era of great and enduring prosperity."

The vice-president's address referred to the higher range of value reached by securities on the stock exchange, and to signs of confidence spreading in the lasting character of the improvement. The facts and figures which he adduces to illustrate the progress of North-West Canada are striking, and an excellent statement of the condition and prospects of different trades is to be found in his "brief summary." A subject which is worthy of all the attention given to it is the trade of Montreal harbor and the condition of the St. Lawrence route, as indicated by the attitude of ship-owners towards that route. The possibility of winter navigation of that great water-way by means of the employment of ice steamers is one that is fitted to create the keenest interest.

* * *

THE HOLIDAY TRADE.

At this season of the year the chief feature visible in departmental and many of the smaller stores of a general character is the large quantity of articles of such a nature as to be easily and gracefully given away. The wholesale dealers in many lines report that so far this year the demand for such goods has been more than usually large. Forehanded retailers have of course already laid in their stocks, but by the manner in which orders still come in, it is to be judged that even the most far-seeing have somewhat underrated the call from the public for goods for presentation purposes; sorting orders continue to arrive from all parts.

It would be almost impossible to mention all the varieties of goods which may be classed under the term of "Special Xmas." Roughly classified, however, they may be said to comprise among dry goods, handkerchiefs, which are always favorites. The popular demand this year seems to be for a quality ranging from good medium, to extra good; the really poor grades drag somewhat. Those put up in boxes of a fancy description are asked for but perhaps not quite to such an extent as usual, and by no means to the exclusion of individual specimens which can be chosen personally according to the taste of the purchaser. Many consumers like to select a few handkerchiefs and then buy a box in which to place them; and for such as these some enterprising merchants keep in readiness a number of pretty boxes from which the customer can choose according to his fancy. Umbrellas are another line naturally in favor for presents, but, while they are shown in the usual large variety, there is no striking feature. To leather goods, such as belts, bags, card-cases, the same thing will apply.

The booksellers have made their preparations for the usual demand which makes itself felt about this time, and very attractive is the variety offered. A good trade is reported, but it seems strange that there is not a stronger rush for books for presentation purposes than actually prevails. Books may easily unite the two qualities, most unanimously in request for the holiday trade, namely, ornament and utility, and combine these two in most convenient shape, and so, while of course thousands of volumes are bought, it seems strange that the number is not doubled or quadrupled. It is said every now and then that the old fashion of sending Christmas cards is going out of date. Perhaps it is, judging from the semi-apologetic manner in which people talk of it; nevertheless, the pretty habit dies but slowly, if the numbers still manufactured and sold are any criterion.

We must not omit to mention, under the present heading, Santa Claus' great offering of toys. The immense number, varying cost, diverse patterns of these preclude description; suffice it to say they are as multiform as ever. One feature which strikes the curious "grown-up" is the fact that an eye to utility, as well as amusement, is this year more marked than usual. In this is to be traced the idea of a serious age that the youngsters may as well take their jam with a pill in it, and that it is never too early to begin their education. Tendencies of the age, too, are manifested in the large number of toys having the automobile or loop-the-loop idea as a basis. Certainly the children make a large factor in modern trade; and catering to their special whims has been done to a greater extent than ever this year.

* * *

THE COTTON SITUATION.

The atmosphere surrounding the position of the raw cotton market is gradually clarifying itself. The United States Government's estimate of the present season's crop has now been issued, and is distinctly bearish in its effect. It places the yield at 12,162,000 bales of 500 pounds each, which would be the largest crop on record by about 1,000,000 bales. Last year the Government estimate was 9,962,000 bales, which only proved less than the reality by 50,000. Some authorities believe the crop in the Southern States will approach 14,000,000 bales, while on the other hand the New York Journal of Commerce, a reliable authority, places the yield this year, based on the report of 800 independent correspondents, at 11,275,000 bales. Whatever may be the exact production for the present year, however, there can be no doubt that it will exceed that of the last two or three years, and this fact will do much to smooth the road of our Canadian mills.

At the same time, too much must not be expected of the above optimistic reasoning. It should be remembered that last year's shortage of crop brought about an almost unprecedentedly small surplus, and that a part of this year's harvest will have to be utilized in filling up the void in the world's markets which followed that shortage. As an illustration it may be stated that Lancashire mills are now working overtime to supply not so much the future demand as the deficiencies of staple cotton goods in all parts of the world.

Another factor which will count strongly against any great reduction in price is the constantly increasing consumption. This has been going on for some years past, and is due not only to the rapidly increasing population of this continent, and to the still more rapidly growing wealth of its people, but to the expanding markets in other countries, such as Japan, China, and others less important. While it is improbable therefore that prices will reach the inflated levels of a year ago, it is by no means unlikely that 10c. or so for raw material will be the range for some time to come. It is possible, of course, that a day may come when American cotton will occupy a less unique position than it does to-day, and that other countries—notably the tropical possessions of Great Britain and Germany—will add important quota to the world's supply of raw cotton, but this is a contingency which probably is so remote that now it may be kept out of the range of "practical politics."

In the meanwhile, staple cotton goods in Canadian mills and warehouses may be described as retaining their recently accustomed firmness almost to the full. Some people point to the decline in raw cotton as an argument that lower prices for finished goods are sure to come, but, as we have said above, this is largely problematical in view of the light stocks in hand consequent upon the extreme prices earlier in the year, and the hand-to-mouth buying which resulted then. The demand both from city and country retailers seems to keep up very well and, for this period of the year, has been distinctly good. Reports from the country generally favor a continuance of the same conditions.

* * *

ESSAYIST versus ACTUARY.

Mr. E. Fielding, author of a leaflet which is being circulated amongst members of the Commercial Travellers' Association, has written to the Toronto World complaining that his proposed plan of using the funds of that society so as to produce results which actuaries say cannot be achieved, has been misunderstood and unfairly presented in last week's issue of the Monetary Times. Doubtless Mr. Fielding thinks he is right, and that he knows more than either the Ottawa or the Toronto actuaries who were employed to report upon the safe way of administering the accumulated funds of the C.T.A.

Since he ventures to contradict these gentlemen as to what can and cannot be done with a certain sum of money in hand in the way of paying mortuary benefits on a given number of lives, we can hardly expect him to agree with the cautionary views of the Monetary Times in the premises. Perhaps, however, he may be content to take a hint from such a publication as the last Report of the Inspector of Insurance for Ontario, which has come to hand since Mr. Fielding's pamphlet appeared. On pages C 193 and C 194 of this report he will find some weighty sentences which, if he is not an obstinate man, or one honeycombed with self-esteem, should show him that he has gone too far in his proposals in this matter. Says the Report:

"As financial calculations with serious results *are still being erroneously based* upon the so-called "Expectancy" or " Expectation of Life," it will be helpful to collect here some of the warnings that from time to time have been published by leading authorities."

The authorities here cited are T. B. Sprague, than whom none has stood higher in the actuarial world, F. G. P. Neison and Edward W. Brabrook, F.S.A., friendly societies' actuaries in England; and W. Sutton, M.A., F.I.A., at various dates from 1857 to the present day:

When reforming the financial basis of the great Friendly Societies of England, Mr. Neison pointed out the *danger of founding any insurance or benefit upon the expectation of life.* See Contributions to Vital Statistics, edition of 1857, page 99, from which the following is extracted:—

Neison.—"Although the expectation of life expresses the true average duration in years of a certain number of individuals at a given age, yet it does not represent the chances of surviving an equivalent number of years; and consequently for medical and other purposes in which it is required to determine the relative value, improvement or other change which may have taken place within a given period of life another expression must be found."

Mr. Brabrook says, in 10 Journal Institute of Actuaries, page 350: "Reflection will show that the 'expectation of life' means nothing whatever. It is merely an arithmetical result. It does not import that any one person, or any number of persons, will live that term of years; but only that, if you add the years lifetime of a number of persons together, and divide by the number of lives observed, you obtain a given result. If some die *n* years earlier, others will die *n* years later. Those who live beyond have not really 'exceeded their expectation;' if it were so, all would live till the last age of the tables, for the expected age at death increases with every year of life completed. The 'expectation' is not an element in the premium to be charged, nor is it a measure available for any purpose whatever."

And Mr. Sutton, in a lecture on mortality tables, said: "Although as a matter of theory the meaning of the expectation of life at any age is a perfectly simple matter, yet from various causes this phrase has been the source of endless confusion." Speaking of a certain calculated probability, he says: "This latter quantity is the *vie probable* of the French writers; and when translated into English as the *probable lifetime* has been mistaken for the expectation of life."

It may be that Mr. Fielding has, as his letter to the World says, "taken actuaries' figures," but he has not used them like an actuary; and no one but such cocksure calculators as himself can be certain that he has "shown the present and future income of our society," as he declares he has done. A little more research may do Mr. Fielding good. By reading and enquiring he can find that arithmeticians have lived and studied years before his era who, when they perhaps reached or foresaw just such false conclusions as he has now reached, pushed on further, and by the aid of patient observation and mathematics found out what he apparently has yet to discover, that "*a little* learning is a dangerous thing," and that shallow draughts sometimes intoxicate the brain.

NOVEMBER FIRE WASTE.

The loss last month in Canada and the United States from fire was satisfactorily less than in November last year, but nearly a million dollars more than for November, 1902. The following table, compiled by the New York Journal of Commerce, shows the figures for this year and last in detail:

	1902.	1903.	1904.
January	$ 15,032,800	$ 13,166,350	$ 21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,894,600	13,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
June	10,245,350	14,684,350	10,646,700
July	10,028,000	12,838,600	11,923,200
August	7,425,550	8,428,350	9,715,200
September	9,945,000	9,939,450	14,387,650
October	9,593,300	10,409,800	12,866,200
November	10,546,650	13,589,550	11,515,000
Total 11 mos..	$134,644,350	$138,970,900	$232,941,700

Already the losses for this year, so far as it has gone, largely exceed those for the whole of either of the past two years, and this would still be the case, even were the losses on account of the Baltimore and Toronto conflagrations deducted. It is believed, however, that notwithstanding this severe strain, a large number of the fire underwriting companies will find they have fairly large surpluses at the end of the year, owing to increases in the values of securities, and to the fairly good business transacted during the last few months. Allowing $60,000,000 for conflagration losses, the eleven months of this year show a fire waste of $172,000,000, which is far above the figures of the same period in 1903 and 1904. The people of this North American continent are not showing that they have learned to cure their costly carelessness of fire.

* * *

THE GUELPH STOCK SHOW.

No better index can be found of Canada's strong-armed reaching out for the best possible than in the exhibition which has been going on this week at Guelph, Ontario. Among the people who carry on the professions and trades and arts, there are two great divisions; the men content with the average, and the men who are never satisfied with any thing but the very highest. Between these two classes there is all the difference in the world, but between the various individuals who help to make up this second category, that is, the men who constantly strive to bring their respective trades or professions to the very finest point possible, there is hardly any difference at all. Intrinsically, they are all artists in the best meaning of the term—shapers of the ideal. The great physician realizes that his raw materials are nature and human mechanism a little out of joint, and his great striving is to bring the two phenomena once more into unison, with as little disturbance of other underlying sequences as possible. The great financier or business man, with a wide grasp of intricate causes and effects in widely separated portions of the globe, from the tangle creates a "deal" which will mean the success of far-foreseen plans. The breeder of fancy live stock puts before his mind's eye an ideal form of carcase and, with never-ceasing patience, with an eye trained to the analysis of subtle distinctions and not less subtle likenesses, with a power of observation capable of guessing at unseen tendencies, he drives towards his mark, firm enough to guide nature with his acquired human skill, never too firm or obstinate to refuse to take nature's gentle reminder of "Thus far and no farther" along a forbidden direction. Each man in his respective career is working for the best possible result, not merely the passably good; the great farmer, or horticulturist, the great merchant, and the great engineer or physician are in a class by themselves based upon the equality of the finest.

Our banks and insurance companies, our great merchants in many lines need no calling of public attention to the importance of their work at this time of writing. The Guelph Show gives tangible illustration of the work of that other great class of workers referred to—the breeders. Suffice it to say that the exhibition this week shows that in this work they are in no way behind their fellow-workers above referred to. The animals shown have been more than fully up to the high average of previous years, and to say this is no small compliment. As to the exhibition itself, it has been a very pronounced success.

Upon this, the Royal City is to be congratulated. It has met with another great success, and most emphatically deserves it. Some other cities in the Dominion, jealous of the marks of approval which each year are showered upon Guelph for its enterprise in this respect would appear to be anxious themselves to become the seat of the annual Fat Stock Show. But we say, to the victors belong the spoils. Guelph has done splendidly well with her show; let her retain it and may she and it long prosper.

* * *

TRADE WITH AUSTRALIA.

That Canadian trade with Australia presents openings which are yet a very long way from being filled may be gleaned from the report of the imports of the Commonwealth for the year 1903, which has just been issued by the Government. To mention a few items, the imports into Australia of wearing apparel from Canada amounted in 1903 to £1,117, while those from other countries were valued at £1,354,837; boots and shoes, Canadian, £386; other countries, £342,467; brushware, Canada, £24; other countries, £48,735; butter, Canada, £205; other countries, £88,754; cheese, Canada, £325; other countries, £33,071; preserved fish, Canada, £11,490; other countries, £272,572; furniture, Canada, £1,735; other countries, £143,129; wheat, Canada, £28,428; other countries, £1,909,403; flour, Canada, £108,558; other countries, £647,485; agricultural implements and machinery, Canada, £58,412; other countries, £455,127; leather and manufactures, Canada, £165; other countries, £236,885; machinery, Canada, £5,055; other countries, £687,121; pork, Canada, £15,117; other countries, £65,136; metals and manufactures, Canada, £1,946; other countries, £1,139,967; printing and other paper, Canada, £2,985; other countries, £700,239; timber, dressed and undressed, Canada, £40,748; other countries, £698,705; bicycles, Canada, £25,046; other countries, £350,252.

Compared with the preceding year the most noteworthy changes were an increase in imports from Canada of breadstuffs of nearly £50,000, and a decrease in those of timber of nearly £70,000. Mr. J. S. Larke, of Sydney, N.S.W., to whom we are indebted for these figures attributes the former to the demand created by the drouth; while the latter he cannot explain, as there was no similar decline in importations from the United States. There were variations in different classes of manufactured goods; yet on the whole the imports for last year showed a decided increase.

Another Canadian commercial agent, Mr. D. H. Ross, stationed at Melbourne, Victoria, speaks of the very promising openings presented in Australia for furniture from this country; also for acetylene gas generators, for which there seems to be much enquiry. Obsolete goods will be of no use; the Australians want machines with all the latest improvements. Another line in request, of which manufacturers here would do well to take note, is enamelled and porcelain-lined baths. One apartment-house shortly to be erected in Melbourne will need no less than forty-seven of these conveniences, together with all the appliances which usually go with them. But it is now, no doubt, too late to do anything with this particular order; the instance is merely given to point out to Canadian manufacturers of all kinds the desirability of making their goods known in Australia, by means of circulars, advertising, the appointment of agents, etc. But quality has always to be up to the mark. Many examples are recorded where merchandise supplied from Canada has been very inferior, or otherwise unfitted for the requirements it is expected to fill. Nor is it untimely to remind Canadian exporters of what the Monetary Times correspondent in Australia has for years been pointing out: that Canadian houses have a reputation in that country for being loose in their business methods, inattentive to shipping instructions from Australian houses, and careless as to quality and proper packing of their goods. All our export houses do not deserve this character, for some do their business properly. But the recklessness of others has done much to injure Canadian repute and to hinder Canadian trade with the Australian Commonwealth.

* * *

CANADIAN SAVINGS.

A. Laing, Wyoming, Ont., writes under date 30th November, as follows: "In one of my business circulars from Chicago, I saw a statement of the amounts on deposit in the banks of the leading countries of the world, in which Canadian depositors were stated to have a total of sixty million odd dollars. I wrote the editor about it, but he said the figures he quoted were from Washington, and he assumed they were (or must be) correct. Now I think it would be too bad to let that figure go uncorrected, and I believe you can tell to a nearness how much Canadian deposits were lately; that is in banks, loan companies and the Post Office Savings Bank, etc. It seems to me the amount should be perhaps (600) million."

[The figures in the circular described are the same as those quoted by the Literary Digest from a recent bulletin of the United States Department of Commerce and Labor. This document gives a comparative statement of savings bank deposits in various countries, the number of depositors, the aggregate of deposits, the average deposit and the amount per head of population. The United States heads the list, with 3,060 millions of dollars; Germany having 2,273 millions; the United Kingdom, 996 millions; Canada, 60 millions. Even with this showing, Canada stands well, having an average of $289 per depositor in savings banks alone, and thus ranking next to the United States, which has $418. But it would be a great mistake to suppose that this 60 millions odd, which is the total of the Government and the post-office savings banks, represents all Canada's savings. She has $438,975,000 deposited in the chartered banks; $62,216,000 in the Government savings banks; $21,000,000 in Ontario loan societies, and $23,507,000 in other savings institutions—in all, $545,698,000, which makes the average deposit $91 per head instead of $11, which is allowed her by the compilation above referred to. In arriving at a knowledge of the comparative standing of different countries in this respect, it is essential to know what has been included under the term "savings bank deposits." We suspect that the basis alters in different countries mentioned in this bulletin.—Ed. Monetary Times.]

* * *

COMMERCIAL TRAVELLERS' ASSOCIATION.

The impending changes in the affairs of this important association, embracing some 6,400 members, and which is closely allied to the commercial interests of the country, are sufficient to warrant an examination of the proposals which are being made. In our last issue we showed the fallacies and inconsistencies of Mr. E. Fielding's shallow reasoning, and now we refer briefly to Mr. Hopwood's amendments to by-laws. This gentleman proposes to make up the deficiency in the funds by a flat assessment, limited to $5 per $1,000. This surely is a most original idea. The thirty years' traditions of the association, limiting the fee to $10 per annum, are to be rudely swept away, and the members compelled to pay an assessment which would increase the cost by 50 per cent. What a pity that Mr. Hopwood has kept hidden for so long such a bright proposal as this, an application of which might have prevented the demise and disaster attendant upon the numerous assessment societies.

But what about the members who refuse to pay this added assessment, but are willing to continue to pay their $10 fee, which the by-laws and the past thirty years' custom have practically made absolute. Mr. Hopwood's scheme proposes that not only shall all their interest in the Mortuary Benefit Fund absolutely cease, but that their transportation privileges shall also be taken away. Here surely is despotism! And what will the merchants and manufacturers who employ the commercial travellers, and who, for at least 85 per cent. of the members, pay the annual fee, say about this? Will they be prepared to pay 50 per cent. more for transportation privileges than heretofore? Again, what effect will this have upon the Association. Will new members be attracted to it when the same transportation privileges can be secured from other associations at the normal rate of $10 per year.

The reform of the mortuary benefits of the Association is a matter which can only be treated with by those who have had special actuarial training, and any attempt which may be made by others, is almost sure to lead to serious trouble and dire consequences. Mr. Hopwood is, we believe, a good commercial traveller; he probably means well, but his endeavors to solve the difficulty, which the association is at present in, clearly indicate that he is incompetent for the task. Better follow the advice of such men as Dr. J. Howard Hunter, the Registrar of Friendly Societies for Ontario, or the Dominion Government actuary, Mr. A. K. Blackadar, F.I.A., both of whom have spent a lifetime wrestling with such problems. Their reports, which have just been published and sent to the members, should be read by every one who desires to see the association continue and succeed.

* * *

OUR HALIFAX LETTER.

Rumor says that the Dominion Coal Company has in view a plan for placing its coal on the Ontario market, which involves a Government bonus towards the expense of carriage, and a remittance in whole or in part of the provincial royalty of twelve cents per ton.

The Halifax City Council some two years ago decided to accept the offer of Andrew Carnegie of $75,000 for a public library, the city to expend a like sum for the same purpose. There was a great deal of opposition on the part of citizens, which became intensified when Mr. Carnegie expressed his opinion as to Canada's destiny, and this feeling culminated in a vote of the council at its last meeting, rescinding the acceptance of the offer. This finally disposes of the public library matter.

The Halifax Electric Tramway Company met with quite a reverse in the courts ten days ago, when Dr. Mader obtained a verdict of $7,372.40 for damages sustained last winter through being thrown out of a sleigh. It was held that the accident was caused through the negligence of the company in not properly clearing the snow from the streets through which its line runs. The company will probably appeal.

The Halifax Board of Trade, which a few weeks ago took up the grievances of the local flour merchants, has succeeded in securing from the Intercolonial a rebate of $7 per car on flour for export. There is no flour warehouse at the terminals in this city, and in consequence merchants are compelled to remove the flour to private warehouses for storage, while awaiting the arrival of vessels, and the rebate is to indemnify shippers for the cost of this work This, while affording temporary relief, is only partially satisfactory, and the agitation for better terminal buildings and facilities will not be allowed to drop. Much needed changes are now being made at pier No. 2, and in the immigration and passenger buildings, and when these are completed, passengers arriving by steamer need not be exposed to the weather for a moment even though bound for the Pacific Coast. Passengers arriving by the winter boats this season will land at Halifax instead of being compelled to go on to St. John. The two steamers that have arrived landed a large number of passengers, and it is expected that immigration this winter will be unusually heavy.

The special ship-building committee of the Board of Trade and the City Council met last week and arranged its plan of work. Local capital is to be interested and a company formed which it is hoped will be the nucleus of the proposed industry. Arrangements are to be made to have the matter of federal aid brought up as soon as possible after the House meets next January.

Much interest centres in the Vice-Regal reception this week to Earl Grey, Canada's new Governor-General. He is expected to arrive on the SS. "Parisian" on Friday, and will be sworn into office at the Provincial Building on the same afternoon. Immediately afterward, addresses will be presented to His Excellency from the Provincial Government and the Halifax City Council. On Saturday evening, Lieut.-Governor Jones will give a state dinner at the Government House, and on Sunday evening a dinner will be given by Gen. Sir Chas. Parsons at Bellvue. Earl Grey, the Countess and two daughters will be guests at Government House during their stay in Halifax. Upon his installation as Governor-General, a salute of 21 guns will be fired from the citadel. On Tuesday, the 13th inst,, the Joseph Howe monument is to be unveiled and it is probable that Earl Grey will remain and take part in the ceremony.

Seven counties of Nova Scotia are again in the throes of an election campaign. These bye-elections take place on December 15th. Among the Liberal candidates is Dr. Kendall, who formerly represented Cape Breton in the Dominion Parliament, and it is said he is eventually to be given the portfolio of Public Works and Mines in the province, now held by Hon. E. Drysdale.

The annual convention of the Nova Scotia Fruit Growers' Association takes place in Windsor on Wednesday, Thursday and Friday of this week. This is about the most important and influential body of agriculturists in the Maritime Provinces, and the sessions are always largely attended. Next week the Winter Fair and Fat Stock Show will take place at Amherst. This institution has grown rapidly in popular favor and has now assumed considerable proportions. The lectures on stock raising and agricultural subjects are an important feature.

Apples are still bringing small returns. Cheques received from the English markets have been disappointing. One dollar a barrel is about the average price received by farmers. The New York Journal of Commerce gives publicity to a story that a coterie of English dealers are in a combine to fleece the United States and Canadian apple growers. The way the plan is worked is to put the apples up to auction, and buy them in at a low price and then afterwards dispose of them at a good figure. Shippers here place little credence in the story, but no doubt the farmer can easily be made to believe that some one is depriving him of profits to which he is entitled.

Bank fish have advanced in price 30 cents per quintal, and are now worth $5.50. There are not over 10,000 quintals unsold in Lunenburg County, while last year at this date there were over 60,000 quintals. Porto Rico molasses has advanced to 39c. per gallon in puncheons. Sugar is easier after its phenomenal rise in price.

Halifax, 5th Dec., 1904.

* * *

—The Windsor, N.S., Board of Trade has elected officers for the current year, as follows: President, W. H. Roche; vice-president, F. F. Murphy; secretary, H. E. Wilson.

THE METRIC SYSTEM.

Editor, Monetary Times:—

Sir,—Seeing your notice on page 722 in your last issue, re "Metric System," may I ask you to kindly give space to the enclosed. So many people declare favorably about the Metric System who really know very little or nothing about it.

The British Weights and Measures Association have for their objects: The defence standardizing and simplifying of British weights and measures. Their offices are at 25 Victoria St., London, S.W. Mr. George Moores is the secretary.

To bring our present standards to a uniform basis will bring beneficial results, and may be done in reasonable time without upsetting existing conditions.

The people of the British Empire and of the United States' control the great bulk of the trade and commerce of the world, and the weights and measures they use are retained because they are the most satisfactory in use.

Then why establish, or try to establish, a change which can only create enormous confusion and loss.

Yours truly,
Toronto, 5th Dec. JAS. P. MURRAY.

What Mr. Murray enclosed us was a circular containing a letter reprinted from Science, of 18th November, 1904, headed, Germany and the Metric System, and written by Samuel S. Dale, of Boston. Its contents would occupy one of our pages. It denies what Lord Kelvin stated before the House of Lords, what Sir Wm. Ramsay wrote, and what several United States and German gentlemen publicly declared, viz.: That there was no difficulty in getting Germany to adopt the Metric System in 1871, that it caused no complaint, but was recognized and put in use in a short period of time. And Mr. Dale further declares that "the weights and measures of a great German industry are in a state of chaos to-day." Here are some extracts from German books and journals which he adduces to prove that the Metric System is a mere nuisance:

EXTRACTS FROM CIRCULAR.

Friedrich Frowein, Barmen, 1901, "Kalkulator fuer Artikel der Textilbranche," a hand-book for textile workers. Gives complicated formulas for converting different standards, including the Prussian, Würtemberg, Baden and Bavarian ells. Gives calculations of cost, all involving a variety of standards. In the one for cotton tape there are the French inch, the English yard, the French line, the English pound and the meter.

Leipziger Monatschrift, October 31st, 1902. A yarn calculation table based on the Vienna inch, English yard, English pound and the meter.

The same journal, July, 1903. An article on textile calculations, in which are found the Saxon inch, English yard and pound and the metric standards.

Donat, "Methodik der Bindungslehre," Leipzig, 1901. Gives a list of standards in use in Germany which include the following: Leipzig, Bohemian, Berlin, Brabant, Vienna, English and French ells; English, Leipzig, French and Vienna pounds; Leipzig, English, Vienna and French inches.

Sixteen different systems of numbering yarn are in use in Germany based on the Berlin pound, the kilogram and half-kilogram, the English yard, the Berlin, Brabant and Leipzig ells and the meter.

Muenchner Allgemeine Zeitung, 1902. At the session of the tariff commission on June 24th, 1902, the introduction of the Metric System for cotton yarn came up for discussion. According to Abgeordnete Muench-Ferber, who is a manufacturer of cotton and woolen goods at Hof, Bayern, the introduction of the Metric System would throw the German weaving industry into heillose Verwirrung because the German machinery is based on the English system.

* * *

BANKING AND FINANCIAL.

We are informed that the Crown Bank of Canada has arranged to open a branch office at Enterprise, in the County of Addington, Ontario, north of Napanee.

The Grand Trunk Railway Company will hold a special general meeting in London on the 21st inst., in order to ratify the directors' resolution to guarantee the principal and interest of $7,500,000 fifty-year four per cent. gold bonds proposed to be created by the Grand Trunk Pacific Railway Company as a first charge upon the Lake Superior branch line.

The United States Department of Commerce has received instructions from President Roosevelt to make a thorough investigation into the petroleum industry of the country, the object, no doubt, being to ascertain whether the Standard Oil Company is an illegal combination in restraint of trade. Mr. J. R. Garfield, Commissioner of Corporations, will be in charge of the enquiry. It is stated, with what degree of truth it is difficult to say, that the President is determined that the Standard Oil monopoly shall be broken, and, anticipating a long, hard fight, he has issued instructions that it be begun immediately in order that it may be completed before his term of office expires.

LIFE AND ACCIDENT ASSURANCE.

In her suit against the Steel Laundry Company, of Jersey City, New Jersey, a jury last week awarded Annie Brady, a fourteen-year-old girl, $3,000 damages. While operating a washing machine Miss Brady's right hand was caught in a cog-wheel and all four fingers taken off.

Life assurance is worth starting and maintaining, says the Union Mutual, *when supporting parents.* Instances are not much scattered where young men find the support of one or both parents incumbent upon them. In such an event, how deplorable would be the situation of those parents should the contingency can be eliminated. A policy written for their beneson's life be cut short. By life insurance the hardships of that fi: can any time have the name of some other person inserted as beneficiary after the reason for the first names appearing no longer exists, the change to be made in accord with the rules of the company.

We hear from Winnipeg that Mr. W. R. C. Hewat, who has been in the employ of the Great-West Life during the past nine years, has been appointed manager for the new branch to be opened in Halifax by that company, and his territory will cover the Province of Nova Scotia. Mr. Hewat has been successful both as a local and district agent; also as inspector in the Province of Ontario during the past few years. He will find his new field of action an interesting one.

Accident and health insurance are in a fair way to get on a "safe and sane" basis, to use the current political phrase, says the Insurance Post, Chicago. Marked improvements in policies and practices are under way, largely as a result of the frank and free discussion of conditions at the recent sessions of the International Association of Accident Underwriters. It was there made plain that the companies had been going too fast and too far in fields where their experience was inadequate, and that competition had added frills and furbelows to the business that were proving as expensive and useless as such fineries usually are. The saving feature of the situation was that the accident underwriters, once convinced that they were going wrong, had both the will and the ability to set themselves right.

It was not a cold-blooded insurance company, but a fraternal of the high sounding name of "The Modern Brotherhood of America," which fought to a finish in the Supreme Court of Iowa a claim for $100 brought against the "order" by one of the Modern Brothers, who accidentally broke one of his legs and thought he was entitled to the amount under the terms of his beneficiary certificate. The certificate promised that amount of indemnity in case the holder should break a leg, provided—and there was the little joker—"the shaft of the hip bone was broken between the hip and the knee joints or the shafts of both bones broken between the knee and ankle joints. Poor Malcolm Peterson didn't break his leg in approved fashion. He managed to break the fibula a couple of inches above the ankle joint and also to break a malleolus process. But in the opinion of the court he did not break the shafts of both bones. So the court decided against him. Not unanimously. One of the judges thought that when a man broke his leg he should not be asked to "observe minute lines of demarcation by which a learned profession has mapped and charted each particular bone of the human frame into sub-divisions too small to permit the inscription of their ponderous Latin names." But, unfortunately for Malcolm Peterson, the judge stood alone in the opinion.—Investigator.

Compliments from the English press have been paid to the Canada Life. Its progress is hardly equalled by any English institution, and appreciative references are made to the high rate of interest obtained on excellent security. In this country the insurance press has less than American liberty of speech, as the owners of a paper printed in the interests of industrial life assurance agents have discovered. Possibly the Assurance Agents Company made an unfair selection from the list of claims contested in the courts by the Pearl Life Company. At any rate a pamphlet was disseminated by them of a sort unlikely to do the Pearl people the minutest piece of good. The jury took the circular as defamatory and awarded damages in £300.

FIRE AND MARINE INSURANCE.

Lake marine insurance shows a fair field this year. The season closed December 5th, and so far the loss ratio is notably low. As a contemporary remarks, however, one or two total losses, however, could put a very different face on matters, so large are the values carried in one of the modern freighters.

After the denials—the confirmation. It is certain now that the overtures of the Commercial Union have resulted in provisional agreements with the Hand-in-Hand, and during the next session of Parliament a bill to legalize the union of the pair is to be brought in. Insurance punsters have had their say over the nuptials, despite a sentimental regret about the absorption of the oldest and perhaps the stoutest of life offices. To set any doubts at rest it must be added that the Hand-in-Hand was in no sort of danger or under any compulsion.

After fire-boats in harbors, fire-cars are the newest thing. A Chicago dispatch of Sunday tells of fire-cars which have been installed on the Metropolitan Elevated lines. The cars correspond in type to the regular chemical engine in use in the city fire department. One is stationed at each of the four branch terminals of the elevated road. At a test a fire-car ran one mile and extinguished a fire within six minutes after the alarm was sounded. The equipment consists of two 100 gallon tanks of chemical solution and two lines of hose, each 150 feet long, besides a reservoir containing 200 more gallons of solution. Two trained men compose the crew of each car.

We know how prevalent is the practice of various churches and societies of holding annual bazaars or fairs for the purpose of raising funds for church or charitable purposes. Booths are erected and decorated with flimsy, inflammable material, and during the open hours the halls are often overcrowded. A gust of wind or the ignition of a match under the foot of some spectator is liable to start a conflagration, and in such a gathering a holocaust is inevitable. Arthur Hawkhurst, insurance manager for Marshall Field & Co., Chicago, recently related a personal experience with an entertainment of the above character. During the preparations for the bazaar Mr. Hawkhurst advised the installation of certain safeguards, but was ignored by the management, which was sure there would be no danger of fire or panic. Yet, says the Argus, a fire did start when the hall was crowded, but the blaze was extinguished in its incipiency by a pail of water, which was placed in a booth presided over by a relative of Mr. Hawkhurst, who had heeded his warnings.

GROCERS AND PROVISION DEALERS.

The egg and produce warehouse of Gunns, Limited, at Wingham, Ont., has been destroyed by fire at a loss of over $8,000.

The assets of the United Canneries Company, Vancouver, B.C., were sold the other day to O. M. Malcolm for $119,500. This price, while it falls considerably below the original cost of the property, is sufficient, it is believed, to pay off all mortgages, interest and other charges. The properties include plants on English Bay, Gulf of Georgia, the Scottish-Canadian salmon canneries. For the past two years Mr. Malcolm has been operating the factories under lease.

The Canadian Grocer tells of the visit of a leading banker recently to a butter factory in a small Ontario town. He was told that the whole output of that factory was shipped regularly, without being salted, to Denmark, where it was prepared for the British market, and sold as Danish butter. The banker also stated that in a pork factory the other day he noticed that the hogs which were being killed were all of medium size, and that when cut up the bacon showed regular streaks of lean and fat. The output of the factory, in this instance, was shipped to Ireland, and no doubt from there re-shipped to Great Britain as Irish bacon. No doubt, as was remarked by a listener, this is a testimony that Canada's butter and bacon must be pretty good stuff or it would not be bought and palmed off as the product of countries which have established a very high reputation in the products as mentioned. But there is another side to the story. Why cannot Canada trade upon her own reputation?

* * *

TORONTO STOCK TRANSACTIONS.

The volume of trading on the Toronto Stock Exchange this week has been somewhat large and prices have held steady. Stocks in New York during the last two days have had a rather strong downward tendency for some reason not fully explained. A feature in local financial circles this week was the auction sale of Consumers Gas Company new stock, of which the city bought $10,000 worth at a price ranging from 209 to 214½. The following are details of the transactions in the more interesting of the stocks: Bank of Montreal, 15 at 249; Ontario, 15 at 127-127½; Toronto, 27 at 228; Commerce, 774 at 160-163; Dominion, 488 at 246-249; Standard, 1 at 239¾; Hamilton, 34 at 214; Consumers Gas, 362 at 216-217; C.P.R., 1,369 at 131¼-134¼; Canadian General Electric, 1,046 at 171⅜-177; Bell Telephone, 141 at 159¼-160; Rich. & Ont., 52 at 60-62¼; Toronto Railway, 270 at 105¼-106¾; Twin City, 810 at 105⅜-106⅞; Sao Paulo, 2,297 at 104⅜-105⅜; Dominion Steel, 616 at 18½-19; preferred, 5 at 49½; bonds, $49,000 at 79-80¼; Dominion Coal, 627 at 62¾-65½; Nova Scotia Steel, 989 at 66-68½; bonds, $6,000 at 107½-108.

* * *

—The Canadian market for paper is being affected by the situation in Norway and Sweden, where several large pulp mills have ceased operations on account of lack of water power. This circumstance is likely to lead to a heavy demand from British and Continental markets for Canadian pulp and paper. At a meeting of manufacturers in Ottawa, however, the other day, it was decided not to advance prices.

* * *

—There can be little doubt that the new regulations referring to the bounties for the production of crude oil in Canada have resulted in a considerable stimulation to the oil industry. Between June 8th, when the law went into force, until December 1st, the total production was 18,463,200 gallons. The falling off in the importation of mineral coal and kerosene oils for the first four months of the present year amounts to 2,569,483 gallons, while in the case of crude petroleum there is a reduction of 838,354 gallons.

* * *

—Beatty, Kerr & Verner, who have opened a new wholesale dry goods business on Wellington Street East, Toronto, are now busily engaged receiving stock. By January 1st, they expect to be in good shape to carry on business in earnest. They will make a strong feature of specialties, some of the leading ones of which will be hosiery, underwear, laces, ribbons, embroideries, handkerchiefs, lace curtains, Victoria lawns, and a complete line of notions. Both Messrs. Kerr and Verner were formerly connected with the Wyld-Darling Company, and the latter gentleman will continue his travelling in the West, under the new auspices.

* * *

—The Director of Experimental Farms, Ottawa, has received instructions from the Government to make another distribution next spring of samples of the most productive sorts of seeds for Canadian farmers. The stock is described as the very best, having been secured mainly from excellent crops reaped at the Experimental Farm at Indian Head, N.W.T. The seeds to be distributed will be oats, spring wheat, barley, Indian corn and potatoes, the weight of each varying from three pounds to five pounds. Only one sample will be sent to each farmer. Applications must be sent to the Director of Experiment Stations any time before the 1st of March.

Insurance Agents and Brokers

can add materially to their incomes by selling the Personal Accident, Health, Liability, and Steam Boiler Policies of the

MARYLAND CASUALTY CO.

Our contracts sell well, being up to date in every particular. We allow usual commissions.

—A circular from the general manager of the Grand Trunk Railway System announces that Mr. John Bell, K.C., for fifty years the trusted legal adviser of the company, has been obliged, owing to ill-health, to ask to be relieved of the active work and responsibilities incident to the position, but will remain as consulting counsel. Mr. W. H. Biggar, K.C., of Belleville, is appointed general solicitor, and Mr. M. K. Cowan, K.C., formerly of Windsor, is appointed assistant solicitor, with headquarters at Montreal. Mr. A. E. Beckett continues to act as solicitor in the province of Quebec. Mr. D. L. McCarthy, Toronto, will, as heretofore, act as agent in Toronto, of the general solicitor.

NORTH OF ENGLAND LETTER.

The Canadian Agent at Leeds is represented to have said that Canadian knitted underwear is much better, cheaper and more up-to-date than English. Also, that Canadian exporters might find a ready sale in this land for underwear, sweaters and jackets, if adequate representation were secured. One is not disposed unhesitatingly to confirm this opinion, though the Canadian article may be better than the writer is aware. If a profit is sought, the work of sellers will be hard and the way thorny. If Canadians are content to dump at prices below cost no doubt an extensive business could be done. Last year a considerable number of knitted bodices from the States were disposed of in this way. At the present, domestic manufacturers of hosiery find orders and prices alike disappointing, though a revival is hoped for in the accustomed way during next year. Canada has to reckon in the English market not with native manufactures alone, but also with the cheap goods from Chemnitz and from Switzerland. In particular are the Swiss successful in dealing with knitted mixtures of wool and silk.

When correspondents are not unanimous, it remains only for manufacturers to try, and haply one may be of service in assisting tentative experiments. Leicester is, of course, headquarters in this Kingdom for knit goods, and many of the largest manufacturers there are also large importers. It is possible, therefore, for foreign firms to do business through firms like Cooper, Corah & Sons, which maintain agencies in all distributing centres. Alternatively, one might begin with London, testing such firms as Cook, Son & Co., of which several cluster together in St. Paul's Churchyard. These firms are huge wholesale department stores and they have counterparts in Manchester in houses like Ryland's, Watts' and Phillips', and in Glasgow, with houses like Arthur & Co., Limited, or Maclaren's. A first-class commission agent in any of these centres might make sure of the ground. Fancy knit goods or highly superior ones should be shown in Nottingham or at the London addresses of Nottingham dealers. Supposing these openings to be well surveyed, one could say definitely whether or not Canadian hosiery might take a place in this market.

Let it not be thought, however, that all the difficulties would end with the adoption of the goods by wholesalers. The Dominion is somewhat distant, and in modern trade of this kind the manufacturer must be able to give rapid delivery to repeat orders. Unless buyers found that goods could be had as and when required, Canadian sources would be abandoned to give place to home and Continental supplies. It is only right to add, on the authority of one who has the best means of knowing, that wholesale buyers in England have a short and haughty way of dealing with the inferior race of creatures that lives only to sell. Agents there are in thousands but only a few are in possession of wholesalers' confidence. Great commission men in the textile centres here know their value pretty accurately, and they also demand that their nominal principals shall be able to turn out large quantities in quick time. One feels it best to warn Canadians not to commence here in serious earnest unless they are prepared to cope to the fullest with all demands. Giving advice is always a matter involving some responsibility. But the thing to do—in the humble opinion of the writer—is to seek the confidence of one of the best type of agents and to test trade feeling in a way that will lead to little expense in the event of failure, and will afford some security for incurring expenditure should encouragement be found.

Those Chamber of Commerce delegates who toured through Canada last year do not forget what they saw. Neither do they cease talking and writing of the opportunities lying fallow. Mr. R. S. Fraser, of the London Chamber, is one who has been correcting the errors of writers to the press. Enthusiasm for Canada is not confined only to these visitors. A kinsman of one's own is never quite so happy as when with mammoth maps he is expatiating in his own room on all that he saw in two months. These amateur advocates are perhaps as valuable as any that Governments can pay.

Any other disturbance in banking circles arises from the acquisition of the Midland Counties District Bank by the Birmingham District and Counties Company. As in other amalgamations, the uncalled liability on shares is much diminished. In this case the former liability for £50 is reduced to £6 uncalled, on £10 reserve liability.

Manchester, Nov. 25th. NORTH COUNTRY.

ANSWERS TO ENQUIRERS.

Subscriber, Hamilton.—The dividends are payable in April and October. Shares are not listed here or in Montreal. Would recommend you to write J. C. Mackintosh, broker, Halifax.

S. B., Winnipeg.—There are rainbow tints and rose-water all over that statement of your friend's. It must have been a Minnesota banker who informed him, for no Canadian banker would talk such rubbish. He may remember, in Hudibras:

> "Quoth she, I've heard old cunning stagers
> Say, fools for argument use wagers."

Wagers, such as he offers to make, prove nothing except the fatuity of betting against a sure thing, which even a Far West banker ought to be shrewder than do.

H. McL., Montreal.—If your letter to this office was ever posted, it has gone astray. Search your pockets; and if not found, try again.

G. A. W., Waterloo, writes: "I note per last Government return, under heading, 'Loans from Other Banks,' a loan made to one of the newer banks. Would you kindly explain what this means? I had hitherto looked upon this as a sign of weakness on the part of the borrowing bank." [If you look in the other half of the Bank Statement, under the head of "Loans to Other Banks in Canada Secured," you will find the names of the banks which lent the amount, or amounts, among liabilities, which have attracted your attention. The transaction is common enough, and for one bank to borrow from another and give security is not necessarily a sign of weakness—only, perhaps, temporary shortness of cash; for the offer of a good loan may tempt any bank to borrow from another and give security.—Ed. Mon. Times.]

* * *

MOVEMENT IN BRITISH COLUMBIA.

Vancouver merchants are congratulating themselves on the prospects for the rapid settling up of the interior of British Columbia, which means a good deal for them in a business way. As one instance of what is being done in the desired direction, Messrs. Shatford propose to develop the Ellis property, which extends north of Summerland along the shores of Lake Okanagan as far as Osoyoos Lake, and dispose of it in small holdings. The land is especially adapted for fruit-growing, and some of it for dairying. The enterprise is to be capitalized at $500,000. The Great Northern Railroad proposes to build west from Midway next summer and up the valley of the Similkameen river to Hedley, while the C.P.R. has a route surveyed which will take the line up the Okanagan river, along the west shore of the lake of same name, and via Hedley to Spence's Bridge. The construction of these roads will afford transportation facilities to districts rich in resources, the development of which should do much for Vancouver and the distributing points.

We hear from Victoria, B.C., that the syndicate of local business men who are going into the whaling industry on the west coast have procured a steamer at Christiania, Norway, specially built for such purposes, and she is now on her way to Canada. At Shushartie Bay, northern end of Vancouver Island, a refinery is being built. The whales will be caught in the open sea and towed to Shushartie Bay, which is described as a more modern system than the one hitherto pursued on the Pacific coast of cutting them up when and where taken and refining the oil on board the steamer.

British Columbia engineers are considering a project for lowering the level of Lake Okanagan, which is believed to be feasible and of not too great cost. One of the main reasons of this improvement is to relieve the town of Kelowna, which is flooded by high water every spring. The town is situated on a rather low portion of land, and the spring freshets raise the level of the lake so much that inconvenience and damage is done. To overcome this, the river between Okanagan and Dog Lakes will be dredged, and the level lowered four feet or more. This river is only five or six miles long, and if made more navigable will allow steamers to pass through to Dog Lake and give water transportation to a portion of the district which will soon be settled.

—The Ontario and Quebec Railroad Company, which is controlled by the C.P.R., is applying to the Dominion Parliament for authority to build and operate a branch line from a point on its main line west of London to some convenient point on the St. Clair river, between Sarnia and Lake St. Clair. Incorporation will also be sought for the Georgian Bay and Seaboard Railway Company to build a railway from a point on Georgian Bay, between Port Severn and Penetanguishene, south-easterly through the counties of Simcoe, Ontario, Victoria, Peterboro', Hastings, Lennox and Addington, Frontenac and Lanark, or any of them, to a point of connection with the Ontario and Quebec Railway, between Cavanville and Maberly. This is looked on as being part and parcel of the C.P.R. scheme for extensive railway development in Western Ontario, which has been already foreshadowed.

⁂

BANK OF MONTREAL.

The eighty-seventh annual general meeting of the shareholders of the Bank of Montreal was held in the board room of the institution, in the City of Montreal, at noon, on Tuesday, 5th December.

There were present: Hon. Sir George A. Drummond, K.C.M.G., vice-president; Sir William C. Macdonald, R. G. Reid, Hon. Robert Mackay, Messrs. G. F. C. Smith, George Durnford, James Skeoch, Henry Dobell, C. J. Fleet, K.C.; George Filer, Henry Morton, R. B. Angus, M. S. Foley, B. A. Boas, F. S. Lyman, K.C.; Angus W. Hooper, Percy R. Gault, Thomas Irving, J. Scott and John Morrison.

On the motion of Mr. R. G. Reid, Sir George A. Drummond, vice-president, was unanimously voted to the chair, in the absence of the president, the Right Hon. Lord Strathcona and Mount Royal.

On the motion of Mr. C. J. Fleet, K.C., seconded by Mr. Henry Dobell, it was agreed: "That the following gentlemen be appointed to act as scrutineers: Messrs. F. S. Lyman, K.C., and G. F. C. Smith, and that Mr. James Aird be secretary of the meeting."

The report of the directors to the shareholders, at their eighty-seventh annual general meeting, was then read by Mr. E. S. Clouston, general manager, as follows:

REPORT.

The directors have pleasure in presenting the report, showing the result of the bank's business for the year ended 31st October, 1904.

Balance of Profit and Loss Account, 31st Oct., 1903.		$ 373,988 06
Profits for the year ended 31st October, 1904, after deducting charges of management, and making full provision for all bad and doubtful debts..		1,609,207 95
		$1,983,196 01
Dividend 5 per cent. paid 1st June, 1904..	$700,000 00	
Dividend 5 per cent., payable 1st December, 1904	700,000 00	
		$1,400,000 00
Balance of profit and loss carried forward........		$ 583,196 01

Since the last annual meeting of the shareholders, a branch of the bank has been opened at Portage la Prairie, Man., and sub-agencies at Armstrong and Kelowna, B.C., and Papineau Ave. (Montreal), and Westmount. Sub-agencies at Hochelaga (Montreal), Enderby, B.C., and two at Winnipeg have been arranged for, and will be opened shortly.

The re-construction of the headquarters building on St. James street is now proceeding, and will be completed in a few months.

All the offices of the bank, including the head office, have been inspected during the past year.

STRATHCONA AND MOUNT ROYAL,
President.

Bank of Montreal, Head Office,
31st October, 1904.

E. S. CLOUSTON,
General Manager.

Bank of Montreal,
Montreal, 31st Oct. 1904.

THE GENERAL MANAGER.

The general manager then spoke as follows:

Referring to the statement laid before you, the principal changes, as compared with last year, are, an increase in the deposits bearing interest of $13,265,000, in the call loans of $9,143,000, in the current loans of $6,699,000, and a decrease in the balance due by our own agencies and other banks outside Canada of $4,114,000.

There is nothing that calls for any special remark in connection with these amounts, except that in the case of the loans and deposits a certain amount of the increase is of a temporary nature and will disappear shortly, but there will still be a sufficient amount to show that our business is steadily progressing. The diminution in our profits is largely accounted for by the low rate of interest ruling in the foreign markets, where we have to loan most of the money we desire to hold readily available. I saw a statement the other day, that in New York not in a quarter of a century has money ruled so low as it did a portion of this autumn.

On the whole, it may be said that the past year has been a prosperous one for Canada, though there have been special industries which did not participate. Lumber markets have been very disappointing, and the prices for dairy products unsatisfactory. Certain industrials have suffered from foreign competition, but on the other hand, some of our important industries are now reviving under more experienced and intelligent management.

The trade of the past year, both domestic and foreign, has been well maintained. Domestic trade shows a slight increase; while foreign trade, omitting specie, reached a value of $454,642,000, as compared with $450,040,000 in 1903. One feature of foreign trade may be noted. Exports of domestic products declined in value $16,000,000, while imports for consumption rose $18.776.000, making a loss in balance of trade of nearly $35,000,000 from the preceding year. In the seven-year period, 1896-1902, inclusive, the very exceptional condition existed of an excess of domestic exports over imports for consumption, the actual balance in favor of Canada in this period having been $1,428,000; but in the last two years the condition has changed, and since 1902 imports have outrun domestic exports by $55,600,000. In itself this excess may be of small concern. It has probably been much more than overcome by the introduction of capital brought by an increasing volume of immigration, by investments of foreign capital, largely from the United States, in our virgin lands, water-powers, forests, and in many other ways. Yet the fact remains that considered alone the foreign trade balance has turned against us, and to this cause the somewhat less abounding activity of domestic trade may, perhaps, be traced. In the two months of the current fiscal year, for which returns are available, July and August, domestic exports were less in volume by $4.200.000, than in the correspond-

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

ing period last year and imports for consumption show a decline of about $530,000.

Taking a broad view of Canadian commerce, the future is bright with promise. Our population is fed now by an immigration of upwards of 100,000 people annually, and the stream appears to be well turned towards Canada. Production in the North-West grows apace, the railways are prosperous, a second transcontinental line is on the eve of construction, the reports from the mining districts of British Columbia are more encouraging, a spirit of abiding confidence in Canada pervades our people; and despite temporary checks in the progress of material developments, there is increasing belief that this country has entered upon an era of great and enduring prosperity.

VICE-PRESIDENT'S REMARKS.

The vice-president, in moving the adoption of the directors' report, said:

The statements submitted by the general manager and in the directors' report, so fully place before you the position of the bank that it is unnecessary I should trespass on your patience for more than a few moments with some general remarks.

The handsome and commodious premises in which we are now assembled, and which are now close to completion, have, I am sure, met with your approval as furnishing a worthy and convenient home for the headquarters of the bank for many years to come.

The general manager has referred to one cause of diminished profits, to which may be added the fact that to earn dividends now-a-days a much larger volume of business must be done, though that is only another way of stating the great reduction in the rates for money, and in the charge for banking services which has been going on.

I may again draw your attention to the fact that in 1847, when the bank first occupied the premises on this site, its total assets amounted to $7,110,000, and this year they reach $131,160,000.

In reviewing the general condition of the country, it may be noted that the Stock Exchange, reflecting as it does the views of investors, has apparently entered on a period of revival; securities have now a higher range of value, and confidence in the lasting character of this improvement appears to be spreading.

It is evident that any marked increase in immigration, or in the production of cereals, must come from the North-West. We have there an immense territory, of which the area stated in figures conveys no adequate idea; but taking only that portion to the south of the fifty-fifth parallel of latitude which, as you know, passes through the north of England, the Government expert estimates that the portion "suitable for cultivation" in Manitoba, Assiniboia, Saskatchewan, and Alberta, that is from Manitoba to the Mountains, reaches an extent considerably exceeding the total area of the Empire of Germany, while referring to the much larger extent to the north of the fifty-fifth parallel, he says: "What proportion of these vast districts will be capable of the profitable growing of crops is as yet a matter of conjecture."

You are all aware, of course, that the isothermal lines do not necessarily coincide with the parallels of latitude, and these latter only approximately denote the climate, but the fact of the production of the finest qualities of wheat in our territory, as above defined, is established beyond question. You will be able to form some estimate of the possibilities of the future, when I add that as yet less than 4 per cent. of this land has been brought under crop. It is worthy of note, also, that the yield per acre in Manitoba and the Territories exceeds that of every one of the North-Western States of the American Union, Montana alone excepted.

Striking proofs of progress in this part of the Dominion are everywhere visible. The population of Manitoba and the Territories which in 1901 was 422,000, became, in 1904, 870,000.

The homestead entries, which in 1901 numbered 8,157, and represented 1,305,120 acres taken up for cultivation, had, in 1904, reached the number of 31,383, and covered an acreage of 5,021,291; and to this may be added land sold for settlement by companies, bringing the total up to 9,387,501 acres.

The number of immigrants, which ten years ago, in 1895, was 25,788, and for years made little progress over this figure, last year reached 130,329, and is believed during the present year to have largely exceeded that number; but statistics are not yet attainable.

While the evidences of progress are, as already said, most marked in our Western Territories, the rest of the Dominion has not been standing still. One feature is noteworthy, the number of new manufacturing enterprises springing up all over the country; some of them are essentially Canadian, others are branches of important American industries. It is impossible to give data, even approximately correct, of their extent or number, but I hold in my hand a list of over thirty in Ontario and Quebec, and may say that for three only in this city and neighborhood, sites have been secured averaging about fifty acres each.

OLDER PROVINCES.

Of trade in general, I submit the following brief summary, which, taken in conjunction with the remarks of the general manager, may be useful:

Dry Goods—A fairly good year's business, the woolen industry somewhat better, collections good.

Lumber—Not so good; the production this year will be reduced, and better prices expected.

Provisions—The export of bacon shows large increase, and considerable quantity of provisions is going to South Africa.

Live Stock—Exports show large decline, prices of cattle being very low.

Leather—Good year's business at fair prices.

Boots and Shoes—A very unsatisfactory year, consequent on labor troubles and high prices of material.

Groceries—Business reported good and fairly profitable; the farmers reported prosperous everywhere.

Dairy Produce—Cheese has been disappointing, but butter has been satisfactory; upon the whole fairly good.

The grain trade of the port shows a marked falling off.

The hay crop of this province has been exceptionally good, and exports fetched remunerative prices.

Iron and Hardware—Not so good as last year which was phenomenal.

The construction of another line of railway across the continent, about to be undertaken for the Grand Trunk Railway Company, is an event of the first importance.

TRADE OF THE PORT.

The steamship lines have suffered from various causes, the reaction due to the close of the South African war, and the keen competition in rates inaugurated by the continental lines, which largely reduced earnings. This warfare is believed to be over.

The import trade and the passenger business to this port have been up to the average in volume.

The exports of grain and timber show a reduction of one-third to one-half.

The inland craft coming to this port show a heavy decline. Ship-owners, however, look for better trade next season.

It ought to be noted that importers complain that considering higher freights and insurance and port charges in the St. Lawrence, as compared with Atlantic ports, there is little inducement to bring goods this way.

The prompt completion of the long-talked-about harbor improvements, with modern facilities for handling goods, the reform of the pilotage and improvement of lighting, are urgently called for, if the advantages due to our geographical position are to yield their due results. In this connection, a point of interest is the announcement of the construction of one or more ice-breaking steamers. About these comparatively little is known, but any experiment bearing on the prolongation of the season of navigation, if seriously entered on, will be watched with an interest commensurate with its importance to the country.

The continuance of the sanguinary struggle in the Far East is of course, a menace to the general prosperity, but as regards our own country, surveying the whole field, I can see no reason to doubt that, given normal conditions and favorable weather, we are about to enter on a prosperous year.

I beg, in accordance with custom, to move:

"That the report of the directors now read be adopted and printed for distribution among the shareholders."

The motion was seconded by Mr. R. B. Angus, and after some remarks by Mr. John Morrison, it was unanimously adopted.

Mr. B. A. Boas moved:

"That the thanks of the meeting be presented to the president, vice-president and directors for their attention to the interests of the bank."

This was seconded by Mr. George Durnford and was unanimously concurred in.

The vice-president having acknowledged the compliment, Hon. Robert Mackay moved:

"That the thanks of this meeting be given to the general manager, the assistant general manager, the inspector, the managers, and other officers of the bank, for their services during the past year."

This was seconded by Mr. R. G. Reid, and was unanimously carried, the general manager acknowledging the same.

Mr. Angus W. Hooper moved, seconded by Mr. James Skeoch:

"That the ballot now open for the election of directors, be open until 2 o'clock, unless fifteen minutes elapse without a vote being cast, when it shall be closed, and until that time, and for that purpose only, this meeting be continued."

This was unanimously concurred in.

The ballot resulted in the election of the following directors: R. B. Angus, Hon. Sir George Drummond, K.C.M.G.; Edward B. Greenshields, Sir William C. Macdonald, Hon. Robert Mackay, Alexander T. Paterson, Robert G. Reid, Jas. Ross, the Right Hon. Lord Strathcona and Mount Royal, G.C.M.G.

At a meeting of the board, held subsequently to the annual meeting of shareholders, Right Hon. Lord Strathcona was re-elected president, and Hon. Sir George Drummond, vice-president.

Factory in BRANTFORD.

ENVELOPES made in great variety.

Mercantile Summary.

Messrs. J. P. and Philip Cook and C. J. Fitzgerald, of London, Ont., have organized a company, under the name of the Cook-Fitzgerald Co., with a capitalization of $50,000. They will put up a modern three-story shoe factory, plans for which are now being prepared.

We note that a charter has been granted by the Dominion Government to La Presse Publishing Co., Limited, Montreal, with a capital stock of $1,250,000. The names of the charter members are: The Honorable Treffle Berthiaume, member of the Legislative Council of the Province of Quebec, journalist; Hermenegilde Godin, manager; Simeon Beaudin, K.C.; Louis Gideon Gratton, general superintendent, and Joseph Eugene Dupont, superintendent, all of the city of Montreal.

The Canadian International Mercantile Agency, Limited, and Sprague's Mercantile Agency of Ontario, Limited, have formed an agreement for the purpose of amalgamating and consolidating their stock, property, businesses and franchises; the corporate name of the new company to be the International Mercantile Agency of Canada, Limited, with a share capital of two hundred and fifty thousand dollars. The headquarters will be in Toronto, and among the provisional directors we note the names of Messrs. S. F. McKinnon, W. K. George, John Flett, etc., Toronto.

The negotiations between the Dominion Coal Company management and delegates from the various associations of employees are still going on. The men in general are satisfied to sign the three years' wage contract, provided conditions as to allotment of work and various other matters remain as they are at present. Modifications and proposals by the company seem in many cases very unacceptable. Prominent among such is the request that the men ask no new legislation for three years. This is regarded as a direct blow at the plans for an eight-hour day. The company agreed to modify the proposal that the coal cutters do their own timbering outside their rooms, and also their track-laying.

Mr. Joseph Wharton, of Philadelphia, reports the discovery of valuable by-products in the nickel ores at Sudbury. When visiting the Sudbury district some time ago, he became interested in a pile of refuse from the nickel smelting furnaces, and began examinations resulting in the discovery of several by-products, particularly palladium, a product more valuable than gold. He has gone into the work extensively, and has now, we hear, recovered 3,000 ounces of palladium from 300,000 tons of nickel copper ore treated. The chief physical property which makes palladium of such value is its high fusing temperature, rendering it suitable for crucibles, evaporating dishes, and so on, in the chemical laboratories, while its silvery appearance and non-corrodible property make palladium valuable to the maker of delicate instruments, such as chronometers, verniers, surgical instruments, etc.

CORRESPONDENCE INVITED.

Mercantile Summary.

The Imperial Steel and Wire Company's plant at Collingwood, Ont., is now in operation, the preliminary tests of the machinery having been found satisfactory in every way. The daily capacity of the plant is fifty tons.

Ratepayers of St. Thomas, Ont., will have an opportunity next month of voting on the question of whether they are prepared to give between $240,000 and $250,000 (the value which has been decided on by arbitration) for the gas and electric lighting plants and run them municipally.

The Grand Trunk Railway Company's large extensions to its shops at Stratford, Ont., are now almost completed. The extension to the blacksmith shop, the new wheel shop and the brass moulding shops are finished, and men are at work in them. The total staff of employees now numbers about one thousand.

The Dominion Coal Company during the season just closed made water shipments, practically all to Montreal, amounting to 1,116,191 tons of coal, as compared with 846,137 tons for 1903, or an increase for the present season of 270,054 tons. This record of about 5,580 tons moved by sea for each day of navigation is looked upon as distinctly noteworthy.

The mercantile failures of the last month in Ontario have been very few, and the business changes for the most part unimportant. At Chatham, the retail confectionery department of the Northwood Company has been sold out. In Hamilton, the retail grocery business of the late Tom Hazell is advertised for sale. The Harriston Pork Packing Company, Limited, has been sold to the Wm. Davies Co., Limited. And the Watt Brothers Company, Limited, millers, at Ridgetown, are succeeded by the Ridgetown Milling Company.

We hear that the Canadian Westinghouse Company, Limited, has sold to the Hamilton Cataract Power, Light and Traction Company, for use in the Victoria sub-station of the latter at Hamilton, Ont., two motor-generator sets, each consisting of a synchronous motor and a direct current generator. The sets will be of the two-bearing type, the generators delivering direct current at 550 volts to the railway system, and each being rated at 750 k.w. The synchronous motors will take two-phase current at 8,000 alternations and 2,400 volts, and will be rated at 1,380 h.p. The excess of capacity in the motors is provided so that they may be used for raising the power factor of the transmission system. Power is taken through lowering transformers from the high tension transmission line from the De Cew Falls station. It is also stated that the Westinghouse Electric and Manufacturing Company, through their Mexican agents, have been awarded the contract for the electrical apparatus to be installed by the El Oro Mining and Railway Company at El Oro. The price amounts to nearly $100,000.

The Toronto General Trusts Corporation.

Semi-Annual Dividend.

Notice is hereby given that a Dividend at the rate of Seven and One-Half per Cent. (7½%) per annum on the Capital Stock of this Corporation has been declared for the half-year ending 31st December, 1904, and that the same will be payable on and after

Tuesday, 3rd January, 1905.

The Transfer Books of the Corporation will be closed from the 19th to the 31st days of December, both days inclusive.

Mercantile Summary

Work on the new Dominion Government 2,000,000 bushel elevator at Port Colborne, plans of which have been prepared by Mr. Jamieson, of Montreal, will begin in earnest, it is stated, as soon as the frost is out of the ground in the spring of 1905.

Mr. C. R. Hosmer, Mr. H. S. Holt, Mr. F. W. Thompson, and other Montreal capitalists are said to have purchased the Kakabeka Falls, near Fort William, for the purpose of developing power. It is calculated that the falls, which are 125 feet high, will produce 30,000 horse-power.

The New York and Ottawa Railroad, which runs from Ottawa to Tupper Lake, N.Y., crossing the C.P.R. at Finch and the G.T.R. at Cornwall Junction, has been taken over by the New York Central Railway, the price being about $2,000,000. As a consequence, Ottawa now has direct communication with the sea over the tracks of the New York Central.

An Ottawa news item says that 20,000 tons of steel rails made for the Dominion Government in the Algoma works have been inspected, and over half of them shipped to Montreal. They are of the 80-pound class, and are to replace some 67-pound rails on the Intercolonial Railway. The rails have been inspected as to shape, strength and weight, and were found to be up to the requirements.

Four of the railroads now entering the town of Emerson, Manitoba, namely, the C.P.R., Great Northern, Canadian Northern and the Minneapolis, St. Paul and Sault Ste. Marie Railway, will construct a new international union depot on the border where the four lines intersect. Owing to the fact that two of the companies interested are American and two Canadian, the depot will be placed half on each side of the international line.

An offer of compromise, at the rate of 50 cents on the dollar, has been made by Buffett Bros., who are general dealers at North Sydney, N.S. They attribute their troubles to the general bad state of business thereabout, and to the fact that they were quarantined for several weeks owing to smallpox. They appear, however, to have been very lax in the matter of giving credits, having over $4,000 outstanding on their books, less than half of which, it is said, is uncollectible. They owe about $4,500.

A new steamer, the "Dufferin," was successfully launched on the 1st inst. from Jos. McGill's shipyard at Shelburne, N.S. She was built for the Burrill-Johnson Iron Co., of Yarmouth, and will take the place of the "Wilfrid C.", now running on the eastern shore route. Her dimensions are 120 feet long over all, 25 feet beam, and 9 feet deep, has fine passenger accommodation and large freight space. Maritime Province shipbuilding seems to be making good headway, this being the sixth vessel which has been turned out from the above-named yards since April last.

A PRESENT OF A
SUIT CASE
is a present that will last many Christmas days. It is easy and a pleasure to choose a Suit Case from our stock because we have variety, and every case is so well finished that o e is easily satisfied. ∴ We make all sizes, all colors and all qualities. ∴ Prices are from
$4.25 up to $30.00.
If you live out of town and want a catalogue of everything that is new for this year in Traveling goods and Leather Goods write at once for Catalogue M. ∴ We pay express charges in Ontario.

Mercantile Summary.

Graves & Bath, manufacturers of cider vinegar, Annapolis, N.S., have just made large extensions at their factory. The tanks now have a total capacity of 150,000 gallons.

Latest insolvencies among country traders in the Province of Quebec are noted as follows: Ed. Martin, who started storekeeping in a small way, at Laurier, less than a year ago, was previously a logger, without any business experience. He was foolish enough to become a merchant, and his assignment, now reported, is hardly a surprise.—Philippe Hebert, of St. Maurice, is another similar example. He began business as a retail storekeeper in April last, having had no previous business training, and he has already had to put his affairs into the hands of an assignee.—An offer of 35 cents on the dollar has been made by J. A. Meloche, general merchant, of St. Timothee, who was recently burned out, and who claims to have made a loss of some $7,000.—For the past twelve years Elzear Cliche, of St. Joseph de la Beauce, has been carrying on a small saw-mill, and has generally been found dilatory in the carrying out of his engagements. He has now assigned.— We learn that Azaric Deslauriers, a butcher of St. Liboire, near St. Hyacinthe, who has also carried on cheese factories at Danby and elsewhere, has got into deep water, and is gazetted insolvent.—A compromise at the rate of 85 cents on the dollar has been effected by the estate of the late J. O. Beaudry, dry goods merchant, at Three Rivers. Mr. Beaudry, who bought the insolvent stock of Gariepy & Panneton last spring, shortly afterward took sick, and recently died.—In the spring of 1902, L. G. Belzil bought out the general store business of Belavance Freres at St. Fabien. He subsequently engaged also in some lumbering operations, which are reported to have not resulted advantageously, and he has had to assign. He shows apparent assets of $4,400, as against liabilities of $5,110.—J. H. L. Guillemette, of St. Norbert, formerly a clerk, who began storekeeping on his own account in the summer of 1903, has assigned. He recently approached his creditors with an offer of 25 cents on the dollar, but the proposition did not apparently meet with much favor.—For nearly 20 years Philippe Bergeron has worked as blacksmith and storekeeper at L'Anse au Foin, on the Gulf of St. Lawrence coast, also doing a little as a logging jobber in winter for the Price Bros., and has hitherto paid his way, but now finds himself obliged to assign.—Fontaine Bros., of St. Cyrille de Wendover, in the grocery and hardware line since the summer of 1903, are reported insolvent. They were formerly clerks, one at Nicolet, and the other in Woonsocket, U.S., and they began with small capital.—An assignment has been made by Olivide Desilets, who has kept a small store for eighteen years at Ste. Helene de Chester. He has also filled the positions of postmaster, secretary of School Commissioners, municipal secretary and general parish factotum. With all these duties he could hardly have given much time to shopkeeping. At any rate, he had no right to buy goods on credit if he could not give attention to selling and paying for them.

Mercantile Summary.

W. J. Doyle's general store at Clan William, Ont., has been burned down at a loss of $10,000; insurance, $1,000.

The Imperial Land Company, Limited, Ottawa, has received a Dominion charter authorizing it to acquire, own and operate flour and saw mills, stores, hotels, etc., and buy and deal in land, etc. Among those interested are G. W. Parker, St. John, N.B., and Dr. A. R. Pennoyer, of Montreal.

Many will hear with regret of the death of Mr. John Foy, which took place in Toronto from erysipelas on Tuesday last. He was widely known in transportation circles for many years, and was manager of the Niagara Navigation Company from 1879 until the spring of last year, when he was elected president, to succeed Sir Frank Smith. He was also vice-president of the Home Savings and Loan Company, a director of the Toronto General Trusts Corporation and of the Crown Life Insurance Company. His early manhood was spent in France, and he was later resident in England in mercantile employment. Mr. Foy was an open-hearted man, with much sweetness and no hardness in his disposition. He had no enemies and many friends, and he should have lived longer.

⁂

—In a paper read before the Chicago Medical Society, a physician, Dr. William M. Harsha, declared that the reason appendicitis is so much more prevalent in the United States than in England or France is because Americans eat too fast, eat too much, eat the wrong food, or too much of the right food.

⁂

BOOKS AND PAMPHLETS RECEIVED.

Resources of British North America.—A monthly review of the developed and undeveloped wealth of Canada and Newfoundland. Board of Trade Buildings, Montreal. Ten cents a copy; $1 a year. The principal illustrations in the November issue are Ouiatchouan Falls, in the Province of Quebec (to which Province much of the issue is devoted), Shawinigan · Falls, Metabetchouan Falls, and others less known. Gaspe and Percé are illustrated, too. It is pleasant to find in these pages a tribute to Hon. John Young, in his day one of Canada's prescient men, and a good portrait of him. "Resources" is doing good work.

The Reader Magazine.—Published by the Bowen-Merrill Company, Indianapolis, Indiana. Three dollars a year, 25 cents a copy. In readableness this magazine deserves to be classed alongside the Booklover's. The book reviews and the Reader's Study are distinctly well done; many of the illustrations quite unusual; the topics pleasantly varied. An admirable bit of description

by Israel Zangwill occupies pages 59 to 61, "The King and the Beggars." This is the story of the King of Spain's annual duty of washing the feet of a dozen beggars and waiting on them at table. "The ceremony has its impressive and beautiful side, no doubt," says Zangwill, after telling how the young king did his work, "but I do not care for *editions de luxe* of humility." Another brief paper by the same author is quite remarkable, especially when we consider who writes it. He execrates the darkening of Christianity and the travesty of it committed sometimes in the name of religion. He declares that "the humanitarian turn given to Yule-tide by the genius of Dickens was at bottom a return from the caricature to the true concept. Dickens converted Christians to Christianity." And he says, on page 57, "My compliments to Christmas, in that it preserves for us the word 'merry,' which seems to have faded out of life."

The Delineator.—Monthly by the Butterick Publishing Co., New York and Toronto; $1 a year, 15 cents a copy. Apart from its value to the feminine portion of the community as a fashion book, with scores of cuts of garments, this December issue possesses real interest from its sixty pages of literary reading: Wagner and Cosima; Washington Society; stories by Robert Grant and Hopkinson Smith; colored illustrations of Tristan and Isolde, the duet of Brynhilda and Siegfried, and the Immolation, from Gotter-Dammerung.

Insurance Report, Ontario, 1903.—Printed by L. K. Cameron, King's Printer, 1904. This bulky volume of 526 pages contains a detailed report of the Inspector of Insurance and Registrar of Friendly Societies, in three divisions: A, Insurance Corporations operating under the Ottawa Insurance Act; B, Provincial Licensees; C, Friendly Societies, registered in the Province to do insurance therein. An added feature is the Appendix, containing addresses delivered in 1904 by Mr. J. Howard Hunter, M.A., KC., before the Mutual Fire Underwriters' Association and the Canadian Fraternal Association; also an unreported case, Armstrong vs. Toronto Police Benefit Fund (Street, J.), affirmed by Court of Appeal; and lastly, cautions from leading authorities that the average known as "The Expectancy," or "Expectation of Life," is not to be used for calculating premium rates or for any financial application of Mortality Tables.

* * *

—The musical critic of a rural newspaper in Kansas referred to "Ave Maria," and the editor, who abhorred abbreviations, promptly corrected it to read "Avenue Maria."—New Haven Chronicle.

A Successful Railway Roller Bearing as proven by the following:

THE HENDERSON ROLLER BEARING MANUFACTURING CO., LIMITED, HAMILTON, CANADA, 27th AUGUST, 1904.
785 King Street West, Toronto, Ont.

GENTLEMEN,—**Re Working of Bearings on Freight Car.** Your Roller Bearings have been in operation on our heaviest car since shipment of trucks to us some ten months ago, and are giving perfect satisfaction. We find on examination the condition of ths Bearings is as good as when they were installed. We have placed them on our heavy freight car so as to give them the severest test possible on our system. The length of our freight car is 58 ft., weighs about 15 tons, and carries from 15 to 18 tons of freight, running over 108 miles daily.

We find that the car coasts fully one-third farther than the other cars. We have had no hot boxes since installation, and have saved 90 per cent. of the amount of oil required by the ordinary journals, while no waste is required and no time lost replacing brasses and packing, besides avoiding the drip of oil, which is so evident in the ordinary stuffbox.

Judging from results up to date the Bearings will not require renewing for years. We expect to have all our heavy cars equipped as soon as possible.

Yours truly, (Signed) HAMILTON, GRIMSBY & BEAMSVILLE ELECTRIC RY. CO.
GEO. E. WALLER, Manager.

THE GRAND VALLEY ELECTRIC R. R. have several cars already in use, and expect to equip throughout their whole system.

THE TORONTO RAILWAY CO. are now using them, and are delighted with them. An additional order for 30 cars has been received from the Toronto Railway Company. These cars will be equipped at the rate of one per day.

In use in scores of factories in Canada from east to west. Also on Vehicles, etc.

As the present premises are overtaxed in filling orders, a site has been secured on King Street, west of Subway, where a new factory will be shortly erected.

ALL BEARINGS GUARANTEED

The Henderson Roller Bearing Manufacturing Co., Ltd
Head Office: 403 Temple Building TORONTO Factory: 785 King Street West

A small amount of stock is available at $125.00 per share with $75.00 paid in, the remainder subject to call. Inquiries regarding this stock may be made at 403 Temple Building, Toronto, Ont.

NOT GOOD ENOUGH FOR THE BANK.

A stranger came into a bank the other day and presented a cheque for which he wanted the equivalent in cash.

"Have to be identified," said the clerk.

The stranger took a bunch of letters from his pockets all addressed to the same name as that on the cheque.

The clerk shook his head.

The man thought a minute and pulled out his watch, which bore the name on its inside cover.

Clerk hardly glanced at it.

The man dug into his pockets and found one of those "If-I-should-die-to-night-please-notify-my-wife" cards, and called the clerk's attention to the description, which fitted to a T.

But the clerk was still obdurate.

"Those things don't prove anything," he said. "We've got to have the word of a man that we know."

"But, man, I've given you an identification that would convict me of murder in any court in the land."

"That's probably very true," responded the clerk, patiently, "but in matters connected with the bank we have to be more careful."—Pittsburg Index.

⁂

TORONTO MARKETS.

Toronto, Dec. 8, 1904.

Chemicals, Drugs, etc.—An active Xmas trade is being carried on. Opium is dull, but locally prices keep unchanged in spite of a decline in primary market. Quinine remains as before. Carbolic acid is firm at recent advances. Sulphate of copper has gone up in sympathy with the metal. Antimony is dearer. Camphor is also much higher. Bromides are very firm, and show a strongly advancing tendency.

Dry Goods.—The holiday trade promises good results, according to indications made by the present orders coming to hand. Cotton goods hold firm, in spite of the more bearish conditions in the raw cotton market. Woolens are still very firm. Payments have been very fair.

Flour and Grain.—But little business is being done, and prices are practically unchanged. Ninety per cent. patents are quoted at $4.25 to $4.35, in buyers' bags, east or west. Oatmeal is easy. In millfeed no change has taken place. Wheat is quiet. Barley has advanced a fraction.

Groceries.—Sugar prices are very firm still, and the movement is fairly good. Country merchants are giving good orders, and prospects for trade are bright. Dried fruits are in good request for the holidays. No change has taken place in the situation of canned goods.

Hardware.—Trade has been heavy, especially in all lines of seasonable goods. Possibly with a change in the weather towards colder conditions it would be even better. Metals have been a strong feature. Antimony has advanced 1½ to 2c. per pound. Brass is

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

very firm. Canada plates have advanced. Copper also is firmer. All metals, in fact, have this week a distinctly firmer tendency.

Hides and Skins.—Hides are firmer, and a few upward changes have been made. The leather market is not very brisk at the moment, but improvement is looked for shortly.

Live Stock.—The offerings of cattle have been light, and while, as a result, business has been very quiet; prices have kept steady. Few good butchers' cattle are coming forward for some reason, the farmers probably holding back for Xmas trade. Sheep and lambs are steady, especially the former.

Provisions.—Prices for butter range about the same as last week. For the better kinds a good demand is being experienced. Cheese remains steady. The egg market is very firm. Practically no new-laid eggs are coming forward, though they are still quoted at 22 to 23c. Poultry offerings are light, with a brisk demand. Young turkeys fetch 13 to 14c., and old 10 to 11c. Chickens are 5 to 9c., according to age. Ducks and geese fetch about 8 to 9c. In the provision trade a fair business is going on. Smoked meats are firm. The deliveries of dressed hogs are about average, and prices continue steady.

Wool.—Quotations remain the same as quoted last week, but they are purely nominal, as practically no business whatever is passing. Values in every part of the world are exceedingly strong.

Dividend Number 54.

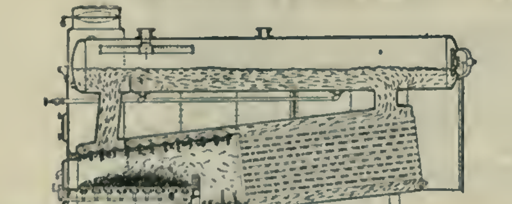
Notice is hereby given that a Dividend at the rate of Five per cent. per annum on the Paid-up Capital of the Company, for the half-year ending 31st December, 1904, has this day been declared, and that the same will be payable on the **Third Day of January next.**

The Transfer Books will be closed from the 20th to the 31st proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL,
Toronto, 10th November, 1904. Manager.

Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler the heat is transmitted directly to the water; and air cannot get into the furnace except through the regular drafts. This makes a saving of at least **Ten per cent.**

Curling Stones

KAY'S "EXCELSIOR."

SPECIAL PRICES TO CLUBS.

Shipment by SS. "Pretorian" just arrived.

The Keith & Fitzsimons Co.,
Limited.
111 King St. West, - TORONTO

City of Moose Jaw,

ASSINIBOIA.

TENDERS.

The City of Moose Jaw, a firmly established railway and agricultural centre with an exceptionally strong financial position, invites tenders for the purchase of **$160,000** Five per Cent. Fifty Year Debentures. Offers will be received up to and including December 15th, 1904. No tender necessarily accepted.

For full particulars apply to

J. D. SIMPSON,
Secretary-Treasurer.
Moose Jaw, Assiniboia.

Debentures for Sale.

TOWN OF RED DEER, N. W. T.

The town of Red Deer, N.W.T., has fifteen thousand dollars' ($15,000.00) worth of debentures for sale, covering twenty years, and bearing interest at 5 per cent. These debentures are issued for the installation of a water-works system.

Sealed tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to DECEMBER 30TH, 1904. The debentures will be sold in whole or in blocks to suit purchasers.

L. C. FULMER,
Secretary-Treasurer.
Red Deer, N.W.T.

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.

W. S. DINNICK,
Vice-President and Managing Director.

MONTREAL MARKETS.

Montreal, Dec. 7, 1904.

Ashes.—Business is almost at a standstill in this line at present, but there is little available in the way of supplies, there being less than a dozen barrels in store here, and quotations are fairly steady at $5.90 to $5.95 for first pots; seconds, about $5.40. Pearls would bring about $7.50.

Dairy Products.—As is usual after the close of navigation the market is of a very dull character, and the few transactions reported are mainly in late fall ends at from 9⅜ to 9¾c. Holders of choice Western makes are firm in their quotations of from 10¼ to 10½c. There is some scarcity of choicest creamery butter for local family trade, and 21c. is asked for such goods in small packages; under grades range down to 19c.; dairy makes, 15½ to 16c. The shipments of cheese via Portland and St. John for the past week were 47,744 boxes of cheese and 3,588 packages of butter.

Dry Goods.—City retailers do not report any great improvement in business over November, and shoppers are apparently not turning out in the numbers usually looked for with the approach of Christmas. There appears, however, to be comparatively little complaint with regard to general collections. In wholesale circles stock-taking is general, and results are hardly expected to be equal to last year.

Groceries.—In this line there is still a very fair demand for Christmas goods, and remittances are fair to good. The local sugar market is in somewhat peculiar shape. As was noted last week the St. Lawrence Sugar Refining Co. advanced prices 5c. a cental, making their figure for standard granulated $5.25. Since last writing the Canada Sugar Co. has reduced their quotation to $5.15, but the former concern steadily maintains its figure, and shows no disposition to make any concessions. The movement in teas continues of limited extent. In general lines there have been no recent noteworthy changes.

Hides.—As anticipated, there has been a further advance this week in lambskins, dealers now buying at $1.10. Hides in New York and Chicago are reported much firmer, but the strength there does not appear to be reflected in the local market, and dealers are still buying on the basis of 9c. for No. 1.

Leather.—For the season a fair movement is reported. Values are very steady, and some dealers are apparently of the opinion that prices may advance, owing to the very strong markets reported in both hides and leather in the United States. In the meantime sole is being sold on the basis of 23½ to 24c. for manufacturers' No. 2; Western splits, 20 to 21c.; Quebec ditto, 17c.; harness, 28 to 30c.; grain, 14c.; pebble and buff, 12c.

The British Mortgage Loan Co.

OF ONTARIO.

Dividend Number 53.

Notice is hereby given that a Dividend at the rate of Six per cent. per annum, on the Paid-up Capital Stock of this Company, for the half-year ending the 31st day of December, has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after

Tuesday, the 3rd Day of January next.

The Transfer Books will be closed from the 16th to the 31st December, inclusive.

By order of the Board.

WM. BUCKINGHAM,
Stratford, Dec. 5th, 1904. Manager.

JOIN THE CANADIAN PREFERENCE LEAGUE

100,000
MEMBERS WANTED

THE object of the League is to educate Canadians how best to apply the Canadian Preference sentiment. Members of the League are expected, when making purchases, to give preference to the products of Canada and to all articles of Canadian manufacture, when the quality is equal and the cost not in excess of that of similar foreign products or manufactured articles. Each member is also expected to give preference to Canadian labor and to this country's educational and financial institutions. A monthly journal will be published in the interests of the League and mailed to each member. The annual membership fee and subscription for the Journal is $1.00.

CUT THIS OUT, SIGN, AND SEND TO
The Secretary, THE CANADIAN PREFERENCE LEAGUE,
Room 20, Home Life Building, Toronto
WRITE PLAINLY

Please enroll my name as a member of the Canadian Preference League. Enclosed is $1.00, my membership fee and subscription for one year to "CANADA FIRST," the journal of The Canadian Preference League.

SCOTT & WALMSLEY,
ESTABLISHED 1858.
Managers and Underwriters.

Metals.—In general metals there is a slightly easier tone, but there is no disposition as yet to reduce the lately advanced quotations. Ingot tin is held at 32½ to 33c.; copper, 16 to 16½c. in an ordinary way; antimony, 9½c.; spelter, $6.50, and sheet zinc, 7 to 7¼c.; lead is a little lower at $5.50. Tinplates are steady at $3.65 and $3.90 for cokes and charcoals respectively of standard weights and brand; Canada plates, $2.30; ditto galvanized, $3.90 for fifty-two's; galvanized sheets, $4.15; Terne plates, $6.25; black sheets, $2.20 to $2.25; boiler plate, $2. Bars are advanced to $1.80 in small lots, and barb wire is firmer at $2.20 in car lots, and $2.30 in smaller quantities.

Oils, Paints and Glass.—The warehouses in this line now present a very quiet appearance, and little is being done in the way of shipping goods. Turpentine is again a cent easier, the figure for barrel lots being now 77c. per gallon. Linseed oil, 43c. for raw and 46c. for boiled. Fish oils are little asked for. Refined seal is quoted at 58 to 60c.; cod oil, 35 to 40c. In leads, glass, etc., there is nothing new.

Furs.—No very large lots in the way of new receipts are yet reported. We repeat quotations for prime new-caught pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark,

Accidents vs. Fires

It is said that 20,000,000 Accidents and Illnesses occur each year, but only 80,000 fires.

A business man protects his property against the loss that rarely happens—fire. He can replace his property, but he can never replace his time or his damaged arm.

The most liberal accident and sickness policies are issued by

The Employers' Liability Assurance Company,
Temple Building, - Toronto.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy holders and addition to Reserve.
$53,841.18 per day in Increase of Assets

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

PEOPLE who admire substantial growth will be delighted with the record of the Sun Life of Canada for 1904. This Company has had many great years, but the year that is closing is the greatest.

——Have you seen the leaflet " From the Blue Book "? It shows at a glance why the Company is proclaimed "Prosperous and Progressive."

CANADIAN TRADE WITH BRITAIN.

The average Canadian who thinks of doing business as an exporter to the United Kingdom would be the better of an interview with Mr. P. B. Ball, commercial agent for Canada at Birmingham, England, who is now in Canada for a brief visit. He may learn of some things to do and some things to avoid in his transactions with Old Country folk. He will be pretty sure to learn that in the opinion of Mr. Ball, the English business man is by no means the dense individual that some esteem him. The Englishman, though he may be quick to see is not quick to change his trade connections or his methods. And, secondly, he has such an enormous trade over both halves of the globe that he may be excused for not grasping greedily at any new extensions of it. This "secondly" is what many Canadians require to bear in mind, because the sales of Great Britain to Canada form but a small portion of her total export trade.

In a half hour's chat with Mr. Ball—who has now resided for two years in Great Britain in his present capacity—the writer learned enough to convince him that we in Canada have still much to learn about the English market. Take the item of wooden handles for tools—files, hammers, picks, screw-drivers, bread-knives, and scores of other products of Birmingham, Sheffield, or Wolverhampton. "There is a market for millions upon millions of wooden handles in our district," said Mr. Ball; "I know of two or three firms who are prepared to take hundreds of thousands of dozens. And yet, when the partner in a large manufacturing concern in England went to Canada prepared to make large contracts for these goods over a term of years, the Canadian makers said: 'Well, you see, we are very busy as it is, and cannot undertake more work.' Is there not enough enterprise among Canadian makers of such eminently staple goods as these, to justify an enlargement of their existing output?" An answer to this enquiry of the Birmingham agent did not present itself readily. When British people who have been accustomed to buy their handles in Norway or Sweden, and who offer Canada their trade cannot get Canadians to take it, there is nothing to be said, we venture to think, as to the unconsinly apathy of the Englishman.

Again, take such a product as apples, "I have paid," said Mr. Ball, "from thirteen shillings ($3.25) to seventeen shillings ($4.25) a barrel for good apples, such as greenings or spies, in Liverpool. They were such as worthily commanded the price, for they were beauties, properly packed and in prime condition. But I have seen Canadian apples, small, shrunken, ill-packed, offered at auction not worth a dollar a barrel, and no wonder they did not bring enough to pay charges. The freight of a barrel of the one is as great as that on a barrel of the other; there was a handsome profit on the one and a certain loss on the other. Why will not our people in Nova Scotia or Ontario remember that apples are a luxury in England—that *it will pay* to select the best fruit in the orchard, to pack it with extreme care, to make arrangements for its sale to a trustworthy people, to even wrap each apple in paper, as Mediterranean merchants wrap their oranges. When will they learn that it is not wise to consign without a knowledge of the market, and not wise to send inferior fruit, with a chance of its being sold at auction, when first-class product is so certain, so easy, of sale. I know a merchant who is prepared to take twenty-five thousand barrels of Canadian apples per week; and I feel sure that he can not only make money for himself but ensure a paying price for the exporter. The apple market will come right; gluts are caused by unwise shipping of unsuitable fruit."

The average correspondence of the commercial agency for Canada in Birmingham is 600 to 700 letters per week. And this, we understand, consists far more largely of enquiries from Britishers about Canadian trade than of Canadians about British trade. If this is the case at one commercial agency out of four in the United Kingdom, what must be the volume of enquiry in all, about Canada? The notion, which many Canadians seem to entertain, that Old Country merchants do not care for Canadian trade is negatived by the hundreds of enquiries embraced in the weekly bulletins of the Canadian office in London, and of the Canadian section of the Imperial Institute, such as we printed in the Monetary Times for several years. If we would increase satisfactorily our export trade to Great Britain it seems clear that we must make more definite and intelligent arrangements for sale of our products on the other side of the Atlantic. The commercial agents for Canada over there are ready to assist with the information and advice. Here is a list of them: P. B. MacNamara, 24 Market St., Manchester; P. B. Ball, room 40, Central House, Birmingham; W. A. McKinnon, Sun Buildings, Bristol; J. B. Jackson, Leeds. Then there is the High Commissioner's office, Victoria Street, London, and the Canadian Section of the Imperial Institute, also in London.

* * *

THE LUMBER TRADE, EAST AND WEST.

At the present season of the year there is usually very little business moving in the lumber trade, and this year is no exception to the rule. There is, however, no easing off in prices; indeed, since our last report they have been accentuating their firmness, and some think that advances of a minor character are by no means unlikely in the early spring.

The lumber and shingle trade on the Pacific Coast continues very unsettled, though a somewhat more hopeful feeling seems to prevail, according to last reports. This is probably due to the effect of the British Columbia Shingle Association's meeting, a few days ago in Vancouver, at which there was a marked tendency on the part of the mill men to rally together. Already, it is stated, some of the large shingle mills out there have refused to sell at the low prices which have prevailed lately, with the result that the market has been distinctly less glutted than it was a few weeks ago, some of them having either closed down or running half-time. Great complaints are still being made by lumbermen in the interior of British Columbia respecting the importation of sawn lumber from the United States free of duty. Great efforts are to be made at the coming session of the Dominion Parliament to have a duty imposed, and subscriptions are now being made to defray the expenses of delegates to Ottawa, who will press the views of this important industry upon the Government.

Another source of complaint to British Columbians is the manner in which the tenders for timber for British warships and for British railways are worded so as to exclude entirely the Canadian product. The forms of tender call specifically for Swedish wood, though it is admitted that that from our Pacific Coast province is just as good. The attention of the Imperial admiralty is being called to what is a very flagrant piece of red tape, if not official ignorance.

According to a circular just received from Farnworth and Jardine, Liverpool, the arrivals of wood at that port from Canada were larger than in November, 1903, but the aggregate for the year was 11,000 tons less. The circular further says:—

> There has been rather a better tone generally in the business of the past month, but little actual improvement to report. The imports have been fairly moderate, but the deliveries have again been disappointing, and stocks are ample. Values generally have been well maintained. Referring to Canadian Woods.—Of waney the import has been fairly moderate, and chiefly on contract; the demand continues quiet, the deliveries very small, and stocks are ample; values rule steady. There have been no arrivals of square pine and with little enquiry, stocks are adequate; values are unchanged. The stock of red pine is very light, but there is only a very limited demand. Oak Logs—A small parcel has arrived in Manchester—the only direct import this season—there is little enquiry, the consumption has been disappointing, and stocks are sufficient; values are steady. Elm—First-class rock continues in fair request and prices rule high; the stock is light. Ash is seldom enquired for. The arrivals of pine deals have again been on a liberal scale, but the import is now practically over for the season; the deliveries have been fair, but stocks are too heavy, and values are difficult to maintain. For red pine deals the demand continues dull and stocks are ample.
>
> In regard to New Brunswick and Nova Scotia spruce and pine deals, the arrivals have been on a par with the corresponding month last year, viz., 5,760 standards against 5,660 standards in 1903. There has been a fair consumption, values are firmer, and the latest sales show a slight advance, but stocks are too large and shippers should act with caution in consigning during the winter, if present prices are to be maintained. Pine deals are dull of sale and stocks are heavy. Of birch logs only a few have been imported. The deliveries have been fairly satisfactory, and stocks are moderate; prices are unchanged. Planks—With moderate import and more active demand values have improved; there is a fair opening for fresh arrivals. Stock is light.

The Timber Trades Journal, of London, estimating the prospects of the lumber trade for the coming year says:—

> "Already in September we pointed out that it was probable that the market for several lines of timber at any rate had reached its lowest point. We doubt if buyers now would be successful in obtaining similar goods for 1905 shipment, except at an increase on this price of 15s. to 20s. per standard on September prices [which were £7 10s. for good 7 by 9 inch from the Upper Gulf.] Much naturally depends upon the manner in which shippers begin their campaign for 1905. If they are content to commence operations at moderate prices, gradually increasing their quotations as they find buyers respond readily to their first attempts to bring about business, they may be successful in imparting to the free-on-board market the firmness which is desired on all sides. But should they open the ball at anything approaching a considerable advance on this year's autumn figures, they will, we feel assured, be responsible for a prolongation of the unsettled feeling of the free-on-board market, which has been the chief characteristic of the present year."

* * *

NEW MINERAL DISTRICT IN QUEBEC.

Judging from the report of Mr. J. Obalski, Inspector of Mines for Quebec, who has returned from the region some two hundred miles north-west of Lake St. John, around Lake Chibougamau, an important new district for mining investigation and development will shortly be added to the resources of that province. It is within a hundred miles of the probable route of the proposed government transcontinental railway. The discoveries include copper ore, magnetic iron, gold and asbestos. Some specimens of gold-bearing quartz were taken out by Mr. Obalski from a vein measuring thirty feet in width, which was traced for over two thousand feet, and where all the indications pointed to a considerable gold-bearing section. Perhaps of greater importance still was the discovery of a large belt of serpentine rock, from which were taken some fine samples of asbestos, the fibre varying from an inch to three inches in length. The province of Quebec, we believe, already produces about 80 per cent. of the world's production of asbestos, and the new discovery may easily make a valuable addition to the supply. There have also been found what are probably extensive veins of copper ore, carrying boinite, also of iron pyrites and magnetic iron. An abundance of timber exists in the district, suitable for pulp-wood, and excellent water-power.

Mr. Peter McKenzie, the head of the McKenzie Trading Company, which has already done good work in the exploration of Northeastern Quebec and the discovery of mineral areas there, will next March lead another expedition into the territory. A syndicate with a capital of $100,000 has been formed for development purposes, and one thing which is to be done soon is to open up the Indian trail from D'or to Lake Chibougamau, so as to enable prospectors, explorers and settlers to get in and out of the interior with as little difficulty as possible. This will further lead up to the development of the mineral belt covering an area of six hundred square miles.

* * *

GREAT FIRMNESS IN WOOL.

Except on the assumption of a world-wide scarcity, which to some extent is indeed the fact, it is difficult to explain the extraordinary high prices now prevailing for wool in every manufacturing country. In the local market, the prices, which have been steadily rising for some months past, were this week put on a higher basis than ever. It should be realized, however, that these prices for the Canadian product are merely of a nominal character, for it is quite a long time since any business worth noting was carried through. It is an interesting question what will prove the outcome of the present situation? The manufacturers of woolens find it extremely difficult to reap any satisfactory profit from their finished goods, when the price they have to pay for their raw material is so exorbitant. On the other hand, to advance the prices of the finished goods is very likely to restrict the consumption. Another alternative is a possible deterioration of quality in textiles, which in the end does no particular good to anybody. The root of the matter seems to be similar to that underlying a part at least of the recent exorbitant prices for cotton, namely, insufficient production. There are not enough sheep in the world to keep up with the consumption of wool in recent times; and there seems little reason to hope for much change in this respect in the near future, judging from the attitude of the farmers in this country and the United States.

From Boston comes word of a steady, though not very active demand for wool, but the tone of the market is very firm. The orders generally come in the shape of small lots from the large consumers. In the interior, that is, of the United States, some contracting is already reported for the 1905 clip.

London advices tell of increasing firmness at the sales. The coarser kinds of crossbreds are now at least 10 per cent. higher than they were three months ago. In Bradford combed crossbreds of standard medium quality are quoted at 15 1-2d. per pound, having advanced 1 1-2d. in the last six weeks. It might be imagined, that these advances, acting on the cost of finished goods would before this have resulted in such decrease of the consumption in favor of other and less expensive materials as to lessen the demand and thus the selling price of the former. So far, however, this does not appear to have happened.

EASTERN TOWNSHIPS BANK.

It was a pleasing feature of the meeting of this bank on Wednesday 7th, that there were present to express their pleasure at its continued progress, the Western director of the bank, Mr. Flumerfelt, from British Columbia, and a gentleman who was formerly a director of the bank, and is now the United States Consul General at Ottawa, namely Hon. Mr. Foster. The report, which is for twelve months ended with 15th November, showed an increased business at a satisfactory rate of profit. The net profits were $306,968 on a capital of $2,472,000, and there was also realized $22,995 premium upon balance of new stock issued. It was found possible to add $50,000 to reserve, after paying eight per cent. dividend. We are pleased to see further evidence of the prudence of the management on making further appropriations than those of November, 1903. In revaluing the assets, $40,000 was written off them, and a further sum of equal amount is written off bank premises and furniture account.

There is evidence of the bank's popularity, and also perhaps of the resolve of its authorities not to be forestalled at any desirable point, in their establishing ten new branches or agencies at points in the Eastern Townships of Quebec. This makes the number of their offices thirty-eight. The amount the bank lost by the burglary of its office at West Shefford was $7,970; this is the first instance of the kind since the bank began business forty years ago, so that there is this to be thankful for. The dimensions of the bank's business may be inferred from its total present assets, namely, $16,198,000, which is a remarkable increase from $8,298,000 five years before. The public deposits are nearly ten millions—a million and a quarter having come in during this year, and the loans are almost eleven millions. The directors were re-elected, and the president and vice-president continue to be Mr. Farwell and Mr. Wood respectively.

* * *

EMPLOYERS' INDEMNITY.

It is important that an understanding should be had by manufacturers or other employers of labor as to the nature and limitations of their contract with employers' liability insurance corporations. We heard last week of a case where a workman went to the office of such a company and wished to lay a claim for injury, saying that his employer had told him that the company "would fix him up all right." This is a mistaken view of the agreement between such companies and the employers whom they undertake to indemnify. Possibly, in the case in question, the employer was misled by a clause in No. 1 of the conditions which we find in a liability policy—it reads: "The employer shall not, except at his own cost, settle any claim or incur any expense without the consent of the corporation." And this, carelessly read, may have been interpreted to mean that the employer was to do nothing, in case of an accident, but let the insuring company do it all. We shall see, however, that the employer has, under his contract, definite duties to perform.

The policy recites that the Employer, A. B., has applied to a company for indemnity against claims for compensation for accidental personal injuries caused to employees while engaged in the Employer's work. And the company contracts to pay to the Employer A. B. all such sums for which the latter is liable to his employees by virtue of the common law, or of any statute, subject to certain limitations. But the very first of the conditions which form part of the contract says:—

> 1.—Upon the occurrence of an accident to an employee, notice thereof shall be immediately given by the Employer upon the blank provided for the purpose, to the managers of the company. On receiving from the Employer notice of any claim, the company may take upon themselves the settlement of same.

And the second condition states that if any legal proceedings be taken to enforce a claim [for injury],

> The Employer shall render the company every assistance in his power in investigating accidents and in adjusting or litigating claims.

It is thus plain that there must be concerted action by both employer and insurer where a claim for injury is to be considered. The employee, if injured, should go to his employer to look for redress. The employer on his part must communicate with the company, and between them, if necessary, the settlement of any claim by an employee may be effected. But the man or woman or child injured has no claim upon the insuring company, whose contract is with the Employer alone. And there is no obligation on the part of the Employer to discuss with the injured party his relation with any insurance company.

If the employers of labor would scrutinize the contracts which they make with liability companies, ascertaining what they have agreed to do in case of accident, and if they will promptly observe the requirements of the policy, they will not only be acting in fairness to the companies but will have the greater prospect of securing this particular class of insurance at reasonable rates.

* * *

TEETOTALERS AS INSURANTS.

On the question of the effect of moderate drinking of spirits or malt liquors upon longevity compared with total abstinence from these beverages, a weighty pronouncement has been recently made. A year ago a paper was read before the British Institute of Actuaries with elaborate tables and diagrams, the author of which was Roderick Mackenzie Moore, actuary of the United Kingdom Temperance and General Provident Institution. This paper set forth with scientific accuracy the full experience of that company—covering sixty-one years' time and 125,000 individual cases—as to "The comparative mortality, among assured lives, of abstainers and non-abstainers from alcoholic beverages."

This is the widest and most important record bearing upon the question which has ever been made, so far as we know. A period of sixty-one years, from 1841 to 1901 has been covered. All the required data, we are told, are included for each one of 124,673 individual cases—the abstainers always having been kept separate from the moderate drinkers. Many years ago, this investigation was begun by Mr. R. P. Hardy, the then actuary of the Institution, and brought down to the end of 1882. Mr. Moore, who makes the final report, has been a long time with the Temperance and General. He now brings down the facts to the end of 1901, and finds, in the great experience of the company, the following propositions conclusively proven:—

Firstly: That the non-abstainers assured in the Institution are good average lives, generally equal to the best accepted standard of assured life, namely, the Om Table.

Secondly: That the abstainers show a marked superiority to the non-abstainers throughout the entire working years of life, for every class of policy, and for both sexes, however tested.

These conclusions, and some of the statistics on which they are based, have been embodied in a small pamphlet which is issued by Chas. W. Scovel, A. M., of the Provident Savings Life Society of New York, and Geo. P. Donehoo, D.D., of the same society's total abstinence department. We learn from the pamphlet that while there were 56,802 deaths out of some 130,000 among the teetotalers there were 75,671 deaths among the moderate drinkers; showing an excess among the latter of 18,860 deaths. That makes more than 24 per cent.—an excess of one to every four.

"One is amazed to find that, in the ten years from age forty to fifty—the very prime of life—there are 6,246 deaths among the abstainers, while there are 10,861 deaths among the moderate drinkers; an excess of 4,615 deaths in that single decade."

The figures for each decade, through the working years of life (computed on the same number of lives beginning the decade in each class), are as follows:—

Ages.	Number of deaths.		Excess deaths among moderate drinkers.	
	Total Abstainers.	Moderate Drinkers.	Number.	Per cent.
20-30	4,221	4,677	456	11
30-40	4,201	7,041	2,840	68
40-50	6,246	10,861	4,615	74
50-60	13,056	18,524	5,468	42
60-70	29,078	34,568	5,490	19

* * *

"HUMBUGGING THE ENGLISHMEN."

Steadily, but slowly—for the Englishman is slow to arouse and not unnaturally averse to admitting that he has been "done"—evidence is coming forward that the game so long and so brazenly played upon British traders by the travelling agent for two Montreal weeklies, is becoming understood, and the man who has been gammoning the firms who desired to export manufactured goods to Canada, is getting to be known in his true colors. We find the following in the Birmingham Chamber of Commerce Journal for November. "Useless Advertising" is the heading:—

> "During the last nine or ten months the secretary of the Birmingham Chamber of Commerce has been approached on several occasions with regard to certain so-called trade papers in Canada, and after making enquiries has had to inform intending advertisers that the representations made to them were false. Of late unscrupulous advertising convassers from Canada have reaped a good harvest for the journals, and have mulcted many manufacturers in this district in large sums for which no return has or is ever likely to be seen. All sorts of artifices are resorted to in order to secure advertisements. Tall stories are told as to circulation, and lists of bona-fide buyers are handed to the advertisers. In most cases the circulation is imaginary, and indeed so limited as to preclude any possibility of a tithe of the outlay returning to the advertisers. We recently had occasion to examine a list of alleged to be bona-fide buyers of a certain article made in this city, and ascertained that very few of the firms named were likely to import the article referred to—the list having evidently been copied from a directory by a man who knew nothing whatever of the business. Many thousands of pounds have already been wasted in this way, but we think that so many manufacturers have learned the lesson of caution that they are not likely to provide an opportunity for its repetition.

We also find an article on the subject in the December issue of the Canadian Engineer. It begins by a reference to the series of remonstrances made during two years by the Monetary Times against the untruthful statements made in England about Canadian trade by this clever and unscrupulous man, Griffin, and tells of letters it has received from British firms complaining of his stratagems and his spread-eagle speeches. "Imagine," says the Engineer, "imagine, for instance, a coterie of leading British boot and shoe manufacturers spending hundreds of pounds in advertising British-made footwear in Canada, or furniture manufacturers pushing English-made goods of the common class, when Canadian furniture and boots and shoes are so much cheaper that thousands of dollars worth are shipped every year to the Old Country.

"These mistakes of British merchants and manufacturers are not serious in themselves, but they are important as disclosing a condition of apathy in regard to trade opportunities in Canada, and of ignorance of the trade conditions now existing in this country. Why is it that, as a rule, we do not find United States firms making the same mistakes in placing their advertisements in Canadian papers? Yet United States firms advertise ten times as much in the trade papers of Canada as British firms, and the striking fact is that in many lines they are taking a proportionate amount of the orders placed by Canadian houses. Regret it as many of our people do, it must be confessed that our United States neighbors understand Canadian temperament better than our British cousins do, and keep themselves in better touch with us, and no clearer proof of this is needed than the methods adopted by the two peoples in cultivating Canadian trade."

* * *

THE METRIC SYSTEM.

Referring to what he is pleased to call, in his letter of 7th December, published to-day, "The Metric Fallacy," Mr. Dale lays stress upon the survival of accustomed local trade measurements in certain places, and he argues from this that the metric system of weights and measures cannot become universal. But if cities and countries are to compete in a world-wide trade, they cannot well refuse to accommodate themselves to the terms and conditions that prevail in trade with many foreign countries, whatever local measurements they may also retain. The Metric System has been approved in forty-four countries of the world, and this is a stamp of appreciation which no amount of local aversion or theoretical disapproval can get over. It is significant, too, that at the last Paris Exhibition, a meeting of British and Continental woolen manufacturers approved unanimously of metric measurements as a necessity of their trade. It may be too much to say, and we think it is, that in our day and generation the Metric System will become universal. But the testimony of exporters of manufactured goods to such markets as South America and the East Indies afford is to the effect that the nation which does not use it is decidedly handicapped.

* * *

—It was a sensible as well as graceful thing that citizens of Hamilton did when they presented the city clerk, Mr. Beasley, with a gold watch and an address expressing their confidence and good-will towards the man who has spent fifty years of valuable service in the employ of the municipality. Mr. Beasley has served fifty years as city clerk in Hamilton, and for fifty years he has been secretary of the Board of Education, and he has filled both offices well. It is therefore appropriate that so long a term of service should be marked as it has been. Some moralists are accustomed to say that a man's conscience should be his sole impelling power to the discharge of civic duty. But there are times when circumstances may make a man hesitate or swerve from the path of his duty, or when higher emolument may tempt him to abandon a difficult or perhaps poorly paid municipal office. It is therefore a sensible procedure to do—what is so rarely done—something to mark the public recognition of duty well performed. This presentation is not needed to impel Mr. Beasley to do his duty, but the fact that it was made is an encouragement to other municipal officers to do theirs. Many of them, in humbler spheres of action, spend long terms of worthy service with very insufficient thanks and for very little pay.

* * *

IRON AND STEEL PROSPECTS.

Mr. George E. Drummond, of Montreal, has been making a trip of inspection to the various steel plants of the Dominion, and says that as a direct result of advancing prices in iron and steel products in the United States and the temporary diminution of competition from that quarter, the conditions of the trade in this country have improved very considerably during the last month. The demand for pig iron is quite active, and the same applies to most forms of heavy steel and iron. Prices are advancing steadily from the unprofitable basis that they have been on since the commencement of the present year. Iron ore and coke are higher in price and the whole outlook is in the direction of still higher figures for raw material and finished products in the coming year. Some authorities in the States predict that before the close of 1905 prices of iron and steel products will be as high as they were three or four years ago. Prices in Canada are sure to be firm for pig iron and finished materials as a result of the fact that stocks in consumers' yards and warehouses are exceedingly low. The large amount of construction work to be carried on in the near future in Canada also gives a very bright aspect to the prospects of the iron and steel industry.

* * *

FIRE AND MARINE INSURANCE.

At the next session of the Dominion Parliament, an application will be made, we are told, for an act incorporating the Sovereign Fire Insurance Company of Canada with power to carry on the business of fire and marine insurance in all branches.

We are informed that Mr. J. C. Norsworthy will retire from the chief inspectorship of the North British & Mercantile Insurance Co., in Canada, at the end of the present year, and that Mr. J. M. Bascon, one of the company's inspectors, will then assume control of the Western field. The cause of Mr. Norsworthy's retirement is ill-health, the result of a serious accident some time ago. His retirement is much regretted by the management of the North British & Mercantile, whose faithful servant he has been for the past fourteen years, and the company will grant him a retiring allowance in recognition of his services.

* * *

—The Rossland, B.C., Board of Trade is taking steps to petition the Dominion Government to grant a bonus on copper, similar to those on lead and other metals, which it thinks is fully warranted in view of the disadvantages which the gold-copper mining industry is at present laboring under in British Columbia.

LIFE AND ACCIDENT ASSURANCE.

The Canadian Guardian Life Insurance Company intends to apply at next session of the Dominion Parliament for authority to carry on the business of a life insurance company, with all powers incidental thereto.

We heard of a man who, some years ago, surrendered his policy in order that with the proceeds he might buy some costly luxury for his home. Later on he was stricken with illness, and when he recovered he hastened to mortgage his home to get another policy. Reminds us of Phelps' story about Bill Thompson, his dog, and the pitcher.—Insurance Age.

By the death of Mr. Hugh S. Wright, of Halifax, Nova Scotia, the North American Life has lost one of its most highly respected and successful representatives. The late Mr. Wright was in the 49th year of his age at the time of his death, having been born in Edinburgh, in 1855, the son of a physician there. He came to Canada at an early age, and settled in the Eastern Townships. He became connected with the North American Life in 1891, and was so successful that he was appointed to the district agency at Woodstock, New Brunswick. In October, 1900, he was made joint manager for that province, with Mr. C. S. Everett, the last-named gentleman having been chief inspector for some years. In the summer of 1904, the position of manager for the province of Nova Scotia became vacant, and was offered to Mr. Wright, who accepted it, removing shortly afterward to Halifax. He was successful almost from the time of entering into his new position, and apparently he worked very hard, for he soon complained of ill-health. The company promptly responded to his request for a holiday, and he went to Scotland, carrying with him the best wishes of a large circle of friends. But before the date at which he had expected to return, he died in the Old Country, a cablegram announcing his death having reached Toronto on 3rd December.

TRADE WITH GERMANY.

As a result of the German surtax, the value of articles imported from Germany between September, 1903, when the new regulations actually came into force, and September, 1904, declined to $7,000,000, as compared with $12,000,000 for the previous year. In dutiable goods alone there was a decrease from $9,972,859 to $5,394,946, or 46 per cent. To take another example of the working of the surtax, the importation from Germany for consumption in 1903 of raw beet sugar amounted to 174,000,000 pounds, worth $2,935,716, while the importation of refined sugar was 13,286,374 pounds, valued at $456,528. Since the surtax was imposed, these importations have practically ceased, the trade having been diverted to Great Britain and the British West Indies. Other lines of goods imported from Germany which have plainly shown the adverse effects of the surtax are cotton and woolen goods, brushes, combs, buttons, iron and steel manufactures and glass.

BANKING AND FINANCIAL.

La Banque Nationale has re-opened its branches at Deschaillons and Amqui, in the Province of Quebec.

The town of Preston, Ontario, has had another bank branch since Tuesday last. The Bank of Toronto opened there, its branch being under the charge of Mr. J. K. Ball.

Mr. James A. Chisholm, of Belleville, died near that city on Saturday last, at the residence of his son. He was an ex-alderman, a man much respected, and had for years represented well known insurance offices.

A change has been made in the presidency of the Sovereign Bank, which has caused further changes among the officers. Mr. Randolph Macdonald, the vice-president, was, at the board meeting on Tuesday last, elected president in the place of H. S. Holt, and A. A. Allan, director, was elected first vice-president, to succeed Mr. Macdonald. D. M. Stewart, the general manager, was elected a director, and in recognition of his services to the bank, was also appointed to the office of second vice-president. C. R. Cumberland, assistant manager, at Toronto, was appointed manager of the local branch, in place of the late Launcelot Bolster, an appointment which will please the customers of the bank who know the gentleman.

In a discussion before the Pennsylvania Bankers' Association the other day, the opinion was strongly expressed by William Powers, of Pittsburgh, that banks should advertise. He reminded his hearers that the newspaper is the messenger to the hearts and homes of the people of the United States, and, he thought, "intelligently used, newspaper advertising is just as sure to bring results as good stocks are to pay dividends." Mr. Powers contended that newspaper space, intelligently used, should be one of the greatest assets of the bank in the production of new business. In support of this view he had drawn up definite statistics to show the enormous gains, both in business and in the deposits of the banks of the country which had used advertising space freely, and compared them with others and less progressive banking institutions, many of which had lost business, probably taken from them by the banks which were heavy advertisers.

A year and a half ago the shareholders of the Canadian Bank of Commerce authorized the increase of the capital by $2,000,000. An allotment of $700,000 of this was made when the assets of the Halifax Banking Company were bought, and it is now decided to issue the balance of $1,300,000, which will bring the paid capital up to $10,000,000. The stock, which is in $50 shares, will be issued at 70, that is, 140 in comparison with the present price of the old stock on the Exchange, 164. The new issue will thus bring in a premium of $520,000. The need for an increased bank note circulation has been increasingly obvious. It was shown to be by the October statement of Canadian chartered banks, $72,716,000, highest during month, the largest in their history, against the paid-up capital of $79,747,011. Commerce circulation in October, 1903, reached $8,403,000, which was very close to the total paid-up capital of $8,700,000. The development of the west is expected to call more and more on the facilities furnished by banks for business, and it is the intention of the management to be ready for that development. The construction of the G.T.P. and extensions of the Canadian Northern will be accompanied or quickly followed by the opening of branches along these lines. The bank's November statement is a very profitable one, the net profit being larger than 1903.

A special messenger in the Chase National Bank of New York City, who was employed to safeguard the mail to and from the postoffice and also packages of value to and from the subtreasury, after nine years of service, was detected in pilfering from the mail letters containing currency in small amounts. The amount of his pilferings was somewhat less than $1,000. The proof of his guilt was so apparent that he plead guilty upon the trial. Justice Warren W. Foster, in imposing sentence, rendered a great service to the banking and business public, and as the Bankers' Magazine for December says, his language is worthy of wide publicity. The sentence follows: The Court: John L. Carter, you are a bank thief, and if there is any class in the community that must be severely dealt with, it is the bank thief. The product of all honest toil is entrusted to our banks for safe keeping, and you, who are employed in the banks and surrounded by constant temptation, must understand that the law will be enforced and punishment will follow stealing. I owe a duty to the entire community to punish you so that the thousands of bank clerks in this city may know that their stealing will surely be followed by severe punishment. You are an old man, and I am sorry for you, but you are old enough to know better, and your sixty-eight years of honest toil ought to have taught you that honesty is the best policy. I am told this offense is not the only offense; that others are coming to light. You had charge of the bank's mail, and you stole the mail. You stole a money order for $1,000. You could not get cash on that and you tore it up, and the bank may lose the $1,000. I don't know what poor people will suffer from these thefts of yours. You are not the only one deserving of mercy; the entire community is deserving of mercy, and punishment to you will be a lesson to others, and I hope have a good effect. The sentence of the court in your case is that you be imprisoned in the State prison for not more than three years and eight months, and not less than three years and seven months.

We are advised that a branch of the Union Bank of Canada was, on the 12th instant, opened at North Gower, about midway between Ottawa and Prescott. Mr. Joseph Anderson is manager.

The stock of the Lake of the Woods Milling Company has been listed on the Montreal Stock Exchange. Trading in both bonds and preferred stock has already been carried on to a considerable extent.

Another branch has been opened by the Canadian Bank of Commerce, this time in Claresholm, Alberta. This makes the 112th branch of this large Canadian institution—106 in Canada; five in the United States, and one in London, England.

* * *

DEATH OF MR. ALEXANDER MACPHERSON.

After an illness extending over several months, Mr. Alex. Macpherson passed away at his residence, 229 Stanley street, Montreal, on Sunday last. Mr. Macpherson had reached the age of 74. His native place was Lancaster, Ont., but he had been a resident of Montreal for over fifty years. Coming to the city at the age of twenty, he entered the employ of Mr. John Harry Evans, hardware merchant. Later, he and the late Mr. Wallace Benny, jr., entered into partnership, trading under the name of Benny, Macpherson & Co., in wholesale hardware. In 1868, after the death of Mr. Benny, Mr. Macpherson formed a partnership with Mr. Robert Benny which continued until 1892, when it was dissolved. Mr. Macpherson then took his son, Mr. Alexander Gordon Macpherson, into the firm, the name of the firm being Alexander Macpherson & Son. Mr. Macpherson was for many years one of the directors of the Sun Life Assurance Company. He was at one time a well known curler, being one of the earliest members of the Thistle Club, and was a member of the Royal Montreal Golf Club. A man of sterling character, universally respected by his brother merchants, the deceased was also of unusually sympathetic and amiable disposition. His list of friends was large, as the attendance at his funeral on Tuesday testified.

* * *

—The Canadian Forestry Association has received an official invitation for ten of its members to be present, as delegates, to the Congress of the American Forestry Association, which is to take place on January 2nd to 6th next. The range and importance of the subjects to be discussed may be gathered from the following papers, which are among those announced on the programme: (1) Relation of the Public Forest Lands to Irrigation Lands; (2) Relation of the Public Forest Lands to Grazing; (3) The Lumber Industry and the Forest; (4) Importance of the Forest Public Lands to Mining; (5) Forestry in Relation to Railroad Supplies; (6) National Forest Policy; (7) State Forest Policy.

* * *

—We find in one of the Toronto papers an interesting report upon conditions existing in the territory north of Lake Nipissing. The News learns from Mr. D. O'Connor, of Temagami, that great activity in all industries exists thereabout, and, he added, the mining, lumber, and agricultural resources will make the Temiskaming and Northern Railway the most profitable line in Ontario. It appears that a New York company is building a concentrator three miles from Temagami Station and a diamond drill is at work on the north-east arm iron range. Major Leckie, of Sudbury, is working a pyrites and arsenic proposition, and the cobalt silver mines of Haileybury are proving "the best in the world," said Mr. O'Connor.

* * *

—A well known railway contractor in Western Canada, Mr. A. McLeod, proposes the plan of importing several thousand men from the Mother Country, guaranteeing them two years' steady work at a stipulated rate of wages, and, at the expiration of such term, a section or half-section of land, at nominal cost. He is prepared to build 100 or 150 miles of the Grand

January Investments

E. H. GAY & CO., BANKERS MONTREAL

offer the following:

$39,900 Dominion of Canada 3 1-2 per cent. inscribed stock, due Nov. 1, 1913; denomination to suit purchaser: interest payable May 1 and Nov. 1, by cheque to holder, at 98 1-4 and interest, **Paying 3 3-4 per cent.**

$24,928.22 City of Winnipeg, Manitoba, 4s, due June 1, 1911.

$44,590.39 City of Winnipeg, Manitoba 4s, due June 1, 1914.

$132,770.05 City of Winnipeg, Manitoba 4s, due June 1, 1919,

Interest payable semi-annually June 1st and Dec. 1st, in London, (Eng.), New York, Montreal, Toronto and Winnipeg, at 100 1-2 and interest, **Paying about 4 per cent.**

$24,000 Town of Galt, Ont., trunk sewer 4s, due June 6, 1924, interest payable semi-annually June 6th and Dec. 6th, in Galt, at Merchants Bank of Canada or Treasurer's Office, at 101 and interest, **Paying about 4 per cent.**

$51,000 Town of Maisonneuve (Montreal) 4 1-4s, due Nov. 1, 1949, interest payable semi-annually, May 1st and Nov. 1st, at Montreal, at 101 and interest, **Paying about 4.25 per cent.**

$65,000 Town of Whitby, Ont., electric light and waterworks 4s, dated Nov. 2, 1903, due in 30 equal annual instalments, at 100 and interest, **Paying 4 per cent.**

$1,000 City of Hamilton, Ont., 4 per cent., due Sept. 1, 1920, interest payable semi-annually March 1st and Sept. 1st, in Hamilton, at City Treasury, at 101 and interest, **Paying about 3 7-8 per cent.**

$2,000 Town of St. Paul, (Montreal), 4s, due May 1, 1937, interest payable semi-annually May 1st and Nov. 1st, in Montreal, at Banque Provinciale, at 95 1-2 and interest, **Paying about 4.25 per cent.**

$7,000 Town of Westville, N.S., 4 1-2s, due July 1, 1915, interest payable semi-annually, Jan. 1st and July 1st, in Westville, at 102 1-4 and interest, **Paying about 4.25 per cent.**

$30,000 Town of Windsor Mills, P.Q., 4 1-2 per cent. electric light and waterworks extension debentures, due 1st of May, 1914, interest payable 1st May and 1st November, at 100 and interest, **Paying 4 per cent.**

$250.00 City of Montreal Inscribed Stock, due 1939, May and November, interest by cheque, at 95 and interest:

Full Particulars Upon Application. Correspondence Solicited.

The above offered for sale, January Delivery to suit Purchasers.
Coupons on any of the above cashed at our Office at Montreal.

Trunk Pacific line, and to undertake to colonize the section through which the line passes, on the above plan. The plan sounds well; but let us not repeat the Barr colony experience. The fact is that, far from it being desirable to settle freshly arrived Englishmen "in the lump," so to speak, it is the very worst thing that can happen to them. They should be scattered as broadcast as possible, so as to live amidst at least an atmosphere of experience.

* * *

DRY GOODS.

John P. Black & Company, Limited, Montreal, have acquired a Dominion charter empowering them to acquire the business carried on under the name of J. P. Black & Co., and to manufacture, buy, sell and deal in haberdashers' supplies, and clothing of all descriptions.

We hear from Montreal that the Merchants' Cotton Co., the Montreal Cotton Co., and the Dominion Cotton Co. have decided to work their mills full blast, probably for some time to come. It is some time since this satisfactory condition prevailed, mainly owing to the excessive cost of raw cotton. Prices, for the finished goods, however, are scarcely likely to decline.

* * *

—Mr. John Campbell, chief clerk in the office of the Montreal comptroller and auditor, has been formally appointed by the Finance Committee to the position of city accountant and transfer agent for corporation stocks and bonds, made vacant by the promotion of Mr. S. Cazavan to be assistant city comptroller.

* * *

—Here are some interesting figures showing that during November there was a continued movement of settlers into the Canadian North-West. An Ottawa despatch says that in the month of November, there were 2,654 homestead entries in our Northwestern country. This is an increase of 235 over last year. The greatest number of entries was at Regina, Assiniboia, the records being 737. At Yorkton, Edmonton and Battleford there was also a brisk business, the number of entries averaging from ten to fifteen each day.

* * *

—There has been submitted to the Toronto council this week by the City Clerk a summarized statement of the city assessment for the year 1905, as revised by the Court of Revision, and confirmed by the county judge. The total, as returned by the assessors, was $149,272,027. The Court of Revision added $23,447, and deducted $406,476, leaving the total at $148,878,998. To this the county judge added $80,000 and deducted $66,007. The revised total upon which the taxes next year are to be levied is $148,813,071. This is an increase of some seven millions over the revised assessment of the present year. At a rate of nineteen mills, the tax revenue will be swelled to the extent of $135,753.

* * *

—The community of Toronto is to be congratulated on the appointment of Mr. Stark to the position of deputy Chief of Police, in the room of Mr. Stuart, resigned. Mr. Stark has qualifications for this task which some who occupy analogous positions do not possess. In addition to a knowledge of the lower strata of society, needful for a man in his position, he has also the quality, rare in men connected with the police, the ability to understand people who may have more delicate tendencies—he has the gentlemanly instinct, in a word. His promotion is deserved by length of valuable service and because of his possessing shrewdness and a systematic method. His breadth and adaptability as a citizen have been shown in other directions; for example, he has identified himself with amateur sport. Deputy Stark is the right man in the right place.

* * *

—What are termed Section Luncheons of the Toronto Branch, Canadian Manufacturers' Association are pleasing social features of the presnt winter. Members of various sections of the larger body come together on given dates, at McConkey's, at one o'clock and take half an hour for lunch. Then they are addressed for half an hour by some person or persons who volunteer to speak on stated topics or else engage in discussion on some trade subject. The first gathering of the kind was on December 7th, when Mr. J. S. McKinnon led the members of the Dry Goods Section in a debate on Returned Goods from Retailers, a subject which has been a source of annoyance to the trade for years. The second was when members of the Leather, Paper, and Stationery section came together last Wednesday. The subject was Business Men in Municipal Politics, and the speakers were Mr. C. C. Ballantine, of Montreal; Mr. Richard Brown and Mr. James Hedley, of Toronto; Mr. A. F. Rutter, who was to have spoken, being out of town. Mr. R. J. Copeland, convener of the Section, occupied the chair. About fifty members were present. The point which Mr Hedley sought to emphasize was the duty which citizens owed to a municipality—business men, especially, for their own sakes—to exercise their franchise and to make sure that properly qualified men were brought out as candidates for councillors or aldermen.

THE METRIC FALLACY.

Editor of the Monetary Times,—

In your issue of December 2nd, 1904, a correspondent signing himself "Intercolonial," refers to an extract from the Electrical World and Engineer of New York, in which the editor of that journal states that "the Metric System sooner or later must become universal."

This prediction is often made and is apparently based on no substantial foundation. It is in conflict with the fact that in spite of the most drastic and compulsory laws for more than 100 years, no country on earth has been able to make the Metric System its single standard in the sense that the English system is the single standard for the British Empire and the United States. The weights and measures of France and the rest of Continental Europe are in a state of chaos that must be seen to be appreciated because words cannot describe it. Take for example, the textile industry, which supplies one of the three primary necessities of human life. We need go no farther than France to illustrate the metric failure in this industry, and I will let two prominent French textile manufacturers tell the story:

Paul Lamoitier, 104 Rue d'Inkerman, Roubaix, in l'Industrie Textile, Paris, October, 1902: "Ah! These Americans are not considerate of our feelings, and they are right. We are as much in the anarchy of weights and measures for the textile industry as at the time of the Revolution, for we have the denier of Montpellier and of Milan for silk, with the aune as a unit of length. We still have the diverse standards of Roubaix, Fourmies, and Reims for worsted, the moque of Sedan, the livre, the quart and the sous of Elbeuf, the yard for linen, etc."

Désiré Chedville, Saint-Pierre-lez-Elbeuf, at the Paris Metric Yarn Congress, in 1900: "We hope no new burdens will be imposed on the (woolen) industry, but if we look the facts in the face, we will find that notwithstanding the decree of 1810, and in spite of the serious efforts put forth by the industrial societies of many districts, we still have the ancient units of weight and measure, and we scarcely comprehend each other when we talk of spinning at Reims, Roubaix, Elbeuf, Sedan or Vienne, where the skeins measure 1,420, 710, 3,600, or 1,500 meters (metric equivalents of old standards)."

The attempt to introduce the Metric System into France began 114 years ago, when her industry and commerce were in a comparatively primitive condition. All the conditions were favorable to success because of the limited use of weights and measures. The attempt has failed there in spite of these favoring conditions and the forcible means adopted to make the French people use metric standards. In the face of this experience, how is it possible to change the weights and measures of English-speaking people, who now number 140,000,000, as compared with 25,000,000 in France in 1790; who inhabit or control 14,000,000 square miles of the earth's surface, as compared with 200,000 square miles covered by France in 1790; and who are the leaders in a highly developed and complicated system of industry and trade, as compared with the primitive condition in France when the Metric System was established?

If, as the Electrical World and Engineer so confidently asserts, the Metric System is to "become universal," the weights and measures of every industry must be changed. If the change cannot be made in one industry, it is impossible to make it in all, for the whole includes all of its parts.

SAMUEL S. DALE.

Boston, Mass., 7th Dec., 1904.

⁂

MORTALITY EXPERIENCE.

Sir,—In the last issue of your valued paper, I observe a mis-statement in your editorial re Commercial Travellers' Association, respecting the mortality experience of the Canada Life, as compared with all other life companies. I quote as follows:

"Of those who applied, at least one-tenth were rejected; the result being that the experience of the Canada Life shows *a more favorable rate of mortality than that enjoyed by any other life company.*"

The Canada Life is the only Canadian company that has published its mortality experience, and therefore it is impossible for any one to make any statement or comparison with the mortality experience of any other Canadian company. All the precautions exercised by that company in the selection of its risks, are part of the routine of this office, and no doubt of every other life office, and I know that bad lives are as rigidly excluded from membership in this company, as they are in the Canada Life. I think a correction of this statement should be made, as it reflects upon the medical departments of the other Canadian life companies.

Yours truly,

GEO. WEGENAST,

The Mutual Life Assurance Co. of Canada, Manager.

Waterloo, Ont., 9th December.

⁂

MUNICIPAL OWNERSHIP IN BRITAIN.

Some statistics are to hand concerning the extent and growth of the idea of municipal ownership in Great Britain. There are in that country 1,045 water plants owned by cities, boroughs or districts, as compared with 251 owned by private companies. Besides this, a very large number of the cities of any consequence are moving in the direction of public ownership. There are 256 public gas plants, against 454 privately owned ones, but the number of the former is increasing, while that of the latter is stationary or decreasing. On the capital invested, the cities have made six and a half per cent., against five and a quarter for the private companies. The cities have charged an average price of sixty-four cents a thousand feet while the private companies have charged seventy-seven. The total profit from plants was about $11,500,000. Of British street railways, 142 are municipally owned, against 154 belonging to private companies, but the former represent an outlay of nearly twenty-two million dollars, compared with eighty-five million dollars of private capital. The mileage is 1,067 municipal against 704 private. The percentage of profit on money invested is seven and three-quarters for the cities and four and three-quarters for the private companies. The net profits to the cities were eight million dollars, and to the companies four million eight hundred thousand.

With regard to electric lighting and power plants there are in Great Britain either in operation or in course of construction, 355 plants owned by the local authorities, as against 214 owned by local companies. The former have invested a hundred and fifty million dollars against a hundred and thirty million dollars for the companies. The net receipts of some of the larger towns and cities are as follows: Aberdeen, $79,000; Ashton-Under-Lyne, $17,000; Ayr, $23,000; Bath, $38,000; Bedford, $28,000; Belfast, $65,000; Birmingham, $170,000; Blackburn, $65,000; Blackpool, $61,000; Bolton, $100,000; Bradford, $186,000; Brighton, $175,000; Bristol, $135,000; Cardiff, $50,000; Croydon, $90,000; Derby, $50,000; Edinburgh, $300,000; Glasgow, $380,000; Hackney, $40,000; Halifax, $39,000; Hampstead, $110,000; Hull, $75,000; Islington, $77,000; Leeds, $200,000; Leicester, $77,000 Liverpool, $500,000; Manchester, $420,000; Nottingham, $155,000; Oldham, $60,000; Plymouth, $41,000; Portsmouth, $70,000; St. Pancras, $160,000; Salford, $130,000; Sheffield, $155,000; Southampton, $60,000; Sunderland, $64,000; Wolverhampton, $58,000. In the entire list of cities only one showed a loss and that was but slight.

⁂

THE GERMAN-AMERICAN FIRE.

Arrangements have been completed, or nearly so, we understand, by the German-American Fire Insurance Company for doing business in Canada. Agents have been appointed in the cities of Quebec, Montreal, Ottawa and Toronto; these agents to report direct to the head office of the company in New York. Mr. Charles G. Smith, the company's secretary, is now on a visit to Canada, accompanied by Mr. Edward E. Paschall, superintendent of agencies for Canada, who will reside in Montreal and will have general supervision of the Canadian business, and visit or confer with the district agents from time to time. The German-American is a strong and well-conducted company, and has, we are told, the second largest business in New York City. Its capital is a million and a half of dollars, all paid up; its assets are $12,074,306, and it has a surplus of $5,633,249. The requisite deposit has been made at Ottawa, to comply with the

OUR ST. JOHN LETTER.

Mr. David Russell, the well known promoter and friend of Hon. A. G. Blair, owns or controls the St. John Telegraph and the St. John Times. The former is a morning, the latter an evening, paper. Within the past few days a contract has been given for a large four-story addition to be built on two sides of the Telegraph building, and it is declared the Russell papers will have the finest home east of Montreal. It is also reported that a twenty-four page press, with color attachment, will be installed and other new machinery provided. The Telegraph was formerly the Liberal organ, but under Mr. Russell's direction it fought the party in the recent elections, and now, while Mr. Russell is spending thousands on his papers, the Liberal party is raising thousands to fight him, and there is announcement that a new Liberal morning paper will be started early in the New Year. There have in the past two or three years been many rumors of new papers here, but there is now little doubt that the new morning organ will come and then St. John will have three morning and three evening dailies—not a bad supply for a city of fifty thousand people.

Messrs. J. & A. McMillan, printers, binders and booksellers, were burned out about a week ago. The fire was a serious one, as it completely destroyed their building and plant, and ruined most of the stock. The insurance loss, not yet adjusted, is about $36,000. It is only seven years ago since Messrs. McMillan & Co., one of the oldest and most reliable houses in their lines in Lower Canada, suffered a similar disaster. Now they have opened temporary quarters and will rebuild at once.

The suspension is announced of S. S. de Forest, wholesale grocer, and and J. J. Barry, hardware broker. No statements have yet been made of the assets and liabilities of these traders, but it is considered likely they will be able to make arrangements to carry on their business.

The Bank of New Brunswick has declared its usual semi-annual dividend of 6 per cent. for the half-year ending December 31st, and it will be payable on January 11th. The bank is preparing to open two new agencies in the province at an early date, and there are rumors of still further extensions in the near future.

The City of St. John has decided to try and secure a new assessment law. The City Council has authorized the appointment of a commission to prepare the scheme, and a special committee of the council is now trying to find three good commissioners—not an easy task. The council has also been considering the question of civic representation. At present all the electors vote for all the councillors. The Mayor favors districts, and a two-years' term. The aldermen have decided in favor of the two years under the existing conditions, but the Legislature has yet to say.

Elections are to be held in St. John city and county on December 30th for the legislative seats vacant through the appointment of Hon. A. T. Dunn as collector of customs, and the resignation of the Hon. H. A. McKeown.

A representation of the Gasoline Engine Company, of Toronto Junction, is now touring the Maritime Provinces, and is reaping something of a harvest from the fact that he is the first in his line to visit this section. The field is a good one, both for pleasure craft and for boats for business purposes, as a good fishing community exists. In St. John a number of orders were secured.

Wm. Bruckhof, who has conducted a fancy goods and toy store in St. John for many years, acquiring considerable money, which he has invested in other enterprises, has sold out his store business, and will devote more time to his investments.

H. E. Cook, a Boston man, is here organizing a company to manufacture and sell the Century Light, which uses ordinary illuminating gas.

A party of New Brunswickers have just secured incorporation as The Elk River Lumber Company, and will engage in lumbering in British Columbia, where there are many others from this province, all meeting with good success.

Messrs. Sayre and Hally, of St. John, have just completed the erection of a new sawmill at Chipman, on Salmon river, north of Grand Lake, in this province. The mill of A. F. Bentley, at Loggieville, has been purchased by Messrs. A. and R. Loggie.

Some litigation is likely over the affairs of Stewart D. White, implement agent, etc., who "skipped out" from Shediac recently, leaving liabilities of about $15,000. All his personal property was, it was found, made over to his mother; St. John and other creditors want to have the preference annulled.

Representatives of the Governments of New Brunswick and Nova Scotia have had some conferences over the question of providing text books in their native tongue for French scholars attending the provincial schools.

The annual meeting of the New Brunswick Petroleum Company was held on Monday at Moncton. The reports presented are said to have been of a very satisfactory nature and showed that 37 producing wells were opened during the year, that a pumping plant was installed at Dover, and tanks built at St. Joseph capable of storing 8,000 barrels. Hon. H. R. Emmerson, Hon. A. D. Richard, Hon. A. R. McClelan, B. F. Pearson, N. Curry, C. S. Hickman, F. W. Sumner, Joseph Allison and F. H. Deacon, of Toronto, were elected directors. Mayor Ryan, of Moncton, M. B. Jones, and M. McDade were appointed to look after the erection of an oil refinery.

St. John, N.B., 13th December. * * *

* * *

—Representatives of the chief electric railways of Canada are to hold a meeting in Montreal on the 20th inst. for the purpose of organizing a Canadian Street Railway Association. Its avowed object is to give better protection to the men employed on the railways, and to bring about a better understanding between them and their employers throughout the Dominion. Mr. Duncan McDonald, manager of the Montreal Street Railway, is mentioned as the new organization's first president.

* * *

—The Canadian Manufacturers' Association invites communication from shippers who have experienced difficulty in transportation of their goods, owing to the recent new regulations made by the railroads regarding the mixing together of various kinds of commodities in carload lots. The Railway and Transportation Committee of the Association would also like to have a knowledge of any difficulties which may have arisen in connection with the question of demurrage or storage of freight in cars. Particulars should be sent to Mr. W. H. D. Miller, manager of the Transportation Department of the C.M.A., Toronto.

* * *

—The North-West Commercial Travelers' Association of Canada held their annual meeting in Winnipeg, on Saturday last, Mr. F. H. Agnew, the president, in the chair. Mr. John Horne was elected president, Mr. D. J. Dyson, vice-president, and Mr. Drewry, treasurer, all by acclamation. The following were elected officers for British Columbia: Vice-presidents, (Vancouver) E. H. Gerster; (Victoria) H. H. Welsh; directors for Vancouver: T. Parkinson and E. W. Hutchison; director for Victoria, F. J. Hall, Jr.; for New Westminster, J. A. Cunningham; for Kootenay, George Munn.

* * *

—An engineer's report has been sent to the United States Congress recommending that the appropriation for improving the channel of Detroit river be increased from $1,750,000 to $3,750,000, in order to provide a 21-ft. channel below the low water plane. The work now being done was planned some years ago, and was estimated to cost $1,750,000; since then it has been found that the surface of Lake Erie has been gradually dropping, and that to make the navigation of the Great Lakes satisfactory, a large percentage of bed rock will have to be dredged out. Much of this work will be in Canadian waters. Fifteen years ago, or thereabout, the ideal of lake navigators was a depth of twenty feet in all waterways and harbors of the Great Lakes. But this is not enough to accommodate the 500-foot steamers of today, and some are clamoring for twenty-five-foot channels.

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

Meetings

THE EASTERN TOWNSHIPS BANK.

The forty-sixth annual meeting of the shareholders of the Eastern Townships Bank was held in the board room of the bank at Sherbrooke at 2 o'clock on Wednesday, December 7th. There were present a good number of shareholders. The president took the chair, and the general manager acted as secretary. Mr. C. W. Cate and Mr. C. H. Mansur were appointed scrutineers of votes.

DIRECTORS' REPORT.

15th November, 1904.

The directors beg to submit the forty-sixth annual report, with usual balance sheet and statement showing results of operations for year ending fifteenth November past.

The net profit, after making provision for cost of management, interest to depositors, and current losses,—including $7,970.20 by burglary at West Shefford Branch in October last,—amounts to $306,968.57, $201,390 in 1903, or exceeding 12 per cent., adding the premium from payment of new shares, and balance of profit brought forward in November, gives a balance available of $357,611.14. From this amount the directors, in a re-valuation of the assets, have considered it expedient to take $40,000 in reduction thereof; and they have applied $40,000 in reduction of bank premises, safes and furniture account, and $65,000 on May last, and $67,000 in May, 1903. Payment of two semi-annual dividends in July last and January next, at the rate of eight per cent. per annum, were provided for and $50,000 added to reserve fund, leaving a balance of $30,217.74 to carry forward.

Business throughout the year at all the offices has been satisfactory, and the outlook for the future is very good.

During the year branches have been established at Cookshire, Lake Megantic, Lawrenceville, Masonville, Roxton Falls and Thetford Mines, also sub-agencies at Stanstead, Clarenceville, Valcourt, and Beloeil, being points in the Townships considered necessary by the management to retain the business we have been so many years in building up. This makes thirty-eight offices altogether now operated by the bank.

Deposits have increased during the year by $1,242,977, now standing at $9,821,026, and loans stand at nearly eleven million dollars. All the offices have been duly inspected during the year, as usual.

The burglary at West Shefford, while not serious in amount, is regrettable, as it is the first since the bank commenced business in 1859, and breaks the record.

In conclusion, the directors desire to record their appreciation of the zealous and faithful manner in which all the officers of the bank have performed their duties, and in recognition the directors have granted them a bonus.

Respectfully submitted,
Wm. FARWELL,
President.

GENERAL STATEMENT, 15th NOVEMBER, 1904.

Applied in reduction of bank premises and furniture	40,000 00	$327,393 40
Balance carried forward		$ 30,217 74

J. MACKINNON,
General Manager.

The president addressed the meeting and covered very fully every point in the report, closing by moving its adoption, seconded by vice-president Wood.

The general manager followed, reviewing the financial statement presented and outlining the policy of the bank.

Mr. A. C. Flumerfelt, western director, gave some statistics of the development of the western country and referred to its great possibilities.

Hon. John G. Foster, United States Consul General at Ottawa, a former director and present shareholder, referred to the pleasant associations of former days and congratulated the management on the bank's continued prosperity, as evidenced by the very satisfactory statement.

Votes of thanks were passed to the president and directors for their attention to the affairs of the bank, also to the general manager and staff for the efficient manner in which they have performed their duties during the past year.

The ballot resulted in the election of the following directors: William Farwell, Israel Wood, N. W. Thomas, Gardner Stevens, C. H. Kathan, H. B. Brown, K.C., James S. Mitchell, S. H. C. Miner, A. C. Flumerfelt, and Frank Grundy.

At a meeting of the new Board Mr. William Farwell was re-elected president, and Major Wood vice-president.

Mercantile Summary.

J. & A. McMillan's printing establishment, in St. John, N.B., was last week destroyed by fire. Loss over $30,000; covered fully by insurance.

Good ore body has been discovered in the Le Roi mine, Rossland, at the 1,450 foot level. It averages about 3 ft. of good shipping ore, but its grade varies considerably. Great efforts are being made to develop and ascertain the extent of the new body.

James Beveridge, of St. John, N.B.; G. T. Keys, of Pepperill, Mass., and others, are applying to the New Brunswick Government for the incorporation of the Miramichi Pulp and Paper Co., capital, $300,000. They have bought the Chatham pulp mill, which closed down some years ago, and will at once resume active operations.

Owing to the failure of the New Brunswick Southern Railway to obtain legislation empowering them to build a bridge over the St. Croix river, near St. Stephen, they are likely to build a new line from St. Stephen, N.B., through Milltown, Maine, and making connection at the latter place with the Washington Counties Railroad. This plan is looked upon as much simpler and easier than the first.

Surprise was mingled with regret in the minds of many people in Southwest Ontario when they read of the death of John Goldie, one of the sons of James Goldie, the miller in Guelph, and one of a family connection widely known and respected. Mr. John Goldie's death is attributed indirectly to over-exertion at a football match some years ago, since which one of his lungs has been seriously affected. He was born in Paterson, N.J., in 1852, and moved with his parents to Guelph in 1860, since which time he has been identified with that place.

No less than three concerns are seeking power to establish, construct, maintain and operate local and long-distance telephones in the Province of Manitoba. Two are applying for charters from the Provincial Government, and one from the Dominion, granting operating powers in Ontario, Manitoba, and the North-West Territories. Few particulars are given, but one is represented by Potts & Hubbard, Winnipeg, and the other by Hough, Campbell & Ferguson, of the same place. The Dominion company is represented by Hal. B. McGiverin, Ottawa.

If any business enterprise could get along with comparatively little advertising, apart from that trumpeted forth by means of flaming posters, the glory of the small boy, that enterprise should be the circus. Yet this does not appear to be the case, according to the remarks recently uttered by Barnum & Bailey's business manager. Here are his words, as reported in an American paper: "The day of flaring circus poster is about over. Its value as an advertising medium is doubtful. Hereafter newspapers will get more and dead walls less. This also means we will not have to give out anywhere near as many free tickets as we have had to in past years."

Mercantile Summary.

The telephone line just constructed by the B. C. Telephone Company, between Vancouver and Victoria, is now in operation. Its length is 100 miles of land line and 14½ miles of cable.

In Owen Sound, Ont., the price of gas, which has been supplied during the last two years, by the municipality, has been reduced from $2, less 20 per cent., to $1.50, less 10 per cent. for prompt payment.

The premises of Macdonald & Fleming, hardware merchants, Winnipeg, were on Tuesday last almost completely destroyed, the loss being over $20,000; insured.

The Northern Navigation Company's steamer, "Huronic," left Fort William for Sarnia, on Saturday last, its last trip for the season, thus closing navigation at the head of the Canadian lakes for the year 1904. She took out a record cargo, comprising 60,000 bushels of grain, 850 tons of flour, etc.

The Canadian North-West Land Company sold last month 6,100 acres of land, which realized, on the average, $6.63 per acre, or a total of $40,420. Between January 1st and November 30th, the sales aggregated 50,440 acres of land, for which the price obtained was $331,240. All of it was sold to actual settlers.

The Walkerton and Lucknow Railway Company wants power to build an extension of its authorized line from Durham easterly to a point of connection with the Toronto, Grey and Bruce Railway, between Flesherton and Dundalk, and southerly from Lucknow to Wingham; also a branch line from Teeswater northwesterly to Kincardine.

Mr. N. Thompson is interesting English capital in a scheme for erecting a steel plant on Vancouver Island, to use local ores. Mr. Thompson is the promoter and builder of the Vancouver Drydock and Shipbuilding Company, and is said to have acquired the provincial and other patent rights to one of the most modern processes of making steel. Texada ore, from which much of the raw material would doubtless be drawn, is looked upon as of extra good quality.

Several of the leading British engineering firms have joined together with a view to exploiting the Egyptian market. They include Babcock & Wilcox, Limited, Dick, Kerr & Co., Limited, Gwynnes', Limited, etc. A new company, to be termed the British Engineering Company, of Egypt, has been formed, and will act as Egyptian agent for the constituent firms. It is not improbable, says Commercial Intelligence, that additional concerns will be admitted to this new agency venture, as there are a number of lines which could be conveniently worked in conjunction with those run by the above-mentioned firms. Immense sums are about to be spent in Egypt on railways and irrigation, and even the present trade of the country is believed to be of sufficient importance to warrant such combinations. Joint representation of British or for that matter other firms, in foreign countries, is in line with many consular advices recently.

The Toronto General Trusts Corporation.

Semi-Annual Dividend.

Notice is hereby given that a Dividend at the rate of Seven and One-Half per Cent. (7½%) per annum on the Capital Stock of this Corporation has been declared for the half-year ending 31st December, 1904, and that the same will be payable on and after

Tuesday, 3rd January, 1905.

The Transfer Books of the Corporation will be closed from the 19th to the 31st days of December, both days inclusive.

By order of the Board,

J. W. LANGMUIR,
Managing Director.

Toronto, 1st December, 1904.

AGRICULTURAL SAVINGS AND LOAN COMPANY.

Dividend No. 65.

Notice is hereby given that a Dividend at the rate of Six per Cent. per annum has been declared for the current half year, upon the Capital Stock, payable on and after

3rd January next.

Transfer Books closed from 15th to the 31st instant.

Mercantile Summary

John Ferguson's block in Owen Sound, Ont., has been burned down at a total loss of $30,000. It was occupied by Torrance & Parks, groceries; McCluskey & Lindsay, coal and wood, and several other offices. The building was insured, and most of the tenants also.

Upon the demand of Wm. McLimont & Sons, Quebec, an assignment has been made by O. Lechasseur, dealer in men's furnishings, clothing, etc., at Levis, across the St. Lawrence. A second store, which he recently opened at Lauzon, is thought to have tended to his embarrassment.

The Georgian Bay and Seaboard Railway Company will apply to the Dominion Government for power to build and operate a line from between Point Severn and Penetanguishene, on Georgian Bay, to a point on the Ontario and Quebec Railway, between Cowanville and Maberly.

The York Radial Railway Company have laid a large portion of the extension of the Scarborough electric car route towards Highland Creek. Cars are expected to be running about two and one-half miles beyond the Halfway House within a few days. The company is building a large car barn just east of East Toronto. It is also considering the question of continuing the road as far as Oshawa.

Dora Mendel, who last spring bought the retail hat and fur store of A. Fred & Co., in Montreal, has somewhat unexpectedly assigned. Her husband, E. Mendel, was formerly a manufacturer of cloth caps in quite a considerable way, but failed disastrously about ten years ago. The present liabilities are said to reach the unaccountably large figures of some $22,000.

For the month of November the land sales made by the Canadian Railway Company totalled 23,392 acres, for which they realized the sum of $112,261.70, an average of about $4.80 per acre. The total land sales from January 1st to November 30th, amounted to 488,468 acres for the sum of $2,097,946. This is a much better showing than the sales at the beginning of the year would have led one to anticipate, and besides this nearly all the purchases were made by actual settlers, which means that the land will be cultivated.

Criminal proceedings have been instituted against Myer Sanft and B. Finkelstein, who began business in April last at Montreal, as the Montreal Installment Co., and who assigned last week. They are charged with fraudulent secretion of their assets, and owe about $20,000, while showing few distinguishable assets.——Another similar case is that of Rabinowitz & Gardner, of Ottawa, who started a like business only last summer, and who assigned a few days ago to W. A. Cole. They have visible assets of about $1,000, with liabilities of $6,000 or over, and creditors have apparently decided to prove both cases thoroughly. It is high time something was done to punish or to keep out of business this kind of scoundrel foreigner. Their dishonest or suspicious failures have been disgracefully numerous for several years.

A PRESENT OF A
SUIT CASE

is a present that will last many Christmas days. It is easy and a pleasure to choose a Suit Case from our stock because we have variety, and every case is so well finished that one is easily satisfied. ∴ We make all sizes, all colors and all qualities. ∴ Prices are from

$4.25 up to $30.00.

If you live out of town and want a catalogue of everything that is new for this year in Traveling goods and Leather Goods write at once for Catalogue M. ∴ We pay express charges in Ontario.

Mercantile Summary.

The Robert Simpson Company, Toronto, have decided to open a departmental store on St. Catherine Street, Montreal.

The Klondike Mines Railway Company want power from the Dominion Government to start their proposed line from Dawson and to construct a bridge across the Klondike river, near that city. They also will apply for an extension of time in which to begin and complete the railway and its various branches.

The Electrical Flour Patents Company Limited, Montreal, has been incorporated under Dominion charter, with capital of $250,000, to acquire patents and manufacture and deal in machinery and equipment connected with such patent. Among the charter members are Sir G. A. Drummond, Mr. E. S. Clouston, Mr. Charles R. Hosmer, and others, of Montreal.

The Johnson-Richardson Company, Limited, of Montreal, capital, $100,000, has received from the Dominion Government a charter empowering it to buy and deal in package dyes for domestic use, to manufacture and sell butter color and deal in all kinds of dye. A. E. Richardson, of Burlington, Vt., and C. M. Johnson, Montreal, are charter members.

The recent insolvents whose names follow are seeking compromise indulgence from their creditors: Weinstein & Co., Black Lake, Que., offer 50 cents, in two, four, six, and eight months, secured, on liabilities of about $8,000. L. G. Belzil, of St. Fabien, Que., is offering a similar figure, as also is P. Bergeron, of L'Anse au Foin, Que.

The Dominion Government has received an application for a charter for a railway line from Byng Inlet, at the mouth of French river, on Georgian Bay, to Montreal, by way of Ottawa, and another for a line from a point on the James Bay line north of Toronto to Montreal by way of Ottawa. These applications seem to be in line with the plan of Mackenzie & Mann for the completion of a transcontinental system.

Montreal failures of minor importance are chronicled as follows: E. Senecal, druggist, doing business in his wife's name, owing to a former failure in 1896, has assigned. He is said to owe about $6,000, while showing assets of only $2,000.——A. R. Wightman, doing business as the Wightman Sporting Goods Co., has also assigned. He was before unsuccessful in 1894.——The insolvency is announced of H. Rainville, tobacconist, who began in 1901. He has been running two stores, too much of a strain for his small capital. He probably got credit too easily.——D. Legault, formerly a carter, who began keeping a grocery store last spring, has already assigned.——C. Scanlan, a contracting plumber in a small way, is reported an absentee, and his estate has been put into insolvency with little prospect of general creditors getting anything.——Louis Therien, formerly a Canadian Pacific Railway employee, who began last spring dealing in furniture, is making an offer to his creditors of 75 cents on the dollar.

Mercantile Summary.

Joseph Bertrand. a carriage-maker in a small way for the past nine years at Rockland, Ont., has assigned.

The American Cereal Company has closed down its mills, at Peterboro, on account of the recent advance in freight rates, which are a material consideration to a concern which does such a large export business.

It is now evident that C. McGinn, of Moncton, N.B., who began as a haberdasher in the spring of 1903, was not cut out for business, for he now shows assets of about $2,000, to pay liabilities of $5,105. He makes an offer of 45 cents on the dollar.

King's Asbestos Mines is the name of a company which has obtained from the Quebec Government letters of incorporation entitling it to carry on mining and lumbering in all branches and operate mills, waterworks, steamboats, etc. H. M. Whitney, of Boston, Mass.; E. Slade, of Quebec City, and B. Bennett, of Thetford Mines, Que., are interested.

The Provincial Secretary for Ontario is negotiating for the sale of the broom-making machinery at the Central Prison, owned by the Province. It is modern and complete, and a good price is expected to be realized. The contract for the manufacture of brooms at the prison expires on June 1st, and, in accordance with the promises made by the Government some time ago to representatives of organized labor bodies, who objected to these goods coming into competition with free labor, it will not be renewed.

⁂

A PARADOX IN COTTON.

Measured in dollars, the 12,000,000 bales of the 1904 cotton crop are worth less than 10,000,000 bales of the 1903 crop. The difference in total value is enormous. A pound of raw cotton, which last February sold for 17 cents, is worth only 8 cents now.

Cotton is selling at $40 a bale now, as compared with $70 to $75 a year ago. At that rate the total value of the 1904 crop will be less than $500,000,000, while the 1903 crop sold for over $700,000,000.

It is paradoxical that as one result of the increased industry of the Southern planters they receive $200,000,000 less. If they had planted less, cultivated less, and allowed the boll weevil to flourish they would have been better off. The immediate effect will be to discourage Southern enterprise and to diminish the value in international exchange of the United States principal article of export. The consumers of the world will be the beneficiaries.—New York World.

⁂

THE DUMMY DIRECTOR.

If the State Supreme Court decision requiring five directors of the American Malting Co. to refund more than a million dollars of dividends illegally declared is to become a precedent, a new use will have been found for dummy directors. The

IS IT SUFFICIENT ?

Very few people realize how much life insurance is necessary to take the place of the income they are at present earning. Take a man who is earning $1500 a year. Let us suppose that $500 goes for personal expenses and $1000 for the keeping of his wife and family, $1000 is the interest at 5 per cent. on $20,000. It is safe to say that no man earning $1500 a year carries $20,000 of life insurance. Every man should, however, strive to leave his family in as good a position after his death as they are before.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

state statute forbids the granting of dividends except "from the surplus profits arising from the business," and holds liable, individually and severally, all directors who distribute moneys from any other source than net profits. It excepts, however, directors who register a protest against such an illegal division or are absent from the meeting. From now on it should be difficult to get a quorum at directors' meetings where the business in hand is voting away capital as dividends. In fact, the more questionable companes may be forced to maintain a dormant quorum of under-clerks to vote unearned dividends, while the Messrs. Moneybags of the directorate remain in discreet and inexpensive aloofness. More seriously, this searching decision reinforces Judge Parker's view that we have only begun to realize the safeguards that the common law provides against rotten finance. Very much of the so-called trust problem is merely a financial problem. The danger from the great corporations is less from their bigness than from their bait of operating under a blanket, thus fooling both the credulous investor and the naive purchaser of their wares. It is unlikely that the appellate division will reverse the finding. Evidently a very potent weapon lies at hand for all who have suffered from rash and lawless handling of corporate funds. The directors of the American Malting Company are by no means the only ones who have mixed up principal and profits.

* * *

A BANK CLERKS' TEST.

In the great money counting and cheque adding contest of the Chicago bank clerks, the tests were the most difficult that could be devised. The bank loaned the clerks $60,000 in currency for the occasion. To each of the ten contestants was given twelve packages of bills, each containing $500 in mixed denominations. The contestants were required to break the straps in the packages, prove the amounts, sort the currency, restrap and prove it again. The cheque adders had a seemingly easier, but what in reality was an equally difficult, task. They were compelled to read and add on an adding machine 500 cheques, written in as many different styles of hand-writing. The marvellous speed to which long-continued practice brings these clerks is shown by the records they made in the contest. One clerk, complying with all the requirements, counted $6,000 in 21 minutes 6 4-5 seconds. One cheque adder read and listed on the adding machine 500 cheques in 11 minutes 39 4-5 seconds. This is very speedy work, the speediest ever done anywhere, we are told.—Boston Herald.

MANAGER WANTED.

Applications will be received for the position of Manager for the Province of Nova Scotia for the **NORTH AMERICAN LIFE ASSURANCE COMPANY**, rendered vacant by the death of Mr. H. S. Wright.

This affords a splendid opportunity for a gentleman having the necessary qualifications for managing and extending the business of this most desirable Agency.

Communications will be considered as strictly confidential.

Address, Mr. T. G. McCONKEY,
Superintendent of Agencies, Toronto.

NIGHT AND DAY BANK.

The New Herald says that, impressed by the need of an institution where money may be obtained at any hour, prominent New York financiers and commercial men have organized the first night and day bank and safe deposit company. The names of men prominent in the business and social world appear in the Organization Committee, and the capital stock of $250,000 already has been subscribed.

The plight in which many travellers of wealth often find themselves because they are unable to draw cash in cases of emergency suggested the organization of the bank. Troubles experienced by a well-known man who recently required $2,200 before 11.30 p.m., started the work of organization. The man in question had $27,000 deposited in one down-town bank, but only succeeded in raising the

sum he needed by the assistance of cashiers in two large up-town hotels.

* * *

TORONTO MARKETS.

Toronto, December 15th, 1904.

Chemicals, Drugs, Etc.—The local drug market is rather on the dull side at present writing. A feature of interest is camphor, which occupies a very strong position, owing to scarcity. Nux vomica, chamomile, carbonate of bismuth, sulphate of copper are also very firm, as are a large number of the vegetable drugs. Menthol and saffron, on the other hand, are rather easier. Opium is about the same as reported last week. In quinine, there is but little change, though the market is in a somewhat more settled condition owing to the London auction sales having been now held, though they did not develop any strong demand.

Dry Goods.—A good trade in general dry goods is going on, and the demand for holiday goods was seldom or never better. The call is mainly for articles of a reasonably good quality. All staple goods are held firmly. There is a very satisfactory trade going on in dress goods of all kinds.

Flour and Grain.—Little or no export demand is coming in and business is dull. Ninety per cent. patents in buyers' bags, east or west freights, realize $4.25 to $4.40. Millfeed is dull and oatmeal still rather easy. Ontario wheat is 4 to 5c. lower since our last quotations; rye, 1 to 2c. lower; buckwheat, 3 to 4c. lower, with other grains unchanged. The market is dull with respect to all kinds of grains.

Groceries.—The sugar market continues unsettled, but prices are still very firm, though a certain degree of easiness has developed owing to the large crop in Cuba, which is apt to affect the American market. General trade of a sorting character is of a satisfactory character, though there is no special feature of any very striking character to record.

Hardware.—In all lines of seasonable goods, the volume of trade is very satisfactory. Orders for such articles as guns, ammunition, skates, etc., are being received by wholesale houses in large quantities. In the metal branch the activity is very marked. In pig iron, buying seems to be somewhat spasmodic, but the aggregate volume is quite large. Wire rods are in very keen demand and the factories are hard pressed to make deliveries on time. In the United States, an advance took place the other day.

Live Stock.—Owing, perhaps, to the fact that farmers have been keeping back their finer animals for the Christmas trade, the offerings at the Toronto markets this week were better grade than for some time past. Trade naturally picked up in consequence. Many butchers' cattle sold as high as $5 per cwt. For exporters the demand was not over-brisk. Sheep and lambs also were quite firm, with light receipts. In stockers and feeders and other lines, trade continues light.

Hides and Leather.—Trading in hides is steady at recent advances. Sheepskins have gone up to $1 and $1.25. Calfskins

CIGARETTES

STANDARD OF THE WORLD

SOLD BY ALL LEADING WHOLESALE HOUSES.

are steady. Deerskins are scarce. In leather, as is usual at this particular season of the year, not very much trade is passing, but conditions will no doubt improve after the holidays are over.

Provisions.—Creamery butter is firm and has gone up about a cent owing to light offerings. Receipts of other lines are fairly steady. Cheese is steady and in good demand. Eggs are very firm and practically no new-laid exist on the market. Choice poultry is not coming forward very plentifully, and is wanted. The dressed meat trade is good.

Wool.—Prices have made a further small advance though they are merely nominal as no actual business of any moment is passing.

⁂

MONTREAL MARKETS.

Montreal, 14th Dec., 1904.

Ashes.—Though there is next to nothing doing, values hold pretty steady, and for first quality of pots dealers are still disposed to pay $5.90 to $5.95, and for seconds from $5.40 to $5.45. Pearls are quoted nominally from $7.50 to $8 per cental.

Cements and Firebricks.—With the removal of all stocks from the wharves into winter storage, the usual advance in prices has taken effect, and we quote Belgian cement at $1.85 to $2.05; English, ditto, $2 to $2.20; American, $1.90 to $2.15. Firebricks are quoted at $18 to $23. There is very little doing at the moment.

Dairy Products.—There has been some cable enquiry for cheese, from Britain, which has resulted in a revival of interest and a rather firmer market, it being doubtful if finest Westerns could be got under 10⅜ to 10½c., with about 10¼c. the figure for fine Easterns. A firm feeling prevails in butter, 21c. being quoted for fine creamery in small packages, undergrades range down to 20c.; dairy, 16 to 17c. per pound.

Dry Goods.—But little really new or strange can be reported in this line. Travellers are getting home for the holi-

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. C. C. DINNICK, Managing Director.

The British Canadian Loan & Investment Company, (Limited.)

Dividend Number 54.

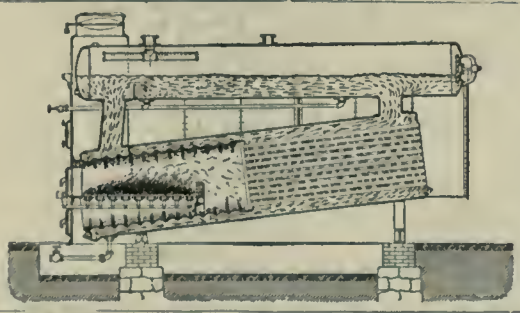
Notice is hereby given that a Dividend at the rate of Five per cent. per annum on the Paid-up Capital of the Company, for the half-year ending 31st December, 1904, has this day been declared, and that the same will be payable on the **Third Day of January next.**

The Transfer Books will be closed from the 20th to the 31st proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL,
Toronto, 10th November, 1904. Manager.

Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel, because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler the heat is transmitted directly to the water; and air cannot get into the furnace except through the regular drafts. This makes a saving of at least **Ten per cent.**

The British Mortgage Loan Co.
OF ONTARIO.

Dividend Number 53.

Notice is hereby given that a Dividend at the rate of Six per cent. per annum, on the Paid-up Capital Stock of this Company, for the half-year ending the 31st day of December, has this day been declared, and that the same is payable at the office of the Company, in the City of Stratford, on and after

Tuesday, the 3rd Day of January next.

The Transfer Books will be closed from the 16th to the 31st December, inclusive.

By order of the Board.

WM. BUCKINGHAM,
Stratford, Dec. 5th, 1904. Manager.

Debentures for Sale.

TOWN OF RED DEER, N. W. T.

The town of Red Deer, N.W.T., has fifteen thousand dollars' ($15,000.00) worth of debentures for sale, covering twenty years, and bearing interest at 5 per cent. These debentures are issued for the installation of a water-works system.

Sealed tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to DECEMBER 30TH, 1904. The debentures will be sold in whole or in blocks to suit purchasers.

L. C. FULMER,
Secretary-Treasurer.
Red Deer, N.W.T.

The Standard Loan Company.

Take Notice that a Special General Meeting of the Shareholders of The Standard Loan Company will be held at the Head Office of the Company, Number 24 Adelaide Street East, in the City of Toronto, on Monday, the 19th day of December, 1904, at the hour of two o'clock in the afternoon, for the purpose of taking into consideration and, if approved, of ratifying and accepting an agreement provisionally entered into by the Directors of the Standard Loan Company and the Directors of the Huron and Bruce Loan and Investment Company, for the purchase by the Standard Loan Company of the assets of The Huron and Bruce Loan and Investment Company, upon the terms and conditions prescribed in the said agreement.

And take notice that the said agreement may be inspected by any Shareholder at the Head Office of the Company.

Dated this 9th day of November, 1904.

W. S. DINNICK,
Vice-President and Managing Director.

days, and stock-taking and balancing are the all-absorbing occupations of the moment. There is hardly a sufficiency of snow to make good roads yet, but trade in the country is apparently very fair, and general remittances may be called satisfactory. Complaints continue to be heard regarding city retail trade; it is slack.

Furs.—While offerings of raw furs are rather more numerous, no large supplies are yet coming forward, good snow roads being as yet lacking in the interior. We quote as follows, for prime skins: Black bear, large, $12; medium, $8; small, $5 badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4, pale, $3, red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall, 10 to 15c. for prime winter; otter, $8 to $12, fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50, short stripe, $1.10; long stripe, 60c.; broad stripe, 20c.

Groceries.—The main volume of fall trade is pretty well over, but there is a fair sorting movement in dried fruits and general Christmas supplies, and collections as a whole are fair to good. The peculiar disparity in sugar quotations, noted last week, continues; the Canada Sugar Refining Co. having advanced its quotations since last writing, and standard granulated is now quoted at $5.35, in barrls, by both companies, while bags are only 5 cents less the cental, instead of 10c., as heretofore. Dried fruits are all steady in price, and canned goods very firm, $1.25 being asked for standard brands of tomatoes in an ordinary jobbing way, and $1.15 to $1.20 for corn. There appears to be very little molasses now in first hands, and jobbing quotations are firm at 28 to 29c. for Barbados. In teas the demand continues surprisingly light, and the market is almost featureless.

Hides.—The advance in lambskins is firmly held, $1.10 being the general figure now paid by dealers. As yet no calfskins are reported coming in. Hides are unchanged, dealers buying No. 1 at 9c. per lb., and quoting a half cent advance to tanners.

Metals and Hardware.—With the close approach of the holiday season, there is naturally a slackening in the demand, but for the time of year, the movement is called a fair one. In pig iron there is very little doing, but quotations are steady at about $20 ex-store for No. 1 Summerlee, with best domestic brands held at $19. Bars are quoted at $1.75 to $1.80; iron pipe, $4.12 for inch. The English market for Canada plates is again stronger, cabled quotations being now £8 for spring importation, but local quotations are unaltered at $2.30 in a jobbing way for 52 sheets; galvanized, ditto, $3.90 to $4; Ternes are a little firmer at $6.25 to $6.50. In galvanized sheets, tinplates, etc., there is no change. The copper market is slightly easier, but 16 to 16¼c. is still asked for jobbing lots; lead, $3.60; antimony is very stiff in price at 9½ to 10c.; spelter, $6.50 to $6.75.

Oils, Paints and Glass.—Some houses are still making fair shipments to the far West and British Columbia, but travellers are all coming home, and will be occupied getting ready during the next few weeks for the spring campaign. The only change noted in values is the recovery of a cent on turpentine, which is now quoted at 78c. per gallon by the single barrel.

⁂

UNPROFITABLE MERCANTILE RISKS.

President Evans, of the Continental Fire, in a circular to his agents, has given the results of a recent analysis of about 320 separate classes of mercantile risks. He says:

Our figures demonstrate conclusively that unprotected business is inadequately rated, and that, as between the different classes of stocks, proper consideration has not been given by the rating organizations to the inflammability and susceptibility of certain stocks as compared with others. It is along these lines that the mercantile classes differ one from the other. The specially unprofitable classes, upon which our figures are in sufficient volume to show positively that the rates are inadequate as to contents, are as follows:

Cloaks (with or without Mfg.).
Clothing, Manufacturing.
Clothing, Wholesale.
Crockery.
Country Stores, without dwelling, in Villages (Unprotected).
Department Stores.
Dry Goods, Retail.
Feed Stores.
Frame Rows (Unprotected).
Glassware and Window Glass.
Groceries, Wholesale.
Hats, Retail and Wholesale.
Laces, Embroideries, etc.
Millinery.
Musical Instruments, Pianos, etc.
Notions.
Paper.
Photographers.
Paints and Oils.
Picture Stores.
Roofing Materials.
Seeds.
Stoves, Hollow-ware and Castings.
Toys.
Varnish.
Wall Paper.

Special attention should be given to unprotected frame rows and to country stores, without dwelling, in villages (unprotected). These represent a large volume of business at present on our books and we are somewhat surprised at the very unprofitable results which are shown. It is evident that risks of these two classes need serious attention, both in the way of increasing rates and in weeding out the undesirable business.

WESTERN CANADIAN TRADE WITH MEXICO.

Mr. Lucien J. Jerome, British consul in Mexico City, writes some interesting memoranda for the use of British Columbian and Western Canadian manufacturers intending to trade with the Pacific coast points of Mexico. Owing to a high range, or rather successive ranges of mountains, he explains, there is as yet no practicable means of transporting merchandise from these ports into the exterior, except by mules, at excessive cost. There are no roads, and the mule trails are for the most part quite impassable during the rainy season from May to October.

The most important Mexican town on the Pacific coast is Mazatlan, with a population of 17,582; next comes Guaymas, which, having rail communication with some interior points, is a more or less important distributing point. The State of Sonora, in which it is situated, is a great mining region. There is a railway from Altata to Culiacan in the State of Sinaloa, and another is being constructed from Topolobampo to Chihuahua via el Fuerte. San Blas has to-day no trade, which has been diverted to Manzanillo, where important harbor works are being built. A line of railway connects Manzanillo with the town of Colima. It will be some years before Colima will be connected with Tuxpan, the

present terminus of the Mexican Central Railway, and making one of the richest districts of this country available to Canadian trade. There is no immediate prospect of Acapulco being connected with the interior by railway. This place, once a famous port, the emporium of the trade of the Philippines and the far East, and Spain via Mexico City and Vera Cruz. This has now dwindled down to nothing, the trails over the mountains are out of repair and there is scarcely any hinterland. Puerto Angel, in Oaxaca, is five days' ride from Ejutla, and offers hardly any opportunity at present, but the hinterland is rich in agriculture and mining. Salina Cruz, the terminus of the Transcontinental Railway, the Tehuantepec National Railway, the Atlantic Terminus, Coatzacoalcos is some 193 miles from Salina Cruz. At both these places large harbors are being built. A line from Santa Lucrecia on this line runs to Vera Cruz.

UNITED STATES FINANCES.

Henry Clews & Co., New York, in their weekly circular, under date December 10th, said: Like "a bolt from the blue" the crash in Wall Street came when least expected and when all seemed serene. The truth is, the market was ripe for a break. For weeks and months stocks continued to rise without interruption until speculation, overstimulated by increasingly favorable outside conditions, carried the market up to the point of collapse. Sentiment everywhere was so overwhelmingly bullish that weak spots were ignored and a situation created where only a shock of some sort was needed to force wholesale liquidation. This shock came in the form of an attack upon Amalgamated Copper, which promptly exposed the weakened condition of the whole market. Stocks, it was then seen, had passed from strong into weak hands. The big men who bought freely at the low prices of 1903 had disposed very largely of their holdings, and when the crash came there was little or no support from this quarter. Liquidation of over-bought accounts became imperative, and prices were so high that no substantial buyers could be found except at such heavy declines as exhausted weak margins and frightened timid holders out of their senses. The decline was, of course, accompanied by the usual supply of unsettling rumors and intensified by the trading element, who always push a movement in either direction to the utmost. One thing is clear; the financial atmosphere has been much clarified by this unwelcome squall. Values are now on a more substantial basis, and weak spots have been pretty thoroughly eliminated. A period of irregularity may follow such a shock, but speculation is likely to be carried on within safer and narrower limits, and the so-called "boom" has received a timely and much needed check. Conservative bankers had for some time been apprehensive of excesses, and caution has been repeatedly urged in these advices, so the break caused no surprise to our readers.

* * *

FOR GROCERS AND PROVISION DEALERS.

Many people believe, in spite of some strange opinions held by one of Britain's cabinet ministers, that Canada is destined to fill an important place in the growing of barley for malting purposes for the Mother Country. We now hear that Lord Strathcona is sending to Regina several varieties of seed, especially adapted for malting, and these will be tested at the Government Experimental Farm stations. But why send so far as Assiniboia? The Province of Ontario raises as good barley as any in the world, and supplied the Northern States with it till they put on a prohibitive duty.

The directors of the Union Stock Yards, Toronto Junction, held their annual fair and prize competition on Friday last. Mr. J. D. Allan, the president of the company, expressed his satisfaction at the success and progress of the stock yards, as well as at the quality of the animals exhibited. Since the opening of the yards, sixteen months ago, no less than 1,525,000 head of cattle have passed through. There was one thing, however, which should be fostered in Canada, namely, the dead meat trade, which, while at present it was far behind that of other countries, might in time assume the proportions of the bacon trade. Several other well known speakers were present.

The market for Canadian apples in Britain is considerably improved, according to advices to hand this week. In Manchester greenings are selling at 13 to 15s.; Baldwins, 12s. to 13s.; spies, 15s. to 19s.; russets, 15s. to 17s.; kings, 16s. to 21s.

—The statue of Joseph Howe, erected by the Government of Nova Scotia, was unveiled on Tuesday last. It was designed by P. Hebert, the Canadian sculptor. The statue is in place in the southern area of the Provincial Building Square, where it has been admired by thousands. After the ceremony a public meeting was held at the Academy of Music, at which an oration upon Joseph Howe was delivered by Attorney-General Longley.

—An amusing tale comes from Konigsberg. A Russian lady, while looking at the goods in a certain shop, chanced to see a Japanese saucer, which she took up and flung to the ground, saying: "So may the cursed Japanese be treated." The shop assistant quietly picked up the pieces and, after wrapping them in paper, handed them to the lady, telling her that payment was expected for them. Much excited, the Russian once more flung the china to the floor, this time shouting: "And so may the Germans be treated," This was too much for the patriotic German saleswoman to stand, and she replied by dealing the lady a smart box on the ear, saying: "And may the Russians ever thus be served." Great excitement ensued, and the trade done by the shop has been much increased by the good Konigsbergers' desire to see and admire their patriotic fellow citizen.

* * *

We learn that Mr. A. L. Parker, for fourteen years with the Eastern Townships Bank, being latterly accountant at Sherbrooke, has severed his connection with that institution and entered mercantile life with the firm of C. R. Clough & Co., wholesale grain merchants and millers at Lennoxville. The latter is a very old established concern with an enviable record for upright dealings, and from what we hear of him, we should think that in Mr. Parker they have secured one who will continue the good standing of the firm; he certainly was well thought of in the bank.

PEOPLE who admire substantial growth will be delighted with the record of the Sun Life of Canada for 1904. This Company has had many great years, but the year that is closing is the greatest.

——Have you seen the leaflet "From the Blue Book"? It shows at a glance why the Company is proclaimed "Prosperous and Progressive."

THE CANADIAN WHEAT QUESTION.

Canadian wheat finds itself the centre of an especial amount of interest just now from the American point of view. The United States Government has ruled that, when ground in United States mills for export, it may enter that country in bond free of duty. The millers there find it increasingly necessary to form an admixture of No. 1 Hard which it is difficult to obtain outside of Manitoba, in order to bring their flour up to the standard required in Europe. The peculiar condition arises from this state of things that the American miller is grinding flour for foreigners and letting them have it at a cheaper rate than he will his own countrymen. If the United States would allow Canadian wheat to enter the country entirely free of duty, whether it be intended either for foreign or for domestic consumption, the milling industry there would be greatly strengthened, but the farmers to a man are against such a course, not altogether without reason, for they are as a class sufficiently taxed in paying for all the usual necessaries of life, and naturally object to having their own particular product competing with duty-free articles from another and growing country.

Some people in Canada, however, strange to say, seem to object to the American duty being taken off, either wholly or in part. And they propose the imposition of an export duty on Canadian wheat. How such a suggestion will appeal to our western farmers is not a matter for doubt. Their interest lies in the discovery of outside markets of the very largest and widest character possible, and why they should be called upon to see one of their potentially best markets closed to them on general principles, or what probably appear to them to be no principles at all,—and by their own government too—is a question they would hardly care even to discuss. There is not the slightest likelihood of any such course being adopted, but the proposition helps to bring the subject of reciprocity more to the fore.

ONTARIO THROUGH LONDON EYES.

When, some days ago, an account of the meeting in London, England, of the Trust and Loan Company of Canada reached this side of the Atlantic, a certain sentence in the speech of the chairman occasioned amusement or annoyance, as one chose to view the curious purblindness that caused it to be put into the mouth of that gentleman. We say put into his mouth, for Sir Vincent Caillard is an able man, familiar with Egyptian finance, and probably well informed upon matters in the United Kingdom. But he could not know thoroughly the company's position, its intimate workings, and local relations, for we cannot think he has ever been in Canada. If he had, clever man as he is, he would never have said, off his own bat: "We have closed our Toronto office, as we consider that we have practically exhausted the business in Ontario." The business mentioned, the reader must remember, is advancing money on mortgage of real estate, which the company has long done in Ontario, and which it still does in Quebec and Manitoba. And the phrase quoted must be intended to mean that the field has been exhausted—for we can hardly accept at its face value the statement that, "we, [the Trust and Loan Company] have exhausted the Ontario market for loans on real estate."

The Province of Ontario has twenty-four million acres of land under assessment. The value of this land—farm, grazing, and orchard land—in townships, as 23,727,000 acres of it is described, is $463,891,000; of towns and villages the real estate assessment is $124,000,000; and the cities of the Province, $229,600,000, while the total personal property assessed is $31,975,000. Here is an aggregate value of $850,000,000, equal to, say, £170,000,000 sterling. While the great bulk of the land and personalty values here described are owned clear of incumbrance, yet something over a fifth of it, ($189,613,000 in 1901) is shown in the Dominion Report to be subject to mortgage, the amount having been reduced to this sum from $261,589,000 in 1892. Eighty-one companies are shown in the blue book as engaged in lending money on mortgage in this Province, and almost all of them pay dividends on capitals ranging from $50,000 to $6,000,000 each; besides which insurance corporations and private capitalists lend money here by the million on land. One company, which has loaned money for forty years in Ontario only, has to-day loans of $7,238,000 in this province, and has for years paid nine per cent. dividend. Others have aggregate loans ranging from two to five millions, and the largest company has loans of twenty millions, and their dividends are regularly paid. But the Trust and Loan Company wiseacres, seated in their cosy offices in Great Winchester Street, London, composedly give it to be understood that they "have practically exhausted the business in Ontario!" What a pity it is that the people who write their reports and inspire their annual speeches should not know something about the premier province of Canada, after doing business in it for sixty years.

* * *

SMELTING WORKS IN BRITISH COLUMBIA.

It appears inevitable that in all newly settled countries affording promise of mineral wealth, the early development of that wealth is delayed through inadequate geological knowledge and a lack of expert advice as to proper methods and machinery. British Columbia has proved no exception to the rule, in this respect. Hundreds of thousands of money have been sunk in various parts of that great mineral area, in some cases in appliances not adapted for the kinds of ore prevailing; in others because the machinery could not, for physical reasons, be got into the valleys or up the mountains where it was intended to be used. Lack of forethought, the reader will say. Yes, lack of forethought and lack of skill, both. In the matter of smelters, the province has had a very sufficing experience, as we learn from a paper by Mr. E. Jacobs, a well-known writer upon British Columbia minerals, in Bulletin No. 19 of the Provincial Government, which deals at large with the subject of mining.

Dealing in succession with the smelters in the Kootenays, in the Boundary country, and on the Pacific Coast, Mr. Jacobs shows how the first-named has had its share of unsuccessful ventures as well as successful ones. Golden, Revelstoke, Pilot Bay, Ferguson, and Marysville, each has its story of great expectations and greater disappointment. "It is a consolation to think that the long-continued operation of the Nelson and Trail smelters, especially the latter, has taken away the reproach that in the absence of their success would have become associated with the Kootenays. Not that it was deserved, for where smelting enterprises have been in fully competent hands and started under conditions necessary to success they have been kept going."

Needless to give any detailed account here of unsuccesses, these are given in the Blue Book. We note, however, that the first actual smelting of ore on a commercial scale in British Columbia appears to have been done at Revelstoke. The works are described in the Mines Report for 1889, as having a sampling and smelting capacity of 100 tons and 60 tons respectively. "It is not known to the writer how long these works were in operation, but as there is now in the Mineral Museum of the Department of Mines, at Victoria, a moulded bar of 'Kootenay' lead, stated to have been the first lead smelted in British Columbia and believed to have been the product of the Revelstoke smelter, it would appear that ore was actually smelted here and a marketable bullion produced."

The site of the Pilot Bay smelter was chosen and work on it begun as early as 1891: in 1895 the smelter had been in operation and had shipped some 3,000 tons of bullion, the main supply of ore [low grade] being obtained from the Blue Bell mine. In that year the company employed on an average more than 200 men daily, and by December they had expended in cash more than $650,000. "For a time the concentrator was used in 1897 by Braden Bros," but "in 1898 the whole works passed into the possession of the Bank of Montreal, since which year they have been idle."

The smelter at Nelson was built in 1895 by the Hall Mines Company, for the purpose of smelting the product of the Silver King mine, which was copper-silver ore. It has since purchased other product, and its work is largely confined now to lead ores and dry ores. During the year ended with June last, 16,677 tons (dry weight) of silver-lead ores were smelted at these works.

The Trail smelter was begun in October, 1895, by F. A. Heinze, and by the following summer five furnaces were in operation, four reverberatories and one circular. These were afterwards replaced by rectangular blast furnaces. In March, 1898, the C.P.R. bought the smelter, and it is now described as the largest lead-copper reduction works in Canada. The plant is valued at two million dollars, and employs ordinarily 350 men. The works are operated by electricity transmitted from Bonnington Falls about thirty miles.

Then there is the Northport smelter, which though situated in Washington State, a few miles south of the Canadian boundary, is to all intents and purposes a British Columbia smelter, owned by the Le Roi Mining Company, and obtaining practically all its ore supplies from Rossland and other British Columbia mines.

We must devote another article to this subject.

* * *

BANK OF OTTAWA.

It must be with much satisfaction that the authorities of the Bank of Ottawa can point to the figures among liabilities of that institution on November 30th: Capital paid up, $2,500,000; rest, $2,500,000. To have reached, in thirty years, the point where reserve equals capital, which had been twice enlarged in the interval, and reaches now two and a half millions, marks a stage where, if they feel like it, they may fairly rest and be thankful. But the country continues to grow, the bank's deposits continue to grow, the demands of the bank's customers must also be expected to increase. And so with the aggressiveness which is implied in the bank's motto, "Advance," one may expect to see still further additions to the large totals which this live institution is able to show. And one may hope, too, that there will be a continuance of the wise caution which, the president also assures us, has helped materially the bank's success.

The general manager's address analyzes the statement for 1904 very fully. It is printed in our columns side by side with that of 1903, making comparison easy. Circulation is well up to the limit, though not quite so large as at like date of 1903. Deposits now exceed $15,000,000, having gone up a million and more in the year. Current loans show an advance of two millions which helps to account for a decline in call loans, and some other items among cash assets. Bank premises represent the very considerable total of $440,000; but this is not wonderful, for the bank has forty-two branches. Considerable sums have from time to time been applied in its reduction. Overdue debts are notably smaller, and compared with the total loans are quite slight. We notice with pleasure an appropriation of $5,000 to officers' pension fund. The offices opened during the year have been at Virden, Manitoba, and at Russell and Morrisburg, in the Province of Ontario.

* * *

THE TRADE BALANCE AND SPECIE IMPORTATIONS.

COMMUNICATED.

Since 1899 Canada's foreign trade, inward and outward, has run as follows:—

Year.	Merchandise Imports.	Merchandise Exports.	Excess Exports.
1900	$172,506,878	$177,776,044	$5,269,166
1901	177,700,694	194,509,143	16,808,449
1902	196,480,190	209,970,864	13,490,674
1903	224,813,719	225,229,761	416,042
1904	243,582,824	211,055,678	*32,527,146

To bring the table more nearly up to date the figures for the first three months of the fiscal year ending 30th June, 1905, are also given:—

First quarter (1905) $67,070,253 $62,106,874 *$4,963,379

To compare with this let us now consider the movement in coin and bullion. The figures are:—

Year.	Excess Merchandise Exports.	Net Import of Coin and Bullion.
1900	$5,269,166	†$ 359.730
1901	16,808,449	1,558,805
1902	13,490,674	4,641.983
1903	416,042	8,356,834
1904	*32,527,146	5,408,756
1st quarter (1905)	* 4,963,379	2,841,548
	*$1,506,194	$22,448,196

It will next be interesting, while bearing the above in mind, to examine into the visible stocks of coin and bullion held in the Dominion. These are held by the Receivers General, and by the chartered banks.

	Specie Held by Banks.	Specie Held by Receivers-General.
31st December, 1899	$ 9,584,702	$12,444,791
" 1900	11,773,336	14,931,088
" 1901	11,571,337	16,224,576
" 1902	12,892,235	21,266,157
" 1903	16,101,019	28,679.708
31st August, 1904	16,286,923	32,881,195

Thus it is seen that between the 30th June, 1899, and the 31st August, 1904, our merchandise imports and our merchandise exports almost balance; imports exceed exports by a million and a half. Notwithstanding this there was a net import of coin and bullion during the same period of $22,448,196. Between the 31st December, 1899, and the 31st August, 1904, the specie holdings of the chartered banks increased $6,702,221; those of the Dominion treasury increased $20,436,404; the two together increased $27,138,625. But it would give a one-sided view of our financial position unless we also took into account the change in the bank position with regard to foreign credits. If we take and add together the following items from the bank balance sheets, viz.: "balances due from bankers in the United Kingdom," "balances due from bankers in foreign countries," "call loans elsewhere than in Canada," current loans elsewhere than in Canada;" and deduct from the total thus arrived at, the sum of the following items on the other side of the balance, viz.:—"balances due to bankers in the United Kingdom," "balances due to bankers in foreign countries," "deposits elsewhere than in Canada," the result should show the foreign position of the banks as nearly as it can be shown. Figuring on these lines we get $57,414,433 as the net balance of credits abroad owned by the banks on the 31st December, 1899. On the 31st August, 1904, the net credit was $50,594,249. There is, therefore, on this basis, a fall of $6,820,188 in the net foreign balances and investments. With regard to the movement of capital belonging to individuals, firms, and corporations other than banks, it is not so easy to speak with any degree of positiveness. It is well known that there is going on all the time a cross flow of capital, both into and out of the country. Some of the different items that go to make up these two streams may be mentioned, but there are no statistics to tell us of their respective dimensions. On the one side there are:—interest on our debts, public and private, held abroad, profits on investments made by foreigners in the Dominion, spendings of our people travelling in Europe and the United States, the earnings in Canada of foreign shipping, railroad and insurance companies, and investments by Canadians in foreign enterprises; on the other side there are: the stream of capital from abroad seeking investment in Canadian enterprises, the capital brought in by immigrants, profits on investments by Canadians in foreign countries, spendings of foreign tourists in the Dominion, and the outlay of foreign ships in Canadian ports.

It is, of course, impossible to strike a balance between these two sides, but we can be reasonably certain that if one item were left out of the reckoning it would be found that the outflow of capital exceeded the inflow. The item in question is "the stream of capital seeking investment in Canada." In amount this is an uncertain quantity. It will vary from year to year. When the surplus savings, available for investment, of the people of outside countries, particularly of Great Britain and the United States, are very large, and when at the same time great prosperity prevails here in Canada, outside capital will, in all probability flow here in very considerable volume. But if the growth of the investment fund in those countries suffers a check, from one cause or another, and if, at the same time, it should happen that the Dominion was passing through a trade depression, then there would be a great falling off in the flow of capital to us-ward; it might, in fact, disappear altogether for a time, or be turned in the opposite direction.

In the last four years, if we reckon this stream of outside capital along with all the other items mentioned above, the probability is that the balance of this invisible commerce has been considerably in our favor.

Naturally this part of our commerce with outside countries does not receive so much comment as does the visible commerce, the dimensions and particulars of which are recorded in the custom house returns. The exchange experts, when they seek to get a notion

---

*Excess imports.

†Net export.

as to the probable movement of gold, cannot take into their calculations very much outside of the known movements of imports and exports, and some few special international financial transactions that they happen to know about.

So far as our own net import of gold is concerned it would appear that the favorable balance of trade has had comparatively little to do with it. One of the most important causes has been the great expansion in the liabilities of our banks. Deposits of the banks and their note circulation have grown very rapidly since 1899. Although the bankers, naturally, have invested the greater part of the increased funds thus entrusted to them, in loans and discounts to Canadian farmers, merchants, manufacturers, etc., they have been obliged also to increase their cash reserves. The total liabilities of the chartered banks on 31st December, 1899, amounted to $336,018,630; on 31st August, 1904 they were $559,781,428.

The cash holdings of the banks are to be found under the headings of "specie," "legals," and "notes and cheques of other banks." With respect to the last named, the holdings of these are converted into legals as expeditiously as possible, the bulk probably on two days after receipt. The favorite form of cash holding is "legals." They are convenient to handle, they constitute the accepted mode of settling differences at the clearing houses, and they are based solidly on an ample reserve of specie held by the Receivers General. Therefore, as their liabilities and the volume of their business increased, the banks have, in order to augment their cash reserves, purchased cash abroad and imported it just as merchandise is imported. This cash was taken, of course, in the shape of gold; some of it, the banks kept themselves, but the greater part they turned in to the Dominion Treasury in exchange for "legals." As the increase in the stocks of gold held by the banks and the Receivers General exceeds the net importations of the metal during the period under review, probably the balance of five millions came from our own mines.

This movement on the part of the banks to strengthen their cash reserves would account also for a very large part of the increased volume of Dominion notes issued by the Government.

H. M. P. Eckardt.

* * *

—It was to be expected that denial would be promptly made of the improbable story which emanated from Montreal on Sunday as to the intended amalgamation of Canadian Banks. And it has been denied, we see, the authorities of two of the principal institutions named having discredited the rumor. How such stories arise one cannot easily tell. Some such rumor went the rounds of the daily press a year ago about four Maritime Province banks being rolled into one, but there was nothing in it. Whether interest, or a desire for gossip starts such reports it is hard to say. It may be that, applying to such busybodies the phrase of Sir Henry Taylor, "We figure to ourselves the thing we like, and then we build it up as chance will have it, on the rock or sand." But there is so far as we can see, no argument for utility in such reports as this last. The banks referred to are doing well enough; they are competently managed, and there does not appear to be any reason for the application in their case of the doctrine so often invoked now-a-days on behalf of the amalgamation of industrial concerns, that it is necessary to consolidate several factories to save expense.

BANK STATEMENT.

We present below a condensation of the monthly statement of Canadian Banks for November, 1904. It is compared with the Bank Statement for the previous month, and shows capital, reserve, assets and liabilities, averaging holdings of specie and Dominion notes, etc.:

Canadian Bank Statement.

LIABILITIES.	Nov. 1904.	Oct. 1904.
Capital authorized	$100,546,666	$100,546,666
Capital paid up	79,851,310	79,747,011
Reserve Funds	53,426 775	52,480,152
Notes in circulation	$69,426,931	$72,226,306
Dominion and Provincial Government deposits	8,030,479	8,281,716
Public deposits on demand in Canada	133,138,746	130,969,564
Public deposits at notice	317,914,322	315,323,431
Deposits outside of Canada	40,038,126	33,200,104
Bank loans or deposits from other banks secured	1,000,923	963,456
Due to other banks in Canada	5,248,949	6,019,329
Due to other banks in Great Britain	3,881,800	4,866,137
Due to other banks in foreign countries	1,302,038	2,845,426
Other liabilities	8,663,105	8,210,034
Total liabilities	$588,645,497	$582,905,579
ASSETS		
Specie	$17,849,746	$17,048,358
Dominion notes	37,193,912	36,048,332
Deposits to secure note circulation	3,328,771	3,328,771
Notes and cheques on other banks	23,986,585	25,357,557
Loans to other banks, secured	1,001,269	963,455
Deposits with other banks in Canada	8,179,734	7,670,209
Due from banks in Great Britain	14,514,627	11,392,418
Due from other banks in foreign countries	21,988,618	18,723,722
Dominion or provincial Govt. debentures or stock	11,780,594	10,983,264
Other securities	55,657,287	56,016,633
Call loans on bonds and stocks in Canada	36,279,761	36,233,712
Call loans elsewhere	44,213,180	44,603,469
	$275,974,084	$268,369,900
Current Loans in Canada	415,297,503	416,344,885
Current Loans elsewhere	17,911,048	19,426,308
Loans to Dominion and Provincial Governments	2 361,926	2,547,759
Overdue debts	2,044,015	2,358,554
Real estate	738,440	793,193
Mortgages on real estate sold	830,844	731,310
Bank premises	10,445,893	10,336,420
Other assets	6,559,941	6,054,756
Total assets	$732,163,884	$726,963,269
Average amount of specie held during the month	16,992,675	16,848,041
Average Dominion notes held during the month	35,615,596	35,120,194
Greatest amount notes in circulation during month	74,216,072	72,716,817
Loans to directors or their firms	9,836,685	9,933,136

* * *

—When a valuable man is called away suddenly from the sphere of public duty, it is natural for people to ask, who will be his successor? If the post is a political one, we are accustomed to expect party affiliation to have something to do with the appointment. There was general agreement, we believe, that the personnel of the Transportation Commission was satisfactory. All its members were acquainted with both water and rail communication. One of the members, Mr. John Bertram, was removed by death. To fill his place it is proposed, so an Ottawa telegram of

Tuesday last to a Government organ says, to appoint Mr. J. H. Ashdown, of Winnipeg. The proposal is not welcome, we venture to think. Mr. Ashdown is a successful and a very respectable merchant, who has lived in Manitoba for more than thirty years; but we have yet to learn that he possesses the breadth of knowledge of transportation matters that is necessary for a member of the commission. There must certainly be, among friends of the Government in Ontario, men who have superior qualifications to Mr. Ashdown. And we dissent entirely from the doctrine that a western man should be placed in a position of such far-reaching importance just because he is a Western man, and in spite of his lack of experience which other men possess.

* * *

—A special despatch from Washington expresses the disappointment of President Roosevelt and Senator Fairbanks that Sir Wilfrid Laurier does not favor another sitting of the joint high commission to consider reciprocity between the United States and Canada, and other matters in dispute. And his letters declaring to call another session are described by the Senator as "curt." They are not more curt than the treatment accorded to Canada by the so-called "jurists of repute" chosen by the United States to settle disputed matters between the countries. Sir Wilfrid is a gentleman, not a petty huxterer; and he was at a disadvantage in discussing matters with men of narrow views and made-up minds. He knows, however, when he is snubbed, and when Canada's fair claims are slighted, and we cannot wonder that he is in no hurry to subject his country and himself to another useless wrangle.

* * *

WINNIPEG AFFAIRS.

All accounts from the East go to confirm the general belief that 1904 has been a good year for Canada. Your factories are well employed, your merchants are busy, your farmers are prosperous. Up here we, too, are prospering; there is no exception to the rule. In this city are abundant evidences of enterprise and thrift. The Realty Gazette of last Friday tells of big sales and small sales of land within the city limits, with a buoyant tone in not only central residential property, but also in suburban acreage. Notably, among the sales to record is a terrace, which sold for $35,000, a block of five houses for $50,000, a piece of Portage Ave. property, near the Y.M.C.A., for $50,000, a parcel in the north end at $30,000, and some suburban acreage in St. Boniface for $35,000 or $500 an acre. Two-thirds of the money involved, it is stated, comes from outside sources, indicating either new residents or fresh capital or both.

There are now 12,170 houses in Winnipeg, plus the number erected during the present year, which are stated to have cost in the aggregate $2,500,000. The assessments made for 1904 were $15,920,710; and it is estimated that $6,000,000, if not $7,000,000, will have to be added for actual erections and the increment due to increased land values. With all the new buildings erected, either for dwellings or for commercial purposes, the demand has not been met and rents are still high. The assessment commissioner estimates the population of the city to-day at 78,000. That the increased activity everywhere seen is real seems to be proved by the clearings of the banks. For the week ended on 8th December, the aggregate clearings were $9,846,101, an increase of almost three millions over the corresponding week of 1903.

Some of the new buildings in Winnipeg are upon a scale which indicates belief in the still greater growth of the city in the near future. The best proof of the importance of this capital of the Prairie Province is in the style and dimensions of the five-story building to be erected for a post-office. The existing post-office, erected twenty years ago, was a good one for that day, but the new one will be big enough and handsome enough for Toronto, a city of almost a quarter million population. The Provincial Government is erecting on Broadway a land titles building of stone, of good appearance and dimensions. The Carnegie Library is almost finished, a new hospital is proposed, and the contract has been let by the Manitoba Government for an agricultural college. Then there is to be, at the angle of Main St. and Broadway, a union depot for the Canadian Northern and the Grand Trunk Pacific Railways. To these add churches, fire halls, schools and the constantly growing list of warehouses and dwellings, and it will be seen the confidence people have in Winnipeg as a great city in the future is being wonderfully shown.

Mentioning fire-halls recalls the fact that the community is aroused to the need of making fire-fighting appliances keep pace with the growth of the place. Mr. Robert Howe, an inspector for the Canadian Fire Underwriters' Association, has lately been making an inspection and report. His last inspection was made in 1901, and he finds an increase of nearly 80 per cent. in population since that date, with all that this implies. The necessity of a high pressure water system to protect high buildings is admitted by the city authorities, and is emphasized by recent fires. There are a great many wooden houses in the city—which covers a great deal of ground—and some of them are in the congested district, and therefore are a menace to the down-town streets, where greatest merchandise values are congregated. The city engineer, the chairman of the fire and light committee of the council, and the C.F.U.A. inspector, are hard at work framing a system of fire protection that shall be adequate to the risks that recent events have shown are to be provided against.

Winnipeg, 19th December. MERCATOR.

PACIFIC OCEAN STEAMSHIPS.

Editor, Monetary Times:—

Sir,—After my return from a southern trip, I looked through a few back numbers of your valued paper. In your Sydney correspondent's letter, dated 13th June, and published in your issue of the 5th of August, I found some rather curious assertions concerning your humble servant which want some correction. Evidently your correspondent jumps at conclusions without knowing what he is talking about.

I did go to Vancouver via Suva, as your correspondent suggests, but did not do the journey in 21 days. I left here on the 24th of February and landed at Vancouver on the 28th of March. This makes 35 days for the journey, adding the extra day which is put in to adjust the difference in time. Your correspondent did not know, apparently, that the "Moana," which made the trip, was detained at Sydney for a week, which obliged me to stay for eleven days at Suva.

In how far I can be accused of slandering the Canadian-Australian Steamship Co., in simply stating facts, I leave to your readers to decide. I have no reason to say anything unpleasant with regard to the Canadian-Australian Steamship Co. The company have always treated me well, and my four trips across in their ships have always been very pleasant. The treatment on board was all I could desire, and, if not pressed for time, I shall always make use of this line by preference.

But all this cannot obscure the fact that the 'Frisco service is, with regard to speed, the more suitable for New Zealand. I wish it were otherwise, but as long as the Canadian-Australia Steamship Company does not call at a New Zealand port, and does not put faster steamers on the route, she cannot expect to cater successfully for the New Zealand passenger traffic.

Now with regard to the "visionary" line for a quicker service to New Zealand, your correspondent, F. W., is just as badly informed. What *is* wanted, and what I have all along advocated, is a *cargo* line of steamers from Vancouver to New Zealand direct, and this line, far from being "visionary" may be sooner in operation than your correspondent seems to expect. Such a line has to be established if ever Canada will derive the benefit of the New Zealand preferential tariff. The matter has the fullest attention in interested circles, not only on the United States side, and F. W. may one day be surprised to hear that a well known New Zealand shipping company has materialized my "vision."

F. W., who apparently takes an interest in matters Canadian-Australasian, ought to be more careful in future and investigate before speaking about "slandering" and "visions."

I remain, dear sir,

Yours very truly,

Auckland, New Zealand, TH. DE SCHRYVER.
8th November, 1904.

TRUST AND LOAN COMPANY OF CANADA.

Editor, Monetary Times:—

Sir,—I think attention should be drawn to a recent display of another Englishman's ignorance of the size and importance of the richest province of our Dominion of Canada, which they continually tell us is "the brightest jewel in the British Crown." As a rule, however, our English friends and professed admirers seem to know very little about it, and in this particular instance, if it has been correctly reported, the display of ignorance was made by a gentleman who should have known better. I refer to the address to the shareholders made by the chairman of the Trust and Loan Company last month in London, as reported in the Canadian Gazette of date 1st inst.

According to this report, the chairman of that meeting, Sir Vincent Caillard, a well known city man, in his speech made the following remark about the company: "It may interest you to know that we have closed our Toronto office, as we consider that *we have practically exhausted the business in Ontario.*"

What would the other Ontario loan companies, notably the successful London ones who have never gone to the North-West for business, and have increased and maintained their reserves better than those who have gone there, say to such a preposterous proposition? We who are here all know that the present prosperity of Canada, as a whole, is benefiting Ontario as much as any other province, and the demand for money on satisfactory real estate security, in long settled districts, where values do not violently fluctuate, is now very good indeed.

As a shareholder in the Trust and Loan Company, I have suggested to their commissioner that they should get their chairman to come out next spring, and see for himself as much of poor old Ontario as he has time to, and I hope he will.

Yours very truly,

QUEEN CITY.

20th December.

OUR AUSTRALIAN LETTER.

The Germans have treated the Australians to a bit of trade "slimness" that makes them look upon Canada's policy towards Germany with other eyes. To the north of Australia, on the other side of the equator, lie two groups of small islands, the Carolines and the Marshalls, which Germany has secured possession of. The trade to these was done by British firms, but on a Sydney steamer recently calling at one of the groups she was called upon to pay a huge trade tax. On the next trip the fee was doubled and was so high that there was not sufficient gold on board to meet it. However, the handful of people there were anxious to trade with the British, and the firm resolved to try another trip, but the German authorities then put on an impossible export tax on copra, [dried pulp of the cocoa nut], the only article of trade. A supply of water was even refused the ship. The Germans contend that they only asked from this British steamer what they collect from their own. The secret of the matter is that the Government of the Islands is carried on by a German trading company, the Jaluit Gessellschaft. It makes no difference what absurd price they chose to put on their own or any other vessel, for it all goes into the pocket of the company. The result has been to drive out all competition and to compel the English traders to sacrifice their stations on the Islands to this German company. Australia has had very little experience of the "tricks that are dark" of foreign trade, but she is getting it, and every experience makes her appreciate the necessity of the solidarity of the Empire.

A month ago the 'Frisco steamer brought two thousand five hundred cases of California apples to Sydney, but the inspectors refused to allow them to land on account of the presence of the Codlin moth grub. After repeated efforts the Government over-ruled this decision, but the Premier said it was the last time that such fruit would be allowed to come in. The effect of this decision is to turn the attention of the fruit dealers to Canada for their supply. The "Aorangi" brought over some British Columbia cases of apples and pears. Some of the apples arrived in good condition, others, soft varieties such as the "Maiden's Blush," in very bad condition. The cases were good, but the tenderest apples were not packed in paper as they should have been. The pears, owing to poor packing, were all rotten, yet pears, plums and grapes from California reach here in capital order. Canada can ship ten thousand cases during the months of November and December, and find a profitable market, but the fruit must be packed as the Californians do, the apples wrapped in paper, the pears in twenty-pound boxes, each pear placed in a separate compartment, as eggs are shipped. Then it should be carried in cool storage. After being par-boiled in crossing the equator, the fruit that carries safely between decks has lost much of its flavor. The apples to bring the best price should be high in color and medium size. Such fruit properly delivered would net from one dollar and a half to one seventy-five per bushel at Vancouver.

The Monetary Times calls attention to the discrepancy between the figures of Canada and Australia and New Zealand of the trade between these countries. The trade returns of neither country are correct, though those of Canada are more nearly so. Many lines are supplied by London or New York export firms and Canadians therefore ship to the United States or Great Britain whence they are transferred to this country.

Mr. Miller, representing a large New Zealand house, is just back from a trip through Canada, which he scoured for connections. He is enthusiastic over the remarkable development of Canada and the courtesy with which he was treated, but regrets that his business results were almost nil. The manufacturers showed him their books full of home orders; but said they were going to enlarge and then they would be ready to take on foreign trade. A Canadian who went over on a similar errand is also back. He secured arrangements with United States houses, but only with one Canadian.

Trade in New Zealand is a little duller, but in Australia a trifle brighter, but not much in either case, and here in Sydney it is poorer. The situation in New South Wales must be inexplicable to outsiders. With an increase of 42,103 bales of wool this year over the similar period of last year, with prospects for a fair harvest, dairy products expanding with a good yield and firm market for most minerals, it would naturally be expected that business would show a revival, but it does not. The explanation of the Australian Trade Review is:

"So far as private credit is concerned, trade must be pronounced as sound, although the margin of profit is small; but the public indebtedness is too heavy, and there is, notwithstanding all the talk of reform and economy before the late Parliamentary election, a steady attempt to increase the public indebtedness, while the population is almost stationary. Socialistic measures are proposed by the Government; fresh burdens, described by the Government as "the stoppage of leaks," are being proposed, but economy in administration is shunned like a plague."

Here is a sample. Coal mines in the Newcastle district are closing down because they cannot compete in the foreign market. The miners refuse to accept a reduction in wages in order to assist in regaining the foreign trade, and some have refused to obey the decree of the Arbitration Court as to wages. They last week sent a deputation to the Government to start public works to keep them from starving, and if the Government can borrow money it will do it. The hope of the future is in the refusal of the money market to lend.

Sydney, New South Wales, F. W.
21st November.

COMMERCIAL TRAVELLERS' BENEFITS.

The course which is being urged upon the Commercial Travellers' Association, as to the alteration of their mortuary scheme, by Mr. Fielding and those members who think with him is not approved by the more careful and thoughtful among the body. Mr. J. C. Black, a shrewd and experienced business man, long treasurer of the Association, has reviewed the changes proposed and shows their unfairness. Not alone the actuary of the society, but the actuary of the Canada Life and the Government actuary have condemned them. And still the canvass for votes in favor of the "new blood" (as the officers are described who hope to carry out Mr. Fielding's or Mr. Hopwood's schemes, or both), goes on. The president of the body, Mr. Thomas McQuillan, has asked that the report of the actuary, dated 7th December, "be read and considered by every member with an open mind, in order that what is best, and that which will make for permanency in our Association, shall be decided upon?" In this report, of which we have seen a copy, Mr. Bradshaw makes the following apt comparison in paragraph 38, a paragraph which ought to commend itself to any business man:

"Mr. Fielding's and Mr. Hopwood's schemes may be likened to a merchant buying goods on the longest possible credit, selling these goods much below cost, and paying off with the proceeds only those creditors who are most pressing and insistent, and making no provision whatever for the others The mortuary benefits of the Association are bought by your members by annual payments. The creditors, or members of the Association, are depending that when their mortuary benefits will fall due, whenever that may be—1, 5, 10, 20, 30, or even 50 years hence—they will be liquidated in full, and not that the management have improperly taken their monies and misapplied them in order to meet the earliest and most pressing claims which have occurred. Inasmuch, therefore, as both Mr. Fielding's and Mr. Hopwood's schemes propose to sell mortuary benefits materially below cost, the result will be that an unfair preference will be established for those members who die early, at the expense and loss of the rank and file of the membership of the Association."

* * *

BOOK REVIEWS.

Principal Grant. By William Lawson Grant and Frederick Hamilton. Toronto: Morang & Co., Limited, 1904.—That there should be a biography of George Monro Grant, Principal of Queen's University, was inevitable. He had borne so large a part in movements of great public moment, and had shown from earlier years so great faith in the future of Canada, and power of inspiring others with that faith, that his friends and admirers felt that here was a life that should be worthily written. And this has been done. The present volume of 521 pages is a satisfying record of his best achievement as well as a comprehensive outline of his character. Of the collaborators in its production one is the Principal's son, the other a Queen's College graduate who understood and loved Grant. This intimacy and insight into the character of the man is what makes the charm of the book. No one who knew Grant well could fail to love him, to respect him, to believe in him. It is stated in the preface that the rule of the writers of this biography was that the subject should speak for himself; and this has been adhered to as far as possible. But elucidation was often necessary, and this has been well done. There is, besides just enough of incident and anecdote to heighten the interest in the subject of the book without detracting from its dignity. To quote from it is a temptation which must be sparingly indulged; but not to quote from it would be to fail to give our readers a notion of its attractiveness. To some, his earlier college scenes and his life in Halifax will appeal; to others, his better known and wider activities in Ontario and beyond.

The writer of this notice recalls how when living in Glasgow, and being invited on one Saturday afternoon of 1875 to go and play cricket in the grounds of the then new Glasgow University, he was asked, when it was learned that he came from Canada: "Do you know Grant?"—as if there were only one of the name, and he acknowledged with pride that he did. "Man," said the then first man of the year, "I have been hearing of him ever since I studied here. He must have been an extraordinary fellow." The traditions of the University accorded Grant the first place in football, in hare-and-hounds, in anything that proved an outlet for his superabundant physical energy. And, it was learned later, he had left the impress of a generous, helpful, manly spirit in any department of indoor study or of outdoor activity.

In analyzing his personality, Mr. Hamilton says, with much force, that it is easier to state what Grant did than to tell what manner of man he was. In the last chapter, the activities of the Principal are admirably summed up:

> "Those activities were extraordinarily numerous. The head of a university, he was keenly interested in politics; a theologian, he was sensitive to the material development of his country; a clergyman, he had singularly accurate views upon military policy; a scholar, he had superb administrative ability. Innumerable were the channels in which his energy flowed. He bequeathed to his country a university; he aided in its crucial days the union of Canada; he fostered the sentiment of imperial organization; he had a large share in welding together the Presbyterian Church; he exerted a rare influence upon public opinion as the work of the development of Canada was prosecuted; he was a leader in the spiritual revolution which has made the religious atmosphere of Canada clearer, more tolerant, more reverent. Behind these achievements was a man; how are we to estimate that nature, with its profound human sympathy, its eager activity, its energy singularly charged with sagacity and charm?"

The chapter on Public Activities shows well the breadth and energy of the man, but the fifteen pages of the chapter headed, "Ocean to Ocean," are among the most delightful of the book. The paragraph about John Glen, on page 141, is a gem. How his yearning, impulsive, eager, but trustful spirit comes out in a passage such as this from a letter written in December, 1901, to Mr. J. S. Willison:

> "To-morrow I shall be sixty-five years old, and my heart is full of gratitude and hope. Have I not seen much of what I prayed and worked for come to pass? The rest will come. Laus Deo! Here's a hand to you across one hundred and seventy miles. We each have a work to do and we delight in doing it. Life has no greater happiness. Clouds come and thick darkness. What of it? They, too, are needed. We know that all things work together for good to the good."

Canadian Banking. A Series of Lectures by Duncan M. Stewart, General Manager, Sovereign Bank of Canada; Montreal, 1904.—The first of these lectures consists of a historical sketch, embracing English, Scotch, United States and Canadian banking; the second epitomizes the bank acts passed since Confederation; the third discusses the relation of banking to agriculture and manufactures; the fourth deals with Clearing Houses and the internal economy of a bank. They are in no sense intended, the author assures us, to represent a complete treatise on banking, but rather to interest the general public in a topic of importance. It is hoped that they may also be of service to some of the younger officers who have chosen banking as a profession.

Mining in British Columbia; General Review.—This is Bulletin No. 19 of the Government of British Columbia, and is a valuable compend of information, both general and particular, upon the subject of mining in that province. It is printed on excellent paper and contains a considerable number of illustrations which heighten the interest of the text. With commendable forethought, 10,000 out of 15,000 copies printed were, we are told by Mr. Gosnell, sent to the St. Louis Exhibition last summer. We have elsewhere dealt with Mr. Jacobs' paper on smelters, pages 140 to 157 of the pamphlet.

CANADA CYCLE AND MOTOR COMPANY.

The annual meeting of the Canada Cycle and Motor Company, Limited, was held in Toronto on the 15th inst. According to a report laid before the shareholders, the bicycle business in Canada, during the twelve months ending with July 31st last, had made no marked change over the previous year, the sales, in fact, not being so large. This is, perhaps, accounted for, however, by the unusually unfavorable weather which lasted throughout the larger portion of the season. In Australia, too, the serious drouth conditions, which prevailed for so long, brought out such dullness and depression in business as to affect very seriously the company's sales in that country. With regard to motor vehicles, the trade has shown a marked advance over the figures of the previous year. The volume of business was much larger, the number of cars sold greater and their quality improved. The company has now started the manufacture of automobiles of its own design. The prospects for effecting reorganization of the company on the lines laid down a year or fifteen months ago, under which all the common and a large block of the preferred stock were to be cancelled, appear to have become brighter. During the past year, sales totalled $1,257,176, and provision was made for depreciation, repairs to plant, bad debts and contingent account to the amount of $24,589. Net profit for the year was $35,017.

* * *

DRY GOODS.

We understand that the arrangements for the amalgamation of those big textile concerns—the Colonial Bleaching and Finishing Company, the Dominion, the Merchants, and the Montmorency Cotton Companies have been now completed, and the combination will be effected at once. The capital stock is placed at $10,000,000. It is reported that the first president will be Senator L. J. Forget.

The annual general meeting of the Montreal Wholesale Dry Goods Association took place on Wednesday, 14th inst., and officers were elected as follows: President, George B. Fraser, vice-president, A. Scott Robertson; treasurer, Robt. Henderson; directors, Thomas Brophy, G. R. Martin, R. W. Macdougall, R. N. Smyth. Mr. Leslie H. Gault, who has represented the Association on the Council of the Board of Trade for the past year, was re-elected. The report of the business of the Association for the past year was unanimously adopted.

* * *

LIFE ASSURANCE ITEMS.

At a recent meeting of the board of directors of the Confederation Life Association, the vacancy on the board was filled by the appointment of Mr. Wm. Whyte, of Winnipeg, second vice-president and manager of the lines west of Port Arthur, of the Canadian Pacific Railway. Mr. Whyte is recognized as one of the ablest men in the West to-day, and he will, no doubt, prove an acquisition to the directorate of this Canadian company.

At the annual meeting of the Canadian Society of Philadelphia, held last week, Mr. W. A. Higinbotham, of that city, manager of the Sun Life Insurance Company of Canada, was elected vice-president, and Mr. E. P. Creighton, another insurance man, was chosen a member of the executive committee. Both, says the United States Review, are fine fellows.

A story of the dead person, who was entered in the Ticehurst Guardians' medical report as "progressing favorably," reminds a correspondent of the London Daily News of "a life office legend which may be new to your readers." He tells it thus: The infallible medical examiner has just dismissed a candidate for insurance as "first-class, ordinary rate," when the porter pops in his head, with, "Sorry to say, sir, the gent, you just reported on 's been and dropped down dead on the doormat." The examiner glances up and says: "Claim already, eh? Rate him up ten years," and serenely revises his papers accordingly. It would not be right to say in what office this occurred.

A man who will be greatly missed in Montreal, particularly in sporting matters, on which he was an authority, was Mr. James Brown, of Westmount. Mr. Brown's death was remarkably sudden. He was watching, from the gallery of the rink, a game of curling on the ice of the Montreal Club, and when some of the players, observing him to be still for a length of time, went up to him they found him lifeless. This, he had said to a friend a fortnight before, was the death he would choose, rather than a lingering illness or a long period of physical disability. Mr. Brown was 61 years of age. He came out to Canada from Sanquhar, Scotland, of which place he was local historian, and where he had written about and admirably exemplified curling, lawn bowling, and golf. Having settled in Montreal in 1895, he became connected with the Sun Life Assurance Company. He was an excellent and kindly man; and the esteem in which he was held in church and other circles was made manifest in the large attendance at his funeral.

* * *

—The Bank of Toronto, which has had a branch in Millbrook, Durham Co., Ontario, for some time past, has acquired the private banking business in that place of Messrs. Wood & Kells.

* * *

—Sherbrooke, Que., is becoming tired of the bonus business. The other day a by-law was presented to the ratepayers of that place to grant a bonus of $15,000 and exemption from taxation to the Modern Bedstead Company, a local concern who propose to enlarge their plant, but the measure was turned down by a very large majority of votes.

* * *

—The Board of Trade of Kamloops is taking up the question of flax growing, to which the soil and climate of the neighboring country are said to be admirably adapted. The plant is valuable not only for its fibre, but for its seed and oil (linseed oil), and the by-products are good as cattle food. It is believed that with a plentiful supply of flax growing in the neighborhood, other industries would spring up of great value to the community—such as rope-making, oil works, spinning, etc.

* * *

—The Montreal Witness makes a suggestion for the convenience of people living along branch railway lines, and, it believes, for the better profit of the companies themselves. In the ordinary way it costs so much to run the heavy locomotives and other equipment at present in use that the service is naturally very infrequent. The writer referred to proposes that the companies should make use of gasoline motor engines, such as is done on some of the side lines in the United States. These, with their light weight, smaller requirements in the way of the number of employees, and merely nominal cost, could be run almost constantly and would be very handy for large numbers of people. Perhaps something of a similar nature might be contrived for the use of people living a few miles out from our cities, and who would have thus quick and easy access to and from them.

* * *

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, December 22nd, 1904, as compared with those of the previous week:

	Dec. 22.	Dec. 15.
Montreal	$22,856,433	$26,443,883
Toronto	21,793,630	19,918,348
Winnipeg	8,282,865	7,980,150
Halifax	1,935,595	1,824,965
Hamilton	1,327,064	1,413,487
St. John	1,146,746	1,015,182
Vancouver	1,497,013	1,463,400
Victoria	561,542	673,327
Quebec	1,500,828	1,755,696
Ottawa	2,301,502	2,020,276
London	1,060,637	972,480
Total	$64,263,855	$65,481,194

HOLIDAY READING.

A FAIRY STORY.

"I say," suggested one man of the group, as we parted for the night at the King Edward, "tell your readers next week about our day at Niagara, and call it 'A Fairy Story,' if you like." "No," said another, "keep it for your Christmas Number, thousands more will read it then. If they do not believe it, that is no more than would have happened to us if we had not not gone over there."

It is not an easy task to put down, in a page, the surprises and adventures of November 12th at Niagara Falls to a party of eight, being seven guests and the guide, philosopher and friend, whom we called His Nibs. But the attempt is worth the making, if it result in no more than the fringe of the affair. For some hours, then, we seven were deprived of all volition, and did merely what we were told—drove here, walked there, climbed yonder, and machinery seemed to do the rest with us. After tramping over a portion of the earth's crust, known as the County of Welland, Canada, acres and acres of a dirty gray rock of most fantastic contour, which had been the bed of Niagara river, and after winding in and out among steam engines and drills, cranes and stone cars, as an auto winds among the traffic of a crowded street, we reached the temporary dam. What temporary dam? the reader asks. The temporary dam of the Electrical Development Company of Ontario, on the Canadian shore of Niagara River.

A terrific wind was blowing, against which it was difficult sometimes for a person to stand up. How much harder was it to walk—gingerly, as unaccustomed and half-frightened people do—along the giddy footing of that impudent wall of timber and stone and puddled clay, with the angry Cascade Rapids leaping at us and calling to us: "How dare you! We will sweep you over the Falls, you desecrators, you and your petty dam!" But along we went, tip-toeing on planks, balking at stringers, holding on to one another when a stronger blast of wind than usual came. We reached and mounted the permanent gathering dam. This massive and solid structure is a straight stretch of concrete faced with granite of say twelve and twenty feet depth and width, its exterior shape, where exposed to the rapids, exhibiting a huge but graceful cyma recta curve.

"Look," said the Laurentian member of the party, "is not this Stanstead granite?" And Mr. Value, the resident engineer, told us that it was. Great hardness is needed to resist the friction of masses of swift-running water, and this material was chosen as the most available. "And what kind of stone will be used for your power-house?" someone asked His Nibs, who was everywhere, seeing to everything, and seeming to bear a charmed life amid these scenes of mechanical distraction and bodily risk. His reply was that this had not been decided upon.

We must see the wheel-pit, so we were told: a great gash cut downward in the rock, close to shore, four hundred feet long and twenty odd feet wide, in the depths of which gigantic dynamos are to revolve and over which the power-house is to be built. How Lilliputian the men looked, laboring with pick and drill in the dripping cave 150 feet below; how reckless those who worked on platforms suspended over the verge or swinging in cages slung from pulleys and wire ropes, dashing down and up with the heedless celerity of a Chicago elevator; how mysterious looked, in the dimness beyond, those huge circular galleries cut in the rock, galleries that were to reach under ground and under water two thousand feet to the Horseshoe Fall! But we could not linger here, being called upon to go and dress in rubber garb for the trip underground. This trip was outlined to us in a large and simple way—they are very unaffected folk, these engineers and contractors—thus: "About 150 feet down in a cage, then walk 440 feet east and then 700 feet south, along our tunnel." We looked at one another. If any of us had qualms he did not dare to say so: our host would be offended, the engineer amused, the contractor contemptuous.

A "Kicker."

Dare, did I say? Yes, one of us dared to be a kicker. This was T. P., who had already had enough of latter-day wonders. He explained that his nerves were prematurely upset, and his head, besides, was swelling and shrinking like an accordion (the result of too much bankers' dinner the night before), that science was getting entirely too nervy in playing such fantastic tricks before high Heaven, that he was a man of the closet, not the Cyclopean cave, in short, that he would see the party participled before he went under the river with them. Therefore we left him in the contractor's hut. It was told us afterward that while we were gone he conversated with the men around—it was the noon hour—upon transcendental philosophy, the simple mechanical powers, the situation of Hades, and the relative merits of Pace's baccy and Quebec-built cigars. Impossible for us to refuse, when we came back from the underworld, a tribute of admiration for the man's pluck, not in refusing to go, but in admitting that he was afraid to go with us. But thar he sot, as the Tennessee girl did, and the classical member of the party phrased it, *et in aeternumque sedebit.* Like the Babu, in Kim, he was frankly and volubly a "verry fearful man." Bravo! Tay Pay the second. Remember for your comfort what Emerson says about robust resolution such as yours: "What forests of laurel we bring, and the tears of mankind, to him who stands firm against the opinion of his contemporaries."

To one who has been down a mine, the trip we now undertook did not seem startling. It was only so many feet in a quivering iron cage downward through dripping rock, and then so many hundred feet per shank's mare along a dry chamber underground. This was all. But suppose a green hand (and some of us were deeply green) every jolt of the cage—every blast shot off in the distance—every warning call of the men who looked like gnomes in the dusk of the excavation—every gust of wind and spray that dashed into the saucy mouth of that tail-race tunnel, sent tremors through him. We were not an imaginative lot, far from it, but if we had been, there would have seemed additional thrills along the nerves and chills down the spine when we thought of the reproachful glances of the genius of the place, aghast at the profanation of her haunts! this intrusion upon her privacy! The girl in green gossamer, the fairy girl, we mean (who is pictured in legend and on the menus of the Prospect House Hotel), variously known as the Maid of the Mist and the Spirit of Niagara, if ever she can get hold of His Nibs and his engineers in their dreams, she will give them a bad quarter of an hour for their temerity.

Stumbling along in the occasional dimness of this particular chamber of a North American Inferno, encumbered with rubber boots as stiff as a frozen sail upon a yard, thinking of Gray's

> Windows that exclude the light,
> And passages that lead to nothing,

one comes suddenly and with an enormous sense of incongruity upon a mule's stable in the rock. This subterranean brute, munching away at his or her hay, turns a calm eye upon the amazed intruder from the upper air, as much as to say: "Hello! Clark Russell, junior, where are you from? Did the Russian naval cannon blow you over here from the Dogger Bank of the North Sea with your heavy-weather fishing togs on? Have you got a certificate of sanity from the Dominion authorities, and a permit from the Ontario Government? If not, you had better go home." The Crow's Nest delegate, who is used to cataclysms of nature, since he lives half his life near Frank, Alberta, comments as he goes along the narrow way, upon shale, conglomerate, seepage, ventilation, winding up with a reminiscence of his church-going or college-going days about somebody or something "casting a dim, religious light." Once in the main tunnel, a thirty-foot circle, the roof timbered as if it had to support the nether world, the sides, if a circle can have sides, as rocky-rugged now as they will be smooth when finished in cement and brick, we walk up stream, feeling the dull concussion of the rapids overhead and hearing, as in a conch-shell, the rush of the Falls, that so entranced Dickens and so aroused the eloquence of poets without number. "Ware car!" and our stalwart Nor' West member takes a world-compelling side step to his left and in silence drags a dazed scribe with him out of the way of a tram-car full of maimed and desecrated palæozoic rocks.

"Hi! Hi! there, no frills, young fellow," called out Nor' Wester to his thinner confrere, when the latter, going down a teetering ladder from upper to lower semi-circle of the tunnel, turned his back instead of his face to the rungs. But Laurentian retorted that he wanted to see where he was going. The Bluenose member of the party, undemonstrative as usual and much absorbed, kept his own counsel as well as his countenance amid "the mystery of all this unintelligible world." We preferred to believe that he was capable of reverence and susceptible to a proper awe. There can be no harm in saying that he carried his compos mentis along with him, however, for he was usually to be found close alongside our underground Mentor, the contractor. "Are there any more blasts going off?" enquired somebody in a lull of noises. No one seemed willing to guarantee that they would not, and there was general assent when a turn was made towards the shaft. Should we ever be here again after the waste water, running out to play after turning the dynamos up yonder, shall flow through where our feet now stand? "Yes," said His Nibs, "of course you will. We shall have galleries suspended along the brick-lined walls bye and bye, and summer visitors will come down here to get cool." As he seldom jokes, this statement, or sally, was received in a sort of enquiring silence.

A Nerve-Trying Exploration.

Driving afterwards over the bridge to the American side, we stopped mid-way to let the *nil admirari* member of the party, who had never before seen Niagara—Nee-ah-garah, thunder of waters—gaze his fill and acknowledge, as he bravely did, the spell of the cataract. Here we heard something of the daring feat performed by one of the company's engineers and his companions in exploring the face of the precipice over which rushes the Horseshoe Fall. Looking at the scene of the exploit from the bridge, it seemed a nerve-trying feat indeed. Afterward, at dinner, this trip and the reasons for it were explained to us, (but only because requested) by the quiet, slender, clean-cut gentleman who had led the exploring party, Mr. Beverley R. Value, resident engineer of the works. It seems that when the exploratory tunnel, begun at the Canadian side and projected eastward 140 feet or more below the surface, had reached a point some 400 feet from the shore and close to the verge of the Horseshoe Fall, it was determined to break through the face of the precipice in order to make sure that there was unimpeded egress for the waste water when the main tunnel should be completed. This done, it was found that some gigantic boulder, or some cross currents of air and water practically barred the opening, for both spray and water rushed tumultuously in. To find out what was the contour of the cliff and what the nature of this obstruction, Mr. Value and two others *walked from the shore along the talus, those four hundred feet, passing between the fall and the face of the rock with thousands of tons of swift water rushing over them!* Talus means the sloping mass of fallen fragments collected at the base of a cliff. (The writer got this definition out of a book. He is determined to be exact even if this is a fairy story.)

"But why, in the name of prudence, should you risk your life on such an errand?" was asked by half a dozen at once. "Oh, well, you see," said this modest hero, "we wanted to give the men confidence." "Exactly!" burst out a classical member, forgetting his dinner, "you did it pour encourager les autres." Fifteen men followed their leader, and all came back alive. Fancy, if one can, these intrepid men clambering, slipping, gasping, wading, flattened against the cliff unable to move, from time to time by the force of wind and water hurled at them, "sounding on their dim and perilous way," foot by foot, yard after yard, in momentary danger of certain death, till their goal, the jagged hole in the rock above them was reached! Nothing that Nansen ever underwent in the Arctic circle, close to the pole, no risk that the Alpine climber ever took, can surpass this achievement of men who went where foot of man had never trod. And all to do what? To find out the why and wherefore of certain things and incidentally to take measurements for a tail-race tunnel. An unbounded curiosity, professional pride, a resolve not to be beat, devotion in the interests of science—any or all these cannot account to the ordinary man for such daring. We did not drink Value's health, as we ought to have done after this recital. Yet, after all, he did not need it, he has health in abundance, nerve to burn, resolution *en masse,* as Jean Baptiste would say. And yet one would think he must gather grey hairs if he persists in such exploits.

The cab-load of critical financio-commercial people, following in the wake of the other cab, which contained the scientific and constructive people, assailed one another with such queries as: 'Can this company furnish electric power, made from Niagara's energy, by wire or cable to distances as great as to Toronto or Brantford? Is there any record of its being successfully transmitted in other countries that far? Will not the winter's ice along the shores, restricting the breadth of running water, or will not the formation of frazil, interfere with the volume of discharge over the cataract and so lessen the quantity of power yielded for manufacturing purposes? "Let us ask the engineer," said one. "No, no," cautioned another, "ask Nicholls; he keeps tab on the whole show day by day and sits up nights in the tunnel." But these questions were never put, for before we caught up with his equipage the hotel had been reached and hunger quenched our curiosity. T. P. had forgotten to be facetious, ceased even to tell stories of Halifax, and while the hair-dresser put bay rum upon his accordion-pleated brow, what was our astonishment to hear him, when it was suggested that we go over to see the completed works on the American side, burst out upon His Nibs in the words of Persian Omar:

> "Oh thou, who didst with pitfall and with gin
>   Beset the road I was to wander in,
> Thou wilt not with predestined evil round
>   Enmesh ———?"

"Nay, nay, Pauline," responded Nicholls, cheerily, "don't fret; there's no compulsion—and besides, we are going in to lunch." What we afterward saw at the American works of the Niagara Falls Power Company, dynamos eight feet across making 250 revolutions per minute on vertical spindles 150 ft. long; chambers so filled with appliances and so charged with electricity that to touch one of them was death; what we learned of current, voltage, electric fields, conveyors, transformers; what we realized of the density of ignorance of the average man (such as we were) in the presence of marvels which to these blue-overalled men about us were as an open book, made us diffident and extremely civil.

"We bankers think we have problems before us sometimes," so one was heard to say to another on the trip; "but our burdens are light compared with the tasks these men set themselves. I shall watch this enterprise with extreme interest." "As for me," said one of his Montreal confreres, "I shall look out at once for some of the bonds." And the remaining member of the group of financiers, unused to committing himself outside of his board-room, was content to say: "These people have done wonders in eighteen months, and assuredly they seem to mean business." After long brooding, the silent member broke out with: "There is nothing impossible nowadays—it's all a matter of *money enough* and the impossible can be done. Was it Archimedes, or was it Galileo, who said: 'Give me a fulcrum, and I will move the world.'"

Niagara Fairies.

Don't ask me ever again, the present writer begged, to go and explore the Cave of the Winds, the stock attraction for a hundred years of the American Fall. What Mr. Value told us of that continuous chamber of the imprisoned winds which he explored from the Canadian shore, has made a new record for show caves. This is the real place, though not the one Sargent was thinking of, "where the scattered waters rave and the winds their revels keep." Is it not Longfellow, relying on the North American Indian legends collected by Schoolcraft, perhaps it is Father Hennepin, who makes the Great Lakes the haunt of the winds of Gitche Manitou, and Niagara their especial rendezvous and source. And indeed what meetings may not Shawandasee and Kabibonokka have had in days long gone, behind that curtain of perpetual mist forever rising at the end of this our Canadian tunnel. Will not some Canadian of 1905 indite, as Thomas Hood did in his day, a plea for the cis-Atlantic fairies who have been so rudely disturbed by Pellatt, Nicholls & Co. Surely the "little people" must not entirely perish. Is there to be, in the modern march of industry, any enchanted land left along this so-long-fabled shore? Or must the whole river echo only to the sound of machinery, and the green forest fringe give place to bricks and mortar in shapes as unsightly as now disfigure the American side? Thanks to the chairman of the Victoria Park, and the good sense of His Nibs' co-directors, there is to be, in the power-house of this latest company, a stately dome, a fane, rising against a tree-clad and historic bank, which will be handsome enough to suggest a library or a gallery of art instead of a place where by means of whirling wheels electricity is collected and dispersed.

Thanksgiving Day, 1904. J. H.

* * *

A GREAT SPEECH BY A GREAT CANADIAN.

The recent unveiling at Halifax of a statue of that eminent son of Nova Scotia, Joseph Howe, reminds us of the occasion when Howe's gift of oratory made a remarkable impression upon the people of Western Canada and of the Northwestern States. In the summer of 1865 a convention of Boards of Trade of the United States and British America was held at Detroit to discuss commercial conditions, transportation, and reciprocal trade. It was a memorable gathering. Forty-two boards sent delegates, and their sessions lasted during four days. Its outcome was the passage, without a dissenting voice, of a resolution in favor of Reciprocal Commercial Intercourse between the two countries. Notice of the abrogation of the reciprocity treaty of 1854 to 1866 had meanwhile been given, a fact which made the subject the more interesting.

On the fourth day, after lengthy discussions and deliverances, the convention was stirred to its depths by a speech from Hon. Joseph Howe, of Nova Scotia, who was present with six other delegates from the Halifax Board. The writer has heard one of the deputies from the Toronto Board, present on that occasion, describe the effect of Howe's great speech. When his third and fourth sentences fell upon the ears of those who hung about the doors or corridors chatting, or even of those engaged in committee-work, there was a curious stillness in the great hall, broken when his second paragraph was reached, by bursts of cheers. The orator had impressed them, as the statesman afterwards convinced them. We give the eloquent opening of the speech:

Howe on International Relations.

I never prayed for the gift of eloquence till now. Although I have passed through a long public life, I never was called upon to discuss a question so important in the presence of a body of representative men so large. I see before me merchants who think in millions, and whose daily transactions would sweep the harvest of a Greek Island or a Russian Principality. I see before me the men who whiten the Ocean and the Great Lakes with the sails of commerce—who own the railroads, canals and telegraphs, which spread life and civilization through this great country, making the waste plains fertile, and the wilderness to blossom as the rose. I see before me men whose capital and financial skill form the bulwark and sustain the Government in every crisis of public affairs. (Cheers.)

On either hand I see the gentlemen who control and animate the press, whose laborious vigils mould public sentiment—whose honorable ambition I can estimate from my early connection with the profession. On these benches sir, or I mistake the intelligence to be read in their faces, sit those who will yet be Governors and Ministers of State. I may well feel awed in presence of an audience such as this; but the great question which brings us together is worthy of the audience, and challenges their grave consideration.

What is that question? Sir, we are here to determine how best we can draw together, in the bonds of peace, friendship and commercial prosperity, the three great branches of the British family. (Cheers.)

In the presence of this great theme all party interests should stand rebuked—we are not dealing with the concerns of a city, a province or a state, but with the future of our race in all time to come. Some reference has been made to "Elevators" in your discussions. What we want is an elevator to lift our souls to the height of this argument. Why should not these three great branches of the family flourish, under different systems of government, it may be, but forming one grand whole, proud of a common origin and of their advanced civilization? We are taught to reverence the mystery of the Trinity, and our salvation depends on our belief. The clover lifts its tri-foil leaves to the evening dew, yet they draw their nourishment from a single stem. Thus distinct, and yet united, let us live and flourish. Why should we not? For nearly two thousands years we were one family. Our fathers fought side by side at Hastings, and heard the curfew toll. They fought in the same ranks for the sepulchre of our Saviour—in the earlier and later civil wars. We can wear our white and red roses without a blush, and glory in the principles those conflicts established. Our common ancestors won the great Charter and the Bill of Rights—established free Parliaments, the Habeas Corpus, and Trial by Jury. Our jurisprudence comes down from Coke and Mansfield to Marshall and Story, rich in knowledge and experience, which no man can divide. From Chaucer to Shakespeare our literature is common inheritance. Tennyson and Longfellow write in one language, which is enriched by the genius developed on either side of the Atlantic. In the great navigators from Cortereal to Hudson, and in all their "moving accidents by flood and field," we have a common interest. On this side of the sea we have been largely reinforced by the Germans and French, but there is strength in both elements. The Germans gave to us the sovereigns who established our freedom, and they gave to you industry, intelligence and thrift; and the French, who have distinguished themselves in arts and arms for centuries, now strengthen the provinces which the fortune of war decided they could not control.

But it may be said we have been divided by two wars. What then? The noble St. Lawrence is split in two places, by Goat Island and by Anticosti—but it comes down to us from the same springs in the same mountain sides; its waters sweep together past the pictured rocks of Lake Superior, and encircle in their loving embrace the shores of Huron and Michigan. They are divided at Niagara Falls as we were at the Revolutionary War; but they come together again on the peaceful bosom of Ontario. Again they are divided on their passage to the sea; but who thinks of divisions when they lift the keels of commerce or when drawn up to heaven they form the rainbow or the cloud? It is true that in eighty-five years we have had two wars; but what then? Since the last we have had fifty years of peace, and there have been more people killed in a single campaign in the late civil war than there were in the two national wars between this country and Great Britain. The people of the United States hope to draw together the two conflicting elements and make them one people. And in that task I wish them God speed! In the same way I feel that we ought to rule out everything disagreeable in the recollection of our old wars, and unite together as one people for all time to come. (Applause.)

I see around the door the flags of the two countries. United as they are there, I would ever have them draped together, fold within fold, and let

"Their varying tints unite,
And form in heaven's light,
One arch of peace." (Applause.)

He thanked the Board of Trade, and the people of the city for the hospitality extended to the provincial delegates, and proceeded to the general exposition of his subject.

* * *

A CHRISTMAS SUGGESTION.

"Somehow," said Mrs. Wiggs, of The Cabbage Patch, "I never feel like good things b'long to me till I pass 'em on to somebody else." And so, at this Christmas Time, when nearly every one is thinking of giving or getting Christmas Presents from relatives and friends, it is well for us to try if we can help to pass along help to persons who need things they cannot themselves procure. There are many worthy charities, public ones in the large cities, private ones in the smaller communities; and these it would be difficult, perhaps ungracious, for us to select or advise upon.

Each man can find, if he will, some person to benefit, some institution to assist with his dollar or his hundred dollars.

One institution, however, occurs to us as filling a crying want and therefore appealing in a peculiar way to those who have money to spare. This is the Free Hospital at Gravenhurst for consumptives. That this establishment is doing a good work is strikingly shown by some figures quoted from the report of the Provincial Board of Health of Ontario. In 1897 the Muskoka Cottage Sanitarium was opened by the National Sanitarium Association, and at the end of the next year 116 patients had been treated. This number was increased annually until by the close of last year more than a thousand patients had been treated, with the result of a proportion of cures of this dreadful malady as gratifying as it was by many unexpected. The deaths in Ontario from tuberculosis had increased in number from 3,154 in the year 1897 to 3,484 in 1900—though in lessening ratio yearly after the opening of the Sanitarium—but declined from the latter maximum figure to 3,243 in 1901, to 2,694 in 1902, and to 2,072 in 1903. Thus the decrease was 241 in the first year; 549 in the second year; 622 in the third year! Toward this welcome result the Muskoka Free Hospital, which was opened in 1902, greatly helped. No patient is refused admission to this hospital because of his or her poverty; but the lack of room for more patients constantly applying impels the trustees to ask for assistance to be enabled to house at least one hundred more. To do this they need money and they need help. This institution and others like it elsewhere have proved that *consumption is curable*. Let every one then assist to stay its ravages and save to the country valuable lives. The wealthy can support their own relatives through the curative stages, but there are hundreds who cannot afford the expense of treatment. It is to save the lives of these last that help is sought. We have knowledge from actual observation of the good work this hospital is doing, and can offer assurance that money given for its assistance will be well applied.

* * *

BANKING AND FINANCIAL ITEMS.

The Crown Co-operative Loan Company, Winnipeg, will apply to the Manitoba Legislature for authority to change its name to the Crown Loan Company, and to increase its capital stock to $1,500,000.

The directors of the St. Lawrence and Chicago Navigation Company have declared a dividend for the current half-year of 3 per cent., instead of 5, as heretofore. The explanation given for the decrease is that vessels have been compelled to accept the minimum rates in which the profit is but small.

The Title Guarantee and Trust Company of Canada will apply next session to the Dominion Parliament for an act of incorporation to carry on a business of a title guarantee and trust company, also for purchasing, selling and otherwise dealing in mortgages, debentures, stocks and other securities, and for the purpose of guaranteeing payment thereof and the title thereto.

The business people of Nelson, B.C., manifested their interest in a townsman some days ago in a striking manner. Mr. A. H. Buchanan, who has been manager of the Nelson branch of the Bank of Montreal for a dozen years or more, has many friends in that Kootenay town. A hundred people came to the Strathcona Hotel one evening this month "to give the genial bank manager a royal send-off," as the News expresses it. An orchestra was provided, and songs and speeches sped the hours. But the most interesting feature of the evening was the presentation to Mr. Buchanan of a solid silver tray, 24 inches square, with his name and the motives of the presentation engraved upon it. The donors were some 120 in number. Mr. Buchanan leaves Nelson to take charge of the branch on the Bank of Montreal in Spokane, Wash.

Our attention is drawn to a statement of the financial standing of Brandon, Man. The expenditure for the current year has been $111,528, the principal items in which were debenture interest, $22,062; public schools, $25,000; license, health and police departments, $12,815; fire, water and light,

January Investments

E. H. GAY & CO., BANKERS MONTREAL

offer the following:

$39,900 Dominion of Canada 3 1-2 per cent. inscribed stock, due Nov. 1, 1913; denomination to suit purchaser: interest payable May 1 and Nov. 1, by cheque to holder, at 98 1-4 and interest, **Paying 3 3-4 per cent.**

$24,928.22 City of Winnipeg, Manitoba, 4s, due June 1, 1911.

$18,235. The total revenue was $15,800, leaving a balance of $95,727. The taxation rate this year is 29 5 10 mills, or 3 mills lower than last year. The estimated expenditure on waterworks is $22,533, and the revenue, $20,000, the deficiency being made up by a special levy. Brandonites pride themselves upon possessing a growing city, requiring large expenditures, but this growth cannot make itself felt until the assessment returns of the coming year, so that the expenditure will overlap revenue in proportion to the increase in the town's size and value of property. In the past two years there has been an increase in the town's assessment of $31,649. The total debenture debt of Brandon is at present $413,053 of which $337,053 bears 5 per cent. interest, $70,000 bears 7 per cent., and $6,000 bears 6 per cent.

WOMEN IN BUSINESS WALKS.

Repeatedly during recent months the Editor of this journal has had requests from women, both by letter and by personal call, for information and advice as to launching into commercial careers of some sort. In certain of these cases advice was not difficult to give, the applicants being so plainly unsuited to business life. In others the case was different. For example, one young person of attractive face and dainty dress wanted recommendation to "an office." She did not understand phonography, had not learned to work a type-writing machine, wrote a cramped, scratchy hand, and spelled badly, but was "sure she could earn her board at once, because Chrissy Blank had got a job and had an easy time." This young creature's idea of the work of a business office was that the hours were 9 to 4, she could get an hour for lunch, and Saturday afternoon off, and so her post would be a sort of pic-nic, with intervals in which to do tatting and read the Family Herald. When asked if she could copy letters, could do banking, could keep books, she confessed her incompetence, but supposed she could learn. "And would you expect pay while you were being taught?" Why, yes, of course; she had heard that girls got five and six dollars a week in offices. This innocent was astonished on being told, what the writer has official reason to know, of a certain commercial office which had a waiting list of thirty girls who were willing to accept $3 and $4 a week for copying and filing away documents and such mechanical work from nine to six, with a half hour's interval at noon for lunch in the office.

A married woman, without children, wished to help a delicate husband by working "in an office." She was full of zeal and hope, anxious to learn "business," and desirous of short hours; but was dismayed to be told that her ignorance of commercial terms and usages as well as of arithmetic, her inability to stay later than a certain hour down town, would stand in the way of any busy office employing her in a commercial capacity. "Well, how is it that Mrs. So-and-so did so well as an office clerk, and made enough to pay her rent?" The answer was that Mrs. So-and-so had had some business training and would work as late as her employer needed her.

A third case was that of a woman of forty, refined and clever, with the advantage of good handwriting and more than usual intelligence. Her desire was an opening wherein to make some money to send her daughter abroad. "Not type-writing, or anything of that sort," but a genteel occupation that a lady might engage in and save money at. It was awkward to have to tell her that positions with emoluments such as she seemed to expect were hard to get and harder to keep when the occupant would have to be taught her duties. That, besides, she must assuredly encounter boorish people, execute irksome tasks, endure the tedium of office routine—all of which are foreign to the nature and wont of lady-like persons. Being asked if she would undertake canvassing, such as the selling of books or maps on commission, she shrugged her dainty shoulders and declared with fervor that she could not bear the idea.

Then there is the woman of uncertain age, who is "willing to do anything," but is really competent for nothing. She insists on believing that she can fill a place in the machinery of a counting-house without aptitude, knowledge, or practice in accounts or other mercantile work. She assumes, poor woman, that her progress in business life must be certain because she is so willing and because she is "sure she can learn." Nothing but disappointment awaits such people.

Pleasant it was, after disappointing experiences, like those described, to find a young woman with modesty and sense combined, who had been grounded well at school in arithmetic and spelling, and had been brought up by her father to know something of business terms and practices, besides being able to do simple book-keeping. She did not know short-hand, "but she could learn it at night school," she said, and she could already operate the type-writer slowly. This girl made no stipulations about hours and was willing to begin at low wages. Now, after two years, she is a trusted hand in the office, is industrious and obliging, rapid at both stenography and typing, makes seven dollars a week with a prospect of more at New Year's, and is happy as the day is long. Not pretty, but bright and obliging: of the sort that impel you to say "Handsome is that handsome does." This is the disposition that business houses want in their counting-houses and this the sort of women who get on.

BREAKFAST FARE.

Among the curious enquiries we receive is one from Cornwall, Ont., in the handwriting, as we should judge, of a woman. She asks our opinion of a certain cereal preparation, its food value, its value as a cure for "nervous fits," whatever they may be, and whether there is, as the writer has been told, "alcohol mixed in with it to make it so strong and queer-tasting." No, we cannot answer K. A. M.'s questions, not wishing either to puff or disparage any particular kind of breakfast food, not having any experimental belief in any as a cure-all medicine. But we may tell her—or him—that the same mail which brought K. A. M.'s letter brought one from a friend visiting a well known sanitarium in the United States; and with this letter came a copy of the *dinner*, not the breakfast, bill of fare at that resort. There are forty-six items on that bill, for it indicates a Sunday dinner. With some thirty of them we have no particular concern, but it may interest our readers to learn how many of the Yankee food notions of to-day are on that menu. Among "Vegetables," eight in number, we find rolled oats and cracked wheat, so that apparently what is ground grain used for porridge in the morning becomes a vegetable at dinner time. Passing on to "Pastry and Dessert," we find under that head manioca pudding (a sort of sublimated cornmeal), grape nuts, granula, postum cereal, triscuit (a cousin to biscuit; any Latin scholar can tell how close), Graham crackers, Graham bread, gluten bread, white bread, "Force," and cream butter crackers. Here is a baker's dozen of farinaceous food stuffs, which bring back boyish memories of Fowler and Wells' publications of long ago, one of whose tenets it was that "Fruits and farinaciæ are the proper food of man." Happily, the fad is a harmless one; and Canadians are not likely to take serious harm from imitating the people of the United States by feeding on medicated or sublimated oats or wheat, expecting thereby to be made regular giants of health. Thank goodness, there are not so many dyspeptics to the thousand among us as among them. And we do not hanker after patent remedies as they do.

SIX DAYS' LABOR.

"I cannot," said Rev. Dr. McTavish, of Toronto, in the course of a home missionary sermon the other day, "understand a small Canadian, with so vast a land, with such wide and growing opportunities. We must take large views of our heritage. And, my friends, we need to lay the foundations of that western country in the truth of the Gospel—to make definite arrangements besides that shall prevent the incoming of anarchy or irreligion. A student from one of the Territories told me no longer ago than last night, this story: In a Western Canada village, not a year old, a missionary was stationed by the Presbyterian body. The people of the settlement came together and agreed that the Sabbath should be observed in the place, and most of them signed a paper to this effect. Presently there came in a settler from the United States, with free-and-easy ideas; who, on the first Sunday after his coming, went to work just as he would do on a week day. The missionary called upon him and told him that this would not answer—when

the newcomer 'got hot,' as the saying is, and wanted to know who was interfering with his 'liberty.' For reply, the minister showed him the written agreement to keep the Lord's Day. And the man had the good sense to see that he could not go against the resolve of the community, so he quietly acquiesced in the arrangement for six days' work a week instead of seven." Our word for it, that man will yet admit, if he does not now, that the provision is a wise one: that no man and no community is permanently the better even materially, to put it on the lowest plane, for paying no attention to a day of rest. And if we assume the higher plane, the furthering of matters moral and spiritual, the question does not admit of argument at all.

* * *

—The plans of J. C. Hunter, and others interested, for the new smelting industry at Fort William, Ont., are being laid on a more definite plan. Besides the smelter there are to be at that point a rolling mill and a steel plant to give employment to 700 or 800 men. The works of the company are to be on the banks of the Kaministiquia river, west of Fort William, at a point where facilities for shipment and for delivery of raw material will be of the best.

Meetings

THE BANK OF OTTAWA.

The thirtieth annual meeting of the shareholders of The Bank of Ottawa was held on Wednesday, the 14th day of December, 1904, in the bank. Among those present were: Messrs. J. Roberts Allan, H. N. Bate, Col. J. Lyons Biggar, R. G. Cameron, Hon. Geo. Bryson, J. F. Cunningham, J. C. Edwards, A. H. Edwards, H. K. Egan, J. B. Fraser, J. D. Fraser, W. H. A. Fraser, Rev. T. Garrett, Geo. Hay, Denis Murphy, M.P.P.; J. L. Murphy, David Maclaren, Albert Maclaren, J. B. Maclaren, Colin Rankin (Mattawa), C. E. Russell, J. G. Whyte.

On motion the president took the chair and the general manager acted as secretary.

The chairman then asked the secretary to read the report of the directors, as follows:—

REPORT.

The directors have pleasure in submitting to the shareholders the thirtieth annual report, showing the result of business for the year ended 30th November, 1904, together with the balance sheet as on that date.

The balance at credit of profit and loss account on the 30th November, 1903, was	$66,343 78
Net profits for the year ending 30th November, 1904, after deducting expenses of management, and making necessary provision for interest due to depositors, unearned interest on current discounts, and for all bad and doubtful debts	357,684 72
	$424,028 50

Appropriated as follows:—

Dividend No. 56, 4½ per cent. paid 1st June, 1904	$111,994 08	
Dividend No. 57, 4½ per cent., payable 1st December, 1904..........	112,413 14	
Applied in reduction of bank premises and furniture	36,289 02	
Carried to rest account	85,000 00	
Transferred to officers' pension fund.	5,000 00	
		350,696 24
Balance carried forward at credit of profit and loss account		73,332 26

The rest account on 30th November, 1903, was..	$2,389,179 00
To which has been added, premiums on New stock issued	25,821 00
Transferred from profit and loss account	85,000 00
Making the present balance	$2,500,000 00

From the statements submitted it will be seen that the bank has shared in the general prosperity which has been enjoyed by the country during the past year.

Since the last annual meeting branches of the bank have been established at Morrisburg and Russell, Ontario, and Virden, Manitoba, with fair prospects of success.

The offices of the bank have been duly inspected during the past year, and the directors record with pleasure their appreciation of the manner in which the officers of the bank continue to perform their respective duties.

All of which is respectfully submitted.

GEORGE HAY, President.

GEORGE BURN, General Manager.

The president, Mr. George Hay, then said:—

The report which we have the honor to submit shows a degree of expansion and success which will be made more manifest in its treatment by the general manager, Mr. Burn, who is most conversant with its details.

I may, however, refer to one item which made its first appearance in the second annual report, presented in 1876, when the sum of $8,000 was carried to the rest account. The following year another equal amount of $8,000 was added thereto, and so on, year by year, with two exceptions, this interesting fund by steady growth has proceeded, until now in this 30th annual report it has reached the sum of $2,500,000, being in amount equal to the paid-up capital, and constituting one substantial factor in the institution's claims on public confidence.

A considerable part of the year has been marked by a partial stagnation in the great financial centres, the chief cause of which was the very serious war yet raging in the East. Its far-reaching possibilities have had a disturbing and depressing influence on the employment of capital, added to which may be noted the political uncertainties consequent on the then impending Presidential election, both of which may well be supposed to have had no little effect on our local staple—the lumber trade, which has not been satisfactory in results, nor very encouraging in its prospects.

The products of the dairy, so important in this vicinity, have met with only a moderately good return, although the improvement in making and the superior means for transport to market in prime condition have created an increasing demand for both butter and cheese of genuine Canadian production. Notwithstanding some partial drawbacks as a general result of the year's operations we can join in a certain buoyancy manifested in business circles, some of the causes for which we may notice, for instance, the continuance of a stream of immigrants of good class; the increased production in the North West, and not least, the now assured immediate construction of the transcontinental railway together with the extension and improvement of the existing railroads, viz.: the Canadian Pacific Railway and the Canadian Northern. These great undertakings necessitate the expenditure of many millions of money, creating a great employment of labor and demand for home products, all of which under any ordinary circumstances must give impetus to all the material interests of the Dominion as a whole for years to come. The question arises when years have come: who is to "pay the bill" of the many millions so quickly spent? We may answer: "The millions of old Europe," who are so quickly cultivating a taste for Manitoba wheat, No. 1 hard. I was interested during a short run made last summer in Great Britain in noticing the diminished breadth of grain cultivation in the few years (eight only) since my last visit, even the canny Scot having so far adopted the white loaf as that his total oat crop consists in but little beyond sufficient for his porridge meal.

But with this "optimism" in the air, would it be "good business" or "good banking" to relax that wise caution which, combined with the aggressiveness expressed in our motto "Advance" has thus far crowned our operations with success?

Before putting the motion for the adoption of the report, the president asked the general manager to address the meeting.

The general manager said:—

The figures of the profit and loss statement show an increase over last year's profits of $22,044. The total liabilities to the public are greater than a year ago by $1,462,442, this amount being made up of increased deposits, $1,199,862.36, and of balances due to correspondents in Great Britain, $314,689.97, which have since been covered, while the circulation is at the moment down $42,714, and the balances due to other banks in Canada and the United States are less by $9,396.19.

The demand for circulation since the crop began to be marketed has been very considerable, and during the past few weeks we have frequently been obliged to circulate the bills of other banks. Many of the banks in the North West do not at this time of year go to the trouble of "sorting" their other bank bills, but pay them out as they receive them.

In common with other banks, we have shared by the increased deposits, in the new wealth which is being created year by year in the Dominion, and to which I will refer more particularly later.

To turn to the assets side of the balance sheet, the cash and balances due from other banks in Canada and the United States are $429,180 greater than a year ago. The securities held by way of stocks and bonds are less by $91,626, the call loans are less by $309,953.12, and the current loans are greater by $1,990,417, thus making a net increase in the loans of about $1,590,000. The overdue debts are $17,387 less than a year ago, and the bank premises $130,581 higher.

The balance of the capital stock has been paid in during the year, and the few fractional shares left over have been sold by the directors, making the paid-up capital $2,500,000.

The number of shareholders has been increased by forty-three, there being now 464 in all. The stock is strongly held.

Turning aside for a moment from the immediate object of the meeting, which has brought us together to-day, I desire to touch on the progress of the country generally, as manifested by the increased volume of business done by the chartered banks.

In ten years their circulation has increased (taking 31st October in each case) from $34,516,651 to $72,226,306, or an increase of 108 per cent. The total deposits have increased from $184,500,382 to $487,774,815, or an increase of about $303,000,000, being 164 per cent., while the loans have grown from $202,000,000 to $416,000,000, or an increase of 106 per cent. The amount paid out for life insurance premiums, which is another form of saving, has about doubled in the ten years ending 1903, from $9,600,000 to $18,300,000.

When we consider that these increases have gone on steadily for ten years, and that the deposits in the Chartered Banks, not including the Post-Office and other Savings Banks, or the Loan Companies, have grown during the past year at the rate of $1,000,000 per week, or $52,000,000 in all, the advance of the country in material wealth is abundantly manifested.

At the same time, it must not be forgotten that in times of inflation the foundation of bad debts is frequently laid, and caution is, if anything, more necessary in prosperity than even in adverse times.

It was then moved by the president, seconded by the vice-president, and resolved: "That the report of the directors and statement now read be adopted and printed for the information of the shareholders."

Moved by Mr. J. G. Whyte, seconded by Col. J. Lyons Biggar: "That the thanks of the shareholders are due, and are hereby tendered to the president, vice-president, and directors for their careful attention to the interests of the bank during the past year." Carried.

The vice-president, in returning thanks, said:

I thank you for your resolution of confidence in your directorate. In regard to the affairs of the bank there is not much left for me to say, but I may add my testimony.

There have been many disturbing financial and political situations in the world during the past year, to which your management and directors have been keenly alive.

These stirred us, if anything, to an even greater diligence in scrutinizing the internal affairs of the bank, and in the study of its relations to the world's finance. The larger our bank grows the more manifold become our several relations to our customers—our shareholders—and our sister financial institutions. It is our ambition to maintain the confidence of all.

A wise regard for an even balance of our forces to meet all contingencies is not forgotten. Our aim is stability.

Moved by Mr. J. C. Edwards, seconded by Mr. J. L. Murphy: "That the thanks of the shareholders be tendered to the general manager and other officers of the bank for the efficient manner in which they have performed their respective duties."

The general manager replied briefly on behalf of the staff.

Moved by Rev. Thos. Garrett, seconded by Mr. Colin Rankin, "That a ballot box be now opened and remain open until five o'clock for the election of nine directors for the ensuing year, and that Messrs. J. F. Cunningham and J. D. Fraser be appointed scrutineers, the poll to be closed whenever five minutes shall have elapsed without a vote being tendered.

The scrutineers reported the old directors re-elected.

At a meeting of the newly elected directors, held subsequently, Mr. George Hay was re-elected president, and Mr. David Maclaren vice-president for the ensuing year.

STATEMENT OF BANKS acting under Dominion Gov't charter, for the month ending 30th Nov., 1904.

The Quebec Commercial Travellers' Association has elected the following officers for the ensuing year: President, V. E. Beauvais; first vice-president, J. B. Poirier; second vice-president, Ovide Hamel; secretary, J. Lavergne; assistant secretary, J. B. Lemieux; treasurer, J. T. Lachance; directors, L. Letellier, C. J. Lockwell, A. A. Almeras, R. U. Godin, C. Garant.

* * *

DOMINION COMMERCIAL TRAVELLERS' ASSOCIATION.

The membership of the Dominion Commercial Travellers' Association we are told, now numbers 4,815, of whom 762 joined last year, the largest year increase ever made. This was the report made by President J. S. N. Dougall and presented at the annual meeting on Saturday night, 17th December, in Montreal.

Financially, the Association shows up well, the capital account aggregates $242,491.15, of which $19,543.85 was added during 1904. No less than $32,725 was paid in settlement of death claims, under the Mortuary Benefit scheme.

As the three chief officers had already been elected by acclamation, it remained to choose five directors out of ten members nominated. The following were appointed: J. Rousseau, J. Patterson, W. H. Hayes, F. Duggan, G. Brooks.

An effort will be made to persuade the Dominion Government to change Thanksgiving Day hereafter from Thursday to Monday; in this effort the other associations will be asked to cooperate. The objection to Thursday is that the holiday cannot be enjoyed by men who are on the road, and cannot afford to make two trips home in the week. This difficulty would be obviated by a change from Thursday to Monday.

* * *

A DISTINCTION.

Foreladies rule the dry goods shop;
  Salesladies stand behind
The counter and prepare to chop
  Two yards off any kind.
Cashladies wander up and down
  The long and crowded aisles;
The lady manager in brown,
  Displays the latest styles.
Typewriting ladies, proud and chill,
Sit ready to make out the bill.
Fine ladies all—but who are those?
Just women come to buy some clothes.

—Cincinnati "Commercial-Tribune."

* * *

And what if Trade sow cities
  Like shells along the shore,
And thatch with towns the prairie broad
  With railways ironed o'er?

—Emerson (World-soul).

Mercantile Summary.

Hull, Que., last week lost a well known citizen in the person of Theophile Viau, the contractor, who died of consumption of the throat at the age of 57. He did a large share in the construction of the local waterworks.

The Dominion Government has awarded the contract for the new Post-Office building at Winnipeg to Thomas Kelly, of that city, the price being $529,000. It has also awarded the contract for a new immigration shed at Halifax to John McInnes, of Halifax, for $75,000.

Peterboro is a large and active place, with growing manufactures. We notice a recent partial statement of the town's finances from which it is gathered that the municipal receipts for the year 1904 have been $158,184, and the expenditures $156,000. The taxes raised were $106,595.

—The William Davies Company, packers and provision merchants, of Toronto, are making plans to establish an extensive branch of their business in Montreal. They are leasing from the Montreal Stock Yards Company, three and a half acres of land, and propose to build a packing house on this property. They also purpose to operate stores in the city of Montreal. It is their intention to kill both cattle and hogs there.

The Farmers' Advocate and Home Magazine is one of the best conducted of the many journals which come to our table each week. In the Christmas number, however, it excels itself, the pretty cover and the sixty-four pages enclosed within being equally well-appearing and well done. There is no more important class in the community than the Canadian farmer, and the paper now under notice does much toward helping him to realize the fact in earnest, and to teach him how to fill that position to best advantage. Besides articles setting forth in clear language, various points in the science and art of agriculture, there is much in the Farmers' Advocate of a general character to interest the farmer's home circle.

Illustration is getting to be a feature of modern publications. And the skill with which many pictures are reproduced is astonishing. There are full page halftones of two representations of the Madonna and Child in the Christmas Number of the Canadian Churchman, one the Carlo Dolci picture in the Pitti Palace, the other by a later artist, which are excellent. And the "Adoration of the Magi" in the advertisement of Robert McCausland, does credit to both designer and printer, while the dozen other pictures are of interest. Type and paper are clear, and the Monetary Times presses have done their work well. Two of the papers we have read, "Christmas in the Church," and "Christmas in the Home." Mr. Wootten has placed the price of this handsome piece of Christmas literature at twenty-five cents, and he ought to sell hundreds, in addition to his regular circulation.

Mercantile Summary

It is announced that the Kingston Locomotive Works have received from the Canadian Pacific Railway an order for ten more mogul engines, to be completed within the next ten months.

What is described as the latest passage through the Welland Canal since it was opened is that of the steamer "Wacondah." The last boat to pass down the Welland Canal, left Port Dalhousie at four last Friday, with wheat for Kingston.

It is announced that Government has purchased two post-office sub-station sites in Montreal. The properties are on St. Catherine and Cathedral streets. The St. Catherine Street site is near University Street. The lot has a frontage of seventy-five feet and a depth of ninety feet. The price was about $37,000. The Cathedral Street lots comprise 13,393 square feet. The price was about $48,000. The contract for the pneumatic tubing has been let.

For the first time in marine history, says a New York letter, the task of towing a laden barge 15,000 miles, from New York to the California coast, was begun on the 16th. Both the barge and the towing steamer, the Standard Oil Company's tank steamship "Atlas," are laden with cargoes of oil. The cargo of the Atlas will be used as fuel on the voyage. It is expected that the trip will occupy from seventy to eighty days. It is the intention to avoid doubling Cape Horn by going through the Straits of Magellan.

A permanent board of directors for the Canada Car Company, a large industrial concern, organized several months ago, was elected last Friday in Montreal. The directorate is composed of Sir H. Montagu Allan, H. S. Holt, E. L. Pease, of the Royal Bank of Canada; Frederic Nicholls, of the Canadian General Electric; F. N. Hoffstot, president, and J. N. Friend, vice-president of the Pressed Steel Car Company, and W. P. Coleman, of the American Car & Foundry Company. The directors appointed W. P. Coleman president and general manager, and Sir H. Montagu Allan vice-president. The company has been organized with a capital of $3,000,000, half of which has been subscribed in Canada and half in the United States. The company has some thirty acres at Turcot, and the foundations of their new shops are already completed. They will build freight and passenger coaches, and have already entered into a contract with the Grand Trunk Pacific for fifteen cars a day for five years. They expect to employ 1,000 men. "We expect to be turning out cars by next August," Mr. Frederic Nicholls, of Toronto, said last night. "We are all set now, and we are going to make things hum." The company has, during the last fortnight, it is said, let more than $300,000 worth of jobs. Competition was keen, tenders coming in from many American companies. Nearly all the contracts, however, went to Canadian companies.

A PRESENT OF A
SUIT CASE
is a present that will last many Christmas days. It is easy and a pleasure to choose a Suit Case from our stock because we have variety, and every case is so well finished that one is easily satisfied. ∴ We make all sizes, all colors and all qualities. ∴ Prices are from

The Campbell Lumber Co., Limited. Weymouth, N.S., is under a charter from the Dominion Government, authorized to manufacture and deal in logs and lumber of every description, and to develop and operate water powers, electric lighting plants, etc. Mr. G. A. Kohl, of Montreal, is a prominent member.

Mercantile Summary.

The Canada-Middlesex Railway Company purposes to construct a railway from some point on the Niagara River to London.

—The United Lumber Company, Limited, of Montreal, capital $250,000, has received a Dominion charter giving it power to acquire the assets and business of the Three Rivers Planing Mills.

—The Steel Radiator Company, Limited, of Toronto, has been incorporated under Ontario laws. Its capital is stated at $500,000. Among the directors are C. E. Safford and J. G. Smith, of Toronto.

The London & St. Clair Railway Company proposes to apply to the Dominion Parliament for power to construct and operate a railway from somewhere on the line of the Ontario and Quebec Railway west of London to Sarnia, or some point between that place and Lake St. Clair on the St. Clair River.

T. S. Beilby & Co., jobbers of millinery, etc., Ottawa, a concern which has been in existence only since June, 1902, has become involved. They assigned last week, after frequent suits had been instituted against them, and now propose to pay a composition of 35 cents on the dollar.

It is proposed to wind up the Ottawa Milling Co., Limited, a concern which was incorporated in 1900 with a capital of $40,000, an amount which was subsequently increased to $99,000. It is understood this decision was arrived at by the shareholders owing to the difficulty in securing a suitable manager.

A Montreal clothier named B. Todorofsky, is reported in embarrassed shape, and is said to have made an offer of 20 cents in the dollar to some of his creditors.——Adrien Chartrand, of the same city, a dealer in boots and shoes, has arranged to pay 60 per cent. cash, on liabilities of $7,100.——Ovila Chicoine, also a boot and shoe retailer, of Montreal, is trying to compromise at 25 cents on the dollar.

We note, under the heading of applications to the Dominion Government, one from the James Bay Railway Company to change its name, and to authorize it to lease or otherwise acquire the lines of the Quebec, New Brunswick, and Nova Scotia Railway Company, and to amalgamate therewith, also to build the following lines: From a point on the company's line south of Lake Muskoka, thence easterly to Montreal, passing through or near Ottawa, with branches to Ottawa and Hawkesbury. 2. From a point at or near the French River, thence easterly to Montreal, passing through or near Ottawa, with branches to Ottawa and Hawkesbury. 3. From a point on the company's line at or near Sudbury, thence westerly and south of Lake Nepigon to a point on the Canadian Northern Railway west of Port Arthur, passing through or near Port Arthur, or with a branch to Port Arthur.

Mercantile Summary.

An estimate made of the present season's lumber cut in Georgian Bay region places it at two-thirds that of last year.

W. J. McDonald's general store and bakery at Reserve Mines, Glace Bay, C.B., have been destroyed by fire at a loss of $20,000. Insurance less than one-half of that amount.

The Canadian Northern Railway purposes to use a fleet of steam boats on the Upper Lakes to bring down to French River the freight brought to its western branch to Port Arthur. Thence it will go east to the Atlantic, by way of the Intercolonial.

The Iron & Steel Company of Canada's rolling mills at Belleville, Ont., were on the 16th inst., offered for sale at public auction, but the bids offered, which were $25,000 and $50,000, did not come up to the reserve price, and the sale was declared off. In the meantime private tenders are invited.

The Canadian General Electric Company is making a shipment to the Mexican Light & Power Co., Mexico City, of two steam turbine engines, of a capacity that will provide 500 kilowatts of electric power; the first, is is believed, ever used in that country. They will furnish about 1,300 horse-power.

St. Michael's Church at Belleville, Ont., was on the 17th inst., completely destroyed by fire. The church was almost new, and cost $80,000, besides which there were some very fine stained glass windows, the organ, and other furnishings, which would bring the loss up to almost $150,000. It was only partially insured.

The Buckingham Electric Railway, Light & Power Co., will in future be known as the Lievre Valley Power, Traction and Manufacturing Company. It is endeavoring to obtain power from the Quebec Legislature to extend its lines already authorized; also to mine, manufacture, and deal in ores, minerals, chemicals, etc., and to carry on a general business as shipowners, wharfingers and warehousemen.

The excellence of the Canadian telegraphic route has again made itself manifest during the present war. In October, a correspondent of the London Daily Telegraph forwarded via the Commercial Cables and the Canadian Pacific Railway telegraphs, one message of over 20,000 words describing operations in the Far East, and an editorial declared it to be due to the Commercial Cable Company to say that this dispatch of over 20,000 words was telegraphed from Vancouver to their office with remarkable rapidity and accuracy; indeed, almost without a slip. The other day the Telegraph published another long despatch from its special correspondent with the besieging army before Port Arthur, which was despatched from Feng-hwang-shen camp in front of Port Arthur, and cabled from Vancouver.

TENDERS.

Tenders will be received by the undersigned up to 6 o'clock on Jan. 20th, 1905, for the purchase of $35,000.00 bonds of the Wetaskiwin Public School District No. 264, of the North-west Territories, repayable at a chartered bank in Wetaskiwin, in thirty equal consecutive annual instalments with 5% interest on the unpaid principal, interest payable yearly. First payment of principal and interest will be made January 2nd, 1906. Vendors are to receive accrued interest to payment of purchase money.

J. STACEY ORR,
Sec.-Treas. Wetaskiwin S. D.
Wetaskiwin, Alta.

The Manitoba Pressed Brick Company, Limited, Winnipeg, capital, $60,000, has received a charter from the Manitoba Government.

The Canadian Pacific Railway has given a contract to a Glasgow firm for building three large steamers of high speed for the Atlantic trade.

A contract has been given, it is stated, to Andrew Weir & Co., of Glasgow, Scotland, for two steamers for the Canada-Mexico trade, having capacity of 4,500 tons of freight each, and of 50 first-class and 300 or 400 steerage passengers. The Mexican and Canadian Governments will each give a subsidy of $50,000.

"Unlisted Securities, Limited," is the name of a newly incorporated company under the Ontario regulations, which will have for its object the purchase or other form of acquisition of bonds, debentures, shares in the capital stock of corporations, etc. Share capital will be $40,000, and headquarters at Toronto, W. E. Watson and L. J. West, of Toronto, are named as provisional directors.

The Midland Railway, of Nova Scotia, which has a line from Truro to Windsor, will on January 1st next, be taken over by the Dominion Atlantic Railway, having been purchased for $1,250,000. The latter road thus obtains a valuable connecting link with the eastern end of the province. The former road will probably be extended to some point on Northumberland Strait, from which a line of steamers to Prince Edward Island will be operated.

MANAGER WANTED.

Applications will be received for the position of Manager for the Province of Nova Scotia for the **NORTH AMERICAN LIFE ASSURANCE COMPANY,** rendered vacant by the death of Mr. H. S. Wright.

This affords a splendid opportunity for a gentleman having the necessary qualifications for managing and extending the business of this most desirable Agency.

Communications will be considered as strictly confidential.

Address, Mr. T. G. McCONKEY,
Superintendent of Agencies, Toronto.

Many Happy Returns of the Day.

The Keewatin Flour Mills Company will shortly build another large mill, with elevators, barrel factory, railway siding and every facility for operating a concern of 5,000 barrels' capacity.

For some time past there have been reports in Victoria, B.C., to the effect that the Great Northern Railway were about to abandon their interests in that city. This is now authoritatively denied. The Canadian Pacific also will make good their hold there, and will continue on an improved scale its car ferry service between Victoria and Vancouver.

The Cramp Steel Company, Collingwood, has now been reorganized on a different basis and under the title of the Northern Iron & Steel Company, which is expected to begin operating the plant at an early date. This consists of two open hearth steel furnaces, with a complete equipment for making basic open hearth steel at a rate of about one hundred tons per day; rolling mills of the most modern type, capable of rolling double this amount of material every day into sizes suitable for the Canadian trade. A small mill is laid out for the purpose of rolling wire rods on the Belgian plan, and also to take care of a mixed product, such as bolt iron, nut iron, small angles, etc.

The firm of Marchand & Co., general dealers, at St. Stanislas de Champlain, Que., have assigned, owing about $2,500. Dame Eugenie Dessureau, wife of F. N. Marchand, has been of late the legal proprietress of this business, her husband having been twice unsuccessful in the past.——J. A. Authier and S. Charette, doing business at La Macaza, Que., in the county of Ottawa, under the style of La Macaza Lumber & Timber Co., have assigned. Authier was previously a blacksmith and implement agent, and Charette was a few years ago unsuccessful as a general merchant at The Brook, south of Ottawa.——An assignment has been made by J. O. Godin, tinsmith, etc., Ste. Flore. He has been some ten years in business, but of late had been often sued on account of his lack of promptitude in settlements.——W. J. Steele, general merchant at Calumet, Que., lately reported in these columns as insolvent, is seeking a compromise at the rate of 25 cents on the dollar, cash.——T. Bastien, of Ste. Therese, Que., a blacksmith by trade, should evidently have stuck to his anvil. Three years ago he started storekeeping, and last summer he was obliged to compromise at 40 cents on the dollar. Now he has assigned.——We recently noted the assignment of Dr. A. Fournier, who carried on a drug shop at Ste. Anne de Beaupre, Que. He now is before his creditors with a proposition to pay them 35 per cent of their claims for a discharge.——Adelard Bergeron, dealing in groceries and liquors, at Iberville, Que., has assigned. He has been in business since 1899, but has been often found slow pay. His estate is offered for sale by the curator.

A RECOMMENDATION TO GEN. SPINNER.

Applicants for Government positions under the civil service have a more or less discouraging time of it. It was not so in the olden days, when positions were first thrown open to women during the Civil War. Here is the story of the appointment under General F. E. Spinner of one who is still a clerk in the Treasury Department.

"It was in 1864," she said, "two years after the appointment of women had become a permanent thing, I was in Washington visiting a sister, I made up my mind that I wanted a position, and so, without saying a word to any one, I went to the Treasury and made my own application. I simply walked into the General's office, and said:

"'General Spinner, I would like a position in the Treasury." The general looked up carelessly, and then went on with his work.

"'How long have you been in Washington?" he asked.

"'Three years."

"'What influence have you?' he asked.

"'What influence?' I stammered. 'I don't know what you mean.' I was beginning to get embarrassed.

"'Yes; influence,' he said. 'What Congressman do you know?'

"'I don't know any,' I faltered. This time the general threw down his pen, leaned back in his chair and looked at me.

"'You've been in Washington three years and don't know any Congressman?' he queried. 'Good! That's recommendation enough. The position is yours.'"

DELAYS ARE DANGEROUS.

are by far the BEST, CHEAPEST and MOST COMPREHENSIVE in the market.

Full Information Freely Given.

A. C. C. DINNICK, Managing Director.

The British Canadian Loan & Investment Company, (Limited.)

Dividend Number 54.

Notice is hereby given that a Dividend at the rate of Five per cent per annum on the Paid-up Capital of the Company, for the half-year ending 31st December, 1904, has this day been declared, and that the same will be payable on the Third Day of January next.

The Transfer Books will be closed from the 20th to the 31st proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL,
Toronto, 10th November, 1904. Manager.

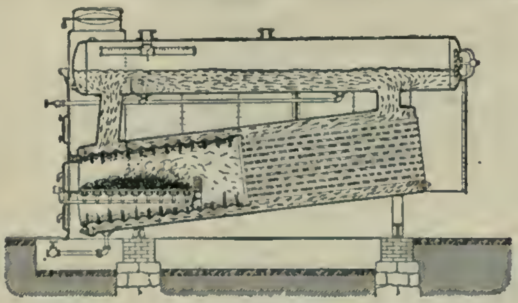
HOW IT WENT.

Buffalo Courier: Thomas A. Edison was one day explaining an intricate machine to a newspaper writer.

"Do you understand?" Mr. Edison would ask. And, a moment later, "Now, do you understand?"

The poor journalist tried to follow the

Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler the heat is transmitted directly to the water; and air cannot get into the furnace except through the regular drafts. This makes a saving of at least **Ten per cent.**

swift sentences of the inventor, but the effort was vain. Every little while he would have to stop and say that just there, he did not quite understand; and then sighing, Mr. Edison would begin all over again.

"I know I am very green as regards machinery," the poor journalist said, apologetically.

"Oh, no, I have seen greener," said Mr. Edison. "Did I ever tell you about the fireman I once met in Canada?"

"Well, in a certain Canadian town where I was running a telegraph office in my youth, a new factory, with a very fine engine house was put up. I visited the factory one day to see the engine. The engineer was out, and the fireman, a new hand, showed me about. As we stood admiring the engine together, I said:

"What horse-power has this engine?"

"The fireman gave a loud laugh.

"'Horse-power?' he exclaimed. 'Why man, don't you know that the machine goes by steam?'"

⁂

CALENDARS.

A week or more before Christmas the calendars for the year 1905 began to come in from our friends and customers. And the first ones that reached this office were among the prettiest. A charming and a natural scene is the picture of "The Winner," in the calendar of the Moffat Stove Co., at Weston. A capitally-colored group of four girls in the cockpit of a yacht are guiding her to the goal in front of half a dozen other yachts. Another pretty production is the picture of "Her Ladyship," like a portrait by Greuze, with the face of a marquise and the tangled red hair that novelists delight in. This is from the Great West Permanent Loan Co., of Winnipeg.

Mr. R. W. Tyre, manager for Canada, and Mr. E. P. Pearson, Toronto agent, of the Northern Assurance Co., of London, England. This company's calendar for 1905, under the caption, "Canada, the Land of Promise," represents a crimson-robed female, her head crowned with maple leaves, holding open gigantic gates beyond which are to be seen prairies and rivers and low hills. The meaning is plain—"Enter in and possess the Land."

⁂

MONTREAL MARKETS.

Montreal, 21st Dec., 1904.

Ashes.—Offerings are few, and though the present demand is very light, values are well maintained, and first quality of pots still bring $5.90 to $5.95; seconds, $5.40 to $5.45 per cental. Pearls are quoted approximately at $7.50 to $7.75, but there has been no recent business to establish a definite quotation.

Boots and Shoes.—Most of the factories intend shutting down next week for the customary ten days' holidays, which the operatives take at this season, and meanwhile business is on the quiet side. Wholesale manufacturers do not relish the prospect of an advance in price of leather, such as tanners are talking of.

Cements and Firebricks.—Business in these lines is practically dead at the moment, owing to the approaching holiday season, and the quite severe cold spell which has prevailed during the past two weeks. Quotations are steady at $1.85 to $2.05 for Belgian cement; English, $2 to $2.20; American, $1.90 to $2.15. Firebricks. $18 to $23 per thousand, as to brand.

Dairy Products.—There were shipped last week via St. John, N.B, and Portland 15,640 boxes of cheese and 2,000 packages of butter, making the total exports since the close of navigation. at Montreal 76,614 boxes of cheese, and 9.598 packages of butter. The Liverpool cheese cable is sixpence higher, and holders are very firm in their quotations for choice quality, declining, it is said, 10½c. The market for butter is, if anything, stronger, and fine dairy commands 17½c.; for fine to choice creamery, 21¼ to 21¾c. is asked locally.

Dry Goods.—In a wholesale way there is comparatively little doing, and travelling salesmen are all at home for the holidays and for the revising of samples before starting out afresh after the New Year. Snow roads, which are needed to make country trade really brisk at this season, are still lacking in a good many sections of this district, but retail payments are said to be well kept up. A feature of the week is the ac-

Manufacturing Premises in St. Catharines

FOR SALE OR EXCHANGE.

BRICK—about 40,000 square feet floor space, centrally situated on line projected Electric Road—Electric Power at reduced rates — competitive freight rates—Rail v. Water—about one acre land — good drainage adjacent to Canal—Boiler and Engine. Will exchange for Manitoba or other property.

33 Scott St., Toronto.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company s Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359 per day in number of Claims Paid.
6,297 per day in number of Policies Issued.
$1,303,559.06 per day in New Insurance Written.
$98,582.76 per day in Payments to Policy holders and addition to Reserve.
$53,841.18 per day in Increase of Assets

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government, for the protection of Policy-holders in Canada, $1 800,000.00.

Managers and Underwriters.

quisition by parties interested in the Robert Simpson Co., of Toronto, of a controlling interest in the John Murphy Co., Limited, of this city, and a change of style will go into effect on February 1st next. The amalgamation of the Dominion Cotton Co., the Montmorenci Cotton Co., the Merchants' Cotton Co., and the Colonial Bleaching and Printing Co., is said to be now practically an accomplished fact, but no immediate effect on prices is looked for.

Furs.—We have nothing new to report in this line, and repeat quotations for prime skins as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall, 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50; short stripe, $1.10; long stripe, 60c.; broad stripe, 20c.

Groceries.—The market for molasses has assumed a firmer phase, due largely to further extensive buying of stock by

Have You Applied For Your Share of the Seventy Million Dollars

which will be distributed throughout Manitoba and the Territories within the next few months? The general merchants in these provinces will handle almost all of this money. Make application to them for your share through their own and the only trade newspaper which interests them.

Within the past year 160,000 new possible buyers of your goods settled in the West. Will the retail merchant offer them what you have to sell?

Established 1882

THE COMMERCIAL

The WEEKLY FINANCIAL, COMMERCIAL & GENERAL TRADE NEWSPAPER of the GREAT WEST

THE HUGH C. MACLEAN CO., LIMITED, Publishers, Winnipeg.

SEVEN TO ONE

That is about the ratio. About seven times as many persons are injured as die from all causes yearly.

Accidents are a more prolific cause of death than any disease except lung diseases.

Twice as many people are accidently killed as die of old age.

Does it not seem reasonable to you as a business man that it would be to your interest to carry an accident policy?

WRITE THE

MANAGERS.

the local sugar refiners, who, owing to the high price of raw sugars, can utilize molasses for refining purposes at a fair price. One purchase of a 500-puncheon lot was reported yesterday, and first hands are now practically cleaned out of stock, while nothing in the way of new supplies can reach here before March. Advices also from Barbados regarding the new crop are not wholly favorable. Owing to a dry season, the canes are said not to be in as thrifty a condition as they should be at this time, and a crop shortage is anticipated. A letter just to hand says that the local market is expected to open at 16c. per gallon, a figure equal to 29 to 30c. laid down. The local jobbing price for single puncheons has been generally advanced to 30c. No further change is reported in the sugar market, which is very firm. Both local refineries quote $5.35 for standard granulated, in barrels, with $4.75 the lowest in yellows; bags, 5c. less. In other lines of groceries nothing specially new is reported.

Hides.—The local hide market is, if anything, firmer, but hardly quotably so. Dealers are buying No. 1 at 9c. per lb. and generally quoting 9½ to 10c. to tanners, though getting a little more in some cases for steers. Lambskins are steady at $1.10 each.

Leather.—There is but a limited demand from boot and shoe manufacturers at the moment. Free shipments of sole to Britain are still going forward via St. John and Portland. Tanners claim that values are likely to undergo some revision in the way of an advance in the near future, but former quotations hold in the meantime.

Metals and Hardware.—The report of last week will exactly fit the situation at date, and there have been no changes in local prices. Canada plates are again cabled a little up in Britain, but $2.30 for fifty-twos is still the local base figure.

Oils, Paints and Glass.—Matters are very quiet in these trades at the moment. Turpentine is a cent off, being now quoted at 77c. per gallon by the single barrel. Linseed oil is easy at 43c. for raw, and 46c. for boiled. Leads are somewhat firmer owing to the late strength in pig lead, and prices are not now much cut below $4.40 for pure. Window glass firm at former quotations.

* * *

TORONTO MARKETS.

Toronto, December 22nd, 1904.

Chemicals, Drugs, etc.— Some degree of quietude characterizes the drug market this week, as is often the case at this season of the year. Opium and quinine remain in the same position as reported last week. Many of the vegetable drugs are advancing. New York advices speak of no new feature in either drugs or chemicals. From Manchester comes word of an improving tendency in both the home and export trades.

Dry Goods.—Seasonable goods of all kinds are in great demand, and the retail stores are having a very busy time. Purchasers are making a greater point than ever this year of quality as a feature of their buying. Woolen goods are exceedingly strong, and further advances may come to hand any day. In cottons there is no particular change, but there is little sign of slackness.

30,000 Policyholders who carry $40,000,000 Insurance in

Head Office—WATERLOO, ONT.

The Mutual Life OF CANADA

think it an

Ideal Company

BECAUSE OF ITS

(a) Reasonable Premium Rates.
(b) Guaranteed Cash and Paid-up Values.
(c) Liberal Policy Conditions.
(d) And Expanding Dividends.

Agencies in all principal Towns and Cities in Canada.

Flour and Grain.—Business in the flour market is fair, but the market is on somewhat an unsettled basis, and sales are made within a somewhat wide range of prices. The ruling quotation for ninety per cent. patents is about $4.30 in buyers' sacks, east or west, with a few cents higher for extra choice goods. Millfeed is rather easier in price. Oatmeal has made no change. In grains, no price changes have been made since last week. Business is quiet, and receipts from the country small.

Hides, Skins and Leather.—Sole leather has advanced about a cent, in keeping with the improvement in the demand. In spite of this advance, however, hides remain as before, without an advance, though prices keep firm. Lambskins continue high-priced. Deerskins are still rather scarce. Calfskins are steady.

Live Stock.—The quality of cattle brought to local market this past week or two has shown marked improvements, and the immediate results ensued that there was a considerably increased activity in demand. Some very good exporters were shown, though not very much business has been done in this line. In butchers' few fancy have come forward this week, but the standard has been fairly good and trade active. Sheep and lambs made their appearance in large numbers, but demand was brisk, and all were cleared out pretty quickly.

Provisions.—Creamery print butter is somewhat scarce and prices for it and other grades of butter firm. Cheese is firm at the recent advance. Fairly large quantities of poultry is coming in for Christmas. Quotations are steady. The dressed meat market is firm.

Wool.—There is no change in the very firm feeling for wool.

Another Milestone

Has been passed in the successful history of The Canada Life Assurance Company. Ten years ago the Company issued Policy Number 60,000. Now Policy Number 100,000 has been paid for. While 60,000 policies represented the growth of 47 years, the past ten years have alone produced two-thirds as many.

In assets too, there has been a proportionate growth.

For The Canada Life.

PEOPLE who admire substantial growth will be delighted with the record of the Sun Life of Canada for 1904. This Company has had many great years, but the year that is closing is the greatest.

——Have you seen the leaflet "From the Blue Book"? It shows at a glance why the Company is proclaimed "Prosperous and Progressive."

SMELTING WORKS IN BRITISH COLUMBIA.

Second Paper.

Continuing our reference, begun last week, to the subject of smelting works in British Columbia, taken from a paper by Mr. E. Jacobs in official Bulletin No. 19 of the Province, entitled, "Mining in British Columbia," we refer now to the smelters on the Pacific Coast of that Province.

It appears from a quotation made by Mr. Jacobs from the London, England, Mining Journal, on "British Columbia as a Source of Copper," that the cheapest smelting practice extant is in British Columbia. This journal quoted says so explicitly, and adds that the distinction of having established it applies to the Boundary smelters. They were thus successful largely because the ores they use are relatively self-fluxing. These are at Grand Forks, Greenwood and Boundary Falls. The first, on the north fork of Kettle River, belongs to the Granby Consolidated Company, and has treated since established in 1900 over 1,320,000 tons of ore. The bulk of the ore treated comes from the company's mines. The buildings are substantial, the equipment modern and complete. This is probably the largest smelting works in Canada.

The British Columbia Copper Company's smelting works at Greenwood were built in 1899-1900; the first furnace being blown in February, 1901, the second in 1902, capacity, 700 to 800 tons ore per day; a Bessemer plant has since been added. The Mother Lode mine furnishes most of the ore, and the company uses electric power from the Cascade station at Phoenix, five miles distant. The company is a New York organization.

Boundary Falls smelter blew in its first furnace June, 1902, its second May, 1903, each having a capacity of 300 tons. The works are driven by steam, and are immediately alongside the Columbia and Western Railway. The works were closed down in December, 1903, to reopen the following summer.

The Coast smelters are described on pages 151 to 153; they are the Van Anda, the Crofton, and the Ladysmith. "The first smelter erected in the Coast section of British Columbia was that built at Vancouver, but this can hardly be regarded as having been seriously intended for the reduction of ores, as there was not a single mine in British Columbia at that time sufficiently developed to warrant it. In fact, lode mining was in its merest infancy, and, apparently, the lead mine at Field, which was never worked since, was depended upon for a supply of ore. The Field mine has almost been forgotten. The inside history of the smelter at Vancouver may never be written; but, whatever its real purpose, the fact remains that it was not long operated, if at all. It was supplied with a 75-ton lead stack which eventually, in 1900, was removed to Van Anda, Texada Island, and there altered and used for copper-ore smelting."

The first smelter built on the Coast was at Vancouver, when lode mining was in its infancy, and apparently the lead mine at Field was relied on to supply it with ore. It had a 75-ton lead stack, and was not operated long, if at all. In 1900 this stack was removed to Van Anda, on Texada Island, in the Strait of Georgia, about seventy miles north-west of Vancouver. Mr. Kiddie, formerly with the Orford Copper Co., New York, began in 1898 the construction of a furnace on that Island for the Van Anda Gold & Copper Company, which in 1899 had smelted 5,000 tons of ore. Next year the furnace from Vancouver was brought over, and 9,527 tons was smelted; in 1901 only 3,016 tons, and since that time the works have not been operated, Van Anda ore being treated at Vancouver.

The establishment at Crofton of the Northwestern Smelting and Refining Co., on the eastern shore of Vancouver Island, is a concern of very considerable size, and is in charge of experienced men. It treats the ore of the Lenora Mine at Mount Sicker, brought by rail, and custom ore as well, brought by water. The works have a capacity of about 1,800 tons, and are operated by steam power.

At Ladysmith, also on the east coast of Vancouver Island, is the smelter of the Tyee Copper Company. It was at first intended for 250 tons, and so far handles its own ore from Mount Sicker, supplemented by custom ores. Provision has been made for enlarging in the future to 600 tons. It employs a peculiar method of roasting, and its appliances generally are of a very modern kind.

Among the other reduction works in British Columbia mentioned in this interesting paper are the large stamp-mill for gold quartz, (80-stamps), owned by the Ymir Gold Mines, Limited, of London, Eng.; the 40-stamp mill of the Daly Reduction Co., at Hedley, in the Similkameen; the combination silver mill at Five Mile, in the Lardeau; the magnetic separator, near Sandon; the Elmore Oil Process, at Rossland, built by the English Company which owns the Le Roi No. 2; the Rossland Power Co.'s concentrator, for Centre Star and War Eagle lower grade ores; and the Hendryx electro-cyanide process works.

* * *

CANADIAN FARMS.

No better way of realizing the enormous importance to Canada of the industries based upon its agriculture can be found than by glancing at the latest published census returns. These show that the capital invested in Canada in agriculture reaches the great total of $1,787,102,630, made up as follows: It should be remembered that the figures given represent conditions as they were in 1901, since which time there has been considerable growth in many lines.

Land	$1,007,454,358
Buildings	395,815,143
Implements and machinery	108,665,502
Horses	118,279,419
Milch cows	69,237,970
Other horned cattle	54,197,341
Sheep	10,490,594
Swine	16,445,702
Poultry	5,723,890
Bees	792,711

It will be seen from this that the aggregate value of live stock alone is no less than $275,167,627, and of this $8,802,985 worth is classified as pure-bred. In many respects, Ontario is the leading province. For example, to her belongs the credit for $5,092,002 of these pure-bred animals, compared with $1,133,611 in Quebec, $945,563 for the Territories, $955,330 for Manitoba, etc. Ontario, too, possesses by far the largest share of the agricultural property specified above, as may be gathered from the following table:—

British Columbia	$33,491,978
Manitoba	151,355,081
New Brunswick	51,338,311
Nova Scotia	72,564,907
Ontario	932,488,069
P. E. Island	30,626,713
Quebec	436,076,916
The Territories	79,160,655

The value of the produce obtained from this investment of capital is as follows, distributed according to the various provinces:

British Columbia	$6,664,369
Manitoba	24,450,710
New Brunswick	12,873,480
Nova Scotia	16,294,305
Ontario	196,952,362
P. E. Island	7,467,567
Quebec	85,034,401
The Territories	13,389,190

Or, coming down to an average basis, the following figures give a comparison in respect to the provinces, of the average value of the products from each acre in use.

	Field.	Animal.	Total.
Ontario	$8.31	$6.53	$14.84
British Columbia	7.50	6.57	14.07
Nova Scotia	7.95	5.00	12.95
Quebec	6.38	5.05	11.43
P. E. Island	6.58	3.70	10.28
New Brunswick	5.77	3.36	9.13
The Territories	4.57	3.81	8.38
Manitoba	4.21	1.91	6.12

The remark may be interpolated here that the value of produce per acre seems to follow closely in the line of preponderance of mixed farming.

* * *

THE POSITION OF THE COTTON TRADE.

The chief item of interest in the dry goods trade of late has been the amalgamation of the four large Montreal cotton companies, before referred to in these columns. The concerns affected are the Dominion Cotton Mills Company, capital $3,033,000; the Merchants' Cotton Company, capital $1,500,000; the Montmorency Cotton Company, capital $1,000,000; and the Colonial Bleaching Company, capital $300,000; and an interesting feature, if all reports be true, is that the capital stock of the amalgamated concern is to be placed at $10,000,000, or nearly double that of the aggregate of the several companies as they are organized at present. This is by no means the first time that an attempt has been made to bring about a combination of these enterprises, but until now these attempts have never been attended with final success. It is said to be the intention of the new company to pay the old shareholders and bondholders by an issue of bonds bearing six per cent. interest, preferred stock bearing 7 per cent. and common stock. It seems not unlikely that Senator L. J. Forget, who at present is president of the Dominion Cotton Company, will be elected president of the new company, and the names of Mr. A. B. Mole, manager of that company, and W. T. Whitehead, manager of the Merchants', are mentioned as joint managers. The Canada Colored Cotton Company, and the Montreal Cotton Company remain outside the new organization. A section of the public are dubious as to the effect of the move upon the prices charged to the consumer of cotton goods, and of course the possibilities of such a result are debatable ground. The prime movers in the matter feel sure that by consolidation great reductions may be made in the cost of manufacture and of selling, besides which, the cutting of prices, at times so ruinous, will be largely obviated. Some improvement in the conditions of the cotton manufacture seem certain. For instance, it will be possible to specialize on certain lines, instead of several of the mills each turning out small quantities of many different lines of goods. It will also be easier to economize on the purchase of raw material by taking large quantities of it.

In spite of the heavy decline in the speculative prices for raw cotton, no great fall in the actual price at which the mills can obtain that article is expected for some time yet. Indeed, there are influences at work—seemingly strong ones—in the opposite direction. Many planters in the South are holding back their product, and those of them who cannot otherwise afford to adopt this course are being helped by bankers, who hope to be able to exert a steadying influence upon future markets by such means. No doubt it would help to give a more even price year by year, and would protect the growers against the low prices which so often follow a particularly large crop.

The holiday trade in staple cottons has been very good, though probably not at all more so than last year, even if it has been quite equal. A striking feature—and one which shows the generally prosperous condition of the country at large, is that the demand from consumers is so particularly in the direction of quality and grade above the usual mark. Wholesale dealers are now devoting attention to the spring and early summer trade. Prints, ginghams, ducks, etc., are now being stocked in large quantities. Payments in the dry goods trade have scarcely been as uniformly good as they should be in the West, which is due perhaps to farmers wanting to make improvements to their houses, etc., and leaving the accounts of local merchants to the last for settlement.

⁂

THE TRADE OF CANADA.

An examination of Blue Books, such as the Trade and Navigation or Trade and Commerce returns, leads one to a long train of interesting speculations and comparisons, but the main lines of enquiry which prove the most profitable to follow up may be divided into three:—The kinds of produce which formed the bulk of the exports and imports; the countries to which these products were sent, or from whence they came; and a comparison of these figures with former years.

For the twelve months ending September 30th last, we find that the total imports entered for consumption at Canadian customs houses amounted to $250,146,965. For the twelve months ending with June 30th last, the imports were $243,590,019, and, in the previous year, $224,813,719. The total exports for the year ending September 30th last, were $205,490,272, compared with $213,521,235 for the year ending June 30th, 1904, and $225,849,724 for the year ending June 30th, 1903. This makes a grand total of Canadian trade for the year ending September 30th last of $455,637,237, as compared with $464, 985,567 for the year ending June 30th last, and with $459,640,240 in the year preceding. It will be noted that the decline in aggregate trade is to be accounted for by the falling off in exports. It may be remarked, too, that the duty collected during the last fiscal year was nearly $4,000,000 in excess of that in the previous one, the figures being $40,954,349 and $37,110,355 respectively. In the twelve months ending September 30th last, the amount of customs duties collected was $40,855,859. At present writing we have not in hand the full details respecting the various classes of produce which made up the list of exports, but for the fiscal year ending with June 30th, 1903 and 1904, and for the four months ending with October 31st last, they were as follows:—

	Year Ending June 30th,		Four Months Ending Oct. 31st,	
	1903.	1904.	1903.	1904.
Mine	$31,064,861	$33,626,739	$14,918,888	$13,048,005
Fisheries ..	11,800,184	10,759,029	3,333,918	3,652,225
Forest	36,386,015	33,091,922	16,551,974	11,887,107
Animal produce	69,817,542	63,812,117	30,288,812	28,154,519
Agricultural products ..	44,624,321	37,138,875	11,599,895	9,169,733
Manufactures	20,624,967	19,864,049	6,580,344	6,744,455
Miscellaneous	83,784	121,708	10,360	16,217
	$214,401,674	$198,414,439	$83,284,191	$75,672,261

Of these exports, taking the third category, namely, the total value of exports from Canada during the four months ending October 31st last, Great Britain took no less than $42,212,347 worth, and the British Empire, all told, $45,810,200 worth. The United States took goods to the value of $26,200,525, thus leaving for other countries the comparatively insignificant sum of $3,651,536.

The following table shows the value of some of the more important exports the produce of Canada for the first four months of the current fiscal year:—

Minerals.

	To Great Britain.	To U.S.	Total.
Asbestos	$87,683	$276,317	$453,581
Coal	8,551	917,688	1,120.267
Gold	......	8,086,544	8,088,224
Copper	......	1,272,210	1,272,210
Lead	25,267	168,928	377,140
Nickel	203.776	183,864	387,640
Silver	......	579,095	666,579
Mica	25,485	28,168	54,063
Iron	......	220,830	224,332

Fishery Products.

	To Great Britain.	To U.S.	Total.
Cod, dry, salted	$18,693	$198,116	$922,479
Mackerel, fresh	.....	54,081	54.081
Mackerel, pickled	.....	100,470	112,680
Herring, fresh	....	72,954	72,984
Herring, pickled	450	22,162	93.294
Lobsters, canned	466,396	492,176	1,413.847
Salmon, canned	193.417	294	305.502

Forest Products.

	To Great Britain.	To U.S.	Total.
Pine deals	$924.676	$73.953	$1,012,469
Spruce deals	3.333.700	142,059	3.757,512
Deal ends	186,820	3,186	196,608
Laths	......	409,399	415.251
Planks and boards	581,662	4,209 362	5,624.324
Scantling	188.161	69,895	356.974
Shingles	......	598,649	609.963
White pine timber	592,697	2.530	605,785
Wood blocks for pulp....	......	1,191,176	......

Animals and Produce.

	To Great Britain.	To U.S.	Total.
Horses	$7,600	$161,144	$183,640
Cattle, over 1 year old..	5,588,656	41.087	5,686,771
Sheep, over 1 year old..	261,523	50 819	325.458
Butter	4.267.655	8 381	4.378 332
Cheese	9.935.784	1.309	9.975.258
Furs, undressed	257.500	74.364	335.301
Hides and skins	41.091	699.760	744.515
Bacon	3,163,852	166	3,166.139
Canned meats	2,153.538	47	2.155.714
Wool	34,067	89.647	123,871

Agricultural Products.

	To Great Britain.	To U.S.	Total.
Apples, green	$608,592	$12,479	$647,150
Barley	145,679	22,937	207,339
Oats	474,855	20,305	558,813
Peas, whole	83,955	23,648	217,117
Wheat	3,162,510	643	3,264.361
Flour	1,049,439	44.569	2,011,212
Oatmeal	246,177	2	274,080
Hay	353,603	156,881	538,867

⁂

HARD-EARNED SAVINGS TIED UP.

The spread-eagle announcements and specious methods of the York County Loan Company, which appear to captivate so many unthinking people in Canada, do not so easily appeal to persons who think, or who possess experience. For example, commenting on a recent article of the Monetary Times upon this much-vaunted concern, the Owen Sound Sun says, editorially: "It has long been a source of regret to Owen Sound business men that so many people deposit their hard-earned savings with outside loan companies and societies of which they know little or nothing, which spend little money in town and make most of their investments in some other locality. Experience has shown that few of these companies turn out to be anything but a disappointment in matter of returns, sometimes trying to palm off a piano or life insurance policy in place of hard cash. * * * This company, [the York County Loan Co.] claims to have 1,500 shareholders in Owen Sound, most of whom pay in small amounts every week. They employ a number of solicitors and collectors here. It is peculiar that they can employ such a staff to make such paltry collections, in addition to their regular staff of accountants, while the chartered banks cannot afford to do so, although handling amounts hundreds of times larger. The company has its funds tied up principally in real estate and not in mortgages. The best-managed companies of this class have as little real estate on their hands as possible. With branches of four of the leading chartered banks in Canada and two local institutions of good standing right here in town there is little excuse for the individual who puts his money in outside concerns who have nothing at stake in Owen Sound."

⁂

THE PRICE OF LEATHER.

The annual meeting of the Tanners' Section of the Toronto Board of Trade was held on the 22nd inst. at the King Edward Hotel. A leading feature was the address by Mr. J. C. Breithaupt, the retiring chairman of the body. Conditions in the leather trade during the year have not been wholly satisfactory. He said: "Trade generally throughout the Dominion has been prosperous during the year, and the volume of the leather trade has kept pace with that of other industries. From a financial point of view, however, the tanner cannot consider the past year as a bright one. The cost of hides, bark, machinery, labor, and everything else entering into the production of leather being much higher than the market prices of leather would warrant. Nearly every article of commerce and manufacture has advanced in value during the past year or two with the exception of that most necessary staple, leather. It follows, then, that the cost of making leather must recede or the manufactured article must advance. The former seems most unlikely. Should, however, hides become lower in price the inferior quality thereof during the next few months will more than offset any possible reduction. The only solution or regulation of the existing discrepancies in value is that leather must advance in conformity with the existing and at present practically unalterable conditions of the cost thereof. It is probable that tanners will act in this matter as soon as the proper time arrives. When leather made of recently purchased hides is ready for the market, it cannot be sold at to-day's prices unless at a loss, and an advance cannot therefore be long deferred."

Of course, a very probable consequence of this apparently certain advance in leather will be a corresponding one in boots and shoes, the prices of which have been for a long while below a fair parity with the cost of labor and material. One thing which has helped to accentuate the dullness in the leather trade has been the poor export demand from Great Britain, where business in this line has been depressed. Improvement is looked for, however, by men in the trade, who have recently visited the Old Country. The prospects in the North-West also are said to be very bright. The following officers of the Section were elected for the ensuing year: Chairman, R. M. Beal, Lindsay; vice-chairman, Hon. E. J. Davis; secretary-treasurer, Mrs. Agnes C. Gray. Executive Committee—Wm. Craig, Toronto; C. G. Marlatt, Oakville; W. D. Beardmore, Toronto; G. C. H. Lang, Berlin; Charles King, Whitby; John Welsh, Hastings; George McQuay, Owen Sound.

⁂

CANADA'S MERCHANT MARINE.

Latest reports to hand show that Great Britain and her colonies head the maritime states of the world with an aggregate tonnage of 11,014,790, or more than four times that of the United States, which country, however, appears second on the list. The tonnage of Canada is 683,147 tons, which puts her eighth on the list, or immediately behind Russia, and in front of Spain and Sweden. Last year 184 new vessels were added to Canada's marine, of a tonnage of 30,534 tons. The total Canadian tonnage is made up as follows:

	Net Tonnage.
New Brunswick	59,508
Nova Scotia	216,053
Quebec	138,570
Ontario	169,086
Prince Edward Island	13,739
British Columbia	76,215
Manitoba	7,695
Yukon District	2,281
Total	683,147

In 1874 Canada's tonnage was 1,158,363. It kept growing yearly until 1878, when it reached 1,333,015. This was the highest year. From 1878 down to 1900 there was a gradual decline each year. In 1900 the tonnage was at its lowest mark, 659,534 tons. There has been a slight increase each year since then and the current year is likely to show a larger growth than the past.

⁂

NATIONAL BANK OF SCOTLAND, LIMITED.

This important bank has held its seventy-ninth annual meeting in Edinburgh. The report shows a net profit of £230,236 on a paid capital of a million—a ratio which is fit to make the mouths of some of our bankers water. Speaking of capital, it is well to notice that in addition to the million pounds sterling called up, there is another million subscribed but uncalled, and the remaining three millions out of the five millions subscribed are termed "reserve liability," and would be available for creditors if any disaster happened the bank.

If, however, the shareholders are remotely liable for a heavy proportion in case anything happened to the institution, they meanwhile share liberally in profits, having had dividends of 18 and 20 per cent. per annum over a considerable period. This year the ordinary dividend is 15 per cent. and the bonus 5, making 20 per cent. return in all. It is a circumstance that causes one to rub his eyes to find in the report an allotment of £20,000 (one hundred thousand dollars), nearly nine per cent. of the year's earnings, to the Officers'

Pension Fund out of the profits of this one year. But this is not unusual; the authorities of the bank did the same thing in 1902, and in 1901 they allotted £15,000, and in 1899 no less than £50,000, two hundred thousand dollars, "to form the nucleus of this fund." So now they have something over a half million dollars for the fund. This sort of liberal provision should prove an incentive to Canadian banks, some of whom, but not all, have funds of the kind.

* * *

BOOK REVIEWS.

Curling in Canada and the United States.—A Record of the Tour of the Scottish Team, 1902-03, and of the Game in the Dominion and the Republic. By Rev. John Kerr, M.A., F.R.S.E., F.S.A.. Captain of the Team, Edinburgh; George A. Morton; Toronto: The Toronto News Co., Limited.—This is a delightful book, not a dull page in it—and there are 780 pages. It has been on our table for months, and we take shame to ourselves for not having until within these few weeks done more than skim through it and taste of its quality Speaking of "tasting books;" in one of Oliver Wendell Holmes' novels a village poet of the Eastern States goes to Boston with his rhymes (manuscript rolled up, with a blue ribbon around it), and gets introduced to James T. Fields with a view to publication. The lad is permitted secretly to see the reader of the establishment perusing his poems and dropping them into the waste-basket. When he remonstrates against their thus being condemned before they are fully read, the publisher answers him: "My dear sir, the man cannot read all the reams that are put before them weekly; he *tastes* them. If you wish to buy a cheese, you do not eat the whole thirty pounds before buying—you taste it." How to get our readers to taste Kerr's book is what puzzles the writer at this moment. There is fun in it, there is sense in it, there is criticism in it, there is information in it. No matter which predominates. Twenty-five business men of Scotland come out to this country. From Christmas till the 1st March they remain here. They visit twenty-three towns and cities from Halifax to Winnipeg, from St. Paul to New York; meet all sorts and conditions of men, and are received with uncommon enthusiasm. They engage in ice-boating, tobogganing, skating, snow-shoeing, as well as Scotland's ain game of curling. And when they get home, some nineteen of them, besides the Captain of the team, record their impressions of the trip and their view of Canada and Canadians.

Mr. Ballantyne, the Provost (Mayor) of Peebles, writes: "I was very much impressed with Canada and the States. The vastness of Canada, its great capacity as a wheat-growing country, and its natural advantages from a manufacturer's point of view, owing to its enormous water power. . . . I never came across any one [speaking of immigrants from Scotland], who had not done well." Major Bertram, of Kersewell, Carnwath, a South African soldier, says, speaking of Canadians: "They are making money and intend to spend it. . . The thing one misses out there is the leisured class. Everyone is 'hustling' to make money and position. . . They are a fine race physically, both men and women, intensely loyal and intensely hospitable." Mr. A. E. Campbell, a florist, from about Greenock, amid some delightful reminiscences sandwiches the following: "As showing their appreciation of the beautiful [he is speaking now of the hospitality shown the Team by Canadians], a usual accompaniment, and to me a most interesting feature, was the floral decorations of those tables. For the most part, roses and carnations were used, and being cut with long stems and set up in tall vases the effect was marvellous. . . To produce these wonderful specimens of horticulture requires *such* a clear, sunshiny atmosphere as we experienced in most of our tour." The honorary secretary of the Team, Mr. R. Husband, in his brief but most appreciative memorandum, refers to the love the Canadians have for Canada and their pride in the motherland of Scotland. "One thing struck me in travelling through the country, and that was the comfortable circumstances of those we met." Dr. Kirk, of Bathgate, was impressed by the future that lies before Canada. "The communities seem to have high ideals, and the pluck and energy to carry them out." He was struck by "the almost total absence of drunkenness and the consequent small proportion of utterly poor." We must mention, too, if only briefly, Mr. Henry Prain, whose intelligent contributions to the Dundee Advertiser about the trip show discriminative skill. Chapter X. with its 70 pages, giving the "Impressions of the Team," contains sometimes amusing comparison and sometimes instruction—for on page 513 one of the writers says: "In these respects [handsome town and other halls, excellent and convenient systems of tramways], and in many other respects I think they are much ahead of us; but in sanitation and water supplies I think they have yet much to learn."

But the descriptions of their 99 games, the analyses of Scottish as compared with Canadian curling, the reminiscences, the anecdotes, the personal friendship engendered by the trip—these are captivating in the recital, almost bewildering in number, too. The book is an epitome of curling in Canada; nothing like it has ever been compiled. Descriptions of the games we cannot give, but we can mention some of the grand old men of curling in Canada whom the book delights to honor. Col. A. A. Stevenson, of Montreal, dear, plucky Col. Sandy, who went all the way to Halifax to meet the incoming Team; Mr. J. S. Russell, of Toronto, "The Father of Curling" in Canada; Geordie Hutchison, of Ottawa; Robert Anderson, a Quebec old-timer. And we can and will mention some younger but not less worthy, perhaps not less distinguished: The justly celebrated Flavelle, of Lindsay, whom the Captain of the Scottish Team so nearly beat; Alec. McLaren, M.P., of Stratford, the acme of bonhommie and enthusiasm; Frank Simson, of Halifax, the guide of the Team to Winnipeg; Mr. J. P. Robertson, "the very life and soul of the Manitoba branch;" such unfailing sports as Friar Littlejohn and Joe Kilgour, in Toronto, whose Damon-and-Pythias love for Bentley Murray and Kerr, respectively, is worthy a paragraph. And then the members of the Team! Eloquent Provost Gordon, matter-of-fact Henderson, the skilful Bramwell, the versatile Provan, the joyous Scott-Davidson, and the robust and calm but lovable Captain—well may we be glad of having met such men. The book is excellently compiled; the author evidently "knows how," for the system and thoroughness it displays could not have been shown by a novice, and the tone is sound throughout. It contains 440 illustrations, and almost 200 of them are individual portraits, cabinet size, and from Rev. Dr. Barclay's, the first, to James Bluenose Munro's, the last, they are all good ones. That such a handsome, complete book should be procurable for two dollars is one of our latter-day privileges and wonders. What we cannot understand is that the Toronto News Company has not sold thousands of them instead of only hundreds.

Educational Papers. By P. C. H. Papps, A.I.A. Published by the Manufacturers' Life Insurance Company.—A series of papers reprinted from the agents' news letter. They are historical, technical, comparative, instructive, suggestive; are contained in 12 chapters, 90 pages, and make one think that the agents of recent years are mighty lucky compared with their predecessors in having so much pains taken to instruct them.

Canadian Forestry Association; being a report of the fifth annual meeting of the Association, held at Toronto in 1904.—We strongly recommend anyone interested in the very important subject of forestry to write to the Government Printing Bureau at Ottawa for a copy of this extremely interesting pamphlet. And further, let him do as we intend doing, send a dollar to R. H. Campbell, secretary, C.F.A., Ottawa, for a membership. When he gets it he will be impelled to send $10 as a life membership. We shall quote from the pamphlet shortly.

* * *

Since November, 1st, says an American Exchange, the Montmagny Mutual Fire, of Montreal, has been writing surplus business through the office of T. Tileston, of New York City. The company reports, as of August 31st, 1904, total net cash assets amounting to $70,417. The Montmagny Mutual must be badly off for business, and Mr. Tileston's customers easily pleased.

A COLOSSAL INDUSTRIAL ENTERPRISE.

It is perhaps appropriate, now that we have devoted a series of papers to describing and illustrating the physical features of the work on Niagara River of the Electric Development Company of Ontario, that we should conclude with a statement of the financial basis of the concern. Briefly, then, the company's paid capital is six millions of dollars, and the bonds issued amount to five millions. This is all Canadian capital, so that the enterprise is financially a thoroughly Canadian one, in which it differs from the other two companies on our side of the river which will utilize Niagara power.

The five directors, we understand, have subscribed one-third of the company's capital. These are Col. H. M. Pellatt, Frederic Nicholls, William Mackenzie, Hon. George A. Cox and James Ross, the remainder being distributed as a rule in smaller amounts. When the securities of the company were placed on the market, the bulk of them were taken by the large financial institutions in Toronto and Montreal. And it is a token of the confidence of the people of Canada in the enterprise that the underwriting of the large sum of money required was practically arranged for in one week. Indeed, when the bonds were placed before the public, they were over subscribed by three millions, for where only $5,000,000 were offered there were $8.000,000 subscribed.

It is only fair to that gentleman to say that the financial scheme, which was as bold and novel as it proved simple, originated with Mr. Fredéric Nicholls, who had the idea strongly in his mind that this should be a Canadian enterprise, not a British or American one. And he has succeeded in interesting in this great power scheme a great number of the most prominent financial men in the Dominion. The illustration we present to-day shows the picturesque office building of the company.

This picturesque building is the Niagara Falls Office of the Electrical Development Co. of Ontario. The Resident Engineer and his staff of assistants are located here. The wing to the right of the photograph is a draughting room. Cement testing and other laboratory work is provided for in the cellar. A Directors' meeting room is in the second story of the tower.

* * *

LIFE ASSURANCE ITEMS.

The deposit made by the New York Life with the trustees in Canada for the exclusive benefit of Canadian policyholders, was increased last week, by half a million dollars. The deposit now exceeds $5,200,000, indicating the rapid growth of the company's business in Canada.

The chances of accident are plain to everyone. You have a good idea of arithmetic and probably algebra. Twenty-five dollars is the cost of an accident policy which pays $5,000 in case of death, loss of sight in both eyes, permanent total disability, and loss of both hands, both feet, or hand and foot; $2,500 for loss of one hand or one foot; $1,333 for the loss of sight of one eye. Double the above for accident by travel. Isn't that $25 equal in your mind to all these benefits divided by your chance of injury? Whether you jump to the conclusion or think of it a week, only one wise conclusion is possible. Act on it.—Travelers' Record.

An article by James Creelman, published not long ago in the New York World, had for its subject: "Racial Influences and Longevity.,' The author made interesting statements about the longevity of some of the different races coming to the United States. He tells us, for instance, that the investigations made by life insurance experts show that in the city of New York the Jew is on the average the most long-lived of the city's inhabitants, while the Irishman is beginning to rank among the most short-lived. The life of the adult German, he says, is also short. As to the Jew, he says that a distinguished actuary declares that the life of an American Jew is by at least 15 per cent. a better insurance risk than the life of any other type of inhabitant, age and conditions being the same. As for the Irish, German and Scandinavians in the United States, the latter are found to be the most long lived.

One of the first mottoes or quotations which head each second page of the neat little memorandum-book published by the North American Life, is the following: "Heaven begins in this world in a house whose foundation is built on love"—and life insurance.

Among the pungent things that are poured forth week by week in the pages of the Insurance Press is the following, addressed, apparently, to a man who carries no life assurance: "Your life is worth more to your wife than your business, whatever it may be, and more than all the goods you have in it. You insure the goods for your own benefit—why not insure your life for her benefit? What answer?"

The secretary of the Sun Life Assurance Company of Canada informs us that 1903 has been a record year for the company. The applications for insurance exceeded twenty-three millions of dollars. The increase over last year was three million four hundred and twenty-five thousand dollars, a very remarkable registry.

* * *

FIRE AND MARINE INSURANCE.

In the recent voting at Winnipeg, on the question of the city establishing its own gas plant, a two-thirds majority of the total vote was not obtained, and the measure fell through.

Ottawa's civic engineer asserts that the source of that city's water supply must ultimately be Meach's Lake, and recommends that the necessary surveys be carried on as quickly as possible. Something will have to be done, too, to increase the water pressure in the central portion of the city. We understand the council has so far not decided to take any steps in the matter.

A report by the Montreal Fire Department, just issued, shows that during the past three years the sum spent for additional men and stations, new fire fighting apparatus, etc., was $241,945. The more important items are as follows: 1,000 gallon steamer, $5,900; two 1,300 gallon steamers, $13,450; 27,000 feet fire hose, $22,000; four new stations, and alterations to others, $116,177; seventy-five new officers and men, $30,541.

On the 14th inst. there was a fire in Minneapolis, which resulted in the death of three firemen, the severe burning of three others, and a loss of property valued at $727,000. The chief damage accrued to three buildings owned by the Hale-Holmstead Company, of Minneapolis, loss, $225,000; Boutell Bros., furniture, $300,000; Bintliff Mfg. Co. (picture frames, etc.), $80,000. The fire started in the Peck chemical factory, and was aggravated by the wires which controlled the automatic sprinkler system becoming crossed with the electric light wire.

The season just closed was, so far as the underwriting of vessels sailing on the Great Lakes is concerned, the most profitable ever recorded. Vessels which carried no insurance were equally fortunate, the losses having been fewer than for many years. This result is attributed to the freedom of last season from heavy storms, the noteworthy absence of fogs, and to the peculiarly high water on all the upper lakes. Navigation did not start in earnest until June 1st, owing to the strike of masters and pilots. From that time until the close of navigation, 430 disasters were noted in the official record of the underwriters. In 1903 there were 522 losses. The aggregate losses on vessels in 1904 was $1,260,750, and on cargoes $299,100. This year thirty-seven vessels were completely wrecked or lost, their total tonnage being 17,687. The total tonnage lost last year was 31,644.

FOR GROCERS AND PROVISION DEALERS.

The tobacco crop this year in Borneo and Sumatra is said to be the largest on record, but in spite of this, not a bale of leaf remains unsold. This fact, coupled with the firmness shown at all the autumn sales and with an advance of about 8 per cent. in the price of the Sumatra crop, and of about 18 per cent. in that of the Borneo crop, points to a very large increase in consumption and augurs well for next season. The combined crops of 1903 sold this year amounted to 271,211 bales, against 256,102 last year.

The currant market in Greece advanced sharply last week, but this may possibly have been due merely to a swift decline in exchange. The buying by consuming countries in Greece has been rather better during the last few days, and it is possible that holders in that quarter have taken some encouragement from a revival of demand. The position in the primary market, while not quite so favorable as a year ago, is still a strong one, taking the principal markets of the world into consideration. The shipments to England are less than last season, but this may be largely accounted for by the much smaller stocks carried by the English holders. Reports from that country indicate an increased demand. Supplies on the spot are very much less than usual, customs returns of November 1st showing stocks on hand on that date to be the equivalent of 8,000 barrels, as against 11,500 barrels a year ago. Since that time, however, consumption has reduced spot holdings to very small proportions. It is probable, therefore, that supplies carried in consuming markets in addition to the supplies in Greece will foot up a total considerably less than last year at the same period."

* * *

FINANCIAL MATTERS.

At last session of the Manitoba Legislature various bond issues were made by several companies organized for the construction of railways in different parts of the province, but which have since been taken over by the Canadian Northern. A bill is now being introduced by Premier Roblin for the purpose of consolidating and taking up these bond guarantees of these companies. The original acts also provide for a mortgage, to secure the bonds guaranteed by the Province. The present act is to confirm, ratify and legalize this mortgage, this being necessary in view of the issue of bonds in the near future, and the desire to have the Province's security undoubted. The Province would then occupy the same position in respect to these bonds, as it does to the various issued prior to them.

The London Statist, speaking of the Mackey companies, of which Commercial Cable now forms a part, remarks: "It is evident that a conservative financial policy has been carried out, as out of the net profits nearly 50 per cent. has been written off for betterment purposes, while in addition the sum of $500,000 has each year been added to the reserve fund. . . . So far as the profits are concerned, for the current year they will show a large increase over those of 1903. The surplus, after providing for the debenture interest, was $1,708,526. It is stated that the corresponding figure for the present year, the results for November and December being estimated, is about $2,770,000.

The Montreal City and District Savings Bank has made its annual distribution among the charitable societies of that city, being the interest on the poor fund. The amount is $9,350, among forty-two societies, from the Grey Nuns, who have the largest allotment of any body, to $480 for the General Hospital, and the same amount for the Hospital Notre Dame, and so on downward till three Hebrew societies have $175 divided among them. Fifteen Protestant bodies receive $2,330 in all. The deaf and blind asylums of the city also share in this very commendable apportionment.

We are told by Dickerman's United States Treasury Counterfeit Detector of a new counterfeit five-dollar note on the Dominion Bank. This new counterfeit made its appearance in Port Hope, Ont., and is a poor woodcut production, and should not deceive any one in the habit of handling money. It is on the Dominion Bank, Toronto, and of the new issue dated 2nd January, 1900, bearing series letter B. The face of the note is poorly executed. The back of the note is better than the face, but the lathe work very poorly done and broken. Paper of fair quality. Counterfeits of other banks of same character as this note are likely to appear. Tellers should watch for this, and apprehend the shovers.

* * *

—It has been agreed between the Canadian and United States Governments to appoint an international waterway commission to report upon all waterways adjacent to the international boundary line. A mutual understanding between the two countries respecting the commerce passing through waters within easy reach of the boundary line would often prove of great value to both parties and this is what an attempt will be made to reach. There are to be three Canadian and three American commissioners and among the former will, we are told, be W. F. King, who had charge of the Alaska boundary survey.

* * *

—The bards of the Old Land should not throw stones—in their own residences there is too much glass! Following upon the reports of a month or more ago that heavy snowfalls had tied up railroad trains for forty-eight hours at a stretch in different parts of Britain, came word during Christmas week that fog was causing a complete disorganization of railroad traffic and shipping. One despatch from London, dated 22nd December, read: "A dismal pall is spread over the greater part of the kingdom, causing enormous business losses and threatening to deprive thousands of their Christmas parcels. Statisticians estimate that the losses in a single day of such a fog in London alone amount to fully $3,000,000. All the coasts report a dislocation of shipping. The White Star Line steamer 'Cedric,' which sailed from Liverpool yesterday for New York, is still at noon fog-bound in the Mersey, where traffic is at a standstill. Similar conditions prevail on the Thames. A number of minor shipping mishaps have been reported from various points."

* * *

—We are informed that Lord Strathcona has caused to be opened at 73 Basinghall St., London, E.C., the "city trade branch, High Commissioner's office." Mr. Harrison Watson, formerly curator of the Canadian Section, Imperial Institute, has been placed in charge. The office is in the same building as the Commercial Intelligence branch of the British Board of Trade. India, South Africa, and Queensland also occupy offices in the same building. This office is working in association with the Canadian Section of the Imperial Institute, and the officers co-operate with the Board of Trade as regards enquiries received by them concerning Canadian trade and other matters. Mr. Watson, we understand, is sensibly arranging for a supply of Canadian official pamphlets and literature to deal with intending immigrants. They already have some Canadian directories and books of reference, but wish to be equipped so as to be able to satisfactorily handle enquiries and applications of all kinds, and this appears to be needed.

* * *

CLEARING HOUSE FIGURES.

The following are the figures for the Canadian Clearing Houses for the week ended with Thursday, December 29th, 1904, as compared with those of the previous week:

	Dec. 29.	Dec. 22.
Montreal	$16,849.431	$22,856,433
Toronto	13,693,628	21,793,630
Winnipeg	5,749.257	8,282,865
Halifax	1,579.532	1,935,595
Hamilton	1,100,287	1,327,064
St. John	896.110	1,146,746
Vancouver	1,304,920	1,497,013
Victoria	441,185	561,542
Quebec	1,477,685	1,500,828
Ottawa	1,831.380	2.301.502
London	751,616	1,060.637
Total	$45,675,031	$64,263,855

January Investments

E. H. GAY & CO., BANKERS MONTREAL

SENSIBLE BOUNTY.

One of the most sensible as well as kindly things done by an employer for employees was arranged last week by the Gendron Manufacturing Company, which makes bicycles, tricycles, and children's carriages, in Toronto. This company made a Christmas gift to each of its 150 employees of a bank book with a deposit of $1 to the recipient's credit, as a token of the company's appreciation. A letter accompanied each book, in which the firm says:

"We hope that the small seed which we have planted may be the means of your nourishing the same, and that it will grow to be a large, healthful and fruitful tree. We would always be pleased to learn of you showing your appreciation by using all legitimate means in continuing to put aside a certain amount of your earnings, so as to provide for misfortunes, which are liable to come to all, and more so in your old age, as it is in our declining years when it is always convenient to have a bank account, because it is true that the best friend a person can have is a savings account. You are at perfect liberty to close the account and draw out the small sum to your credit, but if you have not already an account open with some bank we would be pleased to have you leave it there and to continue it."

Now here is an excellent lesson in thrift; and thrift is one of the things many of us need to learn—that is to say, care of his wages on the part of a bread-winner, and economy in management by wife or mother in the household. The letter is well expressed, and breathes a wise spirit. Besides, this action on the part of the Gendron Company shows that they are willing to make their employees sharers in the company's prosperity—the true Christmas spirit. For as James Russell Lowell expresses it, the most welcome bounty is

"* * * Not what we give, but what we share,
For the gift without the giver is bare."

* * *

ANSWERS TO ENQUIRERS.

Arthur, Rat Portage.—We do not expect to be able to give a satisfactory answer to your query. As to the opinion you have so bluntly and so breezily expressed, we may be permitted to remind you that "The bearins' o' this observation lays in the application on it," as the simple and would-be mysterious Cap'en Cuttle remarked. Plainly, you are in no frame of mind to receive opinions different from your own, therefore we shall not try. You had better write to the Department of Trade and Commerce, at Ottawa.

R. C., London.—On 30th June each year.

R. M. S., City.—The case is a hard one, and well illustrates man's inhumanity to man. If James Massie were alive he would take pains to have such a matter set right. In any case the city relieving officer will attend to it on your representation. It stirs one to anger to hear, at a Christmas season, of an instance of the accursed race prejudice which, while it does not say, "I am holier than thou," does say, in effect, "You do not belong to our church, and therefore I will not help you, no matter how grave your necessity." That fine Englishman and fine poet, Thomas Hood, said truly:

"With sweet, kind natures, as in honeyed cells,
Religion dwells, and feels herself at home;
But only on a formal visit dwells
Where wasps instead of bees have formed the comb."

H. McL., Montreal.—Glad you liked it; will send you another copy. It was not Grant—who very likely, however, has said something like it—but Sir Charles Dilke, who declared, in his "Greater Britain" (Harper's edition of 1869, page 62): "Red River Territory should be a second Minnesota, Halifax a second Liverpool, Esquimalt a second San Francisco . . ." But he is the same man who, like Tay Pay in the "Fairy Story," could not see sublimity in Niagara, or, indeed, in any waterfall. In fact, he says, page 67 (he devotes 10½ pages out of 550 to Canada) "when surveyed from the fittest points the Chaudiere Fall is but little behind Niagara"—which is exactly Hazel's opinion.

J. W. Brown, Hamilton, writes on December 22nd:—"Enclosed you will please find a circular, will you kindly let me know through the Monetary Times if in your opinion this institution is safe to deposit money with. Are they required to have a license to do business here in Ontario." [The circular is one of twelve pages octavo, full of dollar marks and pictures, showing how money grows, and how smart the people are who manage the National Commercial Guild, of New York, for such is the name of the concern that pretends to enrich every body connected with it. But the first sentence or two of the pamphlet will show the probable character of the concern: compared with it bond or mortgage investment is "slow;" savings banks poor; building associations "only yield 6 per cent.;" endowment insurance "cannot be regarded as an investment,"—therefore put your money into this guild and realize 20 per cent. Such trash ought not to mislead any body. We cannot advise our correspondent to put a shilling into the concern let alone a dollar. Ed. M. T.].

* * *

NORTH OF ENGLAND LETTER.

The apple-growers of Canada have their grievances, doubtless, against the fruit salesmen in these markets. They may solace themselves with the reflection that the English farmer has still more. A few days spent among the growers and cider-makers of fair Hereford convince one that the Canadian has now a chance that may yet grow less favorable with time. In the matter of freight, colonial growers are frequently more favored than those in the West of England. It is strange that apples may go from Quebec to Liverpool for less money than from Herefordshire. In the matter of price the American grower, by virtue of his larger quantities, makes a better bargain and is treated more leniently by the middlemen intervening between grower and consumer. One saw picked apples, such as command fourpence per lb. in the fruiterer's shop, offered at one halfpenny per lb. Sick and sore, the growers down in our West are endeavoring to form an amalgamation.

Cider is of several distinct and wholly different sorts in this country. In Devon, the fruit juice is doctored with sugar; in Norfolk, other processes are resorted to which produce a fine champagne-like drink. But in Hereford cider is just barreled apple juice and no more; except there be a little added water. Farmers set an old man at work to make cider and without apparent exertion he will produce 100 gallons a day. The mill is somewhat like a mortar mill. One heavy edge-runner circles round in a deep groove, as the old gin-horse revolves. When thoroughly pulped, the must is shovelled into hair-cloths and pressed. The juice is caught and the cider is made. On the spot one may buy this fluid at fivepence per gallon. While new it is fruity and mild. In a year's time it is heady and sour; and it is then that the farm laborer loves to wallow in it. That figure of speech is no overstatement of the case. Nothing can replace cider in the local estimation, and Canadians, anxious to cater for this demand in our bad apple harvests, will do well to abide by the simple recipe now given.

Has any Canadian manufacturer of textiles ever conconsidered the chances of Canadian tweeds from Canadian wool as a fit article for advertisement? An English firm, Apperly, Curtis & Co., Limited, of Stroud, is making a specialty of English tweed from English wool. The manufacturer is able to apply a cogent *argumentum ad hominem* to estate owners, farmers, sportsmen and lovers of country life. Every advertiser in his own way does not appeal especially to one class. Perhaps Mr. Apperly's way is a new one, and it is one decidedly to take note of in days in which nationalism counts for so much.

Every now and then one reads of the capture and return of some runagate Canadian with anxious creditors behind him. But we are more shy of strangers from the colonies in this country than are Canadians of gentlemen with no known antecedents out from England. No useful purpose is served by spoiling the new career of a man who starts honestly afresh, but it is impossible to restrain a private titillation of wonder in some specific cases. It came to one's knowledge the other day that a merchant,

whose past is sensationally a bad one, was in a fairly large way of business in one of your chief cities. In these matters individuals take their own risks and not even remembrances of Stanley Rowe will deter the hardier over-confidents. It is well to remember, nonetheless, that scruple runs in inverse ratio to business ability with a certain type of man.

A complaint often heard among exporters is that Canadian debtors allow matters to run too far. Turning over the accounts of business difficulties in the Monetary Times, one does imagine there are an undue number of minute compositions. Continental firms grumble that we in England make bad failures, and possibly there are fewer losses of over fifty per cent. in Germany. Twenty-five cents on the dollar occurs with unpleasing frequency in your records of mishap. Bankers and wholesalers have it in their hands, doubtless, to limit the losses in these connections, and it looks superficially as though there were work to be done by them. How an exact comparison would look one does not know. Assuredly some firms have been deterred from entering Canadian trade from fear of the consequences of a financial convulsion. May be it would do no harm to make an examination of the number of failures and the average rate of dividend with a view to making matters better in future, or to stifling mistrust.

In Lancashire, that chameleon among companies, the Mutual Reserve Life Association, met with its earliest English success. Here, too, it appears to be meeting with its latest defeats. Mr. Justice Farwell has annulled the policy and commanded the return of premiums on a life that was insured on a basis of bi-monthly payments of £20 16s., which grew under the stimulus of re-assessments to a bi-monthly £70. Approval all round has been evoked by the judgment.

Whispers are heard of big mergers in the fire insurance branch. What is coming is uncertain, but rumor has it that the bonus-returning mutuals are to be obliterated. Let us see.

Manchester, Dec. 9th, 1904. NORTH COUNTRY.

REMEMBRANCES.

As the years go by, one is more and more disposed to marvel gratefully, with Tom Pinch, at "the extraordinary kindness of people." The editor has received many Christmas cards, from, for example, the Canada Life, the Metropolitan Life, the North American Life, the Northern Life, the manager and staff of the London Life, Mr. J. K. Macdonald, managing director of the Confederation Life; Mr. W. H. Riddell, secretary of the Mutual Life of Canada; Mr. David Dexter, of Hamilton; Mr. David Burke, of Montreal; Mr. W. S. Dinnick, of Toronto; Mr. John B. Laidlaw, of the Norwich Union Fire; Mr. Cecil E. Corbold, of the Ottawa Fire; the staff of the Toronto branch of the Canadian Bank of Commerce, and friends in Vancouver, Calgary, Port Arthur, Winnipeg, Owen Sound, Detroit, Windsor, Guelph, Brantford, Niagara Falls, Lindsay, Ottawa, Montreal, St. John, New York, Boston, London, England; Edinburgh, Scotland.

We acknowledge gratefully the receipt of calendars for 1905 from the Atlas Assurance Co., Limited, with which is incorporated the Manchester Assurance Co.; Guardian Assurance Company, Union Mutual Life of Maine, Excelsior Life Insurance Company, United States Fidelity and Guaranty Company, Metropolitan Life, Hammond Typewriter Co., United Typewriter Co., Crown Life Insurance Co., London Life Insurance Co., Canada Permanent Mortgage Corporation, The Ideal Bedding Co., Buffalo Printing Ink Works.

ANENT ADVERTISING.

It has come to be a recognized fact in the business world that, other things being equal, the man who advertises is bound to do a larger business than the man who does not.

Even to-day there are plenty of business men who take but little stock in the matter of advertising. They look askance at the whole subject, and seem to regard it as a delusion if not a snare. Certain of such men have, however, awakened later to discover that in the world of trade they are where the hare was in his race with the tortoise. These men do some business, of course, but slowly they are being left behind. They fail to wrestle with the subject which should have as important a place in their business as the keeping of their books or the buying of stock.

One of the greatest surprises of the recent Presidential election in the United States was the return of W. L. Douglas as Democratic Governor of his native State of Massachusetts. Now Douglas is a maker of shoes and a born advertising man, and in spite of the fact that the state referred to gave Roosevelt a majority of 80,000, no small credit for his election is due to the use of advertising. Some might be inclined to call it a "freak of politics." It is nothing of the kind; it is but another proof of the power of good advertising.

Page and quarter-page advertisements were run in the leading papers of the State. What man who wears shoes does not know the face of W. L. Douglas? It has been in the pages of the magazines for years. People already knew the man, possibly also they liked his face—and his shoes, and it was easy to get them to read his political "copy." Even Rooseveltism, it seems, could not down a man when he called advertising to his aid.

While on the subject of political advertising, let us mention the fact that this feature is becoming stronger each year in our own political contests. During the recent Dominion campaign, the prosperous farmer and the elongated cow, stretching from West to East, being fed in Winnipeg and milked in Portland, Me., kept bobbing up continually as we walked along the streets or read our newspapers. It had some effect, too.

The following lines from the pen of M. L. Carey might with appropriateness be spoken of the "man who would not advertise:"

Breathes there a man with soul so dead
  Who never to himself has said,
"My trade of late is getting bad,
  I'll try another ten-inch ad."
If such there be, go mark him well;
  For him, no bank account shall swell;
No angel watch the golden stair
  To welcome home a millionaire.
The man who never asks for trade
  By local line or ad. displayed,
Cares more for rest than worldly gain
  And patronage but gives him pain.
Tread lightly, friends, let no rude sound,
  Disturb his solitude profound,
Here let him live in calm repose
  Unsought except by men he owes,
And when he dies, do plant him deep
  That naught may break his dreamless sleep;
Where no rude clamor may dispel
  The quiet that he loved so well.
And that the world may know its loss,
  Place on his grave a wreath of moss;
And on a stone above "Here lies
  A chump who wouldn't advertise."

We have referred to W. L. Douglas. This leads us to say something upon the personal factor in present-day advertising. It is a noteworthy fact that some of the most persistent and apparently most successful advertisers are those who have used their own personality in their announcements. Among these might be mentioned W. M. Ostrander, the real estate man of Philadelphia, who in a few years has grown from having a small office in the Quaker City to maintaining some fifteen offices in various cities in the United States. One never sees his picture but the subject of real estate is suggested. Another striking sample of how effective a personality is in advertising is that of Mennen, the toilet powder man.

Starting in an unpretentious way about a dozen years ago, his business grew until before his death, a few years ago, he had already amassed a fortune of a million dollars

or more. Lipton's teas, Wanamaker's store, Douglas shoes are greater successes than they would have been had the personal element been left out. Lipton & Company would not be so effective as Thomas Lipton. The public likes to feel that it is dealing with individuals. If it has complaints to make, the public thinks they are more likely to be heard if an individual hears them rather than a corporation. It is often unsatisfactory for yourself to complain to the Canadian Pacific Railway or the Canadian Express Co.

Advertising is a serious business when one thinks of paying out six dollars a line and four thousand dollars a page for one insertion. We are afraid that a good many of our readers would hesitate to pay out such amounts unless they saw a good big return at the other end. It would take a good supply of optimism to bring us to that point, no matter how large a circulation Mr. Publisher could guarantee. "But then," as a Brooklyn man suggests, "whoever knew a successful advertiser who was not a born optimist? Optimism is half the genius of advertising!" Publicity, when properly conducted, will so enliven any half-dead business that the whole staff will be enthused as never before. A business once resuscitated by advertising can be kept alive by the same force, for publicity acts as a life preserver.

* * *

A LITTLE KNOWN WESTERN INDUSTRY.

So many experts have written articles upon the salmon canning industry of British Columbia, that there is hardly anything of interest left to relate. There is, however, a most important and growing industry, near the mouth of the Fraser river, which it might almost be said is dependent upon the canning business, and which has not been taken much notice of by anyone. Has it ever struck the outsider what the canneries do with the hundreds of thousands of heads and tails of salmon which the Chinamen so deftly cut off at the canneries?

The town of Steveston, south of Vancouver, as is well known, is the centre of the salmon canning industry, although there are canneries scattered up the Fraser river as far as New Westminster, also at the north arm of that river. Yet it is at Steveston that the biggest "pack" is looked for. Not far from this "Salmonopolis" is an island to which tug boats, towing scowloads of heads and tails of fish from the various ports of the river quietly wend their way every night during the "Sockeye" season. "What are they going to do with those salmon heads and tails?" is a question often asked by the many strangers who pay a visit to the canneries during July and August. This story is to tell you what they do with this valuable raw material.

In the first place, it takes at least four powerful tugs and from 30 to 40 scows to collect the fish offal from the many canneries on the Fraser river. Each tug, in addition to its usual crew, carries from two to four so-called "gut shovellers." This is the rude, but very expressive, name given to these indispensable human machines. It is the duty of these men to get into the gut chutes at the canneries and shovel out the offal into the scows (average capacity of scows 25 tons). In the evening, after all the offal has been collected, the tugs start for an island off the coast. Each tug tows from 100 to 150 tons of fish offal.

On arrival at the works, a crew of Chinamen, wearing gum boots, get into the scows and shovel the offal into an endless conveyor. The conveyor carries the offal to the top of the building (which is five stories high), where the heads and tails on their last journey are dropped into great big hoppers. From the hoppers a gate is opened, and the offal runs into four six-ton iron cookers. The cookers filled, steam is turned on, and in a little more than an hour the cooked mass is dumped into iron receiving tanks, of thirty tons' capacity hanging below the cookers. A wonderful sight now takes place, in less than five minutes the tops of these huge tanks are covered with oil—rich, red oil—which is immediately run off into the oil tanks, the capacity of which is 400 barrels one filling. The solids are then dumped into machines for extracting all the water from them. The water extracted, the half dried solids are dropped into another conveyor, which carries the still steaming stuff to a drier in a separate building. Twenty minutes after the cooked mass leaves the machines for extracting the water, the finished guano pours out of the drier in one continual stream so hot and dry that it cannot be touched with the hand. It will thus be seen that in a little over an hour after the offal arrives the oil is extracted, and in less than two hours the finished guano is being made from the heads and tails of salmon caught in the river in the morning. To continue the account, as soon as the guano is cooled off it is ground and sacked automatically. This completes the guano process.

Now let us see what becomes of the red oil. The oil is run into "treating tanks" and is chemically treated in batches of seventy-five barrels (about 3,000 gallons), and in a very short space of time, the once red oil is running through the filter presses, a beautiful clear yellow color. After that it is barreled.

The buildings we have mentioned, which are very substantial on account of the enormous weight they have to carry, cover more than five acres of ground, and belong to the "Pacific Oil and Guano Co., of Vancouver, B.C." The oil is shipped to tanneries in Eastern Canada, and the guano goes to Japan, California, and Honolulu. It may be of interest to add that this big plant, said to be the biggest of its kind in the world, can get through 300 tons of offal in twenty-four hours. It has a boiler capacity of 275-h.p., and the necessary engines also a dynamo of 250 lights.

The finished goods are loaded on to cars, which are brought by the Railway Co. alongside the wharfs on lighters. In this way the goods are not touched until they reach their destination in Eastern Canada. Ocean-going vessels can lie alongside the wharf. Recently, although the company has only been operating a year, they shipped nearly 500 tons of guano and 40,000 gallons of oil.

* * *

—The Charlottetown, P.E.I., Board of Trade has passed a strong resolution asking the Dominion Government to undertake the work of putting on an efficient service between that port and the mainland of Nova Scotia, the present summer service to Pictou not being satisfactory.

* * *

—If the results of the reciprocity treaty now in force between Cuba and the United States be any criterion, the way of the benefactor is hard. A report for the first quarter of the current fiscal year shows that Cuba's import trade has risen from $17,343,433, compared with the same period last year, or an increase of $2,038,200. But of this very creditable amount over one-third was gained by Great Britain, over a fourth by Spain, and over a sixth by Germany. The imports into Cuba from the United States show an increase of but 3 per cent., while those from England, Germany, Spain, and France increased 20, 21, 16, and 8 per cent., respectively, "and I am unofficially informed that the Cuban exports to the United States have very largely increased. Nearly all the advantage gained by American exporters from the reductions of the reciprocity treaty was lost by the 30 per cent. advance in the principal schedules made by the Cuban Government soon after the convention went into force."

* * *

—The Canadian Pacific Railway recently made a record for rapid track-laying, having during the past two months laid 60,000 tons of steel rails. The hurry was prompted by the duty of $7 a ton imposed on foreign rails entering Canada, and in order to avoid as much of it as possible, the company had to engage extra gangs of men and keep them working against the coming of Jack Frost. The rails were ordered in the United States for prompt delivery. Delivery began late in October, and at once 100 gangs of men were placed at work at different parts of the system. The work was distributed over the entire line, and probably represents 480 miles of new rails. By getting the rails at the low figure at which United States mills were supplying foreign markets and getting them laid in time, there was a saving of $7 a ton, or close to $500,000, so that there was economic method behind the energy which the company put forth.

Factory in BRANTFORD.

ENVELOPES made in great variety.

Mercantile Summary.

The assets of the Dominion Brass Works, Limited, at Port Colborne, Ont., will be offered for sale on the 14th prox.

The McAdamite Metal Company, of Staten Island, N.Y., is to put up a factory at St. John, N.B., for which a site has already been purchased.

On the 23rd inst., there was launched in Glasgow another new turbine steamer for the Allan line, called the "Virginian," sister ship to the "Victorian."

Dr. J. E. Wilkinson and Mr. J. McCart have sold out their interests in 275 acres of oil producing property near Petrolea, Ont., to a New York syndicate.

The shareholders of the Canada Atlantic Railway have ratified an application by the directors for legislation authorizing the company to amalgamate with or sell out to the Grand Trunk.

The New Brunswick Telephone Company purposes to bring its system more up-to-date in every way. A new office building will be erected in Fredericton, and a new system of wiring put in.

Good news comes from the silver mines at Haileybury, on the Ontario side of Lake Temiscaming, the returns being quite satisfactory. A few days ago four car-loads of ore were shipped to New York, and assays showed up well.

On the 26th inst., there was a terrific explosion at the Acadia Powder Company's mills at Waverley, near Halifax, nearly a ton of No. 1 class powder igniting, owing to over-heating in the drying house. Happily, there was no fatality, but $10,000 damage was done.

The Ottawa and New York Railway, which was offered for sale last week at St. Regis Falls, N.Y., was bought in by the bond-holders for $1,000,000. The line runs at present from Ottawa to Tupper Lake, but it is believed that the New York Central Railroad will ultimately gain possession of it and extend it to Nyando and Messina Springs, thus forming a connection with the Rome, Watertown, and Ogdensburg line.

The Canadian Street Railway Association, reference to whose meeting in Montreal has been referred to already, has elected the following officers: President, Mr. W. G. Ross; vice-president, Mr. W. H. Moore, Toronto; secretary-treasurer, Mr. Allan Royce, Toronto. Executive Committee—Messrs. C. E. A. Carr, London; E. A. Evans, Quebec; D. McDonald, Montreal; Col. H. H. McLean, K.C., St. John, N.B.

Drouth is having serious consequences in some parts of the eastern states. In the country districts the only water for stock and domestic purposes has to be obtained from melting snow, of which very little so far has fallen. Many mines and industrial establishments have closed down, after sulphureous water already had had the effect of eating boilers and pipes to a mere shell. Some of the largest factories in the country, according to last reports, were expected to close down at any time.

GOVERNMENT

AND OTHER HIGH GRADE

BOND INVESTMENTS

CORRESPONDENCE INVITED.

Mercantile Summary.

The "Lottie F." group of claims on Kettle River, a few miles from Canyon City, B.C., have been bonded, it is said, for $60,000 by English capitalists. A 12-foot lead on the property is said to give average tests of 30 per cent. copper, 2½ oz. gold, and 13 oz. silver to the ton.

The traffic through the Sault Ste. Marie, Mich., Canal this month has been the greatest on record, having been 970,865 tons compared with 497,198 last year, or an increase of 413,667. For the year, however, there has been a decrease of over 3,000,000 tons, the figures being 26,517,916 tons.

The following statement is made concerning the British Columbia Copper Company: For the first ten months of the present year it produced 4,122,864 pounds of copper; the output for November was 689,000 pounds, and for December about the same is expected. Two furnaces are in operation, and another is probable. The converter recently installed has sufficient capacity to treat the output of seven furnaces. After the outlined improvements are completed the management expects to be able to produce 1,200,000 pounds of copper per month without counting the by-products of gold and silver. There is fine dust on hand at the present time valued at $75,000, which will be smelted as soon as it can be briquetted.

Th reorganization plans for the Great Northern Railway which was projected as a transcontinental one, have now been perfected. At a meeting of the directors, presided over by Mr. D. B. Hanna, the matter was explained to the shareholders. The proposal provides for the issue of bonds to the amount of $4,962,000, at 4 per cent. These would take care of existing bond issues and debts, and would be guaranteed, as regards both principal and interest, by the Canadian Northern Railway Company. The company will in exchange for each $1,000 of the outstanding bonds, series A and B, give $750 principal of the guaranteed bonds of the consolidated issue, with all interest coupons attached. This plan of reorganization has been unanimously adopted by the shareholders. The directors expect to have all their lines between the east and west completed within the next two years. The road will pass fully into control of the Canadian Northern interests very shortly. The old board of directors has been re-elected, as follows: D. B. Hannah, president; Jas. McNaught, first vice-president; H. H. Melville, second vice-president; E. E. Ling, V. Chateauvert, Hon. Jules Tessier, W. H. Moore, J. A. Nash, F. C. Annesley, Thos. McDougall, John Joyce, Hon. S. N. Parent, ex-officio. This board is, however, only to exist until the old bonds are in, when the Quebec directors and Col. McNaught and H. H. Melville, first and second vice-presidents under the old management, will disappear, and an entirely new board be elected.

The Toronto General Trusts Corporation.

Semi-Annual Dividend.

Mercantile Summary

The Detroit Chamber of Commerce is to hold its annual banquet on New Year's Eve in the main dining room of the Cadillac Hotel. Mr. Michael Brennan, toastmaster.

The Public Works Department of the Dominion Government is sending an expert to Great Britain to study the designs of dredges built there, with a view to placing an order for a dredge for work in Quebec and Ontario.

We are interested in learning that Mr. V. G. R. Vickers has been appointed superintendent of the Dominion Express Company for Montreal and all points east. Mr. Vickers has been long the agent of the company at Montreal, is a good officer, and has many friends.

A group of Nova Scotia failures is reported as follows: The creditors of D. F. McRae, general merchant of Baddeck, had a meeting some days ago, and Mr. McRae made an offer of 40 cents on the dollar. His liabilities are figured at about $25,000, with apparent assets of $22,000, but included in this latter amount is $13,000 of weak book accounts. In 1895 he is said to have compromised at 50 cents.——A. I. Hart, another leading merchant of the same place, has assigned, and is said to owe as much as $30,000, but definite details of his failure are as yet lacking.——M. Abramson, of Reserve Mines, in business for a year or so as a dealer in cigars and confectionery, is reported insolvent.——A. T. Grant, in the furniture line at Sydney, is reported seriously embarrassed. He was formerly manager of the local branch of Gordon & Keith, Halifax, and began business for himself only last spring.——B. Morris, another furniture dealer at Glace Bay, is said to be seeking a compromise arrangement.——The suspension is announced of J. N. Creed & Co., a fish commission firm at Halifax.

Toronto and Principal Cities Dominion

Mercantile Summary.

Last week a revolving generator made by the Westinghouse Mfg. Co., was installed at the Goldstream station of the British Columbia Electric Railway Company in Victoria, thus doubling the company's capacity for power and light, and greatly improving the two services. The new machine is of the most up-to-date type, and has a total normal capacity of 1,000 kilowatts.

—Mr. Francis, the president of the St. Louis Exposition of 1904, replying to a letter of thanks for courtesies, written him by the Canadian Commissioner, Mr. Hutchison, writes: "I wish particularly to congratulate you upon the magnificent showing by Canada under your supervision, and I am confident that the Dominion will profit by its very handsome representation at St. Louis this year. The comprehensive nature and splendid character of your exhibits have attracted widespread attention and unvarying admiration, and the very attractive pavilion used as your headquarters has been a favorite gathering place not only for Canadians, but the people of all nationalities."

It is a very satisfactory thing to be able to note that the good quality of home-made steel rails has now been placed beyond question. Some time ago Sir Thomas Shaughnessy, president of the Canadian Pacific Railway, caused a careful technical inspection to be made of the quality of the rails being made at the works of the Algoma Steel Company, at Sault Ste. Marie. As a result, and contrary, it is said, to expectations, the Canadian Pacific Railway Company has to-day placed with the company, through its sales agents, Drummond, McCall & Co., Montreal, an order for 25,000 tons of 80-pound rails for prompt delivery. The same company, it is announced, has other contracts for fairly large quantities of rails with the Pere Marquette and Michigan Central Railways.

Mercantile Summary.

Wilcox Brothers' dry goods and men's furnishing store at St. John, N.B., was last week destroyed by fire at a loss of about $12,000, mostly insured.

The Vancouver papers stated that the Crow's Nest Pass Railway Company have now taken over for operation, the Canadian Pacific branch from Fernie to the mines at Coal Creek. This move is in connection with the Great Northern Railway construction which is progressing so rapidly in the district. The American line will thus have direct access to the fuel fields which are to so largely supply Montana and other American points hereafter. The Great Northern has just bridged the Elk River, and contracts for the depot, section-house and other buildings at Fernie have been let. The output of the Coal Creek mines of the Crow's Nest Pass Coal Company last month was 44,867 tons, the largest on record. The production at Michel was 22,253 tons, and that at Carbonado 74,449 tons. The 390 coke ovens at Fernie made 11,950 tons of coke, and the 345 ovens at Michel, 9,157 tons. Owing to a shortage of cars the ovens were not charged to their full capacity.

The weekly list of country failures in the Province of Quebec includes no important cases. Charles Blais, broker at St. Evariste, has assigned. Previous to 1902 he was a farmer at Lotbiniere.——Miss J. A. Blais, a middle-aged spinster, who has been carrying on a general store business for four years at St. Tite, and previously at St. Jean des Chaillons, has made abandonment of her estate.——J. A. Londeau, shoe dealer at Fort Coulonge, has assigned. He removed from Renfrew, Ont., in 1902.——Daignault & Sevigny, who have been selling dry goods and shoes at Valleyfield for the past two years, and have shown a lack of sufficient capital, have been obliged to put their affairs in the assignee's hands.——Miss M. L. Clement, in the millinery line at Nicolet, Que.——A compromise at the rate of 60 cents on the dollar has been arranged by R. A. Brillon, tailor at Sorel. He was formerly a bank clerk at St. Hyacinthe, and began making and selling clothes about three years ago. He has always shown a disposition to overstock.——An offer of compromise at the rate of 35 cents on the dollar is made by C. Dionne & Co., general dealers at Fraserville, but judging by the business record of the concern it is not likely that such an arrangement would be any real benefit to them. In 1898 Mr. Dionne failed and compromised at 60 cents on the dollar. In 1901, however, he again got into trouble, but creditors were not so complaisant, and the estate was sold out. He subsequently resumed under cover of his wife's name, but is again "in a hole," and should be advised to seek some occupation other than storekeeping, for which he is evidently unfitted.

IN HER PUBLIC LANDS

many thousands of square miles in extent, the Province of Ontario offers unexcelled inducements to mining prospectors and capitalists looking for large returns for their money.

Many valuable deposits of iron, nickel, copper, gold silver, arsenic, mica, corundum, graphite, granite, limestone and other ores and minerals have been found in Northern, Eastern and Northwestern Ontario, and many more are doubtless yet undiscovered.

For maps, reports, Mines Act, etc., apply to Hon. E J. Davis, Commissioner of Crown Lands, or Thos. W. Gibson, Director Bureau of Mines, Toronto.

AGENTS WANTED in every unrepresented District in Canada.

TENDERS.

Tenders will be received by the undersigned up to 6 o'clock on Jan. 20th, 1905, for the purchase of $35,000.00 bonds of the Wetaskiwin Public School District No. 264, of the Northwest Territories, repayable at a chartered bank in Wetaskiwin, in thirty equal consecutive annual instalments with 5% interest on the unpaid principal, interest payable yearly. First payment of principal and interest will be made January 2nd, 1906. Vendors are to receive accrued interest to payment of purchase money.

J. STACEY ORR,
Sec.-Treas. Wetaskiwin S. D.
Wetaskiwin, Alta.

The Montreal Rolling Mills have purchased a strip of land at Ste. Cunegonde along the Lachine Canal, and will build an extension to their works.

The large concentrating and cyanide plant of the Rossland Power Company at Trail, B.C., has closed down, as it is found that it does not work altogether with satisfaction. Additional machinery will be prepared and installed, and the works then put into operation again, but it is expected that some months will be needed before this can be done.

A postal convention has been established between Canada and Mexico, whereby letters, newspapers, and all except fourth-class matter, such as dry goods, groceries, hardware, and the like, may be mailed to Mexico, at the same rates as between two post offices in Canada. The regulation goes into effect January 1st, 1905.

Nova Scotia Steel & Coal Company,
(LIMITED.)
DIVIDEND NOTICE.

A Dividend of Two per cent. on the Preference Shares of this Company, for the quarter ending December 31st, 1904, has been declared, payable on JANUARY 15th, 1905, to Shareholders of record of December 31st.

The Transfer Books of the Company will be closed from January 1st to January 5th, both days inclusive.

By order of Directors.

THOS. GREEN, Cashier.

ENDOWMENT INSURANCE.

Did you ever think that the man who takes out an Endowment Insurance Policy, receiving at the end of a definite period all the money he has paid in, in the way of premiums, with good interest thereon, actually has had free insurance during the continuation of the policy?

Write for rates on their Endowment Insurance to the Manufacturers Life Insurance Company, Toronto, Canada.

The first annual meeting of the Mexican Light and Power Company took place in Montreal a few days ago, with the president, Mr. James Ross, in the chair. The company's first transmission line is expected to reach the city of Mexico by April next, and contracts have already been made for practically all the power which will then be available. A second transmission as well as one to Elora are expected to be ready by next June. The earnings of the lighting department amounted to $331,000 for the year. The old board of directors was re-elected. Mr. James Ross was appointed president, and J. H. Plummer, and F. S. Pearson, vice-presidents.

There were, says the Gazette, 19,694,855 admissions to the Great St. Louis Exhibition of 1904. Of the number 12,804,616 were paid for, and 6,890,239 were free. To the Chicago World's Fair ten years before, there were 21,480,141 paid, and only 6,059,380 free admissions. "The noble army of dead-heads seems to have grown rather faster than the rest of the fair-going population in the intervening ten years."

Many Happy Returns of the Day.

A neat little pocket book, full of useful information, such as statistics of Canada, clearing-house returns, etc., has been issued by the Trust & Loan Company of Canada, 26 St. James St. Montreal.

The annual meeting of the Hamilton Steamboat Company was held last week, when the old board of directors was reelected as follows: M. Leggat, F. W. Fearman, George T. Tuckett, Seneca Jones, J. W. Lamoreaux, H. B. Witton and Thomas Ramsay. At a subsequent meeting of the directors Matthew Leggat was elected president, and George T. Tuckett, vice-president. We understand that during the winter the "Macassa" will have a section of 36 feet added to her length amidships, while her engines and boilers will be overhauled and renewed, and all her internal accommodations will be remodelled. The travel between Toronto and Hamilton this season was heavier than ever before, not only the boats of this line being busy all the time, but the Turbinia carrying large numbers of passengers as well.

* * *

TIPS GENERALLY WORTHLESS.

Speaking of the tip of A. A. Housman, that so signally failed, reminds us of a story about James R. Keene. A certain man used to pester Keene for advice on the market, Keene seldom gives advice on stocks. Seeing that his friends misunderstood his refusal, Keene one day said to him: "I don't want to give you a tip on the market because I don't want to see you lose money. Here I am, the best speculator that ever came to Wall Street, I know the game as no other man knows it. I pay more for information and get more of it than any other manipulator in the market. I have men secretly at the elbows of all big people in Wall Street, and I know what's doing all the time. I know conditions and the tape talks to me. But with all this the best I can do is to beat it four times in seven. If I could beat it six times in seven, I would have all the money in the country. Now, do you see why I won't give you the tips you ask for? Three out of seven would go wrong; and I couldn't tell when I gave them to you which three it would be. I never had a sure thing in my life. If I ever have I will let you in."

* * *

—A story of British literalness is being told. A wealthy American ordered a set of decanters in a London shop. As the purchase represented more money than he had on his person at the time, he gave his address at the hotel and instructed the assistant to mark them C.O.D. The assistant made a note of the request, but the purchaser was surprised to find the goods left at the hotel without demand for payment. When the parcel was unpacked, however, it developed that each decanter had been beautifully engraved in twining letters, "C.O.D."—New York Tribune.

The Montreal Bridge Company is making ready to purchase the property and franchises of the Montreal and Longueuil Bridge Company or else to amalgamate with it. It also proposes to change the site of the bridge.

Mercantile Summary.

W. R. Cartwright's general store, at Roblin's Mills, near Belleville, Ont., was burned down on the 25th inst., with a loss of $10,000, only partially insured.

The James Richardson Company, Limited, headquarters at St. Jerome de Matane, Que., capital, $200,000, will take over the lumber business and assets of James Russell at that place and carry on a general lumber and merchandise trade.

Word comes that a large ore shoot has been discovered on the intermediate level of the Jumbo mine, at Rossland, B.C. It is 30 feet wide. This discovery is looked upon as an important event in the history of the mine, proving, as it does, that the ore shoot is deep-seated. It will probably result in the development of several adjoining properties.

W. R. Callaway, the new-world's friend, erstwhile jollier and practical joker, but now moralist and litterateur, sends a Christmas card from his Minneapolis home bearing this sentiment for 1905; it is from the celebrated Adam Clark: "The secret of happiness is, never allow your energies to stagnate." W. R. never did. Ho! ye people of Hind—that is, Canada, listen to the Jataka, and be ye seekers all, seekers for a river of enlightenment, not necessarily a river of healing.

Dividend Number 54.

Notice is hereby given that a Dividend at the rate of Five per cent. per annum on the Paid-up Capital of the Company, for the half-year ending 31st December, 1904, has this day been declared, and that the same will be payable on the **Third Day of January next.**

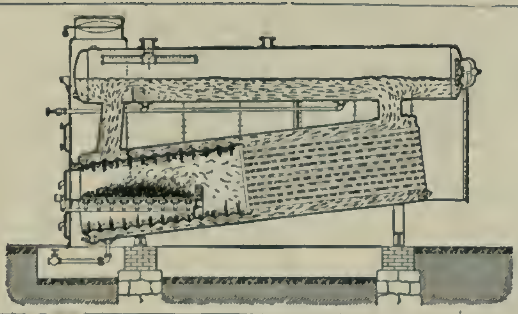
The Transfer Books will be closed from the 20th to the 31st proximo, both days inclusive.

By order of the Directors.

ERNEST S. BALL,
Toronto, 10th November, 1904. Manager.

The St. Mary's and Western Ontario Railway Company wants power to build and operate a railway from a point on the C.P.R., between Woodstock and London, in a northerly direction to St. Mary's thence westerly to a point on Lake Huron, near the St. Clair river, between Grand Bend and Sarnia.

Internal Furnace Saves Ten Per Cent.



An externally fired boiler wastes fuel because of the radiation of heat from the outside of the brickwork and the leakage of cold air above the fire, which causes a double loss by heating the excess of air and by producing imperfect combustion.

In a Robb-Mumford internally fired boiler the heat is transmitted directly to the water; and air cannot get into the furnace except through the regular drafts. This makes a saving of at least **Ten per cent.**

The Alberta Railway and Irrigation Company will apply at the next session of the Dominion Parliament for an act authorizing it to acquire the Western Alberta Railway and its franchises, or to amalgamate therewith.

Mr. A. W. Donly has been appointed Canadian commercial agent for the Republic of Mexico. Mr. Donly is a native of Simcoe, Ont., and has lived in Mexico for the past fifteen years, and speaks and writes Spanish like a native.

Another church in Winnipeg, the third within a week, has been badly damaged by fire. This time it is St. Andrew's, one of the finest in the city. The loss is figured at $15,000. The fire is attributed to defective furnace pipes.

The National Construction Company, Limited, Montreal, has received a Dominion charter. Its capital is placed at $250,000, and it will carry on a general contracting and construction business. Joseph Hobson and R. S. Logan, of Montreal, are charter members.

The contract for building a new lift lock, at Kirkfield, on the Trent Canal, has been awarded to the Dominion Bridge Company, Montreal. The lock is to overcome a lift of fifty feet. The towers will be of steel. It is likely that work will begin at once on the new contract, to be completed by a year from next spring.

A meeting of the directors of the Dominion Coal Company took place in Montreal last week, when it was decided to pay the usual half-yearly dividend of 4 per cent. on the preferred, but none on the common. It is believed by some, however, that the earnings for the second half of the past year will show up considerably better than those of the first.

The Montreal Terminal Railway Company will make application to the Quebec Legislature for an act to issue preferential shares to increase its bonding power; to construct branch or circuit electric lines in Hochelaga, Maisonneuve, Jacques Cartier, Chambly, Vercheres, Laprairie, St. Johns, Iberville, Rouville, and St. Hyacinthe Counties, and to acquire, generate, and distribute electric power for heat and light.

The Canada Saw Company, Limited, capital, $125,000, headquarters, Ottawa, has been incorporated under Dominion laws. It will take over the business of the Ottawa Saw Company, of Ottawa, and of the James Robertson Company, Limited, so far as the latter's saw manufacturing business is concerned in the cities of Montreal, Toronto and St. John. Among the chief charter members are J. M. Robertson and Frederick Bacon, of Montreal, and Charles McGee, of Ottawa.

We hear of an interesting event which took place last Saturday in Toronto in the carpet department of John Macdonald & Co., wholesale dry goods merchants. The occasion was that of a presentation to Mr. W. A. Denton, Mr. T. A. Mitchell and Mr. Lyle Duncan, buyers and traveller respectively for the firm, the recipients having resigned to go into business for themselves. The presentation was made by Mr. Macdonald on behalf of the employees. The presents to each consisted of a cut glass epergne and punch bowls. The responses to the speech made by Mr. Macdonald showed a spirit of fealty to the house and a sense of regret at leaving it.

* * *

MONTREAL MARKETS.

Montreal, 28th Dec., 1904.

Ashes.—There is only an odd barrel coming in occasionally, and business is of a decidedly holiday character, but values are pretty steadily held, and makers can realize $5.90 to $5.95 for first quality of pots; seconds are quoted at about $5.40. In pearls there is still an entire absence of business.

Dairy Products.—The cheese market is of a seasonably quiet character, little actual business transpiring, but holders are indifferent sellers at the moment in the expectation that firmer prices will prevail later. As it is, finest fall goods can probably be quoted at 10½ to 10⅝c. per lb. Butter values are quite firm, good dairy selections being quoted on spot at 17 to 17½c., with creamery makes ranging from 20 to 20½c. per lb. according to grade.

Dry Goods.—But few buyers are to be found among the wholesale warehouses this week, and with travellers all at home there is comparatively little pretension to attempt much business. More snow having fallen in the country, business there seems to be fairly active, and with most houses collections are reported as fair to good. Nothing new is reported with regard to values.

Furs.—Some fair-sized mixed lots are now coming forward, principally mink, coon, skunk, and fox, which buyers appear to be sorting pretty closely. We quote for prime pelts as follows: Black bear, large, $12; medium, $8; small, $5; badger, 50c. for No. 1 large; fisher, $5 for No. 1 dark; brown, $4; pale, $3; red fox, $2 to $3.25; silver fox, $75 to $150 for No. 1 as to size; cross fox, $5 to $10 for No. 1; wolverine, $2.50 to $5; lynx, $2.50 to $6, as to quality; marten, $4 to $7 for British Columbia; Eastern skins, $2.50 to $4 for No. 1; mink, $2 to $4 for No. 1; muskrat, 8 to 10c. for fall; 10 to 15c. for prime winter; otter, $8 to $12; fine Labrador pelts would bring $18; coon, $2.50 for fine, black, large pelts, with prices ranging down to 25c. for unprime, poor colored skins; skunk, No. 1, all black, $1.50; short stripe, $1.10; long stripe, 60c.; broad stripe, 20c.

Groceries.—The central feature in this line continues to be sugar, which keeps mounting steadily upward. This morning New York prices moved up 10c. a cental on all lines, and the local refiners have in consequence established a further advance of 5c. on granulated, and 10c. on all lines of yellows, making the present factory figure $5.40 for standard granulated in barrels, with yellows ranging from $4.85 upwards; bags, 5c. a cental less. There appears to be no indication of any easing off in the near future, and raw beet sugars show steady advance. All available stocks of molasses on spot appear to have been now bought up for sugar refining purposes, it being reported that one broker bought some 3,200 puncheons for his principals, and local jobbing quotations are now very stiff at 30c. Latest mail advices from the island of Barbados report the canes as doing somewhat better than before indicated, but it is still anticipated that the market for new crop will open fairly high at 16c. In other lines there is nothing new to record.

Hides.—The local hide market has at last taken a more upward turn in sympathy with the stronger feeling that has prevailed in the United States, and dealers are now paying an advance of half a cent., making the present figure for No. 1 hides 9½c. per lb., with the usual advance in quotations to tanners. Offerings are fair, and the general quality is good. The American market is now reported as slightly easier. Lambskins here remain at $1.10 each.

Metals and Hardware.—The week's trading in these lines has been of a rather dead character. Few marked changes in price are reported. Lead is a little easier at $3.45 to $3.50; ingot tin remains at 32 to 32½c.; antimony is very firm at 9½c.; copper 15¾ to 16c.; spelter, unchanged. English advices report further firmness in the market for Canada plates and kindred lines, with the possibility of still higher quotations after the New Year. Canadas are now cabled at £8 5s., but the local jobbing figure continues at $2.30, though laid down cost exceeds this figure.

Oils, Paints and Glass.—Another dull week has to be recorded, and the only change reported is a slight recovery in turpentine, which is again quoted at 78c. per gallon in single barrel lots.

Wool.—There is little doing in this line at the moment. The next series of London sales begins on the 19th prox., when firm prices are expected to prevail. Ordinary Capes are quoted at 17½ to 19c., though some business is reported in extra fine at 24c. B.A. wools are high, being quoted at 40 to 45c.; North-West, 18 to 18½c.; domestic pulled, 30 to 32c., and fleece washed, 28 to 30c. per pound.

Manufacturing Premises in St. Catharines
FOR SALE OR EXCHANGE.

BRICK—about 40,000 square feet floor space, centrally situated on line projected Electric Road—Electric Power at reduced rates — competitive freight rates—Rail v. Water—about one acre land — good drainage adjacent to Canal—Boiler and Engine. Will exchange for Manitoba or other property.

TORONTO MARKETS.

Toronto, December 29th, 1904.

Chemicals and Drugs.—A fairly good trade without extraordinary features is passing. Prices continue firm. New York advices speak of comparative dullness. Some big drug sales have been held in London during the last week or two. At these, quinine remained unchanged. Reports from the Amsterdam quinine sale this week are so far not to hand. Some opium has been sold in considerable quantities in primary markets, and holders are keeping prices firm. Blue vitriol, potash, camphor, are tending higher. Norwegian cod liver oil is easier. Sulphur retains its very unsettled condition.

Dry Goods.—A good trade is being done, that is considering the season. Just before Christmas, business was exceedingly brisk, but immediately after, as is natural, it fell off somewhat. All staple goods retain their strength, and woolens particularly, and for these it is difficult to foretell the upshot of present exceedingly firm conditions.

Flour and Grain.—Dullness prevails in the flour trade, and it is hardly likely to improve until well into the New Year. Ninety per cent. patents fetch $4.25 to $4.35 in buyers' sacks. Bran and shorts are both on the easy side. Oatmeal is

Have You Applied For Your Share of the Seventy Million Dollars

which will be distributed throughout Manitoba and the Territories within the next few months? The general merchants in these provinces will handle almost all of this money. Make application to them for your share through their own and the only trade newspaper which interests them.

Within the past year 160,000 new possible buyers of your goods settled in the West. Will the retail merchant offer them what you have to sell?

Established 1882

THE COMMERCIAL

The weekly financial, commercial & general trade newspaper of the great West.

THE HUGH C. MacLEAN CO., Limited, Publishers, Winnipeg.

also dull, with prices easy. There has been no change in quotations for grain since last report, and little or no business is passing.

Hides and Skins.—There was a decline this week in Chicago of about ½c. in hides, but so far prices here have not been affected though they are somewhat easy. Calfskins and lambskins are steady at old prices. Deerskins are a little more plentiful. Tallow is without feature.

Groceries.—Comparative dullness is the rule in the general grocery trade just now. Sugars have made no change, though prices are still firm. The market temporarily is practically dead. Prospects for the general trade, as reported by travellers in various parts of the country, are bright. In teas there is but little movement. Canned goods continue strong, but there is nothing of particular moment to report.

Live Stock.—Unfavorable weather and the usual lull after Christmas have affected the market, which has been very dull. No exporters have arrived, and the only butchers' animals were but of poor to medium quality. Prices continue about as before. For sheep and lambs, the tone of the market is distinctly good. Calves, on the other hand, are easier. Milch cows still fetch all the way from $30 to $60, according to grade and quality.

Provisions. — Dairy offerings have fallen off since the holidays, and prices keep a good steady tone. Butter and cheese are both firm. No new laid eggs are coming forward; others are quoted around 20 and 21c. Poultry is still plentiful. Canadian hops fetch 28 to 32c. In the smoked meat and provision trade there is nothing new, and the market continues quite steady.

Wool.—While prices of all grades of wool continue very high, there is practically no business being done.

⁂

ST. LAWRENCE ICE-BREAKING.

The trial tests of the new ice-breaking steamer "Montcalm," which have been looked for with much interest by all shippers and others, were, we are pleased to note, highly satisfying. The following description shows the result of a practical demonstration made near Quebec a few days ago. She sailed up the river at flood tide, and went through fields of ice eight and nine inches thick with perfect ease that did not in the least tend to impede her speed. She sailed along at the rate of about 12 knots, passing the Narrows at the Chaudiere, which were choked with ice as far as St. Gustin. When Cap Rouge was reached the ice was packed as a solid mass and the bridge at this point evidently on the verge of taking, when the "Montcalm" went through the solid mass of ice, cutting in places ten inches, without any difficulty whatever, or causing any violent vibration on board. The triple expansion engines worked beautifully, and the Minister of Marine and Fisheries, who remained on deck all the trip, and took a keen interest in every move made by the ship was extremely well pleased with the new Government ice breaker.

⁂

A DRUGGIST'S EXPERIENCE.

Any one who has read the somewhat weird story of "Wireless" in Rudyard Kipling's latest book will be interested in the following recital of a druggist's daily experiences.

The bright and glittering foreground of the average druggist's life has also, it appears, its deep and dismal background of daily gloom.

"You haven't any idea," remarked a highly intelligent pharmacist, behind the counter of a handsome little shop, "how many persons, besides myself, try to run this little drug store. All day long and far into the night, the druggist is at the mercy of all the people who come and go and have barrels of advice to throw away. We keep postage stamps. purely for accommodation, and many of my customers act as if I ought to be arrested because I happen ever to be out of stamps. I have even had complaints presented because I don't take every identical newspaper printed in the city, night and morning, for my neighborhood loungers to read. Men tell me what cigars and soap I ought to keep, and what prices I ought to ask; how early I ought to be here; how much time I ought to take at noon, and how late I ought to stay at night. Doctors, as a rule, are the most persistent advisers; every doctor thinks he knows exactly how to run a drug store. Some of the doctors act as if the chemist ought to go home with each prescription customer and sit by his bed while he takes the dose.

"And the thick-headed or careless customer is another long chapter. Last night a big fat man with a croaky voice waddled in here and said: 'I can't gargle with this stuff.'

"'What's the matter?' I asked.

"'It's too thick,' he said, 'no man on earth could gargle with a gargle like this.'

"'Did you read the directions?'

"The fat man turned the little jar of paste in his hand and read slowly aloud: 'Dissolve one teaspoonful in pint of water, and use as a gargle.'

"'Oh,' he croaked, 'that's different.'

"'Quite different,' I said. Suppose you go home and try again.'

"That's only a sample," concluded the drug man, "but our life is full of diverting encounters, too; we see many interesting and intelligent people, day by day, and they atone for the stupid ones and the meddlers."—Louisville Courier-Journal.

⁂

—The Ohio farmer who hid his savings in an old stocking instead of depositing them with a banker friend of Mrs. Chadwick is now having his laugh.—The Washington Post.

—"The foolish woman," said a physician, "spends six weeks with the needle making Christmas presents for her friends so as to reduce the cost and then spends $50 for doctor's bills as the result of her labors The wise woman takes $20 and buys all she needs, thus saving her time, her temper, her health and $30 in cold cash."—Cleveland Plain Dealer.

THE METROPOLITAN LIFE INSURANCE CO.

(INCORPORATED BY THE STATE OF NEW YORK.)

The Company OF the People, BY the People, FOR the People.

ASSETS, $105,656,311.60

Proof of Public Confidence

This Company has more premium-paying business in force in the United States than any other Company, and for each of the last 10 Years has had more New Insurance accepted and issued in America than any other Company.

The Number of Policies in force is greater than that of any other Company in America, greater than all the Regular Life Insurance Companies put together (less one) and can only be appreciated by comparison. It is a greater number than the Combined Population of Greater New York, Chicago, Philadelphia, Boston, Toronto and Montreal.

Significant Facts

This Company's Policy-claims paid in 1903 averaged in number one for each minute and a third of each business day of 8 hours each, and, in amount, $89.00 a minute the year through.

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1903.

359	per day in number of Claims Paid.
6,297	per day in number of Policies Issued.
$1,303,559.06	per day in New Insurance Written.
$98,582.76	per day in Payments to Policy-holders and addition to Reserve.
$53,841.18	per day in Increase of Assets.

Full particulars regarding the plans of the Metropolitan may be obtained of any of its Agents in all the principal cities of the United States and Canada, or from the Home Office, 1 Madison Ave. New York City.

Amount of Canadian Securities deposited with the Dominion Government. for the protection of Policy-holders in Canada, $1 800,000.00.

MONTREAL BANK CLEARINGS.

The figures of the Montreal Clearing House for the year just closed were slightly smaller in aggregate than those of either 1903, or even 1902. The total for 1904 was $1,065,067,000, representing an average of $88,755,000 per month. The totals of the two previous years are compared below:—

Clearings for 1904	$1,065,067,000
do do 1903	1,113,978,000
do do 1902	1,098,970,000

There is thus a decrease of $48,911,000 from the figures of 1903, and of $33,903,000 from those of 1902. These decreases are probably to be accounted for by the lessened transactions on the stock exchange, which is a matter not to be lamented.

⁂

TORONTO CLEARING HOUSE.

The present is the fifteenth year of the existence of the Toronto Clearing House, which began its operations in 1891. The growth of transactions was not in the earlier years so striking as it afterwards became. By 1900 the aggregate clearings had reached 515 millions, advancing thence to 842 millions in 1904, a figure which shows a very remarkable increase of business activity in Toronto. We present below the figures for the five latest years:

Twelve months, 1900	$513,696,401
do do 1901	625,271,306
do do 1902	809,078,559
do do 1903	808,748,260
do do 1904	842,097,066

It is to be remarked that the clearings of 1902 exceeded in amount those of the succeeding year. This does not imply, we presume, any decrease in solid transactions of a manufacturing and commercial kind in the latter year, but rather an increase of speculation in stocks of the former, for 1902 is remembered—by some to their sorrow—as "the great speculative year." Mr. Yarker, the manager of the Clearing House, has kindly furnished the Monetary Times with some particulars which may prove interesting. The year 1904 shows the largest aggregate of clearings in the history of the Clearing House: it shows also the larger single month's clearing, viz.: $91,040,170 in December, as well as the largest day's clearing, viz.: $5,917,477 on November 24th. On looking through our fyles for the largest week's transactions of the year we find it to have been the week ending 8th December, when the total was $77,054,928. Below we give the figures of last year by months:—

January	clearings	$67,162,794
February	do	51,223,748
March	do	59,474,939
April	do	61,121,063
May	do	68,974,022
June	do	72,117,476
July	do	70,844,172
August	do	64,112,439
September	do	66,245,919
October	do	82,763,595
November	do	87,016,729
December	do	91,040,170
Total for year		$842,097,066

⁂

STOCK TRANSFERS FOR 1904.

The extreme activity of the Montreal and Toronto as well as the foreign stock exchanges of a year or two ago was succeeded in 1903 by a slump which is still fresh in the memories of our readers. The year just closed opened with these conditions still prevailing. Business was very dull, and transactions of a desultory character. Gradually, however, a revival began to take place, and on the whole the year 1904 may be described as one of recuperation. Doubtless the chief factor in the situation, so far as the first half of the year was concerned, was the uncertainty of the outlook in the United States, together with the approach of the Presidential elections in that country, which generally seem to affect trade and finances in an adverse direction, whether or no there be any real warrant for such. In the autumn, there were several upward movements in the stock exchanges (reflected here), which partook of the nature of spurts, and appeared as though there were influences at work attempting to boost the market at all hazards. These had considerable effect, though they were prevented from reaching their culmination owing to counter efforts, including the extraordinarily well advertised revelations of a master in self-advertisement. The ups and downs of the Toronto Stock Exchange may be perused at a glance in the summarized table to be found in another place in this issue. This table, for which we are indebted to Mr. Lyndhurst Ogden, manager of the Stock Exchange, reflects, as a general rule, it will be seen, the conditions mentioned above—there has been a general upward movement throughout the course of the year. The bank shares, for example, with one exception, stood all at higher figures towards the end than at the beginning of the year. Imperial rose from 212 in January, to 235 in September; Dominion from 222 in March, to 253 in December. On the whole, however, the banks showed little violent fluctuation. Consumers' Gas advanced from 199 in August, to 220¾ in November; Canada N. W. common from 150⅛ in May, to 215 in November; C.P.R. from 110 in March, to 135⅛ in October; Canadian General Electric from 138 in March, to 178 in November; Commercial Cable from 163 in January, to 194 in February; Bell Telephone from 135 in March, to 162½ in November. On the other hand, there were some considerable drops. For example, among the navigation companies, Richelieu & Ontario fell from 87 in October, to 52 in April, and Northern Navigation from 81⅜ in January to 50 in December. Among the industrials, Dominion Coal common suffered a drop from 72¼ in January, to 40 in June; Nova Scotia Steel and Coal preferred, from 118 in May, to 105¼ in September; common, from 82 in January, to 51¼ in July. Taken as a whole, however, the general trend of stocks during the year was, as we have noted, distinctly upward.

⁂

PENSION FUND TO OLD EMPLOYEES.

At the request of an old subscriber, who expresses much interest in the subject, we reprint from a former issue of the Monetary Times part of an article under this heading.

"Authorities of banks or public companies which have no pension funds may well consider whether such provision for their employees ought not to be made. While it is true that it is the duty of every man to make provision out of his weekly earnings for his declining years, it is also true that many a man in the employ of public companies is prevented by sickness, misfortune, the needs of a large family, or other causes, from setting aside the sum he would like for such purposes. There are to-day cases in which men have worked twenty-five, thirty, even thirty-five years for the same concern, and are in an agony of apprehension lest they may lose their places through the consolidation of companies. Having saved but little, and their employer having no pension fund, the prospect for the latter years of these men is dreary in the extreme.

"There are many important institutions among us which have made no provision for their aged employees, and which ought to do so. Not only banks and loan companies, but insurance companies and industrial concerns. It is a proper and necessary thing to do from a humanitarian standpoint, but it is also a sensible thing looked at in a business light. This matter is well understood in the Old Country, where, when the oldest of a staff must leave or be superseded, it is considered a business charity to have a pension, however small, paid him. Such a provision here would have a present desirable effect, and the prospect of the pension in future would be an incentive to more work and greater diligence on the part of the employee. We commend the matter to the consideration of our prominent life companies, and to all employers who have the reasonable comfort of their old employees at heart."

⁂

CANADIAN SAVINGS.

More persons than one have written to us desiring to see a correction of the figures recently published by the United States government professing to give the amount of savings of the people in different countries, and crediting Canada with only $10.99 per head instead of her true figure, which is nearly $90 per head. In replying to a November correspondent who felt offended at so flagrant a mistake in high quarters, we give a brief resume of the matter. Since then, a Canadian bank manager has thought it worth while to write to the New York Sun. He shows the partial character of the figures quoted in the Government bulletin, and says, what is quite true, that only about a fifth of our people's savings find their way into the Postal Savings or Government Savings banks. The people instead, place the great bulk of their savings in the chartered banks. This may be seen from the following figures, which are taken from the Government report of October 31st, 1904, and are therefore authentic:

Savings deposits in chartered banks	$315,323,000
Post-office savings banks	45,287,000
Government savings banks	16,634,000
Special savings banks (under Government supervision)	23,542,000
Total	$400,786,000

It must be borne in mind that besides this large sum of four hundred millions, there is over $21,000,000 of public money deposited with loan companies in Ontario, so that the total of what may be called the legitimate savings of the people of Canada exceeds $421,000,000, instead of $60,000,000, as quoted by the Department of Commerce and Labor. Mr. Stewart estimates that Canada has 1,500,000 depositors instead of 213,636 credited to her by the United States Department. Taking only the figures above quoted from the official returns of October 31st, ($400,786,000), we find that the amount per inhabitant in Canada is $72.87 instead of $10.99, the figures given by the Washington Department.

DAIRY PRODUCE.

The demand for butter for the holiday season was rather particularly brisk, and stocks were cleared out very considerably. Since the turn of the year, too, receipts have been on the light side. The result has been some fractional advances in prices, especially in the better grades. Quotations range about as follows: Creamery butter, prints, 22 to 23½c.; tubs, 19 to 20c.; dairy rolls, 1 lb., choice, 17 to 18c., large rolls, 16 to 17c., medium qualities, about 15c.; dairy tubs, good to extra, 16 to 17½c; other grades, 12 to 15c.

The market for cheese continues quite firm, owing to the lasting good enquiry from Great Britain, where dealers have evidently gone a little astray of their aim, which was to keep prices depressed and prevent the losses which accrued from an opposite policy a year ago. Then again the decrease in the Canadian production of cheese this year, must have had some effect. In the local Canadian markets a very fair business is being done. The price for large cheese remains at about 11c., with 11¼ and 11½c. for twins.

Eggs are very firm, in keeping with the scarcity of new-laid. In fact, practically none have come into the cities during the last few weeks.

The importance to the nation of Canada's dairy products cannot be overrated, and that is why such a convention as that of the Eastern Ontario Dairymen's Association, which met in Brockville on Wednesday and Thursday last, is of so much interest.

In his annual address, the president, Mr. D. Derbyshire called attention to the necessity which existed of improving not only the quantity, but the quality of the butter and cheese made in Canada. For this there is required united effort. Besides this, each individual dairyman should produce only the cleanest and most wholesome milk; the factories must be kept up-to-date, have the latest improved curing rooms, and be under the direction of properly qualified graduates of dairying. There must also be clean wagons with proper covers for delivering the goods to the railway, clean refrigerator or ventilated cars to convey the product to the shipping port, and steamships properly fitted with cold air channels, to convey the product to the ultimate market.

Other papers read were by Messrs. C. F. Whitney, of Ottawa, who showed what a wide difference existed in net profits between individual cows and herds; Prof. G. H. Grisdale, of Ottawa, on "Building up a dairy herd." This speaker gave an instance of how one man had in four years run up the average annual value of his herd from $35 to $70. Prof. J. W. Robertson showed the probable drift of his remarks when he stated the fact that the farmers of Denmark received $8,500,000 more in the British market for their bacon, butter and eggs than any other people received for the same quantity.

* * *

THE FIRE WASTE.

Property to the value of two hundred and forty-seven millions of dollars, $247,641,000, was destroyed by fire in the United States and Canada during 1904. The figure is a hard one to grasp. Will it be made any more intelligible if we divide it by twelve, and show that this waste means twenty millions per month; or by fifty-two, showing that it means $4,750,000 loss per week; or by 365, which will demonstrate that $676,700 worth of property was *destroyed* every twenty-four hours—equal to $28,106 gone up in smoke every hour of 1904. And yet we do not seem to care. Ignorant people will say, with a grin, "Oh, the insurance companies bear most of the loss." This is where they are mistaken. It is not insurance capital that bears the loss, but the accumulated premiums of years, contributed by the property-owners of America themselves. We present below a compilation of fire waste figures for last year by months, compared with 1903 and 1902. This table, which includes a partial estimate for the month of December, is taken from the Journal of Commerce and Commercial Bulletin, of New York.

	1902.	1903.	1904.
January	$15,032,800	$13,106,350	$21,790,200
February	21,010,500	16,090,800	90,051,000
March	12,056,600	9,907,650	11,212,150
April	13,984,600	13,549,000	23,623,000
May	14,866,000	16,366,800	15,221,400
June	10,245,350	14,684,350	10,646,790
July	10,028,000	12,838,600	11,923,200
August	7,425,550	8,428,350	9,715,200
September	9,945,000	9,939,450	14,387,650
October	9,593,300	10,409,800	12,866,200
November	10,546,650	13,589,550	11,515,000
December	14,616,500	17,224,700	14,700,000
Total	$149,260,850	$156,195,600	$247,641,700

These figures, even with the three great conflagrations—Baltimore, Rochester, and Toronto—deducted, show that last year's was a heavier loss than in 1903, which was a bad year from a fire underwriting standpoint. The moral must be re-affirmed: We are far too careless about fire.

* * *

FIRE PROTECTION AND RATES.

It is natural for a community to be restive under a burden to which it is not accustomed, or which it deems unjust. The average man does not take kindly to a novel impost, whether its author is the State or a municipality or an individual landlord. And so we can quite well understand that if a fire underwriting company or an association of such companies makes a demand upon a householder or a merchant of increased rates of fire insurance, the first attitude of that man is one of amazed or even angry resistance. "Why do you want to tax me this year at a higher rate?" he asks, "when my father never paid more than your last year's figures. I take just as good care of my premises as he did. You never discovered defects in my property before, and the town is quite as well protected against fire as it used to be. I think you are 'holding me up' unnecessarily, and I will fight before I pay this exaction."

This is not an over-statement of what has been going on in the minds, and has been expressed by the tongues or pens, of thousands of persons in North America during the past year. And the prejudice which exists against companies, whether loan companies, heat and light companies, or insurance companies, which are suspected of monopoly has found scope and expression in some such terms. Patience, conciliation, and a calm explaining of altered conditions and needs are required on the part of insurance men to quiet suspicion and to allay resentment when increased rates are charged by underwriters for indemnity. Anything like peremptoriness or what the unthinking term "bulldozing" is sure to be resented in such case by the unintelligent. Often, too, the capitalist or the manufacturer will hastily resent measures taken by the fire underwriters which experience teaches to be necessary when a little thought.

or the explanation of a capable insurance agent, would show these measures to be reasonable.

A Chicago journal notes that as a result of the conflagration charges that have been made in a few towns in the west, material improvements are reported, either as contemplated or as being made in a number of towns and cities throughout the western states. "Wide publicity has been given to the action of the companies, so that municipalities and business men know just what is required and are taking steps to avoid the imposition of the charges. There seems also to be a general sentiment that the policy of making conflagration charges is a reasonable one. There are, of course, those who kick at the prospect of increased taxation for improvements in water supply or fire departments, but when they are shown that such increased taxation is more than offset by the saving made in fire insurance premiums, their objection ceases."

As to the conflagration hazard, so much brought to the front since the Baltimore and Toronto sweeping fires, the Argus says: "The companies want the improvements rather than the rates. They want to get rid of the conflagration hazard, rather than increase their income, only to have it and the accumulated reserves of years wiped away by a sudden disaster. But experience has shown them that in order to get the improvements they must increase the rates. They might make recommendations till they were black in the face, but no attention would be paid them. Money talks, and increased rates, meaning more money, are the only effective arguments to the average property owner."

It has been charged against the fire insurance companies, and not without reason, that they have been in the past too negligent on this continent in accepting risks where conflagrations impend. But now, these companies are doing the best they can with a difficult proposition. "The conflagration hazard exists, and has not been charged for. The charge, as finally worked out, hits only a few cities in a state, affects only a small part of the territory of those cities, and taxes only a part of the property-owners in those districts. Improvements, rather than increased rates, are sought, and the companies will gladly rescind the charge as soon as they have been made. When they have been made, an ever-present menace will have been largely removed. Life and property will be safer, in and out of the congested district, and in most cases the improvements made for the business district will improve the classification of the town and reduce rates all over it."

People have become aroused to the need of greater care in the matter of fire risk. And one result of this awakening is the extension of fire limits, the more rigid enforcement of fire by-laws, the improvement in construction of buildings, the strengthening of fire-fighting appliances. A marked example of the effect of this awakening is to be seen in the betterments in fire construction in the lately fire-swept business district of Toronto now being rebuilt, and the steps being taken in this and other Canadian cities and towns towards more careful building and towards improved fire-fighting machinery.

* * *

A circular from Æmilius Jarvis & Co., stock-brokers, Toronto, acquaints us that Mr. John B. Kilgour has withdrawn from that firm, as of date 3rd January, 1905. The remaining partners are: Æmilius Jarvis, Edward Cronyn, and C. E. A. Goldman.

ASSESSMENT LIFE INSURANCE RESULTS.

We have received the following letter:—

> "Re Mutual Reserve L. Co. Knowing that you take an interest in swindling assessment concerns, and as you have been doing a good work in this direction in the past, I thought it might interest you to see and examine the enclosed. I began 22nd December, 1885, with the Mutual Reserve, and have now paid in cash $412.39, over a period of nineteen years. Now they have the assurance to offer me $346 [of a policy] on which I have to pay $21.24 for the balance of my life. I enclose letters for your perusal and return and find little consolation from them. A highway robber steals from you and you have some satisfaction in punishing him, but people of this description escape scot-free, and you have no recourse."

The documents which our subscriber encloses are voluminous. They are on pink paper, white paper, blue paper; there is a premium notice, a mortuary call, a four-page circular acquainting the recipient of the result to him of the Canadian Parliament's act of July last, respecting the company, a blank form of acceptance, etc., etc. Then there follows some correspondence he has had with the authorities at Ottawa and with other insurance companies. The fact being that he was trying to ascertain what chance he would have of getting fresh insurance with other companies, seeing that for nineteen years he had been paying money for $1,000 insurance, only to be told that now he can get, in the Mutual Reserve, only about one-third of this sum. No wonder one of his correspondents tells him that this offer of the Mutual Reserve people is "an insult to his intelligence," when he can obtain even now, after nineteen years paying into a sink-hole, better terms by taking out a fresh policy in a Canadian or American long-established Old Line company. We have had eight or ten letters within the year from policy-holders in the Mutual Reserve, asking advice whether they should continue with it or take out fresh insurance, and we have answered them according to age or circumstances of the insurant. But the experience of this concern only confirms what we have been preaching for thirty odd years, that any attempt to give life assurance for less than ascertained safe rates is sure to lead to disappointment and loss.

* * *

WHAT SUPPORTS MONOPOLY?

In a series of recent articles the New York Journal of Commerce gives space to considering the question, "what supports monopoly?" In doing so it devotes an article to each of four subjects, namely, tariff duties; patent rights; privileges conferred by corporation laws; and the possession of public franchises. The articles are comprehensive and able. In the first one, it is shown that while highly protective duties were of value in the early stages of United States manufactures, the plan has served its purpose long ago. "To-day we have population and accumulated capital of our own, [in the U.S.], we have established industries and acquired skill, and in such lines of production as our natural resources and advantages are adapted to we have no further need of protection against foreign competition." And, says the Journal, "Whatever arguments may be argued in defense of the protective tariff, it has come to be the 'mother of trusts' and the 'handmaid of monopoly' in various fields of industrial activity."

Another of the provisions of law and phases of public policy which favor and support the tendency to monopoly is found in her patent and copyright legislation, which was intended to promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive right to their respective writings and discoveries. Says our contemporary:

"The only laws of the United States which in intent, as well as in effect, confer an absolute power of monopoly for a period of years are those relating to patent rights. These statutes are in substance more than a century old, and every modification or amendment has extended and strengthened the monopoly principle, regardless of radical changes in industrial conditions affected by them. This principle has become a sort of fetich in our patent legislation, because it has been regarded as essential to the primary purpose of securing adequate reward to the inventor of novel and useful devices, processes and products, for the benefit of the community, by encouraging invention and improvement. That purpose is beneficent and just, as well as expedient, and its fulfillment should be amply assured; but the existing law has effected it imperfectly, while it has promoted secondary objects that are in conflict with the primary purpose, depriving the real inventor in a majority of cases of his due reward, checking in many instances rather than encouraging further improvements, depriving the community of the benefit to which it is entitled from the protected invention, and enabling purchasers of the patent to exercise an oppressive monopoly."

There is no longer any dispute as to the advantage of getting capital into large masses and handling it, or the factories it represents, systematically and economically. The principal method by which incorporation is made to serve the purpose of monopoly consists in combining various concerns under a single control or direction by means of an exchange of securities, or by one corporation holding a majority of the shares of several others, or leasing their property. "A consolidation that consists simply in buying up and uniting into one several establishments, which are paid for with actual capital or an enlarged capitalization representing actual value, is unobjectionable, being in effect only a case of large scale incorporation; but when such combinations are brought about through the inducement of inflated capitalization or 'watered stock,' actual capital being borrowed on bonds and shares being used as a bonus, representing no real value received or much less than what purports to be represented, it becomes an evil, because it is only by the exercise of a monopoly power that it can be made profitable. It is the purpose in such cases to exert such a control as will keep prices up in spite of lowered cost, in order to yield profit upon the expanded capitalization. The 'earning power' which is assumed to be represented by the shares that do not represent capital or assets can only be created by suppressing competition, and that is the object of such incorporations." There is, concludes the third of these articles, serious need of a reform of the United States corporation laws which shall prevent the use of the power and privilege of incorporating capital for purposes of monopoly and extortion, for the suppression of competition, the control of production, and the maintenance of excessive prices. "But if one State should enact a model corporation law it could only be enforced within its own jurisdiction, and it could not prevent the invasion of its territory by the corporations of other States, organized with larger privileges and free from wholesome restriction. If it set up conditions for permitting 'foreign corporations' to do business within its limits which would have the effect of excluding them, it would cut itself off from the wholesome competition of capital and restrain the business intercourse between itself and other States. The evil cannot be successfully combated without a general reform of corporation laws and substantial uniformity in their essential features."

* * *

"FRENZIED FINANCE."

Complaint—Confession—Resolving—Threatening—Abuse—Hypocritical Regret—such might be appropriate headings for chapters of Mr. Lawson's cleverly advertised story. Here is what the London Economist has to say about this most recent financial mountebank:—

> The American people have a certain reputation for coolheadedness, but that reputation is being somewhat endangered by the action of those investors on the other side who threw their stocks on the market in consequence of the lurid advertisements spread broadcast by Mr. Thomas W. Lawson. Mr. Lawson told people to sell certain stocks, whereupon some of them, at all events, sold, and to this the recent collapse in the American market was largely attributed. In a notice, dated Boston, December 12th, published in a London journal, he now declares: "I am going to strike again, suddenly, sharply, sensationally, and in a way that will produce effects upon prices and upon markets so much more destructive that the effect and the destruction of last week will appear by comparison as milk to vitriol. My first and only warning will come in the form of a public notice that certain named stocks should be sold the day my advertisement appears. Three days afterwards I will publish why; but with the 'why' it will be too late for holders of stock to save themselves." If this extraordinary rhodomontade succeeds in causing wholesale selling, the Americans will certainly lose any reputation for sobriety of judgment that they may possess, for a man who blindly obeys a big market manipulator, who promises to give him reasons only when it is too late to undo the transaction, possesses no judgment whatever, and is likely soon to possess no cash. If Lawson can induce masses of people to buy and sell on his *ipse dixit*, he will have opportunities of amassing a colossal fortune; but it is scarcely to be credited that the exponent of "frenzied finance" can, even in the United States, succeed more than once with the tactics we have described. Meanwhile, it is certain that the wild fluctuations in prices caused by the operations of financial houses on the one side or the other, will certainly increase the distrust with which American stocks are regarded by investors here, and must inevitably tend to the detriment of legitimate enterprise in the United States.

* * *

COMMERCIAL TRAVELLERS' ASSOCIATION MEETING.

By the result of the meeting on Saturday night last of the Commercial Travellers' Association, it is evident that the "new blood" advocates, as they are called, have carried the day. They have succeeded in getting a majority to believe that expert advice in matters of mathematics may safely be disregarded, and that what life assurance actuaries say of the chances of human life and their effect upon trust funds accumulated for death benefits is "all poppy-cock"—which is the exact phrase used by one of their number. They have succeeded in displacing as treasurer one of the most valuable and faithful men an association of the kind ever had, Mr. J. C. Black,: and they have put in his place a man who will have a chance to show by-and-by, that he is as well-informed as he now considers himself to be.. The members, however, showed good sense in re-electing Mr. McQuillan to the presidency. He is an intelligent man, and does not lay claim to the possession of *all* knowledge, being willing to admit that some people must know more of some things than he does. The election results show:

President Toronto Board—Thomas McQuillan by acclamation.

Vice-president—John Everett, 1,904 votes.

Second Vice-president—Lewis Howard by acclamation.

Treasurer—E. Fielding, 1,754 votes.

Directors—F. C. Armstrong, 1,932; J. H. Butler, 1,921; L. Glover, 1,805; Robert Gemmell, 1,823; W. J. Micks, 1,712; C. Ryan, 1,776; G. W. Stone, 1,731; C. J. Tuthill, 1,703; Geo. West, 1,893.

Hamilton Board—Fred. Smye, vice-president, and John Herring, second vice-president by acclamation. Directors—E. J. Fenwick, 1,018; W. M. Fielding, 1,879; James Hooper, 1,056; E. E. W. Moore, 995; R. M. Stuart, 1,972; H. G. Wright, 1,039.

Kingston Board—W. H. Graham, 2,052; W. S. R. Murch, 1,930.

Berlin Board—A. Foster, 1,832; W. J. Moody, 1637.

All those elected on ballot solicited support as being "opposed to the reduction of the maximum mortuary benefit to $500, and have pledged themselves to promote an equitable and safe plan by which it can be fixed permanently at $1,000." So that, if they can adjust mortality and rates of interest to suit their book, at the next annual meeting a thousand-dollar mortuary benefit will become a fact. For this year, on the advice of Actuary Bradshaw, the benefit will be $750, as it was in the year just past.

* * *

MONTREAL'S CIVIC APPROPRIATIONS.

The appropriations deemed to be required for next year by the several civic departments of Montreal, totalling $3,877,776, have been brought before the city council. Their total is $3,877,776, and by far the largest item is interest on the city debt, $1,165,251. School taxes show a marked jump upward from $365,000 to $495,000. Roads are a heavy item; it was intended, we are told, to ask for $600,000 or $700,000, of which $100,000 was to go for permanent sidewalks, and twice that sum for permanent roadways, besides $150,000 for the repairs of macadam streets, but the total appears to be cut down to $416,000, which is less than was appropriated in 1904. Clearing the streets of snow was estimated to cost $70,000 last year. Police; fire; water; and light are put down at $345,000; $275,000; $157,000; and $144,000, for the current year, which are not seriously different from the like amounts in 1904, with the exception that the proposed allotment for fire is nearly $50,000 greater this year. "Incineration" is put down for $85,451, and "hygiene"—whatever that may embrace—for $60,598. The fire alarm is estimated to cost $24,160, which is a somewhat larger allowance than in the preceding year.

* * *

FIRE AND LIFE INSURANCE.

The twenty-ninth annual meeting of the Fire Underwriters' Association of the Pacific is to be held in the assembly room of the new board offices in the Merchants' Exchange building, San Francisco, on Tuesday and Wednesday, the 10th and 11th of January.

The Hamburg-Bremen Insurance Company, of Germany, which was organized in 1854, is celebrating its fiftieth anniversary, and in commemoration of the event all the employees yesterday received a very substantial present from the officers of the company.—N.Y. Bulletin, January 2nd.

It is agreeable to chronicle the progress of Peterboro in the direction of adequate water supply. That progressive place has now twenty-three miles of water mains, 166 hydrants, and 1,559 water consumers. During the past year a mile and a half of new mains were laid and 213 services installed.

In the account of the direful blaze at Brockville, on Wednesday, which swept away to smoke and ashes a quarter of a million worth of property of the Canada Carriage Works, occurs a sentence which should arouse attention: "While the arrival of the fire department was being awaited, the company's employees fought the fire bravely with their own apparatus, having a liberal supply of hose and excellent hydrants on the grounds. Unfortunately one of these was found to be frozen, which greatly handicapped their efforts." What a lesson is here given that perpetual vigilance is needed as to the condition of fire-fighting appliances. No one in Brockville, probably, thought this splendid industry in serious danger, with appliances such as it had. There are 300 people thrown out of employment by the fire.

To account for, if not justify, the increase of fire insurance rates in the United States, the Dry Goods Economist asks its readers to consider the great preponderance of frame buildings in many cities throughout the country. In some centres nearly all the buildings are of this highly inflammable character. In Fall River, Mass., for instance, of 12,377 buildings, only 848 are composed of brick or stone. In Grand Rapids, Mich., there are 15,000 buildings and only 1,000 of these are brick or stone. In Topeka, Kan., 11,580 buildings out of 14,231 are frame. Even in such cities as Chicago, Newark (N.J.), Kansas City and St. Joseph more than half the buildings are wooden, while in San Francisco there are 54,427 frame buildings and only 4,280 of brick or stone. And the Economist says: "It does not seem possible that fire rates can be greatly reduced until most of our cities have been practically rebuilt." A further consideration is that enormous money values are concentrated in so small a space as a block or square. "The combustible value of a single block runs all the way from $1,000,000, in such cities as Jersey City, N.J.; New London, Conn.; Portland, Me.; Lansing, Mich., and Spokane, Wash., to $8,000,000 in Chicago and Philadelphia, and $25,000,000 in New York."

A great amount of notice has been bestowed on the objectionable business of pension-teas, says our North of England correspondent's recent letter. It has been realized for a while back that such a trade as that carried on by Nelson & Co. was fundamentally unsound in the actuarial sense and gravely unfair to those prospective widows who bought poor tea at high prices with the intention of earning a subsidy of ten shillings a week. Something like half a million customers have been buying this firm's tea, from door-step canvassers chiefly, and not all of them understood the terms of the contract. A (small-type) condition of the contract was that the pensions were payable so long as the gross total did not exceed 75 per cent. of the net profits earned. Such drawbacks to otherwise excellent offers are not emphasized, as a rule, by the silver-tongued and beery-breathed gentlemen who pester ignorant women for business. Even the promoters have come round to the common-sense way of looking at the matter. To avoid an avalanche, a new scheme has been propounded which affords to tea-purchasers who have never under any circumstances missed their weekly bargain, a prospect of receiving between £20 and £37 on the husband's death. Needlessly fulsome blessings by some newspapers have been bestowed on the newest proposition. The business is one to be viewed with no favor, and sympathy must go out to those who seek to make Nelsons comply with the arrangements subsisting between the firm and its present customers. It seems not fitting that one contractor to an agreement should escape loss by the inexpensive process of changing his mind and his trading style.

* * *

FOR GROCERS AND PROVISION DEALERS.

Many reports from the Old Country concur in giving very high praise to the samples of British Columbian apples and other fruits which have been seen over there this year. Many newspapers, too, make comment on the fact that apples from that province, shown at the Royal Horticultural Society's Exhibition in London last month, had travelled 6,000 miles by land and water, and yet, looked as fresh and perfect as if they had been grown in Kent.

Much interest is being taken by Nova Scotian fruit growers in a shipment of apples to England by sailing boat. A couple of weeks ago the barquentine "Scoda" left Wolfville for London with a cargo of 8,547 barrels.

In order to assist the fruit growers of Jamaica to obtain a foothold in the markets of the United States, the Government of that Island made a great reduction in railway freight rates on oranges to shipping points—in fact, they reduced the rate on oranges to £7 9s. 6d. per carload, the same as bananas. The result will be watched with interest.

The apple growers along the shore of the St. John river, in New Brunswick, are this season making trial shipments to Great Britain. The first shipment was made in September of an apple, very similar to the Duchess, which in the cooler climate of New Brunswick is a comparatively late hardier variety than in the other provinces, and this netted $2.50 per barrel. The "Wealthy" did equally well. These results are so different from those following the old methods of shipping down the river promiscuously and realizing 75c. to $1 per barrel, that quite a large trade appears likely to spring up.

* * *

DRY GOODS.

The Robert Simpson Company, Toronto, will on February 1st next, take over the business of the John Murphy Company, Limited, Montreal, but will carry it on under the latter name. Mr. Murphy, the head of the business, will, it is understood, retire to private life.

The name under which the new combination of cotton companies is to be known will be the Dominion Textile Company with a capital of $10,000,000. Among the applicants for a charter from the Dominion Government, we note the names of Messrs. David Yuille, L. J. Forget, H. V. Meredith, E. S. Clouston, H. S. Holt, Robert Mackay, George A. Grier, David Maurice, Fred C. Henshaw, J. B. Black, J. R. Tooke, James N. Laing, John P. Bailey, David Williamson, and Samuel Carsley. It is said that the stock of the Merchants Cotton Co. will be exchanged on an 85 per cent. basis, and that of the Dominion Cotton Co. on a 50 per cent. basis. The first president of the new organization will be Hon. L. J. Forget.

* * *

—An important waterway project is under consideration in the Eastern States, and a convention of delegates of the cities interested is to be held in Columbia, South Carolina, this week or next. The idea is to construct an inland canal from New York to Savannah, to which engineers who have studied the route say there is no serious practical obstacle. The cost of a sixteen-foot channel is estimated at $10,000,000, and the annual cost of maintenance at $150,000. It is claimed by promotets of the scheme that it is a commercial necessity for the section to be benefited, and that it will result in a saving of at least $2,000,000 a year in coastwise traffic.

* * *

—The Hamilton, Ancaster and Brantford Electric Railway has succeeded at length in buying nearly all the right-of-way over private property from Hamilton to Ancaster Township. There it has obtained running rights over the highway. It is announced that the work of connecting Hamilton with Brantford will begin in the spring of the present year. Power will be derived from the Cataract Power Co. and the new road will run into the City of Hamilton along existing tracks. The stock and bonding privileges of the old company are to be handed over to the Haines' syndicate of New York for constructing the road. It will be bonded for $20,000 per mile, we are told.

* * *

—A Winnipeg special of Wednesday to the World says that within ten days the C.N.R. will have completed the Prince Albert extension of the crossing of the South Saskatchewan, nineteen miles from Prince Albert, and the Rossburn branch into Rossburn, 79 miles long. The completion of these lines at this season of the year reflects very favorably on the mild winter climate the West has been enjoying so far, while Eastern Canada has seen very cold weather in spots, and while on both coasts of the Atlantic snowstorms, blizzards, and zero temperatures have been much in evidence. The Prince Albert extension is 411 miles from Winnipeg. Of this 106 miles of steel were laid during the regular season up to Melfort, and 33 miles additional completed since the beginning of December.

* * *

BANKING AND FINANCIAL MATTERS.

Forty wrecked banks, ten bank cashiers dead by suicide, and $12,000,000 lost to bank depositors. This, says the Boston Herald, is the awful record of Iowa for the year.

We are advised that the Crown Bank of Canada has opened an office at Enterprise, Ontario. It is in the County of Addington, about twenty miles north of Napanee.

The Bank of Montreal opens a sub-agency at Hochelaga (Angus shops), Montreal, this week, with Mr. C. B. Robin as sub-agent, and Mr. D. J. McLean countersigning with him.

We learn that Mr. C. C. Dalton, of the Toronto firm of Dalton Bros., wholesale importers and dealers in spices and chemicals, and manufacturers of soap, has been chosen as a director of the Bank of Hamilton.

Mr. William Stone, president of the Toronto Lithographic Company, and a director of the National Life and National Club, has been appointed a director of the Bank of Toronto to replace the late Henry Cawthra.

A special meeting of the shareholders of the Grand Trunk Railway was held in London on the 21st for the purpose of ratifying the agreement to guarantee the issue of $7,500,000 worth of 4 per cent. gold bonds for the construction of the Lake Superior branch of the road.

The November net earnings of the Montreal Street Railway were not so large as a year ago, the operating expenses showing a large increase. The gross profits increased by $15,000, but the expenses were $17,239 larger. A striking increase is shown in the expenses per cent. of car earnings, from 62.05 last year to 66.54 this year.

The Bank of Nova Scotia is increasing its capital by $500,000. This stock, we understand, will be sold to the present stockholders at a premium of 160, which represents the proportion of the reserve to the capital. The issuing of these shares will place the bank's reserve at about $4,000,000 and the capital at $2,500,000.

We heard, after our last issue had gone to press, of the death last week of Mr. Benj. Heartz, one of the most wealthy and prominent citizens of Charlottetown, Prince Edward Island. The deceased had been in failing health for some weeks, and recently went to California but without benefit. He returned about the middle of December, and gradually sank. He was president for many years of the Merchants Bank of Prince Edward Island.

– The Commercial Trust Company, Limited, Halifax, N.S., capital stock, $100,000, has received a Dominion Government charter, authorizing it to take and hold estates and other property in trust, and to accept the office of executors and administrators, and to guarantee any investment made by it. Among the charter members are J. J. Stewart and W. B. Ross, of Halifax. Mr. Ross is to be president, and Mr. R. H. Murray, manager.

On December 29th, the half-yearly meeting of the Canada Company was held in London. The chairman stated that during the year ended with November 8,406¾ acres of the company's lands have been disposed of at twenty-five per cent. above the valuation price. Although the development of mineral resources is tardy, and applications for licenses fewer than immediately after the oil discovery, in Essex County, in southwest Ontario, the mineral right as an asset is not to be ignored. He referred to the discovery of felspar in Loughboro township, back of Kingston, and iron

$51,000 Town of Maisonneuve (Montreal) 4 1-4s, due Nov, 1, 1949, interest payable semi-annually, May 1st and Nov. 1st, at Montreal, at 101 and interest, **Paying about 4.25 per cent.**

$65,000 Town of Whitby, Ont., electric light and waterworks 4s, dated Nov. 2, 1903, due in 30 equal annual instalments, at 100 and interest, **Paying 4 per cent.**

$1,000 City of Hamilton, Ont., 4 per cent., due Sept. 1, 1920, interest payable semi-annually March 1st and Sept. 1st, in Hamilton, at City Treasury, at 101 and interest, **Paying about 3 7-8 per cent.**

$2,000 Town of St. Paul, (Montreal), 4s, due May 1, 1937, interest payable semi-annually May 1st and Nov. 1st, in Montreal, at Banque Provinciale, at 95 1-2 and interest, **Paying about 4.25 per cent.**

$7,000 Town of Westville, N.S., 4 1-2s, due July 1, 1915, interest payable semi-annually, Jan. 1st and July 1st, in Westville, at 102 1-4 and interest, **Paying about 4.25 per cent.**

$30,000 Town of Windsor Mills, P.Q., 4 1-2 per cent. electric light and waterworks extension debentures, due 1st of May, 1914, interest payable 1st May and 1st November, at 100 and interest, **Paying 4 per cent.**

$72,000 West India Electric Co., 5 per cent. first mortgage 30 year bonds, dated Jan. 1, 1898, due Jan. 1, 1928: interest payable semi-annually Jan. 1st and July 1st, in Montreal, at Bank of Montreal, at 100 and interest, **Paying 5 per cent.**

$250.00 City of Montreal Inscribed Stock, due 1939, May and November, interest by cheque, at 95 and interest:

Full Particulars Upon Application. Correspondence Solicited.

The above offered for sale, January Delivery to suit Purchasers.
Coupons on any of the above cashed at our Office at Montreal

pyrites in Madoc, north of Belleville. The proposed dividend is twenty-two shillings per share, making altogether three pounds, four shillings per share, for 1904.

The injunction restraining the Northern Securities Company from distributing its assets to the shareholders, according to their holdings, has been set aside by the United States Court of Appeal. This is a victory for the Hill-Morgan interests over Messrs. Harriman and Pierce. But the latter, it is said, have another action pending, in which they seek to recover the Northern Pacific stock originally handed over by them to the Northern Securities Co. Mr. Harriman's aim is to secure control of Northern Pacific for the Union Pacific. To do this U. P. would require to hold over $77,500,000 of N. P. stock. The amount of N. P. stock claimed from the Northern Securities Co. is $71,132,000, or $100 in N. P. for every $115 in Northern Securities stock, whereas under the pro rata division each holder of 100 shares of the Northern Securities stock would get 30.17 shares of Great Northern, and 39.27 shares of Northern Pacific.

* * *

—The current year, it is believed, will be a particularly good one for the Canadian steel rail industry. At least 200,000 tons are likely to be needed by various railway enterprises, but this quantity is quite likely to be exceeded during the next few years owing to greater requirements for the Grand Trunk Pacific. The Canadian Pacific Company has ordered large quantities from the Soo factories, while the Grand Trunk, which postponed rail-laying this year, owing to the poor business last winter, will also probably require a few thousand tons. The Canadian Northern, it is announced, expected to lay 500 miles of new track, which in itself will take some 60,000 tons. The Temiskaming and Intercolonial Railways will also likely require between 30,000 and 40,000 tons.

* * *

THE FREQUENCY OF ACCIDENTS.

The Travelers' Record says:

The chances of death from accidents are greater than from pneumonia, typhoid fever, and heart disease combined.

The chance of disability from accidental causes is equal to the chances of disability from pneumonia, typhoid fever, disease of the stomach, liver and brain, heart disease and nervous disorders combined.

The average age at death from accidents is thirty-four.

The percentage of accidents is 50 per cent. greater in the cities than in the rural districts.

The larger the city the greater the proportion.

The causes of accidents differ in different localities and in different seasons.

The months of March, July, August and September are the most prolific in the rule of accidents. The number of people killed or injured in the United States each year is greater than all the casualties of the Civil War on both sides during four years.

The ratio of accidents to the population is considerably greater than forty years ago.

* * *

CLEARING HOUSE FIGURES.

The following are the figures of the Canadian Clearing Houses for the week ended with Thursday, January 5th, 1905, as compared with those of the previous week:

	Jan. 5.	Dec. 29.
Montreal	$24,734,507	$16,849,431
Toronto	19,475,551	13,693,628
Winnipeg	7,040,580	5,749,257
Halifax	1,739 749	1,579,532
Hamilton	1,350,571	1,100,287
St. John	1,052,049	896,110
Vancouver	1,501,424	1,304,920
Victoria	520,155	441,185
Quebec	1,722,424	1,477,685
Ottawa	2,164,502	1,831,380
London	1,177,955	751,616
Total	$62,479,467	$45,675,031

CANADIAN BOOTS IN WEST INDIES.

Mr. R. Bryson, who is the Canadian trade agent stationed at St. John, Antigua, remarks that within the last three or four years, practically all the imports of boots and shoes into Antigua as well as Dominica and Montserrat came from England. This state of affairs, however, is now altered. During the current year the United States have made great strides in capturing this trade, while Canada is now joining in the competition and seems likely to get a considerable share of the trade, too. Canadian footwear is as yet a novelty here, but the shipments, which have recently arrived, have in most respects pleased importers and will lead to repeat orders. Most importers prefer to buy from Canada rather than from the United States, all things being equal, so that Canada has an initial advantage. It must be remembered that Antigua is a poor country, and the purchasing power of the people very small. A considerable portion of the population do not wear boots or shoes at all; hence the trade is not large and the bulk of it is in the cheapest qualities only. So far as shipping facilities are concerned, Canadian manufacturers are as well placed as those of the United States. The Pickford and Black steamers sail from St. John and Halifax monthly, on fixed dates, and freight charges are the same as from New York. There is one difficulty to which I have previously called attention. Canadian manufacturers are in the habit of drawing through the bank against shipments. Most importers here object to that; they are quite willing to remit on receipt of goods and are in the habit of so doing. Manufacturers should therefore first satisfy themselves of the standing of their consignees and make free shipments. Everything points to Canada doing a much increased trade in footwear in the near future, thinks Mr. Bryson. And this can be greatly helped by putting on goods a superior finish. The finish of the cheaper grades of Canadian goods should be improved. Buyers are guided much more by the eye than anything else, and while the English boot may (and probably does) wear longer, the more attractive appearance of the American article gives it the preference.

A DOCTOR ON DOCTORS.

Those who have read any of Dr. William Osler's works or charming professional addresses, naturally want to see and hear the man. This accounts for the large gatherings on December 27th and 28th, when he was announced to speak. At the Medical Library gathering in the Queen's Park the doctor inculcated strongly that the profession must outgrow its narrowness, its tendency to form cliques, the bitterness of hostility shown by one medical man to another for no adequate reason. They should cultivate a fraternal spirit. He gave a rub to the financially speculative disposition of too many doctors. "There are," he said, "comparatively few men in the profession who, after forty years of practice, can give fifty or a hundred dollars to such an institution as this much needed library. The money is needed for insurance or home expenses, yet such a building is an object of solicitude, and if some doctors, who invested $150 in War Eagle stock, had put fifty of it in Golden Fleece and the other hundred into an institution of this kind, they would have had a much better investment; indeed they could have built the largest library on the continent. A doctor never knows how to be a financial success; it is not taught in the profession (Laughter.)

* * *

FORT WILLIAM TO THE FORE.

The Ogilvie Flour Mills Company have now taken over from the original promoter of the Fort William, Ont., power scheme, Mr. E. S. Jenison, the rights of the Kakabeka water falls, near that place. The company's elevator has just begun operations, and their large mill will no doubt be completed this year. The citizens of Fort William are elated by the improved outlook for the place. The town council has arranged with the company for a mutually satisfactory basis for the supply of power for the waterworks and the electric lighting plant. Plans for the work in view are nearing completion. During the present winter surveys of the whole water supply of the Kaministiquia River are to be made, also provision for the storage of water at any of the lakes which feed the stream. Actual work on the development will hardly be commenced before early in the summer, but they hope to have the power harnessed by June, 1906. As some 30,000-h.p. will probably be developed, they will in the meantime be looking for users outside of their own mills, the railway companies and the town. "The canals and raceways will be built of sufficient capacity to develop the entire power of the falls without further work on this portion of the plant, all that will then be required being additional penstocks and turbines to bring about a development of about 50,000-h.p." The new company will assume the liability of the old promoters, and propose to deposit $50,000 in the Bank of Montreal as a guarantee.

* * *

MONTREAL'S GROWTH.

The new buildings erected in Montreal during 1904 approached fourteen hundred in number, according to the report of the building inspector, Mr. Chausse. These consisted of 1,147 dwellings, which number is 460 more than in 1903—the greatly increased demand for dwellings for artisans having resulted in unusual construction—148 stables and sheds, 42 stores, 15 warehouses, 13 factories, besides a number of churches, schools and hospitals. There is a decrease in the number of stores erected this year, as compared with last.

The total value of the various structures erected corresponds very closely to that of the previous year. Their value aggregated $3,643,181. In 1903 it was $3,848,733, and in 1887 it was $3,793,178. But these are the only years which surpassed 1904, and in both the phenomenal amount of building was due to something exceptional, such as the erection of the C.P.R. shops, large office buildings, etc. In 1904 there was nothing of this sort to swell the operations, but there was an extraordinary number of residences of the smaller class put up.

BOOKS RECEIVED.

Canadian Almanac, 1905.—This excellent compend has now reached the dimensions of a volume of 450 pages, and its scope of information is constantly widening. No more useful companion can be on one's library table or on one's shelves. Accompanying the book this year is a timely map of Ontario, delineating "New Ontario" clear up to James Bay on the east, and to the Lake of the Woods and Winnipeg River on the west. The character of the land and timber is shown in the different districts of Nipissing, Algoma, Thunder Bay, and Rainy River. The route of the Algoma Central and other projected railways is given.

ANSWERS TO ENQUIRERS.

Accountant, Hamilton.—The matter (Canadian Savings per head, compared with savings of other countries), was dealt with in Monetary Times of 9th December. The figures are doubtless the same as Mr. Stewart wrote last week to the New York Sun about. It would not be fair to assume that the under-estimate of Canadian savings was made purposely. Whoever compiled the figures for the United States Government of course thought that no country on the earth could surpass the United States in anything. There are plenty of such people across the lakes; but one does not expect to find them in the Department of Statistics. We refer to the matter elsewhere.

W. E. A., St. John, has had a letter from Mr. A. W. Donly, secretary of the Canadian Commercial Club, Mexico City, asking for a list of all the Boards of Trade of the Dominion with their presidents and secretaries. He asks the Monetary Times for such a list, and we have pleasure in forwarding it.

Brotherly, Chatham.—We have not given much attention to the matter of national supervision of insurance because it concerned the United States only. True, it has been recommended by President Roosevelt, but that does not make it either right or politic. A sensible view is taken by the New York Chronicle, which says: "National supervision of insurance is desirable, we think, in spite of the manifest disadvantages, to which we were among the first to direct attention. It is a thing worth working for, to get rid of the petty annoyances and occasional fakes and frauds of supervision by forty States."

Subscriber, Prince Albert, writing on the 29th December, asks the following questions: "I would be much obliged if you will explain the following matter in connection with the Government Bank Statement for November, as given in the Monetary Times of 23rd inst.: (a) Under the heading, "Call Loans on Bonds and Stocks," the Bank of Montreal gave no amount. It surely is not possible that the largest bank in Canada has no loans under this head. (b) Under "Deposits Elsewhere than in Canada," the Imperial Bank shows deposits of $3,373,000. As this bank has no branches, except in Canada, it would be interesting to know where these deposits are located. (c) Under "Other Assets not Included, etc., etc.," the Bank of British North America have a large amount—$3,515,394—which is three times as large as any other bank in Canada. The note at the bottom of your return would indicate that this amount represented gold dust or bullion at the bank's Dawson branch. The Bank of B.N.A., however, never had such a large amount of gold at one time, at Dawson, even in the years when the output from the Klondike was double the quantity taken out this year.

[(a) The Bank of Montreal rarely lends on bonds and stocks on call in Canada, but does a large business of that nature in New York.

(b) It may be that the Imperial Bank was holding some of its reserves in New York in November, and chose to indicate them under that heading.

(c) The amount given does not necessarily represent gold dust or bullion at Dawson. The amount quoted, $3,515,394, may possibly represent, in whole or in part, sterling acceptances purchased in New York. The Bank of British North America has in former times repeatedly held much larger amounts than this under "Other Assets."—Ed. M.T.]

* * *

ACKNOWLEDMENTS.

We have further acknowledgments to make of Christmas and New Year remembrances from subscribers. For example, the manager and staff of the Canadian Bank of Commerce in Montreal send the season's greetings; McDermid & McHardy, and their office staff at Nelson, B.C., do likewise; Oldfield & Gardner, real estate agents, Winnipeg, forward one of their colored calendars, the title of which is, "The Historian," representing an Indian artist of the plains long ago, drawing, upon stretched deer-hide, totems and events after the fashion of the Egyptians and Babylonians. The National Trust Company's calendar is a neat and sensible one.

* * *

THE W. R. BROCK COMPANY'S NEW BUILDING.

The W. R. Brock Company, Limited, Toronto, have now moved into the fine new premises which replace the old ones destroyed in the great fire. The main building, which is of handsome design and fireproof throughout, consists of four stories and a basement, and has a frontage of 75 feet along Bay street and of 165 feet on Wellington St. West. There is also an annex measuring 30 feet by 136 feet. The first floor serves as a wareroom for prints, wrapperettes, ginghams, muslins, flannelettes, linings, etc. On the second floor are stored dress goods, woolens, and tailors' trimmings. On the third floor are shown smallwares, fancy goods, and ready-to-wear goods. The fourth floor holds men's furnishings, carpets, and house furnishings. The basement of the annex is used for storing such heavy goods as linoleums, for receiving which there are good facilities. The first floor of the annex is devoted entirely to the entering room. The arrangements for both receiving and shipping goods are particularly well adapted. There is an archway 18 feet wide, and goods are received on each side of this, but they are all shipped out at the further side, on Piper street, and it is calculated that lorries can now be loaded in half the time which was required formerly. The company having so much storage room in the annex, it will be possible in future to lay goods aside as orders come in, so as to send them out in one large shipment.

* * *

HEAVY CAR BUILDING ORDERS.

Returns issued by practically every car building plant in America show that about 62,950 cars were built last year, including cars for use on elevated railroads, but exclusive of street and other electric cars. These figures, of course, do not include cars built by the railroads at their own shops. Of the above total, approximately 60,806 are for freight service, and 2,144 for passenger service; 60,955 are for domestic use, and 1,955 are for export. This is the smallest car output since 1897, when the number was 43,588. This, no doubt, was due to the very unsettled aspect of business conditions generally this time last year. Operating expenses on the railroads were growing larger all the time, while net earnings were steadily diminishing, and something was needed to retrench from the heavy expenditures of the previous few years. Judging, however, from the large orders for freight cars which have been placed of late, by both Canadian and United States railway companies, this period of retrenchment in this direction is near an end. It appears to be due not to a desire merely to relieve congestion, but to fill anticipated wants in the near future. Carefully compiled figures show that during the past two months orders have been placed for 60,000 cars and about 800 locomotives, a large proportion of which are for Canadian railroads. The greater part of these will not show in the year's output, as they will not be delivered till 1905, but this should be credited to the year 1904, though in effect it will place the orders for 1904 on a par or even behind those of 1903. "Present indications point to a general revival of business, and a heavier traffic in 1905, and orders for new equipment and rolling stock may be taken as an indication of the confidence in the coming season."

* * *

OUR SAINT JOHN LETTER.

The Government of New Brunswick has just issued a statement of the receipts and expenditures of the province for the fiscal year ending October 31st. These show receipts from all sources of $903,554.71. Of this, $491,360.96 was Dominion subsidy, and $296,424.07 territorial revenue. Taxes on incorporated companies yielded $29,921.07; succession duties, $24,878.94, and liquor licenses, $22,852.91. The Government shows a surplus of $5,097.14 on the year's operations. The heaviest item of expenditure is public works, which took $218,255. Education was a close second with $204,743.35, and interest used up the large sum of $151,986.30. The sum of $54,896.43 was required to run the provincial Lunatic Asylum, $31,032.80 the Executive Government, and $29.454 the Legislative Assembly. Agriculture took $27,216.24; justice, $19,133.29; contingencies, $18,298.75; smallpox, $17,067.46, and the revision of the statutes, $16,915.87. For public printing the province spent $12,690.25. These are the main items of expenditure. For immigration $1,461.39 was spent; forest protection, $1,078.88, and for fisheries' protection, $2,382.54. The expenditure to protect big game was $11,507.35. For the fiscal year ending October 31st, 1903, the receipts were $947,196.09, and the balance, $2,901.10.

The shipment of deals, etc., from St. John to transatlantic ports for the year just closed shows a very considerable falling off from 1903. In 1904 there were 183 vessels of 463.585 tons, carrying 172,995.507 superficial feet of lumber, while in 1903 171 vessels of 411.546 tons carried 174,-

BANKERS

MONTREAL—Molsons Bank; Imperial Bank of Canada.
NEW YORK—The Importers and Traders National Bank
LONDON ENGLAND—The National Bank of Scotland.

360,562 feet. Besides this there was shipped 3,567 tons of birch and 15 tons of pine, compared with 4,489 tons of birch and 48 tons of pine in 1903. W. C. Malcolm Mackay was the heaviest individual shipper in each year, while the other large shippers were George McKean and the A. Gibson Railway and Manufacturing Company. Liverpool, Bristol, Manchester and Glasgow are the chief deal ports, and it is noticeable that the shipments to Liverpool fell off five million feet and to Glasgow two million feet, while the shipments to Bristol increased by two million feet and to Manchester by nearly six million, probably a result of the energetic efforts of the Manchester ship canal people. A recapitulation of the shipments from all New Brunswick ports outside of St. John for the year shows that 365 vessels of 641,711 tons carried 358,881,893 superficial feet of deals. In 1903 361 vessels of 602,892 tons took away 388,361,705 superficial feet of deals.

Messrs. Raymond & Doherty, proprietors of the Royal Hotel, in this city, have just purchased a large building on Germain street, near the hotel, and will remodel and greatly enlarge it. The new property is to be fitted up for sample rooms for this popular hotel.

Albert Mowry, a workman in the employ of the Maritime Nail Works, has invented and patented a nut lock that has been purchased by H. R. McLellan, Hon. H. A. McKeown, and others, for $14,000. The new nut lock has been tried on the Canadian Pacific Railway with satisfactory results, and will be given a trial on the Intercolonial.

The annual auction sale of the harbor fisheries of St. John took place to-day, and the city realized therefrom $1,340 more than in 1904, and $2,779.43 more than in 1902. The net revenue from this sale was $5,191.05. The privileges sold are for the right to build weirs. Drift fishing in the harbor is carried on by all the fishermen, but there is no civic control of this.

During the six months ending December 31st, the sum of $386,662.65 was deposited in the Dominion savings bank branch in St. John, and $403,763.49 taken out. For the six months just closed, the withdrawals are usually in excess of the deposits, and the figures given are not much of an indication of how the account will stand on the 30th of June next, the end of the fiscal year.

Messrs. Baird & Peters, wholesale grocers, have been compelled, because of the growth of their tea business, to separate it entirely from the other departments of their wholesale grocery business. Hereafter, the tea business will be managed by the Vim Tea Company. This firm is one of the most energetic and enterprising in the province.

There were forty mercantile failures in New Brunswick during 1904, an increase of eight over 1903. The assets of the bankrupts were valued at $234,025, and the liabilities reached $413,143. In 1903 the assets of failed traders were $69,425, and their liabilities $172,200.

The year just closed has been a good one so far as New Brunswick was concerned, and in some lines, particularly wholesale groceries, a record trade has been done. The lumber business has had its ups and downs, but now the outlook is improving, and generally the prospects seem good for 1905.

St. John, N.B., 3rd Jan., 1905. * * *

* * *

—The Similkameen district of British Columbia is very much to the fore just now, not only as a mining, but as a fruit-growing and agricultural centre. It is said by some that, even without railroads, mining has made greater progress there during the year just closed than at any other period in its history. Were transportation facilities available, several properties could start shipping and continue indefinitely the sending out of ore. It is impossible to ship, however, when everything has to be hauled on wagons at a cost of from $20 to $30 a ton, according to the distance from Penticton, the Similkameen port at the southern end of Okanagan Lake. We may mention that the district which goes under the name of the Similkameen stretches from Fairview, on the east, to Penticton, on the west, a distance of seventy miles, and from the boundary line northward, a distance of fifty miles.

—A judgment of considerable interest to foreign patentees was handed down last week in the United States Circuit Court at Boston. The United States Shoe Machinery Company brought action against J. C. Desautels and the Duplessis Independent Shoe Machinery Company for alleged infringement of patent. Desautels pleaded that he was a resident of St. Hyacinthe, Que., and a subject of Great Britain, and had never had an established place of business in the United States. The court held that an alien may be sued for infringement of a patent wherever in the United States he may be found, and ordered the plea of the defendant overruled, with costs for the complainant.

* * *

—News comes of important strikes of ore made last week on the La France group of mines, La France Creek, a little east of Kootenay Lake, owned by a Chicago syndicate. An ore shoot from two to three feet wide has been, it is declared, already proven for a distance of 100 feet, giving values ranging from 160 to 240 ounces silver, and from $10 to $60 gold and 3 per cent. copper per ton. The other strike was on Bald Mountain, near by. Here "the lead on the surface is from 40 to 50 feet wide and can be traced up the hillside and over the apex to the other slope." The country formation consists of shales, lime and quartzites. The gangue is quartz and the ore is composed of galena and gray copper, the latter carrying both copper and gold. Apart from the rich ore shoot in the workings a large part of the vein is composed of mineral, which, it is said, can be easily concentrated.

* * *

—There have been many conjectures as to the point, in the Crow's Nest Pass of British Columbia, where should be placed the zinc smelter, spoken of for months. Other places had hopes, but most opinions favored either Fernie or Frank. It is stated by the Nelson News, on the authority of a Christmas telegram from C. Fernau, promoter of the undertaking, that it will be placed at Frank. The site selected is on the Old Man river, just east of the big slide. The ground was owned by the Canadian-American Coal and Coke Company and was, it is stated, donated to the smelter company. Work upon it is to be carried on all winter, and the basis is 1,000 retorts. While its principal business is expected to be to treat ores for zinc, it will also treat silver and lead ores. The idea is that the mines of British Columbia shipping zinc ores will concentrate at the various concentrating plants now in operation or being built, and the ores be shipped to the Frank smelter in the form of concentrates. As the smelter will likely use 15 tons of coal to one of concentrates, the advantage of being located near the coal is obvious.

* * *

—It transpires that the $5,000,000 worth of Canadian Northern Railway bonds, which were recently reported as having been disposed of in the New York Market, were sold to J. P. Morgan & Company. These bonds are on the company's lines within the province of Manitoba, and are at the rate of $10,000 per mile, bear 4 per cent. interest, and are guaranteed by the Manitoba Government. At a special session of the Legislature a few weeks back, the consolidation of the bonds on the different branches was authorized, so as to bring them all on to the one standard of $10,000 per mile. The total mileage within the province authorizes guaranteed bonds to the amount of about $7,500,000, of which about $2,500,000 were sold some five years ago. The company have completed in all about 600 miles of railway this year, including branches, and now have their bonds all placed. The earnings of the line show rapid increases, that for the last week reported being about 50 per cent. over the previous year. In addition to the lines constructed by the C.N.R., that company is lessee of the Northern Pacific lines in Manitoba, for which a yearly rental of $21,000 is now being paid, to be increased later. The lines are bonded for $6,930,000, and the C.N.R., through the Manitoba Government, has an option to purchase them at the expiry of the lease in 1929, for $7,000,000.

Mercantile Summary.

The Grand Trunk Pacific Railway has agreed to make Edmonton a divisional point, with shops and terminals. The city pays the company $100,000.

Mr. Geo. Williamson, representing a Vancouver syndicate, is making arrangements to connect Enderby, Armstrong, Vernon and Kelowna by a telephone line.

The Ottawa River Valley Railway Company proposes to purchase or amalgamate with the Ottawa River Railway of Ontario, and other lines, and to build several branches.

—Polly Prise—I went to a fortune-teller to find out whom I was going to marry. Dolly Wyse—So did I. And I found out. Polly Prise—Oh! What fortune-teller do you consult? Dolly Wyse—Bradstreet.—Cleveland Leader.

Mr. C. C. Jones, Toronto, general superintendent of the middle division of the Grand Trunk, has been appointed general manager of the Centrel Vermont Railway.

The Railway Commission sanctions the lease of the Tilsonburg, Lake Erie & Pacific, the Guelph and Goderich to the C.P.R., and the Northern Colonization Railway of Quebec to the Canadian Pacific.

The Marine Department has the Marconi apparatus now installed on the steamers Stanley and Minto, which ply between Georgetown and P.E.I., and Pictou on the mainland. This, it is expected, will be of great service during the winter season.

Victoria capitalists propose to start two large canneries in Esquimalt, having already become possessed of trap licences and foreshore privileges far down the Vancouver Island coast. This will do much to counteract the influence of the removal of the Imperial fleet from the vicinity.

The Alza Company, Limited, Montreal, capital stock, $100,000, propose to purchase certain patents for improvements in sash windows from the Alza English Sash Window Co., and will apply to the Dominion Parliament for power to do a general business as wood and metal workers.

The trial test for the first two units of ten thousand horse-power each of the Canada Power Company, from the rapids of Niagara River, was made on Saturday forenoon last, and was witnessed and inspected by Mr. James Wilson, superintendent of the Queen Victoria Park, and A. Munroe Greer, secretary of the Power Company.

On the evening of Saturday last, the Toronto Customs House staff presented a handsome leather easy chair and an illuminated address to John Douglas, who formally concluded 50 years' service in the customs department. Mr. Douglas entered the service here in 1854, and has been surveyor at the Toronto port of entry since 1879. He still enjoys good health and retires from the service at the age of 79.

CORRESPONDENCE INVITED.

Mercantile Summary.

W. R. Carnwright's general store, at Roblin's Mills, near Belleville, has been destroyed by fire. Loss, $10,000; mostly insured.

A general merchant for years at Lac au Sable, Que., and previously at St. Ubalde, P. Clouthier by name, has turned his affairs over to the assignee, and is said to owe $5,000 or thereabouts.

It is stated that the Quebec and Lake Huron Railway Company, which purposes building a line from Quebec through the northern part of the province to French river, will start operations very soon. Preparations for early survey work have already been started.

At the first of this year, the Canadian Club, of Boston, opened club rooms at 15 Beacon street in that city, opposite the Hotel Bellevue, where reading and writing facilities are provided and British and Canadian papers kept. The Club requests Canadians when visiting Boston to avail themselves of these rooms.

The Grand Trunk Railway Company makes an announcement supplementary to that referring to the appointment of Mr. F. W. Morse to the chief managership of the Grand Trunk Pacific. Mr. F. H. McGuigan is appointed fourth vice-president, and will continue to take charge of the maintenance and transportation departments of the first-named road.

An agreement has been reached between the Canadian Pacific Railroad and the Council of Stratford, whereby that road will enter that town from the northeast, coming along Victoria Lake and connecting with the C.P.R. extension, near Conestogo. Construction will probably begin early in the spring, and is to be completed within a year.

According to a Halifax telegram of 31st December the coal shipments of Nova Scotia this year from the six collieries with an output of over 100,000 tons, amount to a total of 4,367,000 tons, and unless the others produce among them 325,000 tons, the yield for 1904 will fall behind that of 1903. The company showing the greatest gain was the Nova Scotia Steel and Coal Co. The Dominion Coal Company fell off, compared with the year before.

The annual meeting of the New Brunswick Southern Railway was held in New York a few days ago. At this meeting Col. H. H. McLean was appointed president. The board of directors comprises: Russell Sage, Levi P. Morton and Col. Slocum, of New York; Mr. Osborne, M. D. Sweeny, and M. B. Edwards, of St. John. It is the intention of the directors to put the road into first-class condition. An effort will also be made to extend their line to Calais, where direct communication can be had with Boston. A contract for 150,000 ties has been placed already. The steel bridges contracted for last fall by the Dominion Bridge Company, Montreal, are finished.

A Change in the Trusteeship.

Whether of a Will, Marriage Settlement or Bond Issue, is a troublesome and expensive matter.

Where private trustees are appointed such changes are inevitable.

The Trusts Company alone enjoys continuity of tenure, fixity of residence and permanent records.

Mercantile Summary

The Regina and Hudson's Bay Railway Company intend to apply to the Dominion Government for legislation extending the time for beginning and completing its railway and branches.

The Adams Bros. Manufacturing Co., Limited, Toronto, are about to take over the harness and leather goods business of J. H. and Charles Adams, in Toronto, Winnipeg, and Brandon, and carry it on with a total capital stock of $375,000.

The Montreal Park and Island Railway Company wants amendments to its charter authorizing the continuation of the work of constructing its railway and the issuing of additional bonds and preferred stock.

La Compagnie de Chemin de Fer Electrique (railway company), de Trois-Rivieres, St. Maurice, Maskinonge et Champlain, will apply at next session of the Dominion Parliament for power to construct and operate a railway from Three Rivers, Que., through Pointe du Lac, Yamachiche, Riviere du Loup, Louiseville, Maskinonge, Cap de la Madeleine, and Champlain, also to develop and convey electric power.

Mr. Frank W. Morse is to retire from the Grand Trunk Railway, with which company he holds the position of third vice-president, and has been appointed vice-president and general manager of the Grand Trunk Pacific, with headquarters at Montreal. Mr. Morse's position on the Grand Trunk will be filled by Mr. E. H. Fitzhugh, vice-president and general manager of that road's Central Vermont branch.

The authorities at London, Ont., are seriously thinking of cancelling the Pere Marquette Railway Company's lease of the London and Port Stanley line, owing to the numerous complaints of shippers as to bad service. These complaints refer not only to service on the London and Port Stanley, but to that on the entire Canadian division of the Pere Marquette. It is alleged that Christmas goods, shipped four weeks ago, had not yet (December 28th), been delivered, and were, of course, a dead loss in many instances.

George Parker, for the past three or four years in the grocery line at Sydney, N.S., has assigned, and shows liabilities to the amount of about $3,000. He was originally a farmer at Lower Stewiacke, N.S., and before going to Sydney was for several years on a milk route in Halifax, so that he had little real knowledge of his present line.——A general dealer at Cross Roads, Country Harbor, N.S., E. S. Sweet, is reported as asking a general extension of time spread over a year. Besides his store business he has been interested in a couple of gold-mining properties, besides having other irons in the fire, and his affairs have not been in comfortable shape for some years past. In the summer of 1902 he was reported as obtaining a two years' extension. His present liabilities are placed at $6,000 to $7,000.

Do You Care for Your Personal Appearance?

The man with a good bag is shown consideration that is absolutely denied to the one that carries a cheap or shabby bag. — That is why you should use a bag, made by JULIAN SALE. The longer you carry one the better it looks.

DIVIDEND NOTICE.

A Dividend of Two per cent. on the Preference Shares of this Company, for the quarter ending December 31st, 1904, has been declared, payable on JANUARY 15th, 1905, to Shareholders of record of December 31st.

The Transfer Books of the Company will be closed from January 1st to January 5th, both days inclusive.

By order of Directors.

THOS. GREEN, Cashier.

FREE INSURANCE.

The man who takes an Endowment Policy in the Manufacturers Life is practically getting free insurance.

True, he has to pay a small annual premium for 10, 15, 20 or 25 years, as he may choose, but at the end of that time he gets all his money back with good interest thereon, and his 10, 15, 20 or 25 years of insurance will have cost him nothing.

Write for rates to the Manufacturers Life, Toronto, Canada.

The Automatic Railway Signal Company, Limited, capital stock, $500,000, headquarters at Montreal, has received a charter from the Dominion Government empowering it to manufacture a railway signalling system under certain patents. H. Sauriol, of Montreal, and J. Lemire, of Drummondville, Que., are charter members.

Mercantile Summary.

La Compagnie M. Pauze & Fils, of Montreal, capital stock, $95,000, will take over the business of M. Pauze & Fils, and act as general contractors, operators of sawmills, etc.

——A tinsmith at Montmagny, Que., by the name of Noel Paquet, has arranged to pay 30 per cent. on liabilities of $2,400.——J. U. Gagnier, general merchant, at Ste. Martine, Que., who was burned out last August, and whose affairs have since been unsettled, has arranged a settlement at the rate of 50 cents on the dollar.
